AERObridge [Emergency Aviation Response] [Florida to Haiti flights]

Volunteer Camp · Open

FL

Service Temporary

ATTENTION PILOTS: There is a great need for supplies and personnel to be flown into Les Cayes, Haiti. If you're able to fly into MTCA, we have a good deal of requested cargo and pax. Haiti is located 600 nm from Miami.

If after checking with your insurance company, unless you're
self-covered other than by convention insurance means, please reach out directly to Mike Harris at mharris @ aerobridge.org.

Aerobridge will not be fully activated, but we can help and make a difference during these difficult times.

different locations/clinics: https://www.zanmilasante.org/network

from the website:

"All services are virtually free within ZL's network of health facilities in Haiti. Patients need only pay a registration fee that costs less than US$2.50 (about 150 HTG). Thereafter, patients have access to a variety of services, including surgery, cancer care, family planning and other needs.

On March 11, 1996, Zanmi Lasante (ZL) was legally registered as a local nonprofit organization in Haiti. In 2002, ZL officially began working within the institutions of the Ministry of Public Health and Population (MSPP). Although Partners In Health, based in Boston, MA, has been operating in Haiti since the early 1980s, ZL is one of the largest and most successful nonprofit organizations in Haiti. ZL is one of the oldest non-governmental organizations working in Haiti, and has become one of the largest health care providers in Haiti. ZL's first health care facility was established in Cange in the Central Plateau, and since then has expanded its services to 15 public hospitals and clinics throughout the Central Plateau and Bas Artibonite, serving a direct population of 1.3 million people.

As a member of the OnePIH family, ZL is the first and largest established sister organization of PIH. As a locally registered entity, ZL has the autonomy to seek its own funding and has its own board of directors. ZL accounts for half of PIH's funding portfolio and receives technical, administrative, and financial support from the Boston-based organization. ZL and PIH work

closely together on funding opportunities and program management. Technical experts from ZL have also helped PIH set up programs in other countries, such as Peru, Rwanda, Malawi, and Liberia following the Ebola outbreak.

ZL follows the Haitian government as one of the largest employers in Haiti, with more than 6,600 employees, approximately 99% of whom are Haitian or of Haitian descent and 53% of whom are women. The majority of staff (36.91%) are Multipurpose Community Health Workers (ASCPs), consisting of 2,412 people, followed by operations staff (27.27%), or 1,826 people, and then nursing staff (15.72%), or 1,053 employees.

Although Partners In Health, based in Boston, MA, has been operating in Haiti since the early 1980s, ZL is one of the largest and most successful nonprofit organizations in Haiti. ZL is one of the oldest non-governmental organizations working in Haiti, and has become one of the largest health care providers in Haiti. ZL's first health care facility was established in Cange in the Central Plateau, and since then has expanded its services to 15 public hospitals and clinics throughout the Central Plateau and Bas Artibonite, serving a direct population of 1.3 million people.

2021 earthquake items needed:

Special Items Needed for Earthquake Victims
August 16, 2021 | 8:30AM

Dear Friends,

As we are getting ready to send supplies to the earthquake victims, we wanted to post some items that are desperately needed that you could send to our office or send funds to buy.

NO GIFT IS TOO SMALL.

We Need:

Large and small tarps, tents of any size. There are mostly large families, but any size tent is needed. T-shirts of all sizes, blankets, and sheets. Toiletries, soap, toothpaste, deodorant, washcloths, towels. I don't know if anyone has access to MRE's (meals ready to eat), but this would be great.

For Babies:

Diapers of any size, powdered milk. (We will buy water wherever we can en route.) Baby cereal, etc.

This disaster won't go away overnight, but the need is great now.

Send items or a check to:

Love A Child
12411 Commerce Lakes Dr
Fort Myers, Florida 33913

source: https://loveachild.com/news-archive/special-items-needed-for-earthquake-victims/

This site is bracing for Cholera spread and collecting supplies – They have a wishlist and very detailed information about their Cholera operations:

http://www.loveachild.com/blogs.php?id=journal&entry=lac-prepares-for-the-worst-regarding-the-cholera-epidemic

FROM THE WEBSITE:

The earthquake that rumbled through Haiti on January 12th at 4:58 PM left death and destruction everywhere. Hundreds of thousands of people are living in "tent cities" or on the streets. We have 360 families living in a tent city called Camp Hope on Love A Child land. The Lord laid upon our hearts the vision of getting these families in permanent shelter right on the Love A Child land.

After months of planning and researching, we have come up with a nice little wooden house to build for the earthquake families left homeless and living in Camp Hope.

We thank Joyce Meyer Ministries – Hand of Hope for $150,000.00 to build the first fifty houses, Phase One. After Phase One is complete, we are believing God that we will have the funds for the houses and infrastructure for Phase Two.

Anyone wanting to come on a construction team to build housing for the earthquake victims should complete a Building Team Application. The cost of the trip is $20 a day, payable to Love A Child, which covers transportation in Haiti and three meals a day. You may need to pay for a motel room to stay overnight in Miami so you can take the same flight as the rest of team to Port au Prince. Each team member is responsible for his or her own round trip airfare. If you have any questions or need additional assistance, please contact Jesse Ostrander at LACbuildingteams @aol.com. We need you!

We want to thank you for thinking about becoming a part of a Love A Child construction team! Building houses for the poor and displaced earthquake victims in Haiti is a crucial step toward getting these people back on their feet. The fact that you are considering a trip to Haiti to build permanent homes for these people shows that you have compassion for the poor!

Who should I talk to if I have any questions or concerns?
Team members or applicants can call, write, or email Jesse Ostrander, Love A Child's construction team coordinator at anytime.

Love A Child – Attn. Jesse Ostrander
100 Emerson Dr. NW
Palm Bay, FL 32907
Office: 321–768–2737 • Cell: 813–422–8575

October 18–23, 2010 – Mobile Medical Clinic and Ministry Team to the remote mountain village of Savaan Pit, Haiti. All participants must be in excellent health. Trip Fee is $350 plus cost of all transportation, hotel and required temporary insurance. Team's accomodations will be sleeping bags. Need 3 medical professionals. There is much work for everyone. – OPEN

November and December are unavailable because of the holidays.

If you would like to participate in a team or your church or ministry would like to take a team into Haiti to work, please contact Shar in our Florida office at shar @lachaiti.org or 813–621–7263. Please confirm dates with her before completing application/ forms. We will conduct one mission team monthly until our Missionary Training Center is built.

6:00 PM, Saturday evening...There are many different groups of people being fed at the same time. There are over 100 here in our orphanage. We are also feeding our Jesus Healing Center Staff, all the visitors and all the wounded. We are feeding approx. 1,000 in this immediate area, in addition to all those who come to get food to distribute in Disaster Areas...
We were told yesterday that we can expect 6,000 wounded to be coming in...

The D.R. has asked permission to set up a "refugee camp" (tent city), on our second piece of LAC land, adjoining our main property. We have heard that their plans are to have four major camps with 100,000 people in each one...and ours will be "one of those four." We hope that the D.R. sends in Security ASAP! Sherry

PS We want to thank the U.S.A. for their support of these poor Haitian people, as well as the Dominican Republic and all those who have helped, large or small. It is wonderful to see people helping people of all nationalities...all races... A Creole Proverb: "Anpil men, chay pa lou." "With a lot of hands, the load is not heavy."
Sherry

UPDATE ON EARTHQUAKE OPERATIONS:

http://www.loveachild.com/blogs/journal/january–19–2010–––5–pm–––latest–news–update.html

Tuesday afternoon...

We had a very long and wonderful meeting with a group of dignitaries from the Dominican Republic. We thought that it was the U.N. that wanted to come in with groups of doctors from all over the world and set up a huge clinic, but actually, it was the Dominican Republic who is heading this up, in cooperation with the Haitian Government.

Helicopters have been coming in and out all day long with the top people from the Dominican Republic and landing right here on our property in Fond Parisien.

General Pedro Pena Antonio, Chief of Armed Forces of the Dominican Republic, is working with Dr. Douglas Bournigal, from the D.R., to carry out this plan to help the Haitian people through Love A Child, under the direct authority of the President of the Dominican Republic. There are too many wonderful things about to happen to bless the Haitian people and we will be sharing these things as we go along. It's bigger than you will ever know!

The great thing about this is that when the Dominican Republic sends in this "Surgical Hospital" and doctors from all over the world, to treat the earthquake victims, then this will take this big pressure off the shoulders of our small staff here. We can then return to working in our Jesus Healing Center to meet the needs of the community here in Fond Parisien, as we had been, before the earthquake.

We are so thankful for Joyce Meyer Ministries – Hand of Hope for sponsoring this Clinic 100%, which has already saved many lives.

In addition to our being able to go back to operating our Jesus Healing Center for the Community again, we will have the best doctors in the world, coming right here to Fond Parisien to help these poor people! This disaster has really opened Haiti's plight to the eyes of the entire world! To God be the Glory!

Our deepest thanks to the generosity and compassionate care from the Dominican Republic to the suffering people of Haiti.

Here is a photo of Bobby and me with General Pedros Pena Antonio, Chief of Armed Forces of the Dominican Republic.
Thank you, partners, each and everyone of you, for your sacrifices, your prayers and your support for Love A Child in helping these poor, poor people in their time of greatest need.

God Bless You,

Sherry

CRUDEM being supported by a CRUDEM in St Louis: https://www.archstl.org/350–volunteers–pack–113000–meals–for–haitians–6744

This site acted as a "Cholera Treatment Center – CTC"

6/23/11: Posted on CHHN group by Ted Kaplan

We have received the following clarification on methods of referring patients to Hopital Sacre Coeur to be evaluated and/or operated on by visiting surgical teams (check our calendar for dates of these teams):

HSC and CRUDEM recommend the referring person send an email with all of the patients you have to refer to Mr. Raymond Delnatus jdelnatus@yahoo.fr and copy Emmanuella (in charge of clinics) emmbeliard@yahoo.fr , Dr. Charlemeau (CEO) bernesc@yahoo.fr , Dr. Previl (medical director) haroldprevil@yahoo.fr , and CRUDEM President Dr. Peter KellyLPPJS@aol.com .

Msr Delnatus usually responds within 24 hours with an appointment. He will try to arrange one early in the week of the surgical team so that there is time to schedule the patient if surgery is needed and able to be done. If the case is urgent then just call Msr Delnatus on his cell phone (3782–6823). He is also the one to address with requests for reductions in fees due to financial

hardship. We are expecting a fee schedule, and will post that when we receive it for your reference. Please note that children up to age 5 are treated for no charge.

If you have general concerns about this, you can address them with CRUDEM president, Dr. Peter Kelly LPPJS@aol.com

12/12/10 Lpar Note:
CHHN is no longer tracking. Last update Nov. 25th: well stocked and not requiring any assistance.

Subject: Hopital Sacre Coeur, Milot, Haiti

Dear Dr Wilson,

Could you please add the CTC at Hopital Sacre Coeur in Milot on your map and list of CTC sites? We have a CTC with the following characteristics:Triage independent of the hospital,rooms for different levels of care,sanitation and waste management policies, staff exclusively allocated to the center.

As of Friday November 19th, we had received 214 patients with cholera at the CTC at Hopital Sacre Coeur in Milot. 160 have been discharged,12
died,42 are now in the quarantine area. We anticipate that the number of cholera patients will increase drastically this week now that the road between Cap Haitien and Milot has reopened.

Many thanks for all you are doing to help coordinate the response effort,

Denise Kelly

Community Health Services Programs
As the only reliable medical provider for 225,000 people, Hôpital Sacré Coeur places tremendous emphasis on public health education and preventative care. In 2008, the Community Health Department experienced unprecedented growth with a 45% increase in patient visits. By giving individuals and families knowledge and skills, we empower and encourage them to take control of their lives for a healthier future.

Nutrition Center
If they show signs of malnourishment, children visiting the hospital as outpatients are referred by a medical professional to the Nutrition Center program. Located on the north campus across the street from the hospital, the Nutrition Center cares for an average of 23 infants and toddlers each day.

On Monday through Friday from 8:30 to 1:30pm, each child receives two balanced meals, nutritional snacks and vitamin supplements. On Fridays, the children are sent home with a small provision for Saturday and Sunday. Organized games, physical exercise, singing, dancing and storytelling promote healthy stimulation and relationships. Children are also toilet trained and coached in proper hygiene. Progress is tracked closely and regularly to prevent any recidivism. Mothers or guardians take part in monthly health education programs geared toward proper health maintenance and preventative care.

Over the past three years, more and more children referred to the program, live outside the village of Milot and are unable to make daily trips to the center. Each month, approximately 52 children receive weekly dry rations. Hurricanes in the fall of 2008 caused a temporary expansion of this service to over 85 children.

Mobile Clinic
Rough terrain and a severe lack of transportation makes it often impossible for many in the region to visit Hôpital Sacré Coeur and receive the care they desperately need. In October 2003, the hospital launched a Mobile Clinic operation in response to this challenge. Two teams of medical professionals travel throughout the countryside and bring preventative care and treatment to confined and isolated persons. One mobile clinic team consists of a nurse mid–wife and public health nurse that provide pre–natal care and HIV testing and counseling. The other team includes a nurse practitioner, family practice resident and health promoter that provide primary care services. The Mobile Clinic teams cover eight sites on a regular schedule for 5–6 hours per day and make approximately 100–200 patient visits per week. In 2008, there were 1,190 Mobile Clinic patient visits!

HIV/AIDS Prevention
A program to prevent the transmission of HIV/AIDS from mother to child, as well as provide voluntary counseling and testing programs, began in September 2005 in conjunction with the Catholic Medical Mission Board (CMMB). In August 2005, Hôpital Sacré Coeur began participating in the anti–viral treatment program called the AIDS Relief Project to treat entire families affected by HIV/AIDS. Under this grant program (currently funded by Catholic Relief Services and the CMMB), Hôpital Sacré Coeur's is serving hundreds of individuals. CRS and CMMB funding for this program will end in 2009.

Blood Bank
In the spring of 2005, Hôpital Sacré Coeur began operating a much needed regional blood bank. Patients from the region as well as area dispensaries and a smaller area hospital make regular use of this facility. The Red Cross provides the hospital with the necessary equipment, supplies, staff training, and funds required to pay the salary of one technician.

Filariasis Project
The Filariasis Project addresses the prevention and treatment of the secondary effects of the microfilaria parasite, which causes the disease more commonly known as elephantitis. Filariasis has been found in 20% of the student population living in the region. Hôpital Sacré Coeur is the referral center for this program, treating 1,100 people per year.

Immunization and Vaccination
The hospital conducts an immunization and vaccination program (infant, early childhood, and adult) plus health education programs for outpatients suffering from specific medical conditions (e.g., diabetes).

Family Life Center
Hôpital Sacré Coeur places tremendous emphasis on public health education and preventative care, particularly with youth. Community Health staff gives lectures in the eight secondary schools in the region. To date there have been 22 presentations on pregnancy, HIV/AIDS, and sexual behavior. A new Family Life Center offering innovative and effective Natural Family Planning grew beyond our wildest dreams in its first year and demand for its services continues at an exponential rate.

2021 Haiti Earthquake:

https://www.gaskov.org/gcf–earthquakerelief

On August 14, 2021, a 7.2 earthquake devastated the Southern region of Haiti. Our Thoughts and prayers are with our family and friends in Le Grand Sud, Haiti!

Our commitment remains unwavering and we are here to serve our community.

GCF is currently assessing the needs to prepare a sustainable strategy in response to this devastation. In the meantime, Klinik Fonfred will deploy a special wound care unit to work alongside other respondents in Les Cayes. The clinic will continue to receive patients in Fonfred. We will also come up with a plan to repair the damaged wall at Klinik Fonfred, as seen in the video on this page.

As a member of the Haitian Diaspora Emergency Disaster Unit (HDERU) platform, we will collaborate with other organizations to synergize on providing relief to those impacted effectively. This is a significant undertaking as it will take a concerted and well coordinated effort to respond to this disaster effectively.

How can you help?

You can donate towards the purchase of water, food and other in–country logistical resources. We will also use part of the funds to repair Klinik Fonfred's damages. Haiti's Prime Minister's office just released their updated needs assessment. A translated version of the needs assessment will be published during the week of 8/17/2021. Meanwhile, the Government of Haiti is being very strict about what supplies get into the country.

You can send items on the list below at:

Fire Station 1

200 NE 1st Street

Boynton Beach, Florida 33435

Materials needed for shelter.

Almost all existing houses are destroyed or affected. People are sleeping outdoors. The following are most needed to provide some types of temporary shelters.

Sheets

Tents

Suture materials

Topical antibiotic (mupirocin)

Oral antibiotic (Cephalexin)

Pain medication

IV Fluids

Cane

Walker

Orthopedic materials (casts, immobilizers, tourniquets, Gurney)

from the website:

GCF works in Southern Haiti, in the district of Les Cayes, a very populous and underserved rural area with some of the country's worst health indicators. GCF serves a catchment area of approximately 600,000 people through yearly health missions from the United States. It uses the local health system and collaborates with two local hospitals to provide supplemental surgical and preventive care to an average of 3,000 patients a year. From 1999 through 2010, the medical missions tendered to nearly 20,000 rural families. In addition, GCF has recently found it increasingly necessary to contribute to relief efforts in Haiti and did so for both earthquake rapid response period as well as the current Cholera Outbreak that is dangerously spreading across the country.

Within weeks of the devastating January 12, 2010 earthquake, in addition to operating the core Mobile Clinic, GCF rotated over 100 medical volunteers over a four weeks period, in Port–au–Prince and its surrounding town to offer much needed health and wound care to victims in tent cities and remote towns.

FROM RELIEF WEB:

Convoy of Hope and its in–country partner ready to respond to cholera outbreak in Haiti
Source: Convoy of Hope (COH)
Date: 28 Oct 2010

Springfield, Mo. –– As health officials in Haiti work to control an outbreak of cholera, Convoy of Hope and its in–country partner, Mission of Hope, are monitoring the situation and making preparations to respond.

"At this time we stand ready to send in additional sawyer water filters to affected areas where we have a presence through our feeding programs," says Kevin Rose, field operations director for Convoy of Hope. "Mission of Hope is also prepared to go into communities to set up rehydration centers in churches and schools in affected areas."

More than 200 people have died since the outbreak. Officials and aid organizations fear the cholera could spread rapidly in the tent camps in and around Port–au–Prince where 1 million people fled after the earthquake in January.

"Convoy of Hope and Mission of Hope are preparing for the worst, but expecting the best," adds Rose. "We'll continue to monitor the situation and respond accordingly."

A three–year strategy for Haiti

Convoy of Hope President Hal Donaldson shares highlights of the organization’s three–year strategy for Haiti

It’s been three months since a devastating earthquake struck Haiti. More than 200,000 people were killed and 1 million were left homeless. Though the weeks since the earthquake have been trying for the Haitian people, your generosity has given countless families in Haiti the strength to move forward and rebuild their lives.

For that, I thank you. By partnering with us you have enabled us to:

* Provide more than 8.5 million meals

* Serve 1 million people

* Distribute 4 million of pounds of food, water filters, hygiene kits and other supplies to Earthquake survivors.

Before the earthquake struck, we were already feeding 11,000 school children each day in Haiti. Part of our three–year strategy is to expand our children's feeding initiative to 45,000 kids.

The daily meal we provide is sometimes the only food these children receive. In other words, when we feed children, we play a part in keeping them in school where they are learning to read, write and do math. It's a worthwhile investment because the children of Haiti are the future of Haiti.

Another part of our three–year strategy is to continue sending food, water filters, shoes, hygiene kits and other supplies to Haiti. These valuable resources will not only help us expand our feeding initiative, but they will help our partners expand their work, too.

We've also committed to helping rebuild schools and community centers so that the Haitian people can become more self–sufficient. By equipping the people with tools, training and resources, we are ensuring they have the means to live better lives.

Our promise to you is that with your continued help we will remain in Haiti feeding hungry children and helping their families and communities for many years to come.

Thanks for caring enough to make a difference in our world.

Hal Donaldson

Shelter Cluster Notice 2/25/10:

Dear all:

The Latin American organization Un techo para mi País will construct 20 houses this weekend in Grand Goave, with the participation of 200 volunteers from different countries of Latin America. This are the first houses of a four year plan that includes the building of 10,000 houses in Haití.

We would like to invite you to join us.

For more information you can contact Gonzalo Talavera at 011(509)3423–1788

Best wishes.

FROM THE SITE:

Haiti: When it stops being news, where will you live?

On Tuesday 12 January was a terrible day for the history of our continent. Haiti, the most excluded and impoverished in Latin America, was rocked by an earthquake measuring 7.3 degrees on the Richter scale with estimated effects of over 150,000 dead and over 30% of the affected population. According to the UN, the strongest and most complex disaster that has had to face.

The disaster in Haiti is unimaginable magnitude: the conditions under which they lived and thousands of families have seen in the images that flood the news are inhumane. They were before. Today the pain, fear and despair that have settled in the streets of Port outweigh any idea that one can get the distance.

A Roof for my Country had as objectives for this year the first formal advanced Haiti with the idea to start towards the end of the year the project implementation. The earthquake forward our plans, but we do believe that we have the possibility, and therefore the responsibility–to generate immediate actions that represent an aid deal with this disaster. The younger generations of the fifteen countries where we have defined the spirit of our institution, characterized by force, energy, willingness and readiness to recognize the dignity of thousands of families living permanently in a non–emergency extension is acceptable. We hope that the regrettable situation that we face today is a big shake up for everyone to work for a permanent solution to Haiti, which does not comply with the conditions again we knew before the earthquake.

The last two years our organization participated in four episodes of natural disasters, in four different countries. In each of them we learned that after the disaster no longer news, it is very difficult to move from a partnership of first necessity to a true reconstruction of the affected area. That's why we have designed an action plan that considers an emergency operation, ready to be launched barely exceeds the health and safety crisis, and a permanent intervention that is considering opening an office of our institution in Haiti. Our mission is to support Haiti's reconstruction through emergency housing solutions associated with other basic sanitation facilities and access to water. Furthermore, it paves the way for future plans to integrate social empowerment with the goal of becoming a sustainable community, with the deep involvement of young Haitians in rebuilding their own country.

Through these lines reiterate the call to support us in the reconstruction of Haiti through our website, www.untechoparamipais.org and become part of this effort.

Claudio Castro Claudio Castro
Director Social Un Techo para mi País Social Director A Roof for my Country

Volunteers

In A Roof for my Country the volunteer is more than a resource that allows us to achieve our aims: the institution. The volunteer is one who built day by day with their motivation, their questioning and their will. It is his strength that gives our organization a spirit of giving that characterizes it. Therefore, their formation is another of our goals. Through volunteering, UTPMP mobilize awareness in young people, the construction of citizenship and the right and responsibility they have to fight for justice in our society. How do I participate?

* In the construction of emergency housing.
* In the plans of social empowerment.
* In different areas of support such as

o Administration and Finance
o Allocation
o Research Center
o Communication
o Construction and Logistics
o Training and Volunteering
o Legal

o Resources
o Children

Service	Permanent

"Alabama Fly–In": Saturday May 7th

As we have all seen the destruction caused by the violent Tornadoes in Alabama late last week, many have asked how they can help. As a General Aviation Pilot you can support those effected by the Tornadoes in a unique way. While FEMA and the Voluntary Organizations Active in Disaster (VOADs) have done an excellent job so far there are still requests for aid from organizations that are distributing straight to the affected people. Aerobridge has been asked to organize a General Aviation Fly–in to support the people affected by this disaster. This give us, as General Aviation Pilots, a chance to show that small airplanes should be considered part of the solution and not part of the problem. It also demonstrated the value of municipal airports as a lifeline to their communities.

Two airports (KTCL and KJFX), in the areas hardest hit, are being used as staging areas for supplies being distributed in the area. The organizations specifically asking for the specific needs below are listed and they will distribute the supplies.

Pilots are asked to fly in to either of the airports and bring whatever supplies they are able to which are on the list. Volunteers will be on site from 9am to 5pm on Saturday May 7th at both airports. One pilot we have talked to planned to make it a neighborhood response and advertise that neighbors could clean out their kitchens and closets of old pots and pans and children's clothes and drop them at their home and then fly them in on Saturday.

Current Work in Haiti
Facilitating Connections
We are continuing our efforts to assist non–governmental organizations with their missions to rebuild Haiti and support the recovery phase of a disaster. We are connecting different groups in an effort of cooperation and facilitation.

Passenger Transportation

The free flights via General Aviation aircraft are expensive and are utilized in a judicious manner. They are needed in the Immediate Response phase of an emergency. Since Haiti is now in the Recovery phase, these aircraft are no longer available and other more economical transportation methods must be utilited.

Therefore, we are assisting groups with a more economical transportation to Haiti via a $275 negotiated rate with Insel Air from Miami to Port au Prince. The number of seats per flight at this rate is limited, so requests must sometimes be flexible. We are not an agent of Insel and receive no financial benefit for assisting with flight requests. We are simply extending to groups a rate that might benefit them.

We are also working with Bahamas Habitat and RAM to establish an air ambulance service within Haiti. This service is currently being evaluated and we will provide more details when available.

Cargo Transportation

In cooperation with the U.S. Navy, we periodically have access to space available on U.S. Navy ships bound for Haiti. We assist non–governmental organizations in point to point logistics incorporating the military space available shipping. All supplies are based on a priority needs assessment compiled from numerous non–governmental organizations.

Through Lift, we have access to numerous cargo transportation options to Haiti at a reduced rate. Airfreight rate is .82/lb with AmeriJet from Miami to Port au Prince with service daily. Shipping via 40ft container from Miami to Port au Prince is slightly less than $4000 all inclusive.

The Humanitarian Alliance, a group of Japan and US based non–profit organizations and corporations, is working collaboratively to develop a supply chain that will allow three different avenues for individuals and corporations to contribute by donating dollars and requested supplies.

Avenues to direct resources will include the following:

1) Cash Donations for Direct Bulk Purchase In Japan Through an International Wholesale Chain (for $2,000 you can purchase a pallet of diapers) CLICK HERE TO VIEW WHOLESALE ORDER FORM

2) Product Donations to a Central Warehouse in Tokyo Which will Feed into the local Distribution Network.

3) Donations of select products (only those requested and able to clear customs) in the US that will be transported via air cargo/ ocean vessel from Los Angeles to Tokyo to link with the Local Distribution Network.

By far, the fastest, most responsive method for donation to best service the people of Japan is number 1. Cash Donations for Direct Bulk Purchase In Japan. The system is in place and the Eagles Wings Foundation is helping to coordinate the donations so your contribution is tax deductible AND that ONLY the requested and most urgent items are purchased and available on the ground in Japan within 24 hours of your donation being made.

This method of Direct Bulk Purchases streamlines the process of giving in many respects. The products they receive are familiar and written in their own language, there are no customs or duty issues, the Japanese people have continued employment and the groups receive them within 24 hours after the purchase is made and is therefore responsive to the changing dynamic needs of the people of Japan.

In the next week, a few trial runs should be completed and we can put out more information on donation avenues 2 and 3 (listed above) including lists of supplies that can be collected in the US and shipped to the warehouse in LA for distribution. For right now, we want everyone to encourage their friends, family and corporations that want to give to Japan to give now through the link above.

Once you have made a donation you will receive an acknowledgement letter from AERObridge and for donations over $1500.00 you will receive an invoice of items purchased.

Thank you for supporting the people of Japan in this critical time!

350 volunteers pack 113,000 meals for Haitians
CRUDEM Foundation project aims to serve people in desperate need

Submitted August 14, 2021 | 9:01 PM

Nicholas Sheppard held a bag while other volunteers added rice, pinto beans, freeze-dried vegetables and vitamins for six servings. The bag was then sealed and placed in a box.

Over a two-hour shift, 350 volunteers assembled the nutrition food packets at Chaminade Preparatory High School on Aug. 14, which will be shipped to Hôpital Sacré Coeur in Milot, Haiti, for distribution to the neediest people in Haiti's northern region. The aim was to pack 100,000 meals or more for the neediest people there, and they ended up with 113,000.

It's part of a project of the CRUDEM Foundation, begun by St. Louis physician Dr. Theodore "Ted" Dubuque, Jr. in 1993 to support Hôpital Sacré Coeur. The foundation has a social ministry run by two Sisters of St. Joseph of Peace, Maureen Boggins and Ann Crawley. Extreme food insecurity and famine relentlessly overtake much of Haiti — and that was before a 7.2 magnitude earthquake that struck the island Aug. 14, the same day as the "packathon" at Chaminade. Haitians who are blind or infirm, orphans and infants — the focus of the sisters' outreach — are particularly vulnerable.

Nicholas, a sophomore at Clayton High School, was accompanied by members of his youth group at St. Francis Xavier ("College") Church in St. Louis. "It's an opportunity to help people and have a good time," he said. "I know Haiti is going through a hard time. This helps a little bit — we're doing something really good."

Erin Dunlap came with her husband, Darren, and three children, ages 9, 11 and 15, all of St. Peter Parish in Kirkwood. She learned of the effort through the Notre Dame Club of St. Louis and instantly knew it would be a good family project. They helped stack the bags and put them into boxes, already on box eight after about 45 minutes of work. Her son, Patrick, a St. Louis University High School student, said: "I like that people are coming together for one big goal to help people in need."

Dr. William Guyol, a physician in St. Louis and Immacolata parishioner, was a local organizer of the packathon. He said "because of the recent unrest in Haiti, there's been a lot of price inflation. People simply cannot afford their meals. The economy is almost at a standstill. Things are tough."

Guyol typically spends time at the Haitian hospital twice a year but has not visited for a year because of COVID-19 precautions.

The average Haitian lives on approximately $2 a day, often eating just one meal of beans and rice a day. There has been additional issues recently after Haiti's president, Jovenel Moise, was assassinated on July 7. The country currently has no working parliament and only a handful of elected senators. News reports stated that the earthquake Aug. 14 killed at least 300, but thousands were injured or missing. The death toll was expected to rise.

Over a two–hour shift, 350 volunteers assembled the nutrition food packets at Chaminade Preparatory High School on Aug. 14, which will be shipped to Hôpital Sacré Coeur in Milot, Haiti, for distribution to the neediest people in Haiti's northern region. Photo Credit: Joseph Kenny

In addition to the volunteers, the St. Louis effort raised just short of its goal of $50,000 to aid in the food distribution and assist the ministry in Haiti, though some additional donations were expected. "St. Louis has always been generous to the CRUDEM foundation," Guyol said.

Assisting with the operation was another nonprofit, Feed the Hunger. The food was put in a shipping container that was to be trucked to New Jersey, placed on a ship and delivered within a couple weeks to the Port of Cap–Haïtien, about 30 minutes from Hôpital Sacré Coeur.

The people of Haiti are "happy, joyful and have a wonderful faith," Guyol said. "They are full of gratitude for what they have though they have virtually nothing compared to you or me."

The event was dominated by volunteers from Catholic parishes and schools. Archbishop Emeritus Robert J. Carlson led an opening prayer, citing a Gospel passage from Matthew 25 and telling the volunteers that by feeding others they're feeding Jesus. "We share our life and love with the people of Haiti," he said.

Lucas Licker, a Chaminade freshman, came with his mom. "I enjoy helping others," he said. "Haiti is in a bad situation, and I'm happy we're in a situation where we can help."

Anastasia Rybakova, the mother of a Chaminade freshman, said that she's from Kurdistan (a region in the Middle East), and "we experienced a revolution just as in Haiti now. I sympathize with these people and want to take care of them. So many people here are ready to help. I'm really impressed."

Helping Haiti

Hôpital Sacré Coeur is the largest private hospital and public health provider for the 250,000 people living in the Milot region of Northern Haiti. Hôpital Sacré Coeur was established by the Montreal Province of the Brothers of the Sacred Heart in 1968.

In 1986, St. Louis physician Dr. Ted Dubuque spent six months as a volunteer surgeon at the hospital and established the operating room there. The mission, called Project CRUDEM, included the hospital and was started by the Brothers of the Sacred Heart. When the religious community could no longer support the hospital, Dubuque and his friend, St. Louisan Carlos Reese, took over management and financial responsibility by forming the charitable CRUDEM Foundation in 1993, with major support from Annunziata Parish in Ladue and the Order of Malta. The hospital has become a premier health care provider in Haiti, gradually expanding from an original six beds to more than 200.

In 2012, the Holy Name Medical Center Foundation of Teaneck, New Jersey ("Holy Name") became the sole corporate member of CRUDEM. Management of Hôpital Sacré Coeur is the responsibility of its Haitian leadership team, assisted by several U.S. technical advisors provided by CRUDEM.

Outreach is done through the Community Health Service, with public health nurses and community health workers serving a number of sites in the region and reaching 150,000 people with vaccinations, pre–natal care, basic hygiene and nutrition training, and HIV/AIDS, tuberculosis, malaria and lymphatic filariasis treatment.

For information or to assist CRUDEM, visit crudem.org.
