Local Authorities Lead Efforts for Tsunami Debris Response

Posted by Elise E on Jul 5, 2012

As tsunami debris from the disaster in Japan makes its way to Oregon beaches via the Kuroshio Current, local and state officials are making preparations to dispose of and respond to the debris.

Nehalem Bay State park is one of 15 state parks along the Oregon coast that will have a supply of SOLVE clean–up bags and a debris collection box for free debris disposal. Seventeen municipal transfer stations will also be stocked with bags and debris collection boxes. Locally, CARTM is leading the coast in providing recycling as an option for tsunami debris. All debris must be identified before being deposited at drop sites and transfer stations. Click here to find a map showing the locations of the various drop sites for free disposal.

Perry Sherbaugh, Chief at Nehalem Bay Fire and Rescue said that while the state parks and the Oregon Department of Environmental Quality are taking the lead on responding to tsunami debris, if someone finds something that appears to be a hazardous material they should call 911. From there a duty officer at the fire department will assess the situation, cordon off the area and call the Coast Guard if necessary.

“Be smart. Call if you think it is a hazard,” Sherbaugh said. Hazardous materials may include chemical drums, gas cans or propane tanks.

Other potential reportable marine debris includes derelict vessels or other large debris items, mementos and possessions that can be traced back to an individual or group and have personal or monetary value. Garbage, like Plastic bottles, aluminum cans, buoys, Styrofoam should not be reported unless it is too large to carry to a disposal site.

Governor Kitzhaber has also announced that 211, generally used as a social services referral hotline, will be field phone calls regarding tsunami debris. Depending on the item of debris, call–takers may refer callers to the Coast Guard. Previously the 211 system was not available in Clatsop, Tillamook, Curry or Coos Counties. As they work out the kinks in this system, they encourage people to turn to their website oregonstateparks.org and email beach.debris @state.or.us with any questions.
