Dikini at the Adventist Hospital in Carrefour is looking for medical personnel that would ideally be able to come for a 7-day period. They are especially looking for people who have experience in OB, Peds, and NICU. Housing, showers, and three meals a day would be provided. If you want more information, contact Nick at nickpreneta @gmail.com (3-484-7495) or Brooke Beck at brooke.bbeck @gmail.com (509-3-455-6863).

They also are really looking for EMTs, paramedics, and nurses that would be able to work overnight shifts ASAP. Thanks

Note -
May also be known as Diquini Hospital

Carrefour (Haitian Creole: Kafou; pronounced: [kafu]) is a largely residential and very poor commune in the Port–au–Prince metropolitan area. The district has an estimated population of 408,000 as of 2003. It is mostly a bedroom community for those who work in central Port–au–Prince. The neighborhood is very poor and ill–serviced, however, as of recently, small–scale construction has gone on in the area along with street renovations.

Carrefour was not always a poor district outside of downtown Port–au–Prince. Before the departure of Jean–Claude Duvalier and before all the political unrest that has swallowed the country, it was a haven for tourists.

[edit] 2010 earthquake
On 12 January 2010, the a magnitude 7.0 earthquake[2] that hit Haiti caused heavy damage to residential buildings in Carrefour, with 40 to 50 per cent of buildings destroyed in the town's worst–affected areas.[3]

Carrefour and Port–au–Prince/Haiti, 21.02.2010 / APD
http://www.stanet.ch/apd/news/2496.html

Child survivors of the recent earthquake in Haiti continue to suffer from physical and psychological injuries caused by the ongoing crisis, making recovery for the nation's youngest citizens even more difficult. In response, the Adventist Development and Relief Agency (ADRA) has opened a Children's Center that is helping Haiti's children begin to heal.

Of the three million Haitians affected by the quake, more than one million are children, according to the United Nations Children's Fund (UNICEF). Due to the severity of the traumatic events they have experienced, many of these children are currently suffering from Post–Traumatic Stress Disorder (PTSD), an illness that can cripple a person's emotional and mental health, causing a wide range of problems, including depression, an inability to sleep, emotional numbing, violent behaviour, and delayed development.

"For these children who have lost so much, so quickly, they need a place where they can feel safe, and free to express the emotions they are experiencing, if they are to heal from the psychological damages that they have sustained," said Patricia Muller, Post–Traumatic Stress Program Coordinator for ADRA International.

To help these children, ADRA's Post–Trauma Recovery Children's Center, which is open five days a week, is targeting 4,000 children, or the entire population of children currently residing at the internally displaced persons camp (IDPs) located on the campus of the Adventist University of Haiti, in Carrefour. Nearly 100 volunteers are staffing the center, many of which are teachers from the local university and primary schools.

The center is divided into designated areas for the participating children, with no physical rooms due to the fear of closed spaces. One tent has been set aside for individual counselling and treatment. Participants are involved in rotating stations of various activities, including sports and recreational games, art therapy, and individual psychosocial counselling and treatment sessions, which are conducted by trained professionals.

For more information about general relief work or to donate to the Adventist Development and Relief Agency International (ADRA), visit www.adra.org

Community Based Survey: Centre d'hebergement off Beudet 61 suffers water shortages, food shortages, and various public health issues.

Location
North of Carrefour Beudet and Route Lillavois
Date
Mar 31 2010

Incident Report Description
Statistics on the IDP Camp:
Population: 902 Families quantity: 150 Children Quantity: 405 Babies quantity: 26 Pregnant women quantity: 8
Affected Houses: 100 Destroyed Houses: 10

Immediate Needs and Concerns:
1–Water shortage: drinking water is contaminated, causing vaginal infections
2–Infectious disease(sore eyes, vaginal infections, diarrhea, vomit, fever
3–Mental health: people are having difficulty communicating and are otherwise behaving oddly –– "acting a fool" in response to questions.
3–food shortages

Infrastructure:
Their is need for proper piping infrastructure for the population to water their gardens. The water pump needs to be fixed. They think they should find a way to use solar energy to make the pump work, since fuel is expensive.

Survey administered by Quartier par Quartier.

This site is listed as a 'UTC' on the MSPP/PAHO/Health Cluster list dated 11/13/10

UTC DEFINITION: Unit for the/Cholera (UTC): a health center, mobile clinic or hospital alone which has built a space to be able treat patients cholera, or in a tent or ente or in a house of the structure. THE UTC is able to make oral rehydration and intravenous use. Capacity 2–20 beds. Opening: at least during 12 hours. Staff : doctor, nurses, agent sanitation, health worker.

11/12/10 MSF article includes Choscal Hospital reference as a CTC in Cite Soleil: http://www.doctorswithoutborders.org/news/article.cfm?id=4850&cat=field–news

EXCERPT: "As is the case in other MSF health facilities, rising numbers of patients have been admitted to Choscal Hospital, a Haitian Ministry of Public Health hospital in Cité Soleil, due to acute watery diarrhea and vomiting—both of which are symptoms of cholera infection. The MSF–supported hospital has received hundreds of cases over the past five days. “Yesterday we recorded 216 separate cases of cholera arriving at the hospital, while the total number recorded just 5 days ago was 30,” said Stefano Zannini, MSF head of mission in Haiti, on Thursday. “Patients are coming from everywhere, throughout the city, slums and wealthier areas.”

Choscal Hospital in Cité Soleil: MSF intervened in this Ministry of Health hospital initially focusing on earthquake–related trauma. Currently two operating theaters are functioning for major surgery, and one for minor surgery. MSF also works in the emergency room and the maternity and pediatric wards. Medical and psychological care is also provided to victims of sexual violence. The hospital has a 100–bed capacity, all occupied and all under tents (the building has been repaired but patients are still too afraid to stay indoors). Rehabilitation works are ongoing to reduce the risks of flooding. The team has rearranged the facility into a general hospital, providing drugs to all the services and serving a population living in extremely precarious conditions. Psychological care continues for all patients and caretakers.

100 bed tent hospital
2 OR's
Has average of 2–3 violence related injuries per day.

Haiti: MSF Treats More Than 1,000 Patients; Inflatable Hospital on the Way
January 14, 2010

Doctors Without Borders/Médecins Sans Frontières (MSF) medical teams in Port–au–Prince are treating large numbers of people who suffered fractures, head injuries and other major trauma during and after the January 12 earthquake.

More than 1,000 patients have received care in the four tented facilities MSF set up near the damaged buildings in which it had been working. The primary concern at the moment is the overwhelming numbers of people who need immediate treatment and major surgery. An MSF team is beginning to work in the operating theater of a major public hospital in the capital's Cite Soleil district, while other MSF staff are trying to identify additional medical structures that remain intact.

An inflatable MSF field hospital, equipped with two operating theatres, is expected to arrive by air in the next 24 hours. Crucial personnel, including surgeons and anesthetists, and supplementary stocks of medical supplies are on the way as well.

Food, water and shelter materials are all in short supply, however. "Basic provisions were always problematic for people in Port–au–Prince but the position is far worse now," said Vincent Hoedt, one of MSF's emergency coordinators. "And obviously there's a concern for people who are already weakened by injuries. There are also shortages of things like gasoline, which affects the working of all kinds of vital equipment."

MSF has seven charter flights stocked with staff and supplies ready to travel to Port–au–Prince, but thus far, only one has been able to fly into Haiti. That flight carried 25 tons of relief material—tents, medical disaster kits, blankets, plastic sheeting, jerrycans, and hygiene and cooking sets—from an MSF facility in Panama.

While MSF is sending up to 80 additional staff members to reinforce the ongoing efforts to provide emergency care for those who need it, the organization remains concerned about our staff in Port–au–Prince. As of yet, the teams on the ground have not been able to confirm the whereabouts of all their Haitian staff.

January 13, 2010
Doctors Without Borders/Médecins Sans Frontières (MSF) teams already working on medical projects Haiti have treated hundreds of people injured in the quake and have been setting up clinics in tents to replace their own damaged medical facilities. Paul McPhun, MSF's operations manager for Haiti, described the current situation for MSF teams on the ground during a press conference on January 13.

http://www.doctorswithoutborders.org/publications/article.cfm?id=4149&cat=transcript&ref=home–center–relatedlink

Location: 18.5781° N, 72.3367° W
Department: Ouest
District: Port–Au–Prince
Commune: Cité Soleil
Category: Hospital
Comments: Status of hospital as operational confirmed in multiple sources; Cite Soleil District: MSF facility at Choscal hospital in the Cite Soleil district is open (Jan 22) approx. 18°34'39.28?N 72°20'10.41?W (Jan16). As of January 16, more than 2,000 patients have been treated so far at MSF locations, and patients are pouring in. MSF teams are doing their best in terms of administering first aid, but surgery needs are huge. Major impediments have to do with blockages at the airport, challenges to moving people and freight quickly, and damage to pre–existing facilities. http://www.doctorswithoutborders.org/photogallery/gallery.cfm?id=4161&cat=slideshow&ref=related–sidebarPrevious: Cite Militaire. Update on Wharf Jeremie:

Ok, it appears life giving force got a water system placed in the neighborhood with support to sister Marcella. The team from global dirt did their last shift last night, and did some additional training with the nurses to make sure they could handle more intensive cases of cholera. They will be keeping in touch with the sister. I understand that MSF and others are supporting the clinic with supplies, so unless otherwise notified, lets consider the clinic under control. Not sure who is the initial contact with sister marcella, but I would like to get her involved with our medical distribution program and offer her the opportunity to request medical supplies for the clinic. Not sure if she has access to internet...will set up a meeting with her when things slow down a bit here.

From: Leah Bomberger – Global Dirt
Date: November 19, 2010 9:20:56 AM EST
To: Brenda Zimmerman – GrassRoots United
Subject: Re: Need

We had a busy night no emergencies but keeping people stable. A noticeable increase in children. We inherited 30–5 patients upon arrival. Acquired 10 more in the Night. And the morning rush gave us 20 with about half in need of evaluation and the other needing immediate iv serum.

We ran out of beds or only ever had one open at time.

Supplies:

Iv or oral doxcy or ciprofloxacin
Massive bucket / aka 10 thousand gallon tank – metal would be ideal because could burn in it. All of their containers are full!

Think that's all for now. We have a great relationship going with the nuns. They seriously want us to stay forever. I would forever recommend working with them.

Leah + DIRT

From: Leah Bomberger – Global Dirt
Date: November 18, 2010 8:27:03 AM EST
To: brenda – grassrootsunited
Subject: Good morning

Brenda,

We had a slower night with around 40 patients. We had our first infant that was critical and dealt with many of the same kids that we treated the day before coming back in a declined state. We are evaluating how we can do better education with discharge to make sure thy are still drinking.

MSF came back with three nurses this morning. An Italian doctor is covering the afternoon and we are taking the night shift.

Supplies:

Butterflies
Heavy duty trash bags
Cleaning gloves for waste disposal workers
24 Gage iv catheters yellow

11/16/10:

PLEASE DO NOT BE CONFUSED BY COMMUNICATIONS INDICATING THAT THIS SITE HAS ALL THE SUPPLIES THEY NEED – MOST DELIVERED ARE SHORT TERM & THEY ARE STILL VERY OVERWHELMED AND NEED LONGER TERM SOLUTIONS & A REGULAR FLOW OF INCOMING SUPPLIES/VOLUNTEERS & SUPPORT. THIS SITE IS VERY IMPORTANT TO THIS COMMUNITY AS SISTER IN CHARGE HAS A STRONG ELEMENT OF TRUST DEVELOPED SO THAT THOSE THAT ARE WARY OF TREATMENT WILL COME IN.

UPDATE FROM GRASSROOTS UNITED (PORTIONS PARAPHRASED):

Sending a team out to recon today and establish security for clinic and have 4 to work night shift – assuming they can feel "reasonably" safe.

As per supplies, we have a bit more in stock but not enough to support the clinic for any length of time.

IF MSG IS SUPPORTING THE CLINIC PLEASE HAVE THEM DO A SUPPLY DROP.

I can confidently say they need:

LR solution
22 Gage and smaller iv caths
Tubing
ORS
Chux
Buckets
Bleach
Mops
Gloves– especially size large xl

Additional concern is biohazard mangement. We sent surgical grade cleanser yesterday, but worried about general waste management and handling of fatalities.

Of course, our ultimate goal is to save lives, however, we have a responsibility to the teams to provide as much safety and security as possible – concerned that if they are not well supplied and run out of meds overnight that the situation could turn....

Brenda Zimmerman – GrassRoots United

11/15/10 10:17 AM PDT:

Wharf Jeremie is receiving/has received cholera medical supplies, generator, solar lights, water & support from GrassRoots United, PADF, St Damien Hospital, JP HRO, team from Canada & more. Remaining need is being coordinated off–list.

J/P HRO is also donating a generator.

AMY KING

11/14/10 HEAS POST FROM AMY KING/JEFF KERZNER:

"Just spoke with Sister Marciella.....the Wharf Jeremie clinic has received about 80 new cases today 30 of them serious. Totally overwhelmed with no support from the local mayor (who has no resources or expertise to deal with this, though the Ministry of Public Health has said it's his responsibility), Sister said Medecins san Frontiers left the clinic yesterday at 1 PM. I'm looking into getting them a few pallets of ringer solution and a bunch
of solar powered lights." –Jeff Kerzner PADF

"I'm here now in the near dark waiting for a generator and supplies. Now waiting for Fr Rick. A few are very close to death." –Lisa McFadin

Brenda/GrassRoots United, please message me off–list at rolak...@hotmail.com so we can coordinate supply exchange!

THANK YOU ALL!
AMY

11/14/10 Facebook message from Amy King:

I just spoke with Lisa & connected her to Fr/Dr Rick Frechette.

1) the critical kids & adults are being CURRENTLY loaded into tap–tap & are being driven TO Fr/DR Rick at St Damien Children's Hospital in Tabarre....he has a large UNICEF tent ...set up & will begin treatment immediately

2) Lisa is getting supplies FROM Fr/Dr Rick to take back to Sister at Wharf Jeremie for the non–critical pts

3) Life Giving Force is on site to address water needs!

11/14/10 Facebook message from Lisa McFadin:

Just in from Lisa.... "Life Giving Force on the ground now at Wharf Jeremie and we are brainstorming how we can get the filtration system in place asap. We need funding to bring down additional systems. Right now, we need a generator, pumps, diesel to meet this immediate need."

11/14/10 Facebook message from Lisa McFadin/Amy King:

Cite Soleil hospital is sending pts to this clinic & it is in distress!
There is only "1 American doctor"
Many children are sick, the little one in this photo "is dying" has "worms in vomit"

NEED: water, IVs for children, gloves, GENERATOR (have NO lights)
BOTH Lisa & Sister are ON–SITE now – call to confirm needs

I have already just forwarded this to GrassRoots United, MMRC, MTI, IMC, MOSCTHA, GlobalDIRT, Operation Blessing, CAN–DO, Open Hands, HERnow, Samaritan's Purse, MSF, JP HRO, CAMEJO, General Hospital, St Damien

I will keep you all posted! & all of you please do likewise until this need is met!

AMY
rolaking@hotmail.com

From Lisa McFadin – J/P HRO Volunteer on the ground 11/11/10:

"Quote from the ground about Cholera situation "I heard from Wharf Jeremie that there are now so many cases that they can't receive them all, and there are dead bodies now in the streets".

We need help in Cite Soleil.

Education, Prevention and Clean Water. The CTC is very short staffed, need help ASAP."

11/11/10 LTel: Lisa is working on getting contacts and supply needs list – should have by 11/12/10

from wikipedia

Cité Soleil (Kreyol: Site Soley, English: Sun City) is a very densely populated commune located in the Port–au–Prince metropolitan area in Haiti. It has development as a shanty town. Most of its estimated 200,000 to 300,000 residents live in extreme poverty.[1] The area is generally regarded as one of the poorest, roughest, and most dangerous areas of the Western Hemisphere's poorest country; it is one of the biggest slums in the Northern Hemisphere. There is little police presence, no sewers, no stores, and little to no electricity.[2]

The neighborhood, originally designed to house manual laborers for a local Export Processing Zone (EPZ), quickly became home to squatters from around the countryside looking for work in the newly constructed factories. After a 1991 coup d'état deposed President Jean–Bertrand Aristide, a boycott of Haitian products closed the EPZ. Cité Soleil was soon thrust into extreme poverty and persistent unemployment, with high rates of illiteracy.[2]

Armed gangs roam the streets. Murder, rape, kidnapping, looting, and shootings are common as every few blocks is controlled by one of more than 30 armed factions.[3]

On January 12, 2010, at 21:53 UTC, (4:53 pm local time) Haiti was struck by a magnitude–7.0 earthquake, the country's most severe earthquake in over 200 years.[22] The epicenter of the quake was just outside the Haitian capital Port–au–Prince.[23] As the biggest slum of Port–au–Prince, Cité Soleil fared relatively well, as most of its cinder block and corrugated steel shacks survived, and Médecins Sans Frontières reopened its Choscal Hospital located in the heart of the slum, operated between 2005 and 2007 during the gang war, within 24 hours.[24] However, the area remains in desperate need of help, according to World Emergency Relief.[25]

Gang members who escaped from Haiti's damaged prison are settling back into their criminal ways in Cité Soleil. Crime is rising, and police urged citizens to take matters into their own hands.[26]

Lamp for Haiti – 2010 Haiti Earthquake

Medical Facility · Open

Medical Clinic
MAIL ADDRESS: P.O. Box 39703, Philadelphia, Pennsylvania 19106, Cite Soleil
Phone (267) 295–2822
Web www.LampForHaiti.org
Service Temporary

FROM THE WEBSITE:

January 12, 2010
A devastating 7.0 magnitude earthquake struck Port–Au–Prince this afternoon. Land line and mobile phone communications have been cut off in the capital, so we have no word yet from our clinic staff. There are no live radio broadcasts coming from the country.

It was the largest earthquake to hit the impoverished country, since 1984. The vibrations lasted for more than a minute and were felt as far away as Cuba. After shocks have been coming on a regular basis.Widespread damage and countless casualties are very likely in Cite Soleil. "The headquarters of the United Nations Stabilization Mission in Haiti has been destroyed in large part. There are numerous people underneath the rubble, both dead and injured," a local employee of the UN force told Agence France–Presse. This building is less than 2 miles from the Lamp Clinic.

The Lamp is responding, rushing emergency supplies to children and families most in need. I will be traveling to Haiti on Sunday January 17.

Your help is urgently needed. Your generous gift today will help provide emergency food and family survival kits. In addition to immediate life–saving aid, your gift will also provide for the long–term needs of children and families, rebuilding our clinic, if necessary, and restoring hope as we always do.

Thank you for your support through this crisis and everyday as we walk along with the poor in Haiti.

Desiree Wayne
Executive Director

How You Can Help
"The LAMP for Haiti" has built, staffed and maintains a free medical clinic in one of the most impoverished areas of Haiti. Our continued success depends on donations from individuals like you. We need your help!

We accept donations by Mail:
LAMP for Haiti Foundation
P.O. Box 39703
Philadelphia, PA 19106

You can also donate on their website online

NCA wash has done training of trainers in building latrines and has together with MOFECS finished 30 latrines this week. The total finished is 60 latrines in Place Fierté, 32 in Parc Sportif and 30 in Rue Germain. The planned latrine building in Site Soleil is not finished. It now plans to build showers in the three camps. Hygiene training of 100 children has been carried out in Place Fierté with focus on the use of latrines.

Incident Report Description
3/28/2010

IDP camp of 250 families in Pois Congo in Cite Soleil has not received any assistance. There is an urgent need for tents as people are living under cloth sheets and without protection from the rain. Also needed are food, potable water, toilets, and access to medicine. The community association responsible for this camp is APDPC, but have limited resources to service the camp. Cholera Outbreak: Update

Over 250 people have died in Haiti as a result of the Cholera outbreak. 3,000 people have now been diagnosed with the disease, including five in the capital, Port–au–Prince.

Cholera can spread when people drink water that has been contaminated by someone who has already contracted the disease. To help combat the spread of Cholera, Islamic Relief is continuing to supply clean water to residents of Yasin camp in Barriere Fer. 4,000 litres of clean drinking water is being distributed on a daily basis. 4,000 litres of clean water for washing is also being distributed.

Four water tankers have been set–up, two for drinking and two for washing and each is clearly marked and separated from the others.

Over the next few days and weeks, Islamic Relief will be conducting training on good hygiene practices and distributing hygiene kits to all residents of the three camps in Port–au–Prince in which IR works, Parc Sainte Claire, Yasin and Accra Nord.

Services offered: * KITS, HYGIENE KITS; Medical, Education, Cholera Awareness / Prevention; Medical, Education, Hygiene Health, Awareness; Shelter, IDP Camp (Internally Displaced Persons Camp); Shelter, Management, IDP (Internally Displaced Persons) Camp Management; Water, Tanker
Campaigns: 2010 /2011 Haiti Cholera Epidemic; 2010 Haiti Earthquake; Islamic Relief

Yesterday, 1st & Alton delivered 72,000 doses of antibiotics and medical supplies to Haiti (courtesy of Shady Grove Adventist Hospital in Maryland). Please continue to support 1st & Alton as we support those in need in Haiti !!

FROM THE CIVIL SOCIETIES ORGANIZATION SITE:

Contact Name in Haiti: Albert Gomez
Phone: 3600–7851
Email: albert @1standalton.com

Year founded: 12th January 2010

Areas of Activity: Advocacy & Policy, Agriculture, Disaster Risk Preparedness, Economic Development, Education, Environment, Food Security, Health, Housing, Humanitarian Assistance, Media, Microfinance, Other, Water & Sanitation, Women's Programs

Organization Details :

Grass–roots organization focused on multi–tiered objectives of immediate response, sustainable aid, and long term redevelopment of Haiti and beyond. We are currently focused on IDP assessment, and flash aid support. We are concurrently building a rehabilitation network of prosthetics clinics and training facilities, along with supporting in the development of resillience center communities, with sustainable resiliant shelters, agra–business options, along with schooling outreach programs. To date, we have supported Haiti by supplying, distributing, and delivering Food, Water, Medical Equipment and Supplies, Shelter, Hygiene, Physicians, Surgeons, RN's and EMT's. We have supported in the construction of several temporary clinics, hosptials, and schools. We have also been instrumental in supporting safe and transparent orphan transport into the US, with the support of our corporate aviation partnerships, Haitian Immigration, and DOS/USCIS/HHS/DHS.We look forward to future initiatives with our new partners on the ground JPHRO.

FROM THE SITE:

We are mobilizing a rehabilitation center in Port Au Prince, offering pediatric amputees a safe, nurturing and therapeutic environment to cope with lost limbs

Prosthetic components are generally not reused in the United States because of legal considerations. However, used prosthetic limbs may be disassembled and the components reused to make new ones for children and adults who suffered amputations after the Earthquake.
1St & Alton provide peer support and aid to those who have lost one or more limbs either through traumatic or surgical amputation. Our mission is to restore mobility and independence to disadvantaged amputees by providing the best available practical solutions for prosthetic care and rehabilitation.

Spoke to Rev. John D. Hearn 3/29/10: Leaves for Haiti 3/30/10 & returns 4/2/10 – Will call me back with more detailed and specific assessment of needs. A medical team visited back in Jan. & Feb. Currently 225 children (they have taken in many additional kids they are caring for since the quake). Structural Engineers have cleared the main dorm as safe but all residents of this site including the kids are still sleeping outdoors due to the fear factor. I encouraged Rev. Hearn (he is registered with the clusters) to attend cluster meetings and seek out Psychosocial assistance to counsel the caregivers and children before the Monsoon season starts to get them inside.

Michael Andrew/Visited 2/4/10: They have 50+ kids, had some help – need a long term solution

FROM THE EARTHQUAKE BLOG ON THE SITE:

1/22/10:

Supplies Dangerously Low!
Garden City church group provides water, food to quake victims
Catherine Jun / The Detroit News

Port–au–Prince, Haiti — With so many hungry for food and water, a missionary school backed by a Garden City church has become a lifeline for hundreds of Haitians who have nothing and no place to go.

The stone courtyard has become home to as many as 200 people from the Delmas 33 section of Port–au–Prince.

They were displaced by last week's earthquake, their homes reduced to rubble or too damaged to inhabit.

Herbert Studstill, a volunteer from Romulus who flew to the mission before the earthquake, a bricklayer by trade, has become an expert in rationing. He said that the neighborhood has not seen much food from international relief missions.

He has been shaken by the immensity of it all.

"I've seen more people dead than I've seen on TV in my life," he said. "I don't think I can ever switch back to my normal."

He's among a small group of Michigan residents who are in Haiti helping this school, 1,700 miles from Metro Detroit. They are there helping to feed, clothe and comfort hundreds of people who now count on the school for their very existence.

As many as 200,000 are believed to have died in the massive earthquake that struck Haiti on Jan 12. Thousands more are in need of medical care, food and water.

A six–person mission led by the Rev. John Hearn of Christian Faith Ministries of Garden City arrived Wednesday with supplies and thousands of dollars, but it still is not enough.

On Thursday, Hearn managed to secure bottles of water and food from American aid agencies. That was gained with the help of a staffer from the office of U.S. Rep. John Conyers Jr., D–Detroit, who is part of the mission. But that food and water is expected to only last a few days.

Nigel Snoad of the United Nations Disaster Assessment & Coordination team told the delegation on Thursday that relief aid would soon be distributed on a larger scale.

Meanwhile back in Michigan, Hearn's church is organizing a drive to collect items for the Caring and Sharing Mission that they've supported for decades.

Soon, they hope to send back a cargo plane of supplies: rice and beans, baby formula, air mattresses, clothing and shoes for men, women and children.

"That's imperative to get those items down," Hearn said.

Nowhere else to go
Myriam Moise, 23, has slept two nights under a tent at the mission, along with her 2–month–old baby and nephews. She has nowhere else to go.

The quake left several rooms of her three–level home in Delmar 33 exposed. Her husband sleeps outside the door of the house to scare away thieves, she said.

"We don't know where else to go," Moise said about why she came to the mission.

Moise said she hasn't thought about what they will do next week, or next month. She is concerned only with today.

"We're waiting. We're waiting on God to do something."

Life inside the compound is a microcosm of life outside. Those who survived the devastating earthquake last week struggle to endure with very little.

On Thursday morning, shelves were nearly bare and some were empty. All that was left to feed the hundreds that flock to the mission were three bags of rice, and bags of pinto beans and burgher wheat.

With gas scarce, cooking on the stove is unwise. Families are fed from a large iron pot cooked over hot coals in the center of the courtyard.

Each morning, neighbors trickle into the compound to fetch water from the mission's well.

Too many hands drawing up the bucket could contaminate the entire pool, said Yonel Ismael, the mission's director. In recent days, he has assigned just a few of the boys from the school to do the task.

"If they want to eat, we feed them," volunteer Studstill said.

Outside the compound and down the road is a grassy expanse. Once used for soccer games, its fenced grounds are now overrun with makeshift tents, made of rope, plastic sheeting and bed sheets stretched from trees.

It is home to thousands of displaced Haitians.

Monley Kevins is 5 years old. His naked body was pulled from the wreckage of his home Wednesday. He was alive. His mother and father, found earlier, were dead.

That night, Monley slept beside his grandfather on a dusty mattress, shielded from the nighttime chill by a blanket.

His uncle, Gary Elyssee, is the one who found the child after days of relentless digging. He was ecstatic to find the boy, Elyssee said, but now he must feed and care for him.

“I still don’t know what I’m going to do,” Elyssee said in French.

A family atmosphere
Perhaps one of the deepest comforts, some said, comes from the prayers and family atmosphere at the mission.

“They have done a lot for me,” said 19–year–old Donna Jusce, who was raised at the mission since the age of 9.

“I can’t be scared because if I die, I know where I am going,” he said, while emphasizing his faith and how it has grown at the mission. Jusce now is a volunteer.

“I like looking out for people,” he said.

After nightfall, Hearn gathered many in the courtyard for prayers: “Please know even in what you’ve been through, God has not forsaken you.

We work with people and serve families in the poorest communities in Africa and the Caribbean. We Make differences in lives of people by:

–Helping people re–build their lives
–Providing shelters with dignity
–Addressing the Public Health dilemmas in developing countries
–Acclimating new immigrants through cultural orientation and integration
–Bridging the gap by providing economic opportunity
–Delivering emergency Aid to survivors of wars and natural disasters

In Haiti, IEDA Relief is a camp management agency of 14 Internally Displaced Peoples (IDPs) sites in Port–au–Prince, Leogane, Grand and Petit Goave. In partnership with UNICEF HAITI, IEDA Relief is working with children affected by the Earth Quake providing psychosocial support and protection commonly called the Child Friendly Spaces in three sites of AUTOMECA, BOULOS and TERRAIN PERE SOLINO.The Cineas site with a total populationof over 18,000 in Delmas 33 by the Mayor's office is our next CFS site. Currently, we are assisting over 125,000 peoples in 14 sites and surrounding communities.

FORCE D'ENTRAIDE ET DE DEVELOPPEMENT INTEGRE – 2010 Haiti Earthquake (Volunteer Ops in Haiti – Short/Long Term)

Volunteer Camp · Open

Faith–Based, International Social Services
Cp 30146; Delmas, HT 6020; Haiti, Delmas, 6020

Phone 3860–1934
Web www.volunteerabroad.com/listingsp3.cfm/listing/68086
Serves Haiti
Service Temporary

Cp 30146
Delmas, HT 6020
Haiti
Phone: 3860–1934

Volunteer location: Port–au–Prince

Durations of Program: 1–2 weeks, 2–4 weeks, 5–8 weeks, 9–12 weeks and 3–6 months
Typical Duration of Program: 1–2 weeks

Description: Short–term voluntary projects (workcamps) focusing on :
* charity work with orphans and children from underprivileged and disadvantaged background
* environmental protection
* social services including recreation and care programs for children, elderly and people with special needs
* restoration and conservation work
* any other volunteer actions with social impact

Highlights: FEDI–Haiti understands the importance of service to the poor, and we want to help those who have been led to contribute their time and talents. If you have a strong interest in volunteering to help the poor overseas, volunteer with us in Haiti.

Qualifications: There is a wide variety of different international volunteer short term projects. They include mainly one of the following types of activities:

* work with orphans and other socially disadvantaged children
* Teaching English, Work in a medical or dental clinic, ecology, gardening and forestry
* renovation and restoration of social, cultural, historic sites
* Sustainable development (rural clinics, schools and home for the disadvantaged)

Choose a volunteer project according to your interests, skills and area in which you wish to contribute.

In each short term project the charity work activities' duration is up to 8 hours a day, five days a week. This work is voluntary. No special skills, experience or knowledge are needed. The activities carried out are always respective of each participant's physical abilities. Don't be afraid to try doing something different, something which you haven't experienced before. Technical leaders in each project lead the working process and constantly monitor the safety of volunteers. The common work is foreseen as a way for getting better understanding, building friendship and also as a good example of awareness of the problems.

Languages :

English

(Provides assistance on a recurring basis – Sow A Seed)

LTEL 2/11/10: Notified by email from Laura Katz–Parentau that Direct Relief International is taking someone from the hospital to their warehouse to pick up needed medical supplies on 2/12/10.

(Will not change urgency level until this has been confirmed)

2/10/10 Email from Michelle Crombie at ACTS World Relief: Needs list received and will "go see in a couple days".

Paula Thybulle
Founder/Director
011–509–3–454–4829

Najlah Thybulle (Stateside/W. Palm Beach, FL)
305–735–3553

2/8/10: Spoke to Najlah Thybulle stateside. The 4 pallets with medical supplies that are in FL still have not been shipped and the shipper has not provided a new invoice/price to get it to Haiti.

"The neighborhood is becoming more and more unsafe for the children. We were able to purchase some food/water on the black market but we cannot afford to continue doing that at this point".

Food/water/shelter has NOT arrived to serve this facility for 275 people (including 67 orphaned girls) from any NGO's on the ground.

CAT has not been able to secure any short term medical supplies solutions that will tide them over till these stateside supplies can reach them.

LTel 2/4/10: Spoke at length with Najlah Thybulle. Status/needs assessment is as follows:

STATUS:

–25 bed hospital on site – Currently treating/doing surgeries for 200 patients
–Orphanage/Hospital is not completely destroyed – Lots of cracks – No structural engineer assessment – Not safe to sleep in buildings
–Children are sleeping outside in the open
–Hospital patients being treated outdoors
–Help with water pump/filtration system is critically needed
–They have armed guarded security on site

ORPHANAGE:

–Orphan populace is all girls ages 2–22 yrs. old
–70+ children/orphans
–10–12 workers on site

CRITICAL CURRENT NEEDS:

RICE
BEANS
COOKING OIL
NON–PERISHABLE FOODS/MRE'S, ETC.
WATER
JUICE
CANNED MEAT
SNACKS
12 – 10 MAN TENTS
BABY FORMULA (for the hospital)
DIAPERS (TODDLER SIZES – AGES 2–3)

MEDICAL SUPPLIES INCLUDING:

ANTBIOTICS
ANESTHESIA
NOVACAINE
PAIN KILLERS
BANDAGES
WOUND CARE BANDAGES

This site has received no aid/supplies. They currently have 9 pallets of Medical Supplies at a warehouse in Miami and need approximately $3–$4000 to get it shipped for the hospital. Currently, the shipper is modifying the invoice to see what the cost of getting at least 3 pallets over would cost so they can at least keep the hospital running for 1 month. The goal is to get all 9 pallets over so they can distribute aid to other medical facilities in critical need. This may take weeks, so on the ground aid is URGENTLY needed for their current immediate needs.

You can donate URGENTLY NEEDED funds through their supporting sponsor (Holy Name of Mary Food Fund at:

2/5/10 phone call from Lori Rennick/Stateside contact thanking Michael and the Citizen Action Team for helping get many supplies delivered in the last week:

One delivery from UNICEF – Unsure of specifics supplies and date delivered and how much but it was "baby stuff"

1/30: 'Quisqueya in Action' – delivered 7 large boxes that included – Blankets/T–Shirts/Towels – 76 gallons of Culligan Water & 76 Hygiene Kits – 100 pair of shoes/sandals / 2 – 12 man capacity tents – 10 small bags of rice (50 lbs.) – They are distributing the leftovers to the community

15 stateside volunteers are scheduled to arrive at this site with supplies on 3/2/10. It is there intention to set up a small medical clinic on the compound and they need TWO MEDICAL TENTS.

2/4/10: Visit from Michael Andrew today – "Just made a delivery to Greater Works for Girls Home– mostly baby food and diapers and some clothes which they needed. UNICEF has also come by with baby supplies but nothing else that they need"

1/29/10 LTel – Spoke to Lori Rennick, Stateside contact for this site:

–Emmanuel Merisier, Director is onsite at this orphanage – he is actively reaching out to and helping the surrounding community and open to being more helpful if supplies are provided

–Feeding a total of 75 people daily (including children/community)
–Sheltering a total of 150 people daily (including children/community)
–Lost 2 big water holding tanks – URGENT NEED to replace tanks – no ability to do laundry or bathe
–Water bottles URGENTLY needed
–Tents URGENTLY needed
–Front wall needs rebuilding URGENTLY for security reasons
–They have a generator
–Money was wired recently from stateside mission & they have gas to get supplies & bank is open – supplies are hard to come by though even with cash
–Unicef never delivered supplies
–3 story bldg. collapsed on site
–Hasn't felt aftershocks for two days per older child that emailed this morning – this is helping with the trauma effect
–Missionaries from stateside that have been sponsoring this orphanage will be arriving with supplies and volunteers 3/1/10

All needs are "VERY URGENT" but the #1 items are:

BOTTLED WATER
WATER TANKS (2)
TENTS
BLANKETS

Jan. 24th, 2010 – Michael Andrew visited today – ran into the Orphanage and found that they have over 45 kids and have had no contact. They need water, food, tents, blankets and basic meds. They are in a secure location.

Tel: (509) 246–1701
Dir.: Emmanuel

See the website for donation details for food/water/supplies and rebuilding.

SAS: Code pink
(Provides assistance on a recurring basis – Sow A Seed)

3/15/10 LTel:

Sow A Seed visited this site on Sat. 3/13/10 and delivered crackers (they had plenty of food), a water filtration system and provided a medic that sutured one childs head wound and determined one child needed medical attention for a scalp condition.

On Sun. 3/14/10 a team from COOPI visited this site and this is the email update:

Hi Leslie
We went to visit the orphanage yesterday and we think you have a good facility and staff but we had the impression that the staff could benefit from some training in contingency planning for the children and also some external help like regular medical checks, ensuring a balanced diet for each age group and some structured play–learning activity .
Please let me know because the general agreement here is that thing could get much worse once the rain start and so many people still in camps without proper shelter all over PaP.
We are already doing similar activities in Lima Peru were I am usually based.

3/15/10 Email update from OXFAM:

My team visited this location today. The situation did not appear as dire as suggested in the email. While the building has not sustained any structural damage (not even superficial cracks) the director has insisted on the children sleeping outside at night, resulting in water damage to mattresses.

Oxfam Quebec will:
–Provide 20 mattresses for the childeren, on the condition that they are used inside
–Provide Aquatabs (or equivalent) to allow the cistern water to be used for drinking. We will advise staff on correct use.
–Arrange for a Haitian social worker to speak with the director, staff and children to identify other needs
–Provide some food, in the form of a limited quantity of household food kits

We will also try to arrange for a structural engineer to assure the director that the building is safe, and that the childeren do not have to sleep outside.

3/12/10 LTel: Urgent message from Lucie Jaboin – No aid has come to the orphanage yet from Sow A Seed. 5 children taken to the hospital due to illness (likely a result of no clean water) and it's costing $2000 Haitian currency. This is money this facility does not have and they still have BASIC URGENT CRITICAL SUPPLY NEEDS. In addition to the below list of needs, they now need:

FOOD
EMERGENCY HEALTH CARE
MEDICINES

LTEL 3/10/10: Spoke to Lucie Jaboin, Dir. of the Orphanage. An org promised two large tents three weeks ago and hasn't come back since. They measured the area even. They just received food recently.

CURRENT URGENT NEEDS:

WATER FILTRATION SYSTEM
GENERATOR
2 LARGE TENTS (Still sleeping outdoors exposed)
STRUCTURAL ENGINEER TO EVALUATE SAFETY OF BUILDING
ANTIOBIOTICS (kids)
VITAMINS
OTC MEDS (kids)

Provided needs/addr to Sow A Seed for assessment by email 3/10/10. Lucie is going to follow up when she finds the name of the org that promised the tents so there is not duplication. They may still show up with them.

(LTEL) UPDATED 2/11/10 – Spoke to Stateside Director/Charlucie Jaboin:

NOTE: UNICEF came by and delivered Clothing/Water approximately 2 weeks ago. No one has provided food or shelter for these children (sleeping outdoors) to date since the quake and no one from UNICEF said they'd be back with their urgent needs. Money has been wired to the Director but food on the black market is very expensive and this small orphanage doesn't have a lot of monetary support. The age range of children (all girls) is 3–10 yrs. old.

Urgent Needs:

FOOD (Beans/Rice/Pasta/Cooking Oil/Spaghetti Sauce/Canned Meat)
POWDERED MILK
JUICE
WATER
WATER PURIFICATION SUPPLIES/EQUIPMENT (so they can be self sufficient)
TENTS (For 20 girls & their caregivers - sleeping outside - not sure if structure is safe

MEDICAL NEEDS:

Some children have Malnutrition/Sickle Cell/A disease worse than Wig Worm on scalps that requires treatment of antibiotics. The children have not been examined by a physician since the quake.

ANTIBIOTICS
OTC Medicines (cough syrup/anti-diarreal/Motrin, etc.)
Chewable Childrens Multi-Vitamins

OTHER:

A Structural Engineer is needed to evaluate whether the house is safe

"Jan. 25th, 2010 Michael visited and stated. 20 kids, no aid- no support- UN came by 2 days after quake, no other contact since

http://www.rmof.org/earthquake.html

January 15, 2pm

We have just received word from the staff members of the orphanage, the children and staff members are safe. The staff members of the orphanage urge for food, water and medical attention for the children. Though they are safe the air is polluted with the stench of three day old decaying bodies laying in the street. Dust is building up making the air harder to breathe and harder for respiration. The kids are surrounded by all kinds of dangerous elements we need your help to give the kids a better chance to survive this disasterous time.

We are working on ways to make the site more interactive for those who are following our posts. There will soon be a platform to leave comments; we ask if you can spread word of the orphanage by posting a link on other websites that would be a great help to our cause. We have a cause page on facebook and we're accepting all friend request, we encourage vistors to leave comments with ideas on how to make a better impact. Continue to use the contact form on our website to find out information on adopting or sponsoring a child. Please continue to send your prayers and gifts of love, care and hope. Haiti has faith!

January 14, 7pm

After countless attempts to find information about the condition of the orphanage we finally made some progress. We managed to get in contact with the owner of the house next door. She stated that her house was still intact and the orphanage still stands. We also spoke to the owner of the orphanage house and she also confirmed that the house is in good condition. No word yet from any of the staff members within, nor have we heard any news about the children. We are trying our best to get as much information about the condition and the where abouts of the staff and children.

Our search for aid in this matter is extremely urgent and we ask for any and every hand that can help. Please continue to donate, we appreciate all the efforts so far to help us in the tragic time. We urge all people to help with food, clothes and monetary goods; all these and prayers can not be done in excess. The orphanage officials are working diligently to find more direct information about the children.

January 13, 12pm

The orphanage is located in the Port-au-Prince area in Delmas not far from the earthquake. We are trying our best to get in contact with our directors at the orphanage. We can only pray that all the kids, teachers and directors are safe, but please aid in praying and in monetary aid through relief organizations. On the site we have ways to donate to the orphanage and we are shifting the donations that we receive to help in all areas of the earthquake relief. Please find a way to reach out and help us save lives of our families, friends, love ones and those we do not know. You can help in may ways please lend a hand, a voice and your heart.

From: Antoine Langeard
Subject: Clinic Medicare–Delmas 33–Prepare CTC
To: haiti–epidemic–advisory–system@googlegroups.com
Date: Monday, November 22, 2010, 7:19 AM

We are working with a clinic that is located in the middle of Area Citron between Delmas 33 and Delmas 31 in Port au Prince.

It is an area of high cholera risk as there are 17,000 people living in very poor conditions around and there are at least 5 camps in the near distance hosting around 5000 people.

We would like to equip the clinic as a CTC as once the epidemy would start there it will be very difficult to respond efficiently. The clinic is currently receiving 30 to 40 patients a day and 80% of them is Typhoid fever which is related to contaminated water.

This indicator reflects the hygiene conditions of the area.

We have a pick up truck to get any supplies. The clinic currently has 4 nurses, 2 doctors. We would need everything to open a CTC for 20 people.

Please contact Dr Frisnel at 34 27 69 20 for more information.

We need supplies? any information will be most useful

Haiti Response: ADRA Ramps Up Medical Assistance
Saturday, January 23, 2010

SILVER SPRING, Md. —A shortage of medical attention, medicines, and supplies remains a major challenge in earthquake devastated Port–au–Prince, eleven days after more than 111,000 died and thousands others were injured in one of the worst catastrophes in modern times, reported the Adventist Development and Relief Agency (ADRA).

According to ADRA staff coordinating the agency's response in the Haitian capital, medical facilities are still in need of medical supplies, specifically surgical tools, such as sterilization equipment, bone saws, and disposable medical supplies that include gloves, bandages, and masks.

"In the last several days the facilities have been overwhelmed by the sheer number of injured survivors," said an ADRA staff member in Haiti.

On Tuesday, January 19, ADRA conducted a medical supply assessment of the 71–bed Adventist Hospital of Haiti located in the Carrefour neighborhood of Port–au–Prince, and sent a request to Orlando–based Florida Hospital for a shipment to replenish critically low supplies.

"Florida Hospital was devastated to hear of the earthquake in Haiti and horrified to see the images that came out of that country," said Lars Houmann, Florida Hospital president and chief executive officer. "As is our nature as caregivers, many in our organization were eager to spring into action."

In less than two days, Florida Hospital, working with ADRA, airlifted $71,000 worth of medical supplies aboard a chartered Boeing 727 aircraft that landed in Port–au–Prince Thursday morning, January 21. The supplies, which will be delivered in the next two days with the support of U.N. personnel, include 23 palettes containing 10,000 bags of IV solution, IV lines, antibiotics, analgesics, masks, gloves, surgical instruments, orthopedic surgical supplies, bandages, soap, personal hygiene items, and other supplies. This donation will support the Adventist Hospital of Haiti where thousands of people have flocked for treatment since the disaster.

These medical supplies could not have come at a more crucial time," said John Torres, who has been working as the liaison between the Adventist Hospital of Haiti and ADRA's emergency response team in Port–au–Prince. "Medical supplies are being used as quickly as they arrive."

Gustavo Vilorio, a Mexican surgeon who has been performing more than 20 surgeries a day since he arrived in Port–au–Prince last Monday, also added that the supplies provided by Florida Hospital will satisfy some of the "most pressing" surgical needs of the affected population.

Florida Hospital, which operates a group of private hospitals in central Florida and is nationally recognized for its institutes of cancer, cardiology, diabetes, orthopedics, and neuroscience, will be working with ADRA to facilitate further shipments of supplies to Haiti.

Thursday's airlift also carried 40 pallets donated by Harvest Time International, based in Sanford, Florida, aid that included tarps, heavy plastic sheeting, water, hygiene items, generators, baby and medical supplies.

ADRA is also partnering with Florida Emergency Physicians, an independently owned group that provides emergency medical care for patients of Florida Hospital in the Greater Orlando area, who contributed $25,000 to support ADRA's ongoing response efforts in Haiti.

"We are thankful for the great support of Florida Hospital, Harvest Time International and Florida Emergency Physicians as we continue our relief efforts in Haiti," said Charles Sandefur, president of ADRA International who arrived in Port–au–Prince this week. "We look forward to continuing these partnerships, as they are a critical part of our work to provide hope and healing to thousands of people in Haiti who have been touched by this disaster."

ADRA Feeds Thousands in Haiti
Source: Adventist Development and Relief Agency International (ADRA)

Date: 21 Jan 2010

Wahroonga, New South Wales — The Adventist Development and Relief Agency (ADRA) distributed nearly 13,000 rations of high–energy nutritional biscuits donated by the United Nations World Food Programme (WFP) in several sites in Port–au–Prince, Haiti, on January 18. Each ration can feed a person for five days.

"Thousands of people remain in makeshift camps where the food and sanitation situation is precarious," said Richard Jaqua, a staff member who is helping to coordinate the logistics for ADRA's emergency response. He reported that the distribution of food is crucial as supplies in the capital's stores and marketplaces have become limited and extremely expensive.

ADRA also continues to provide urgent water supplies and medical care to approximately 25,000 internally displaced people who have sought refuge at the grounds of the Haiti Adventist University and the Adventist Hospital of Haiti.

ADRA, in partnership with Global Medic, has already established several clean water access points at the site, with plans to install 20 more. ADRA also expects to distribute more water supplies provided by the United States Agency for International Development (USAID), with thousands already receiving water purification tablets. To improve sanitation at the site, ADRA is constructing 60 latrines.

In addition, ADRA will distribute a shipment of 450kgs of medical supplies received from International Aid and medical supplies worth $15,000 donated by Heart to Heart International. ADRA has already distributed approximately 30 boxes of medical supplies at the hospital and continues to provide medical assistance to the injured.

To implement these initial response activities, ADRA is also partnering with Food for the Poor, which is assisting in the distribution of medical and food supplies; Johanniter International, a non–profit association that is providing medical supplies for hospital staff; GARSA, a Colombian rescue and relief group in partnership with ADRA Colombia; International Relief and Development (IRD); and donors in Puerto Rico.

The worldwide ADRA network urgently needs US$1 million to help communities rebuild in the long–term. ADRA Australia has opened a Haiti Earthquake Appeal and is calling for support for the response efforts in the region. Donations can be made to ADRA Australia by calling 1800 242 372 or visiting www.adra.org.au. Donations to ADRA Australia's Haiti Earthquake Appeal will be used to support the disaster, recovery and reconstruction efforts in the area. If the appeal raises more funds than are needed, donations will be allocated to ADRA Australia's ongoing emergency management activities.

International ADRA network partners currently supporting the response efforts include ADRA International, ADRA Australia, ADRA New Zealand, ADRA Czech Republic, ADRA United Kingdom, ADRA China, ADRA Denmark, ADRA Switzerland, ADRA Norway, ADRA Canada, ADRA Ireland, ADRA Portugal, ADRA Sweden, ADRA Netherlands, ADRA Austria, and ADRA Japan.

ADRA Australia is a non–government organisation (NGO) engaging in sustainable development projects and emergency management activities for people in need in Australia, the Pacific, Asia and Africa. It is a member of the Australian Council of Social Services (ACOSS) and has full accreditation with the Australian Agency for International Development (AusAID). It is a member of the Australian Council for International Development (ACFID) and is a signatory to ACFID's Code of Conduct. ADRA Australia is part of the international ADRA network, which has a presence in 125 countries. ADRA is the worldwide humanitarian arm of the Seventh–day Adventist Church. For more information about ADRA Australia, or to sign up for email updates, visit www.adra.org.au.

FROM THE SITE:

Cholera disaster hits Haiti.
Dumay Clinic responds by stocking appropriate medications and IV fluids, and begins community education program. This program addresses issues of what Cholera is, prevention and response to infection. The outbreak initiated about 45 miles north of

Port au Prince, but clinic Medical Director, Dr. Jacques, is concerned about the Dumay area proximity to the Green River, a shared water source for both areas.

2021 earthquake items needed:

Special Items Needed for Earthquake Victims
August 16, 2021 | 8:30AM

Dear Friends,

As we are getting ready to send supplies to the earthquake victims, we wanted to post some items that are desperately needed that you could send to our office or send funds to buy.

NO GIFT IS TOO SMALL.

We Need:

Large and small tarps, tents of any size. There are mostly large families, but any size tent is needed. T–shirts of all sizes, blankets, and sheets. Toiletries, soap, toothpaste, deodorant, washcloths, towels. I don't know if anyone has access to MRE's (meals ready to eat), but this would be great.

For Babies:

Diapers of any size, powdered milk. (We will buy water wherever we can en route.) Baby cereal, etc.

This disaster won't go away overnight, but the need is great now.

Send items or a check to:

Love A Child
12411 Commerce Lakes Dr
Fort Myers, Florida 33913

source: https://loveachild.com/news–archive/special–items–needed–for–earthquake–victims/

This site is bracing for Cholera spread and collecting supplies – They have a wishlist and very detailed information about their Cholera operations:

http://www.loveachild.com/blogs.php?id=journal&entry=lac–prepares–for–the–worst–regarding–the–cholera–epidemic

FROM THE WEBSITE:

The earthquake that rumbled through Haiti on January 12th at 4:58 PM left death and destruction everywhere. Hundreds of thousands of people are living in "tent cities" or on the streets. We have 360 families living in a tent city called Camp Hope on Love A Child land. The Lord laid upon our hearts the vision of getting these families in permanent shelter right on the Love A Child land.

After months of planning and researching, we have come up with a nice little wooden house to build for the earthquake families left homeless and living in Camp Hope.

We thank Joyce Meyer Ministries – Hand of Hope for $150,000.00 to build the first fifty houses, Phase One. After Phase One is complete, we are believing God that we will have the funds for the houses and infrastructure for Phase Two.

Anyone wanting to come on a construction team to build housing for the earthquake victims should complete a Building Team Application. The cost of the trip is $20 a day, payable to Love A Child, which covers transportation in Haiti and three meals a day. You may need to pay for a motel room to stay overnight in Miami so you can take the same flight as the rest of team to Port au Prince. Each team member is responsible for his or her own round trip airfare. If you have any questions or need additional assistance, please contact Jesse Ostrander at LACbuildingteams @aol.com. We need you!

We want to thank you for thinking about becoming a part of a Love A Child construction team! Building houses for the poor and displaced earthquake victims in Haiti is a crucial step toward getting these people back on their feet. The fact that you are considering a trip to Haiti to build permanent homes for these people shows that you have compassion for the poor!

Who should I talk to if I have any questions or concerns?
Team members or applicants can call, write, or email Jesse Ostrander, Love A Child's construction team coordinator at anytime.

Love A Child – Attn. Jesse Ostrander
100 Emerson Dr. NW
Palm Bay, FL 32907
Office: 321–768–2737 • Cell: 813–422–8575

October 18–23, 2010 – Mobile Medical Clinic and Ministry Team to the remote mountain village of Savaan Pit, Haiti. All participants must be in excellent health. Trip Fee is $350 plus cost of all transportation, hotel and required temporary insurance. Team's accomodations will be sleeping bags. Need 3 medical professionals. There is much work for everyone. – OPEN

November and December are unavailable because of the holidays.

If you would like to participate in a team or your church or ministry would like to take a team into Haiti to work, please contact Shar in our Florida office at shar @lachaiti.org or 813–621–7263. Please confirm dates with her before completing application/ forms. We will conduct one mission team monthly until our Missionary Training Center is built.

6:00 PM, Saturday evening...There are many different groups of people being fed at the same time. There are over 100 here in our orphanage. We are also feeding our Jesus Healing Center Staff, all the visitors and all the wounded. We are feeding approx. 1,000 in this immediate area, in addition to all those who come to get food to distribute in Disaster Areas...
We were told yesterday that we can expect 6,000 wounded to be coming in...

The D.R. has asked permission to set up a "refugee camp" (tent city), on our second piece of LAC land, adjoining our main property. We have heard that their plans are to have four major camps with 100,000 people in each one...and ours will be "one of those four." We hope that the D.R. sends in Security ASAP! Sherry

PS We want to thank the U.S.A. for their support of these poor Haitian people, as well as the Dominican Republic and all those who have helped, large or small. It is wonderful to see people helping people of all nationalities...all races... A Creole Proverb: "Anpil men, chay pa lou." "With a lot of hands, the load is not heavy."
Sherry

UPDATE ON EARTHQUAKE OPERATIONS:

http://www.loveachild.com/blogs/journal/january–19–2010–––5–pm–––latest–news–update.html

Tuesday afternoon...

We had a very long and wonderful meeting with a group of dignitaries from the Dominican Republic. We thought that it was the U.N. that wanted to come in with groups of doctors from all over the world and set up a huge clinic, but actually, it was the Dominican Republic who is heading this up, in cooperation with the Haitian Government.

Helicopters have been coming in and out all day long with the top people from the Dominican Republic and landing right here on our property in Fond Parisien.

General Pedro Pena Antonio, Chief of Armed Forces of the Dominican Republic, is working with Dr. Douglas Bournigal, from the D.R., to carry out this plan to help the Haitian people through Love A Child, under the direct authority of the President of the Dominican Republic. There are too many wonderful things about to happen to bless the Haitian people and we will be sharing these things as we go along. It's bigger than you will ever know!

The great thing about this is that when the Dominican Republic sends in this "Surgical Hospital" and doctors from all over the world, to treat the earthquake victims, then this will take this big pressure off the shoulders of our small staff here. We can then return to working in our Jesus Healing Center to meet the needs of the community here in Fond Parisien, as we had been, before the earthquake.

We are so thankful for Joyce Meyer Ministries – Hand of Hope for sponsoring this Clinic 100%, which has already saved many lives.

In addition to our being able to go back to operating our Jesus Healing Center for the Community again, we will have the best doctors in the world, coming right here to Fond Parisien to help these poor people! This disaster has really opened Haiti's plight to the eyes of the entire world! To God be the Glory!

Our deepest thanks to the generosity and compassionate care from the Dominican Republic to the suffering people of Haiti.

Here is a photo of Bobby and me with General Pedros Pena Antonio, Chief of Armed Forces of the Dominican Republic. Thank you, partners, each and everyone of you, for your sacrifices, your prayers and your support for Love A Child in helping these poor, poor people in their time of greatest need.

God Bless You,

Sherry

Once the patient doesn't require medical care three or four times a day, he or she will leave this recovery tent area, and go to "Camp Hope" that is set up on our land adjacent to LAC Village.

January 31, 2010 – Latest News Update

http://www.loveachild.com/blogs.php?id=journal&entry=january–31–2010–––latest–news–update

We also sent a Pastor to the "Displaced Family Camp," (Camp Hope) on our other LAC property, where we have been receiving families who have lost their homes.

–––
1/30 News

With God's help, we are preparing for another day. We advise anyone wanting to come to Haiti, please, first ask the group you want to work with. Come self contained. Bring your own camping tent, food, water and any other supplies. Come in emergency crisis mode. Yesterday, six septic tank trucks came! Bobby

–––

This is a hard time for all of us, but especially these poor Haitian people. The needs are so great and we have so much more to do to help them. Please continue to pray about your role in helping the earthquake victims rebuild their lives.

If you would like to donate to the Earthquake Relief Fund, please go to the website to Donate now.

Your gift, large or small, will be such a blessing. Please help the earthquake victims today. We need you!

Love,

Sherry

URGENT SUPPLIES are in need to help the families and children of Haiti. All deliveries of supplies may be shipped to our relief center at 9304 Camden Field Parkway, Riverview, Florida 33578. Go to this link here for a Needs List.

http://www.loveachild.com/uploads/pagesfiles/3359.pdf

Please print your name, address and phone number on a piece of paper and place it inside each box sent.

If you desire to travel to Haiti to work with other organizations, registration is required with the Center for International Disaster Information at CIDI.org.

At a health post in Port–au–Prince's Sylvio Cator Stadium, vaccinators immunize a child, held by his mother, during the first phase of a campaign to protect young children in the Haitian earthquake zone against measles, rubella, diphtheria, tetanus and whooping cough.

PAP – Massive food distributions this morning in the stadium of Sylvio Cator, at the heart of an impoverished neighborhood of Port–au–Prince. Today, over 1,750 families will receive a bag of 25 kilos of rice which should cover the needs of a household for 2 or 3 weeks, depending on the size of the family.

FROM THE BLOG:

The process of evacuating the homeless church members in PAP into the newly created tent city continues. Over the past week a tremendous work has been accomplished through the members of CCPAP. Ruble from the collapsed buildings around the hospital have been removed. Toilets have been installed. A make shift kitchen was built. Plumbing and electricity has been run throughout the large area where people will call home for the next several months. Even supplies for a clinic to treat people in the tent city as well as those in the surrounding community are being collected.

Ten tents were provided by the team who came down from CC in the City – Boston. An additional 20 tents from CC Melbourne were scheduled for arrival today through the MFI airport. CC Old Bridge is pledging an additional 20 tents that we hope will arrive by next week. In addition, CC Delta, PA, has generously provided the transport and partial funding of food for the tent city via their missions organization in Barahona, Dominican Republic.

The tent city is critical at this point as it is unsafe and unhealthy for people to continue to live on the streets without sanitation and access to clean water and food. Already, many Bible studies are happening each day at the tent city. Please pray for the unity and encouragement of the believers in PAP.

Service Temporary

EMAIL from Sow–A–Seed 12/16/10:

Rosemina has 7 children with cholera. SAS was able to help with hospitalization. The children were accepted by and treated at Hopital de la Communaute Haitienne (HCH). Most of them were sent back home. Only one child remains hospitalized.

They were able to get water yesterday and today – so they have enough for about two weeks. The logistics director from HCH went to visit them to analyze the situation. His recommendation is that a hold be drilled to gather sullied water from wash, hands, etc....

What they need is:
1 – Funding to drill temp. hole
2 – Bathroom not usable and MUST be rebuilt. Also – for 1 bathroom for 86 kids plus about 10 employees just doesn't cut it. Funding needed. SAS can help with engineering.
3 – Port–a–potties must be installed for the kids to use in the meantime – as they have no where to go.
4 – Cleaning supplies – including clorox needed.

SAS can ensure follow through with this situation. I don't have a medical team to go over there right now, but we were able to arrange free hospitalization.

If anyone group wants to help with this project, please let me know. I will try to work on some funding for them on SAS end.

NOTE: L. Teltoe – CAT Dbase volunteer spoke directly with Pilar Martin on 12/13/10 – See internal notes for additional pre–assessment details – Contact me at: Leslie @ citizenctionteam.org

This orphanage is a 4 bdrm. house. There are 80 children ages 0–17 or 18 yr. old. There are 3–4 Caretakers.

One employee contracted Cholera likely from the outside. It is not known whether any of the children are sick.

Dr. Pilar Martin has instructed them on what to watch for Cholera symptoms and to take children directly to the hospital if they start showing any signs.

Their only water source is from the U.N. and they have an underground tank but no chlorination and no running plumbing in the house.

They do not have any electricity.

Choléra in one orphanage in PAP _RFA

To: "haiti_epidemic _system" <haiti–epidemic–advisory–system@googlegroups.com>

I'm not sure if I'm sending this request to the right group and right abbreviation. sorry about this.

This orphanage I have been working for years got a case of cholera in an employee. I try to communicate with them, but it didn't work.

Orphanage : Rose Mina de Diegue Foundation
Route des Freres , St Louis Jeanty # 11, Petion Ville, Haiti

Ph: 342–50213; 346– 24213; 346–24212; 379– 78592

The owners are : Rolande Fernadez (Speaks Spanish and Creole/ French) . Sandra Edouard (Speaks English – is Rolande's daughter)

Person: 3445–5913 / 3586–5913 / 3852–1519
sedouard @flabcad.org sed7473 @hotmail.com edouarde7473 @yahoo.fr

This orphanage has very poor conditions, not running water, not flashed toilet for 80 kids . I'm afraid kids are already with the disease.

Can somebody in PAP check there if they have appropriate resources to follow the hygiene measures, etc.?.. They require close monitoring

I appreciate if somebody on the ground can check there – better in person– and send me information about their status, prevention measures and help them , if needed . I would appreciate so much

you can tell you are referred by me

Thanks so much

pilar

Fear of riots as tonnes of food lie awaiting distribution

http://www.demotix.com/news/225371/82nd-airborne-lz-food-distribution-center-haiti

1/21/10:

82nd Airborne, distributing food that has 5,000 calories - enough for one day's worth of food/water. Additional images show UN soldiers protecting German and Hungarian rescue teams as they enter Leogane on the 18th January. Petionville Golf Club, Port-au-Prince, Haiti.

The LZ is at the top of a hill. Haitians must wait in long lines and climb up the steep hillside to enter into one entrance, grab one food meal/packet than return down the hill. Most haven't eaten for days, and they have to climb up in brutal heat - it is very punishing on their bodies.

NPR, Jan 19, 2010:

http://www.npr.org/templates/story/story.php?storyId=122734169&ft=1&f=1004

A shipment of food from Catholic Relief Services was distributed Tuesday in Haiti at a makeshift camp in the Petionville Club Golf Course, near Port-au-Prince. Lane Hartill, the group's regional information officer, says the U.S. military's presence is making the distribution effort easlier, but people are still desperate.

Aid Arrives but Few Are Lucky to Get It

By RAY RIVERA
Published: January 18, 2010
PORT-AU-PRINCE, Haiti — When the aid helicopters descend on the Pétionville Club golf course, once a playground for the wealthy and now a sprawling city of makeshift tents, the residents hurry toward them. But to get there, they must climb a steep embankment to a landing zone on top of a hill where the 82nd Airborne Division distributes the food and water.

He arrived in the morning but made it only halfway up the hill, where into the late afternoon he was lying on the ground next to his cane. A woman had given him one of the two bottles of water she had gotten from the Americans, but he said he had gotten no food.

“I cannot make it up,” he says.

Even as more aid flows into Haiti nearly a week after a devastating earthquake, the challenges faced by the 82nd Airborne in handing out food and water here illustrate the hurdles in distributing it across the city. Roads are clogged with traffic and rubble. Confusion is rampant. Everywhere, people ask, “Where do I go?”

People lucky enough to have learned about the food drop zone at the top of this golf course in the city’s Bourdon neighborhood, where tens of thousands of people now live, still face difficulties getting to it.

The elderly get priority, but some of them cannot make it up. Families with young children also have priority, so some people are said to have borrowed babies and hauled them up the hill.

Others wait near the landing zone for hours in the blazing sun, using cardboard boxes to shield their faces from the stinging dust and dry grass whipped up every time a helicopter lands.

“I guess the people down there have dubbed this ‘the hill,’ ” said Lt. Jeff Wozencraft, 24, of Mannford, Okla. “It’s desperate. We’re doing everything we can.”

Since members of the 82nd Airborne, from Fort Bragg, N.C., began distributing food on Saturday, their delivery method has evolved.

On the first day they wore rifles slung around their backs. By Monday, they had ditched the rifles and were trying to present themselves more as aid workers than as soldiers.

They set up a first aid station because many people coming up had untreated cuts and injuries. They have also ventured into the camp below to find people who can act as community leaders to help organize distribution in the far reaches of the hilly, nine–hole golf course.

And they had to stop serving only at the front of the line, because the whole concept of a line was not working here.

“We found people at the back of the line weren’t getting anywhere and never getting any food,” said Capt. John Hartstock of Vinton, Va. “Now we’re taking 10 at a time from different sections. It’s the best way, we’ve found.”

“It’s been a learning process,” he added.

Another failure: stamping the fingers of people who receive aid to prevent repeat customers who might sell the extra goods and deprive others who need them. People just washed the ink off.

The food supplies are packaged Meals Ready to Eat, similar to the rations the military uses in the field.

The Navy flies them to the landing zone from the aircraft every half–hour or so, dropping off dozens of 21–pound boxes.

They start at 7:30 in the morning and stop at 6:30 as night falls, so people will not be on the dark hillside at night and because the small grass plateau that serves as a landing zone is unsafe for helicopters at night.

Captain Hartstock said they handed out 3,000 meals on Monday and 10,000 bottles of water.

But they estimate there are more than 25,000 people living on the golf course. A look at the rolling hills of tents and blankets and tarps held up by sticks suggests that estimate may be conservative.

Down below, people are grateful for the food, and finding other ways to survive. Impromptu markets have sprung up, but many with limited food at inflated prices.

Once the food is gone, the boxes have second lives as bed mats and roofs. Children use the cardboard to slide down the hills.

Quikni Alakasis, 21, was lucky. She has a 4–month–old baby. She marched up the hill and was called to the front right away. “Because of the baby,” she said. “That’s why they gave me the food.”

Ms. Alakasis lost her home in the earthquake and does not know how long she will live on this golf course. For now, she just waits for the helicopters.

Plush Haitian golf club houses 50,000 refugees
By Andrew Cawthorne, ReutersJanuary 19, 2010

A family relaxes in their new home at the Petionville Club in Port–au–Prince, Haiti, Monday, Jan. 18, 2009. The U.S. Army is distributing food and water at the tent city.Photograph by: Michael Laughlin, Sun Sentinel/MCTPORT–AU–PRINCE – Elite U.S. soldiers lie exhausted on tennis courts and beside a pool. Fifty thousand homeless people cram the nine–hole golf course. Helicopters land every half an hour with crates of water and food aid.

The prestigious Club Petionville, on a hill in spacious grounds overlooking Port–au–Prince and the Caribbean sea beyond, has been transformed into probably the biggest refugee camp in Haiti after last week's catastrophic earthquake.

Haiti is the most impoverished nation in the Western Hemisphere but its elite came to the country club's elegant stone headquarters to dine and mingle with foreign diplomats and businessmen. Now the club houses commanders from the U.S. military's crack 82nd Airborne Division.

Down the lawns and beyond a loose military cordon, the golf course is covered with tents, made from poles and sheets by people who flocked onto the club's grounds after the earthquake brought down its perimeter walls, as well as their homes.

The club, named for former Haitian President Alexandre Petion, largely escaped damage, save a few broken pillars.

"The days are long but it is good to help," said Staff Sergeant Michael Watson, a veteran of the U.S. military's response to the 2005 Hurricane Katrina disaster in New Orleans.

"Katrina was bad but this is a lot bigger."

The 7.0 magnitude earthquake that struck Haiti last week has killed between 100,000 and 200,000 people, according to the government, and left several million on the street.

Unlike chaotic scenes elsewhere, with refugees fighting and scrambling for water and food, an orderly queue winds up the lawns of the club. Each refugee is allowed two bottles of water and one Meal Ready to Eat (MRE) ration.

"If they get unruly, we just sit down," said Captain John Hartsock. "It has only happened twice. They get the message.

"We don't want everyone going nuts, like the scene in 'Black Hawk Down' from Somalia."

FROM IRAQ TO HAITI

Hartsock, who has served three times in Iraq, said it was easier to deliver humanitarian aid in Haiti because there was not the same risk of attack. Instead of the razor–wire common in Iraq, a line of white swimming pool chairs is the only barrier between the soldiers and the refugees.

"We want to avoid the military look," Hartsock said.

The mass of flimsy tents and thousands of people lying on the grass give the appearance of a traditional refugee camp but a closer look reveals differences, perhaps reflecting the better–off social milieu of areas near the club.

Many of the refugees are comfortably trilingual: Creole, French and English. The occupants of two or three tents even had solar panels outside, charging up some mobile phones.

Rony Florial normally teaches tennis at the club. Now he is helping to organize refugee lines, while off–duty soldiers catch some sleep on the tennis courts. Other soldiers await their next shift around the pool, lounging on deckchairs in full uniform, with spectacular views over the city and hills beyond.

"We are all doing what we can to help," Florial said. "The owners have closed the club and allowed the Americans to take over. It is for the national interest."

Since Saturday, U.S. soldiers have attended the refugees from sunrise to sundown at the Petionville Club. On Monday, they gave out an estimated 20,000 bottles of water.

Refugee leaders, however, say many needs are unattended. With the golf course on a high slope, the temperatures have dropped fast at night, and that has killed various children.

"We need blankets, we need toilets, we need help for the children who have lost their parents," organizer Michel Ovilus said. "And we need houses. These people do not want to spend the rest of their life on a golf course."

HHH Clinic Overview
Here is some information regarding Healing Hands for Haiti, which provides Physical Medicine and Rehabilitation care and support.
1. Kay Kapab Klinik (Rehabilitation Clinic)
2. Physical Rehabilitation Clinic (PRC)
3. Bon Travay Guest House

1. Kay Kapab Klinik Address:
20, Ave Lamartiniere
Bois Verna
Port au Prince

Appointments Telephone: 28130434

Self referral and professional referrals accepted.
Opening hours 8am – 4pm

www.healinghandsforhaiti.org <http://www.healinghandsforhaiti.org>

Haiti Director of Operations: Antonio Kebreau - 37024433
Haiti Country Medical Director: Dr Ben Nau MD - 37089816
Haiti Clinical Medical Director: Dr Fritzgerald Moise MD - 37503831
Kay Kapab Klinik Director & Nurse Progams Manager - Fiona Stephenson – 38922332

Medical Specialities:
Spinal Cord Injury & Rehabilitation- Dr Moise - Physiatrist: Monday, Tuesday, Wednesday
Neurology - Dr Pierre - Neurologist: Monday
Diabetes & Hypertension - Dr Genius - Internist: Tuesday, Friday
Stroke - Dr Genius & Dr Moise - Monday, Tuesday, Wednesday, Friday
Club Foot - Dr Nau - Orthopaedic Surgeon: Friday
Orthopaedics - Dr Nau: Friday
Hydrocephalus Programme - Dr Pierre, in conjunction with Medishare

Nursing and Physiotherapy/Rehab available; Mon, Tues, Weds, Thurs, Fri.

The HHH Kay Kapab Klinik has just employed a Patient Rehab Support Worker (Peer Counsellor) who will be working with and assisting our clients (specifically Spinal Cord Injury and Rehab).
We are extending our SCI services, visiting clients in the community, in liaison with HI (France).
Fiona Stephenson, Klinik Director, is co–ordinating the Haiti SCI data base. Please email any information you may have, regarding any SCI clients you are aware of, to help understand the needs and numbers of SCI clients in Haiti. This is a secure database.

Our aim is to “train the trainers”: A Haitian Rehabilitation clinic, run by Haitian staff for the Haitian people.

We are looking closely at the training needs of Haitian registered nurses for example, working in the speciality of rehabilitation.

The main problem that we are encountering is accessibility of patients from their homes, to the clinic, either due to earthquake debris and/or transportation; along with significant hurdles with import / clearing customs.

2. Partnership: Handicap International / Healing Hands for Haiti Physical Rehabilitation Clinic,
92 Avenue John Brown,
Lalue/Post Marchand,
Port au Prince
Appointments: 28130623

Services: Provision of Prosthetics, Orthotics, Wheelchairs with Physical Therapy, Occupational Therapy, Psychosocial counseling and Community reintegration coordination within Disability Sector Antenna system. Training programs for prosthetics / orthotics and rehabilitation technicians are in progress.
(please note Handicap International might submit similar / additional information)

Contact: HHH P&O Director: Al Ingersoll – 34551947

3. Healing Hands for Haiti Bon Travay Guest House:
366 Avenue John Brown,
Bourdon,
Port au Prince.

Located on a beautiful campus in the middle of Port au Prince, the HHH guesthouse has 30 person capacity with 24/7 security, meals, pool, wireless internet and available transportation.

Contact: HHH Logistics Manager & Volunteer Co–ordinator: Gail Buck – 36349922

11/24/10 Email from Healing Hands (Fiona and Gail)
We are a Rehabilitation clinic and continue to see patients here on a daily basis (Monday to Friday).
We are actively working to educate our staff, patients, any visitor coming to our premises with regard to Cholera.
We are holding impromtu education sessions (by our haitian nurses), handing out leaflets re prevention as well as treatment of cholera symptoms.
We also have a Cholera prevention policy in place.
Regarding medical supplies: many people are asking for water sanitation supplies, soap and hand gel - which unfortunately we do not have enough to give out.

FROM THE WEBSITE:

Haiti Earthquake Response – we are rebuilding

An emergency response team (nurses, doctors, rehabilitation specialists and support personnel) led by Board director and founding member of Healing Hands for Haiti International, Lisa Bagley, RN (above), recently returned from a one month tour of duty at our outdoor headquarters clinic in Port au Prince. The team erected the 20 x 50' army tent for clinic work and treated about 1400 patients in 3–weeks. Their work included wound care management, counselling, physical therapy, referring and transporting several acute patients to the CDTI and Medishare field hospitals, as well as assessment visits to orphanages.

Staff and medical volunteers will continue to expand facilities and services of the outdoor clinic while demolition of damaged structures and site clean–up proceed.

Electricity, water and internet service have been restored to our volunteer guesthouse, the only building left standing after the January 12 earthquake. It has been declared safe and sound by engineers and now accommodates specialized medical teams rotating into service on a weekly basis for many months to come.

Healing Hands for Haiti is collaborating with Project Medishare to provide physical medicine and rehabilitation services and with Handicap International to set up prosthetic fabrication to assist the estimated 4,000 new amputees and other Haitians disabled in the earthquake.

We are proceeding with plans to invest a generous grant from the Newman's Own Foundation to build semi–permanent, moveable prosthetic fabrication, fitting and clinic facilities on our property, and with our intentions to build Haiti's first comprehensive Physical Medicine and Rehabilitation Institute.

Your generous donations, offers to volunteer and to give materials for the herculean rebuilding task, mirror the response of the global community – absolutely overwhelming. Unfortunately, at the moment, we are not able to collect and distribute prostheses, rehabilitation equipment and other medical materials. Please go to Physicians For Peace for assistance. On behalf of all Haitians and our courageous staff and volunteers, we sincerely thank you for your continued support.

Your generous donations, offers to volunteer and to give materials for the herculean rebuilding task mirror the response of the global community – absolutely overwhelming. Unfortunately, at the moment, we are not able to collect and distribute prostheses, rehabilitation equipment and other medical materials. Please contact Physicians For Peace for assistance. On behalf of all Haitians and our hard working staff and volunteers, we sincerely thank you for your continued support.

It has been more than two weeks since the devastating magnitude 7.0 earthquake struck Haiti and our medical, rehabilitation and prosthetic fabrication facilities in Port–au–Prince. We are very relieved to report that all of our 45 local staff have been accounted for, although many lost family members and most lost their homes. Healing Hands for Haiti International has established an emergency relief fund to support them. It has been confirmed that our facilities are 80% destroyed or damaged. Only the guesthouse, which needs structural repairs, remains as a hopeful starting point for a temporary headquarters. Our plans to build Haiti's first Physical Medicine and Rehabilitation Institute have been accelerated.

The Handicap International emergency response team which includes members of Healing Hands for Haiti International and Team Canada Healing Hands, arrived within the first week and has since worked tirelessly with that organization assessing and treating victims at hospitals throughout the city, even transporting spinal chord injured to hospitals in the US. Several of our Haitian Board members who are orthopaedic surgeons operate continuously from their hospitals. Our organization is integrating with a larger consortium to provide acute rehabilitation facilities and services at the major hospital initiative near the airport.

By the end of week two, we had landed a second group of 12 senior Healing Hands for Haiti medical volunteers in Port–au–Prince. They are part of a group of 130 medical and construction personnel and a plane load of equipment, organized and

donated by the Salt Lake City Utah Hospital Task Force. A make–shift clinic with power and water was immediately set up on our property and opened to the public the next day. Our team will continue to expand the staffing and services of this clinic while the main group help clean up, ensure site safety and start guesthouse repairs.

Please give now to help us provide medical support to the most vulnerable victims of the disastrous earthquake in Haiti.

Haiti Earthquake Response
Healing Hands for Haiti International is responding to a powerful earthquake that struck Haiti on Jan. 12, 2010. The earthquake has collapsed buildings and caused wide–spread damage, injuries, and fatalities throughout Port–au–Prince and the countryside.

We are now working with our partners to make an immediate assessment of the damage. We are attempting to make contact with Healing Hands Haitian staff to ensure their safety, as well as the staff and residents of our partner organizations and orphanages where we spend so much of our time and efforts. At this time we are still unaware of the status of our clinic and guesthouse sites at headquarters in Port–au–Prince.

One of our North American medical teams is now on standby to be deployed to Haiti as soon as it is safe and possible. We are now involved in assessing the immediate requirements to make a coordinated effort to respond to the specific needs of the Haitian population living with a disability. In the coming days, the number of persons with disabilities will grow dramatically, and we are beginning preparations to respond to this humanitarian effort.

Americans are encouraged to support Healing Hands for Haiti by making a donation by clicking on the Donate button above and specifying Haiti Earthquake Response Fund.

Canadians (needing a Canadian tax receipt) are encouraged to support Team Canada Healing Hands, our Canadian partner, by making a financial donation to www.canadahelps.org and designate HHHI (Healing Hands for Haiti International) in the message/ instructions box.

We will make every effort to keep this website updated as we learn more about the situation.

January 13, 2009 - Port au Prince Headquarters Facilities of Healing Hands for Haiti International severely damaged by quake. An Emergency Response and Reconnaissance team of specialists to head from North America as soon as our flight allowed in.

For more information or to arrange an interview:

Eric Doubt, Executive Director/ Directeur général

HEALTH CLUSTER DETAILS 3/8/10:

MAIN ACTIVITY/OFFERS: Psychosocial and Medical Care
LOCATIONS: National Soccer Stadium, PAP
FUTURE PLANS: Primary Clinic and Mental Health
PROJECTED EXIT: Long Term

Heartland Alliance for Human Needs & Human Rights has sent a team of staff and volunteers to Haiti to establish long-term services for survivors of the devastating earthquake. Our initial assessment will allow critical time for mobilizing resources that will be desperately needed once emergency rescue efforts wane.

With our expertise in community-based health care, mental health, and trauma recovery, Heartland Alliance plans to provide long-term mental health services to first-responder relief workers (local and international); to Haitian communities experiencing severe destruction; to Haitian children with severe trauma; and to internally displaced populations experiencing trauma.

Heartland Alliance's team in Haiti is led by Sean Casey, director of International Programs, and Ramsey Ben-Achour, country director for Haiti. They are joined on this trip by two volunteers, Dr. Beth Dowell (a physician) and Dr. Sonali Gupta (a trauma specialist). The team members are fluent in French and Creole. Their base office for now is a tent on the lawn of the CHF International compound in Petionville, just outside Port-au-Prince.

Additional volunteer mental health workers will travel to Haiti in the coming weeks.

Heartland Alliance continues to need financial contributions to deliver direct aid and services and to fund travel of volunteers. All donations to the Heartland Alliance Fund for Haiti will be used for Haiti relief efforts.

Services offered: Advocacy, Health & Human Rights; Counseling, Post Disaster Counseling; Demographic Served: Children; Demographic Served: Survivors, Natural Disaster Impacted Communities; Demographic Served: Survivors, Violence; Demographic Served: Vulnerable & Marginalized Populations; Donations, Disaster Fund; Long Term Recovery, International; Medical, Facility, Clinic, Field Clinic (Tent); Medical, Services, Medical Care * (ANY/ALL Types); Medical, Volunteer, General, Medical Volunteer Services

Follow IOM on You Tube: http://www.youtube.com/OIMIOM

Follow the website link above to view current IOM situation reports related to the 1/12/10 earthquake in Haiti.

OVERVIEW

With the inauguration of its President in February 2006, Haiti's nascent government faces a variety of migration issues which impact critically upon stability and economic recovery. These include destabilizing outward migration flows induced by violence, poverty and natural disasters, irregular migration including human trafficking and smuggling, poor labour migration management capacity and the untapped development potential of remittances and the Diaspora.

In a bid to address the most urgent migration issues, IOM has demonstrated tangible results in the stabilization of violent neighbourhoods and disaster–prone areas, support for free and fair elections, the formulation of migration management recommendations, and the return and reintegration of trafficked child domestic labourers. In tandem with the UNCT Transitional Appeal, IOM seeks to sustain quick impact initiatives in support of the government's programme d'apaisement social, while augmenting its mid–term objectives for poverty reduction.

Emergency and Post–conflict Migration Management

IOM aims to mitigate the destabilizing effects of violence and disaster–induced outward migration flows. Through the PREPEP programme (a continuation of the Haiti Transition Initiative initiated in 2004) IOM helps to stabilize volatile neighborhoods in six urban centers across Haiti by generating short–term employment and fostering opportunities for dialogue between the government and the general population around the rehabilitation of small infrastructure and socio–cultural activities. As a process–oriented initiative, PREPEP seeks to cultivate inclusive community and government interaction towards the provision of strong, sustainable, and responsive government services.

In seeking to cultivate a critical mass of support for a peaceful transition among the marginalized communities of Cité Soleil – one of the most volatile neighborhoods of Haiti – other IOM projects similarly work to rehabilitate priority road sections and to improve sanitation and hygiene at primary public schools. In a bid to protect thousands of shantytown residents in the capital from landslides, flooding, internal displacement and loss of life, IOM is constructing life–saving retention walls along ravines and severely deforested mountainsides. In response to the 2004 floods in the isolated rural region of Fonds Verrettes, IOM has engaged in housing reconstruction, community shelter development and improvements to the potable water distribution system.

Main Projects:

PREPEP programme (Programme de Revitalisation et de Promotion de l'Entente et de la Paix)
Rehabilitation of Road Infrastructure in Cité Soleil (Port–au–Prince)
Improving Sanitation and Hygiene at Public Schools in Port–au–Prince

Haiti, January 22, 2010

IsraAID expands its relief operations, as a second medical team departs for Haiti

Just days after the devastating earthquake hit Haiti, IsraAID/FIRST headed by Dr. Laor relief team was among the first to arrive, immediately providing urgently needed medical care to victims of the disaster. As the tragedy continues to unfold, it will be expanding its relief operations, with a second team that leaves Israel tonight to join the relief efforts already on the ground. The 14 member team headed by Danny Maor includes volunteer doctors, nurses, post–trauma and logistics experts from all across Israel.

IsraAID/FIRST emergency response was able to take place thanks to the generous support of American Jewish Committee, The UJA Federation of Greater Toronto, B'nai B'rith International, The Jewish Federation of Metropolitan Chicago in addition to other federations in North America.

Amidst the chaos of the international humanitarian response, word has spread about the successes of the IsraAID medical team operating in partnership with Operation Blessing out of the Sylvio Cator National Soccer Stadium in Port au–Prince. Following rapid assessments, the team decided to position itself in an open–aired stadium where thousands of victims of the earthquake had sought refuge.

While IsraAID/FIRST teams worked around the clock to provide life–saving treatment, several NGOs and medical teams from France and the US joined the relief efforts, bringing the number of medical stations operating simultaneously in the stadium to a total of 14.

The partnerships and pooled resources, orchestrated by IsraAID/FIRST in partnership wiht Operation Blessing, have meant that more locals have access to urgently needed medical care. To date, well over 1,300 people have been treated and several serious cases were transferred to the IDF Field Hospital. Each day over 100 people were treated.

"The scene here is like a war–zone," describes Allan Schneider, an IsraAID member who is currently on the ground in Haiti." After rounding up supplies at the airport – still a chaotic affair -we saw some teams already packing up to leave the country. Our team arrived at the stadium and began to treat the victims. Men, women, and children – a non–ending stream of misery and pain, destitute people who were dealt yet another devastating blow. The fact that our clinic is by now well established, serving as a magnate to local and other international teams who joined our initiative at the stadium, is proof that our mission – to jump into the breach, saving as many lives as possible under the conditions – has been achieved."

IsraAID is currently working in partnership with other international teams to assess the situation in the surrounding hill area and to determine the medical needs on the ground including post–trauma interventions and with the movement of victims to refugee camps the purchase of additional relief items to sustain them.

NEWS:
http://weill.cornell.edu/globalhealth/

Cholera in Haiti
http://weill.cornell.edu/globalhealth/online-global-health-journal/global_health_news/cholera_in_haiti/

From Dr. Jean William Pape, Director of GHESKIO

As of October 27, 2010 there have been 4,000 cases of cholera in Haiti and over 300 deaths. The epidemic started in the Center Department in the city of Mirebalais, and has spread to the Artibonite valley on both sides of the river, with most cases diagnosed and treated in the St Marc area. Two days ago, cases were reported in Arcahaie, and Cabaret indicating that the epidemic is moving towards the Port-au-Prince area. There are 6-8 cases diagnosed in Carrefour, a heavily populated area close to the downtown GHESKIO site. All the cases diagnosed in Port au Prince come from the Center Department and Artibonite area.

There has been no known transmission to date in Port au Prince inhabitants. The greatest fear is that the epidemic will hit the 1.3 million homeless people living in tent cities. At GHESKIO we are more concerned about the people living in slums around Port au Prince. While 90% of tent city populations have access to potable water and latrines, this is not the situation for habitants of slums. Cholera transmission is particularly likely in areas where fecal-oral contamination through non potable water can occur. Thus the slums are a prime concern for new cholera outbreaks, which in turn could spread to tent cities because of the close proximity and exchanges between both populations.

In anticipation of these outbreaks, GHESKIO has developed the following interventions:

1. Cholera Treatment: We have set-up three treatment sites: one at the downtown GHESKIO clinic on Blvd Harry Truman, one at the GHESKIO tent city across the street, and one at the GHESKIO-IMIS site in the north of the city near the airport.

a. Why set-up these treatment sites at these locations?

i. The GHESKIO-downtown site is a logical site because it cares for about 1200 hundred patients with HIV, TB, and other STIs daily and is located right across from two major slums with about 200,000 inhabitants (City of God and City of Eternity). This site is very close to Carrefour and Martissant, two heavily populated areas with very little medical infrastructure.

ii. The GHESKIO tent city has almost 7,000 people, and we are providing the primary care for this population.

iii. The GHESKIO-IMIS site is located north of Port au Prince and is closest to the northern areas affected by cholera. Except for a pediatric hospital, Petit Freres et Soeurs, there are no other clinical care facilities in this area.

b. Three tents have been set up- one at each of the locations indicated above and the personnel has been identified and are being trained in cholera case management.

2. Training: Set up two training sites respectively at GHESKIO-INLR and at GHESKIO-IMIS. These sites can train health care personnel from other health care facilities in Port au Prince.

3. Provisions: Offer potable water to the slums near GHESKIO on a constant basis.

4. Prevention: Create a 12 member community health team to educate in tent cities and surrounding neighborhoods to:

a. Inform about protective measures : potable water, wash hands

b. Inform people living in the slums about the availability of potable water at GHESKIO

c. Inform about treatment centers at GHESKIO

d. Distribute soaps and chlorox solutions

CCCM CAMP CLUSTER – GOOGLE GROUP WEBSITE: http://groups.google.com/group/cccmhaiti

UPDATE: FEBRUARY 22, 2010:
U.N. Designates Salvation Army a Leader in Haiti Relief Efforts

United NationsThe United Nations has named The Salvation Army the "lead agency" responsible for the well–being of the Haiti earthquake survivors and to serve that community and have a prominent voice to communicate their needs of food, water, shelter and security.

The Salvation Army has so far received more than $9.8 million through online, telephone, text message and mail donations. Corporations have also been extremely generous, with FedEx donating $100,000 to the relief efforts, United Parcel Service of America Inc. contributing the use of its planes for transport of personnel and supplies, and Deutsche Post DHL providing fuel to ensure the continuance of the operations within Haiti.

To date, The Salvation Army has distributed more than 1,530,000 meals, 19,000 gallons of water, hundreds of tents and tarps, as well as baby items and medical supplies.

USA Point of Contact for all contributions, donations, equipment to send, etc: Lt. Colonel Dan Starrett:
Dan_Starrett @SalvationArmyHaiti.org

Director of Disaster Services for the Salvation Army in Port–au–Prince, Haiti: Bob Poff:
Bob_Poff @SalvationArmyHaiti.org

THE SALVATION ARMY EARTHQUAKE RELIEF OPERATION EXTENDS TO HAITIAN COUNTRYSIDE
First Salvation Army Aid Begins to Reach Petit Goave

The coastal community of Petit Goave (Little Gulf) on the north coast of the Haiti peninsular will be the next community to benefit from Salvation Army Earthquake relief efforts.

Major Emmanuel Michaud and Captain Serge Lainne, Haitian born Salvation Army Officers serving in Chicago. Il and Miami. FL respectively did an assessment yesterday to determine the post Earthquake circumstances of this community where a Salvation Army Corps and School is presently located.

In describing what he saw in Petit Goave Major Michaud said, "Getting there will be ragged and rugged because the roads are badly damaged but with caution, care and God's help we can transport volunteers, materials and hope to these people."

Captain Lainne noted that the Corps and School facilities appeared to have minor damage but are fully usable.

The Mayor, when visited by these two officers, expressed appreciation for and pledged full cooperation the efforts of the Army's efforts, in partnership with The United Nations. This city of 200,000 is estimated to have lost 1,500 and had another 3,000 persons injured in the Quake.

Within a six mile radius there are approximately 6,000 living in temporary housing such as tents and make–shift shelters.

Beginning January 25, 2010 the two officers who did the initial assessment will be assigned as the Advance Coordination Team for the Petit Goave effort.

TWITTER –
http://twitter.com/TSAHaiti

The Salvation Army has had a presence in Haiti since 1950 and currently operates schools, clinics, a hospital, feeding programs, children's homes and church–related activities spread across two major facilities in Port au Prince, close to the epicenter of the earthquake and at other locations in the country.
One of the facilities, or compounds as it is referred to, includes a home for more than 50 children; a school with a daily attendance of 1,500 children; a medical clinic caring for 150–200 people daily; and a church that on any typical Sunday welcomes nearly 1,000 people. The facility is less than 10 minutes from the National Palace and is in an area known as St. Martin that's home to predominantly poor living in the nation's capital.

According to reports from Salvation Army staff in Port au Prince, no one in the compound was injured during the earthquake, but the children's home, the clinic and church suffered major damage. Several smaller buildings, including residences, have collapsed completely. People were sleeping in the parking lot overnight, while severe aftershocks continued to affect the country.

The second compound that houses Salvation Army administrative offices is being used as an emergency operations center; damage was slight to this compound, according to Salvation Army reports from Haiti.

The Salvation Army hospital in Fond–des–Negres (75 miles west of Port–au–Prince) reports some minor damage, but no injuries.

Heart Line Ministries (MEDICAL CLINIC) – 2010 Haiti Earthquake

Medical Facility · Open

Medical Facility
Rue Gelin #6, Tabarre
Web heartlineministries.org/Blog20.aspx
Service Temporary

EarthQuake:

http://heartlineministries.org/EarthquakeNeeds.aspx

Need: Medical People Needed

We are running a clinic to help those in need. The clinic is located at our Women's facility located at Rue Gelin #6 in Tabarre. We are transporting patients from Simone Pele, a slum near Cite Soleil. We need Doctors and Surgeons that can provide medical care to the injured. If you are interested in going please contact Shelly Stammis at lexismom1972@yahoo.com. We are currently organizing how to get groups and supplies into Haiti. Our first group traveled on Sunday January 17th on a charter flight out of Florida. If you are committed to going, please start raising funds for your trip and the supplies that you will bring in to Haiti. Please contact Shelly at the email above for a list of supplies. The injuries are mostly fractures, gaping open wounds and compartmental syndrome.

If anyone knows of a facility taking seriously injured people in PAP, please contact tom.white@heartlineministries.org. Currently we are running out of room for patients as we are unable to find places for those who are unable to be released after we treat them.

We have been able to get diesel from a couple of sources. Thanks to everyone that helped arrange diesel deliveries.

Need: Other volunteers needed

We can not have other volunteers travel at this time. It is likely going to be months before we can. However, we are anticipating needing volunteers to help rebuild workers homes and other facilities. We are unsure exactly how many of our workers homes were destroyed, but we anticipate it will take at least $5,000 to rebuild each home. Keep watching this site to find out details of when and how you can help with rebuilding. In the mean time, please help raise funds for the critical needs we have now.

Need: Supplies needed

We are not able to receive supplies as donations as the logistics for receiving them and getting them to Haiti is too difficult at this point. We need money to purchase supplies that are already in Haiti. We also have had someone donate the use of a plane and a pilot for a short while. We are going to be coordinating supplies out of Florida. The best way for us to get them is to purchase them as the need arises. Sending supplies to Florida will take time and cause excess of some supplies and shortages of others. The financial need is huge and prices are high for materials we require. For example, a gallon of gas that was $3 a few days ago is now costing us $12. This is true for almost all supplies.

Services offered: Donations, Disaster Fund; Emergency Operations Center, Local; Housing * (ANY/ALL Types); Medical, Education, Prenatal Care; Medical, Facility, Birthing Center; Medical, Services, Pharmacy; Shelter * (ANY/ALL Types); Warehouse, Warehouse Space

No report date–

has been damaged significantly by the earthquake. The children survived. However, lack of food and water are threatening the life of the children again. In the orphanage, there are about 80 babies between ages of 0 and 2 years.

Reported –
Received an email from Gladys. They're all fine. They are staying in a house in the same neighborhood.

St. Philomena Rehydration Hospital (a project of Nos Petits Freres et Soeurs/St. Luke Program)

Medical Facility · Open

Hospital
500 meters from the American Embassy next to gheskio, Tabarre
Web www.nphhaiti.org/index.php?lang=en
Hours 24 / 7
Service Temporary

LTEL 11/13/10

NOTE: This hospital is NOT a 'CTC – Cholera Treatment Center'. It is nearby to the MSF CTC & designated to take overflow in their Tent Field Diarrhea Clinic.

It is listed in the Dbase as a 'CTC' strictly to keep it in the preset link for CTC's.

12/11/10: Assessment from Fr. Rick Frechette
Began seeing patients Nov. 15, 2010
To date have treated 900 cholera patients / 10 fatalities since that date
Pts. last week: 25; 2 fatalities last week.
No. of patients have stabilized.
Does not have educational material however community is receiving info
STAFF: has rec'vd Cholera training 2 docs, 6 nurses, 8 aux. nurses
Isolation units have been established in Tabarre, Wharf Jeremy, Croix des bouquets and Ganthier
Pts are referred to MSF Tabarre
Pts have traveled from as far as the DR border
Road accessible
WATER SOURCE: water well/ purified with culligan filters
Needs: IV fluids, IV catheters, Serum oral

October 31, 2010
Between a Rock and a Hard Place

Father Rick Frechette, Director of Nuestros Pequeños Hermanos/Nos Petits Freres et Soeurs (NPH/NPFS, Spanish and French for “Our Little Brothers and Sisters”) Haiti

EXCERPT: http://www.friendsoftheorphans.org/s/769/inner.aspx?sid=769&gid=1&pgid=252&cid=2449&ecid=2449&crid=0&calpgid=61&calcid=719

"We have covered about two acres of land next to the St. Luke hospital with gravel, and we set up so far 4 of a total of 15 large tents, where we will receive cholera patients. We have set up a diarrhea clinic there, where our staff will evaluate anyone with diarrhea, without them needing to go into either the St. Damien or St. Luke compounds. After screening, if it is likely cholera, we will bring them nearby to Doctors without Borders Cholera site. When they have reached their capacity of 250 beds, we will begin receiving the patients in our tents. We have a capacity for about 300 people".

November 9, 2010
Fr. Rick in HaitiFather Rick Frechette, Director of Nuestros Pequeños Hermanos/Nos Petits Freres et Soeurs (NPH/NPFS, Spanish and French for “Our Little Brothers and Sisters”) Haiti

EXCERPT: http://www.friendsoftheorphans.org/s/769/inner.aspx?sid=769&gid=1&pgid=252&cid=2449&ecid=2449&crid=0&calpgid=61&calcid=719

"We were very fortunate that Dr. Jeff from Ohio came with IV catheters that you put directly into the bone. We flew a team to Port–de–Paix yesterday to teach the sisters and their staff how to use it. So many small children have cholera, and it is nearly impossible when they are so dehydrated to find a vein for IV".

Fr. Rick Frechette
National Director NPFS Haiti

Friends of the Orphans:

Our Response
Cholera treatment in Haiti is being provided by Nuestros Pequeños Hermanos/Nos Petits Freres et Soeurs (NPH/NPFS, Spanish and French for “Our Little Brothers and Sisters”), which is supported by Friends of the Orphans. In addition, supplies are being delivered to various affected areas. NPH/NPFS is prepared to receive up to 400 patients at a tent site next to the St. Luke family hospital.

Support Needed
According to Fr. Rick Frechette, CP, D.O., who oversees all the NPH/NPFS programs in Haiti:

"What we need mostly are the IV catheters that go directly to the bone. The drills that put them in the bone are expensive. The catheters are $100 U.S. each. We sent what we had to the sisters in Port–au–Paix. We need about four more drills and 1,000 catheters for starters. We can buy these at a hospital in Ohio and get them here immediately. Even with the discounts we get, we still need about $90,000 total to buy these items."

Services offered: CHOLERA Epidemic Supplies * (ANY/ALL Types); Medical, Facility, Camp, Medical Camp; Medical, Facility, Capacity, Hospital Beds; Medical, Facility, Cholera, Cholera Treatment Center (CTC); Medical, Facility, Cholera, Rehydration Center (CTU or UTC)

SAS: Code pink
(on a regular supply delivery w/Sow A Seed)

FROM THE SITE:

Yahve–Jire Children's Foundation (Yahve–Jire CF) is a non–profit organization founded in 2006 in Croix–Des–Bouquets, Haiti. Yahve–Jire Children's Foundation began as a children's home resulting from the efforts of the founding board which includes; Chedlin Justinvil (Director), Daniel Auguste, and Michael J. and Victoria Stewart. Yahve–Jire is translated as Jehovah Jireh, which means "The Lord who provides". Funding for the orphanage is currently provided by Western Boulevard Presbyterian Church (WBPC) in North Carolina. WBPC sends $1000 per month and this is what the Yahve–Jire Orphanage is currently surviving on. Recently, Yahve–Jire Children Foundation has teamed with Worship 24:7 a non–profit (501C3) in the US to begin fundraising efforts, so that eventually the Orphanage, School and entire facility will be self–sustaining.

God has called us to establish Yahve–Jire Children's Foundation to aid in the healthy development of at–risk children. Yahev–Jire achieves this by addressing the direct development of the children as we provide them with shelter, families, health care and education that is providing for their spiritual, physical emotional, and academic development.

Yahve–Jire CF is working with the community in helping find ways to address their economic needs. Yahve–Jire CF does this by providing agricultural intervention, job and business training, and by helping entrepreneurs find investment capital to finance their businesses as a way to create jobs in their community.

Yahve–Jire CF works alongside the communities in building advocacy groups that enable the poor to influence government policies affecting their community and their lives.

Croix–Des–Bouquets, Haiti is a city in the Ouest Department of Haiti. Yahve–Jire CF began its work in Croix–Des–Bouquets in 2006. Croix–Des–Bouquets is located 12.9 kilometers (8 miles) to the northeast of Port–Au–Prince, the capitol of Haiti. It is one of the poorest suburbs in the metropolitan area. Croix–Des–Bouquets inhabitants live on subsistence farming and small scale cattle and pig production as a source of income. Croix–Des–Bouquets lacks basic health care, schools, infrastructure, financial services and capital necessary for business investment.

The first activity of the foundation is Yahve–Jire Orphanage. Yhave–Jire Orphanage is a program that provides a home and a family for 14 orphans and abandoned children. They are under the love, affection and care of three godly mothers and two godly men.

In April of 2008, Yahve–Jire Orphanage moved to Tabarre, Haiti. Tabarre is in the same condition as Croix–Des–Bouquets but they do not rely on farming as the area is mostly a suburb with housing. People living in Tabarre are there because it is a bedroom community. The orphanage moved because they needed more room and better living conditions for the children. The new rental house is cheaper than the original and is much larger, which allows the orphanage to also operate a school.

The orphanage is currently under a 5 year contract to rent the house in Tabarre, and has plans to build a permanent facility within that time frame. To find out more about the vision and plans of the orphanage, visit the projects page.

Services offered: Advocacy, Economic Justice for Impoverished Populations; Facility: Orphanage; School, Mission School
Campaigns: 2010 Haiti Earthquake; 2010 Haiti Earthquake, Orphanages/Childrens Homes; Sow A Seed
