This is the TDH (Terre Des Hommes) 11/28/10 press release translated regarding HIC & the Les Cayes Cholera situation:

Progression of cholera in the department South and the city of Les Cayes call for the urgent mobilization

The situation on the front of the epidemic of Cholera in the department of the South and in particular in the town of Cayes is extremely worrying. The health services are totally obsolete while the number of cases is constantly increasing and that no major medical humanitarian agency is not present in the area. The fourth city of country does not have today treatment center at the measurement of the humanitarian crisis which is increasing.

The agglomeration of Les Cayes account a global population of more than 320'000 inhabitants. The city is significantly from the size of Cap Haitien. Urban areas are densely populated areas, the populations the poorest live in the vicinity of river mouths, without any sanitation system. With its channels of evacuation open skies and the major part of the city center located flood area to, Les Cayes presents high risk of contamination (see map DINEPA).

The number of persons contaminated in the department of the South, even if it remains in absolute terms well below the number of cases recorded in Port au Prince or in the Department of Nord, is constantly increasing. Until now, in the whole of the department, 12 outbreaks of contamination , including 5 located in the city, have been identified. Official figures state of 160 cases treated, but they are largely under–evaluated.

The health authorities have been made destitute face the outbreak program and already sorely lacking the means, human and material, to face a situation which is constantly to worsen.

Located in the enclosure of the hospital, the CTU transitional has a capacity of only 25 beds. Women, men and children do not have spaces separated. Managed by staff insufficiently trained and overloaded, missing of supervision, it saves 10 15 admissions daily since a few days. It is completely saturated. The inmates of the central prison are also referred to it.

All indicators show that the epidemic will explode in the city of Cayes. It is already beginning to strike the surrounding agglomerations. There is an urgent need for mobilization of actors medical and WASH in order to build in the shortest possible time CLC to a minimum of 100 beds, dimensioned to the needs of a city of 140 000 inhabitants and thus to avoid that the situation in South is out of control. The MINISTRY lack of means and penalty to mobilize its staff.

3 Dec 2010 – Cholera in Haiti: Tdh mobilizes against the epidemic

Launched on Monday 29th November, the mobilization appeal of Terre des hommes against cholera has not remained unanswered. Three specialists from the Swiss Humanitarian Aid Unit (attached to the SDC) are a hand to our team against the epidemic since early December, together with the doctor already lent to Tdh by the University Hospitals of Geneva. Two other experts are expected to join soon.

In Les Cayes (South) the third city of Haiti, MSF Holland will assure the medical component of the Cholera Treatment Centre (CTC). Soon, the equipment needed to treat 2'000 sick people, requested to the SDC, will land on the island by cargo aircraft.

Michel Roulet, a pediatrician who has experienced several outbreaks in humanitarian contexts, said: "I had some concerns last month on the capacity to meet the new health crisis. I note today that Tdh teams react with skill and intelligence to care for the sick and to prevent communities. The CTC of Grand Goave, which includes a hundred beds, is remarkably conducted with the support of other NGOs."

Tdh collaborates with Medecins du Monde, Medecins sans Frontieres and with the Haitian Ministry of Health and Population to curb the epidemic.

The World Health Organization has revised its forecast: cholera would reach up to 400’000 people by next April with a peak expected in late December. Among those people, one in twenty could die.

11–8–10 HEAS Post from MdM:

Hello everybody,

Just to add some information about the situation in Petit Goave:

We have 15 cases in the last 8 days: 1 confirmed by laboratory and 14 by epidemiological nexus.

The 50 beds CTC will be operational in a few days, but for the moment we have a triage and treatment 7 beds unit at the Petit Goave hospital, where we are taking care of the patients who need it.

Prevention and disinfection actions in the living area's of the patients are regularly organized in coordination with other NGOs like OXFAM

Best regards,
Pino González

11–8–10 HEAS Post from Iris Knuppel (org unk):

Petit Goave next to Grand Goave has registered 12 cases in the last 7 days – 8 last week and 4 in the last 2 daysr. The cases were refered to MdM Spain – however there is not yet a CTC... however it should be build at the end of the week

CTC NEEDS (SUPPLIES, PERSONNEL, WATSAN...)

Tohoku Pacific Earthquake: Report 2 on Medical Activities on the ground (11th April)

As the Doctors of the World emotional and psychological care team helps in the relief effort, it is learning of the realities being faced by those in the evacuation centers.

––

Tohoku Pacific Earthquake: Report 1 on Medical Activities on the ground (8th April)

A team of 8 medical Doctors of the World staff made up of psychiatrists, nurses and relaxation therapy experts specializing in emotional and psychological care has been visiting refuge shelters and private homes in Ohtsuchi, Iwate Prefecture.

––

After consulting with the health authorities of Iwate Prefecture, Doctors of the World Japan has decided to launch a mental and basic healthcare project in the city of Otsuchi affected by the tsunami on March 11.
A logistician and two psychiatrists left Tokyo today to evaluate the needs in the area before starting consultations in shelters, hospitals and homes on April 4.

––

□2011.3.23□
Doctors of the World Japan has now approved relief efforts for those affected by the disaster including psychological support at evacuation shelters, in homes, in hospitals etc, as well as basic medical care.

Services offered: Counseling, Post Disaster Counseling; Medical, Services, Medical Care * (ANY/ALL Types); Mental Health Services
Campaigns: 2011 Japan Earthquake/Tsunami/Nuclear Disasters; Médecins du Monde (MdM)
