PRESS RELEASE FROM THE SITE:

CURE INTERNATIONAL RESPONDS TO CRISIS IN HAITI

Medical Relief Team on the Ground in Haiti; Organization's Hospital in Dominican Republic Ready to Accept Patients; Organization Establishes Fund to Aid Efforts in Country

Lemoyne, Pa. January 15, 2010: CURE International, a U.S.–based nonprofit organization, has responded to the urgent need caused by the earthquake in Haiti.

"We are extremely saddened by the earthquake in Haiti, and our prayers are with the suffering people of this country," said Dr. Scott Harrison, CURE's founder and CEO. "We are now responding to the crisis. Because CURE operates a hospital in the Dominican Republic and sends medical teams to Haiti on a regular basis, we are uniquely positioned to provide both the immediate emergency medical care that is needed and the additional care that will be needed in the weeks and months to come."

Here is a summary of CURE's relief efforts:

• A CURE relief team is in Port–au–Prince. The members of the team are: orthopedic surgeon Dr. Scott Nelson, pediatrician Dr. Dielika Charlier, nurse Lucia Hernandez, nurse Susan Beemer and the executive director of the CURE International hospital in the Dominican Republic Steve Bostian.

The team has set up a base in the city and is now providing urgently needed medical care to injured victims. The team expects to begin performing surgeries tonight. Others are expected to join it in the days to come.

• CURE International's hospital in the neighboring country of the Dominican Republic is ready to provide acute orthopedic surgical care to hundreds of Haitians coming across the border. CURE's hospital, located in Santo Domingo, is but 160 miles from the epicenter of the disaster, the closest specialty hospital equipped to treat these types of injuries.

• The organization has established a relief fund for those who wish to contribute to CURE's emergency medical assistance efforts to victims of the earthquake.

People can give in one of two ways. They can donate online at helpcurenow.org/haitirelief.

They can also give a $10 gift from their mobile phone by texting CURE to 85944. (The charges will appear on their cell phone bill.)

About CURE International
CURE International is a nonprofit organization that transforms the lives of children with physical disabilities and their families in the developing world through medical and spiritual healing, serving all by establishing specialty teaching hospitals, building partnerships and advocating for these children. Since 1998, it has treated more than 1,000,000 patients and performed more than 70,000 life–changing surgeries.

Services offered: Demographic Served: Children; Demographic Served: Disabled, Persons With Disabilities; Demographic Served: Survivors, Natural Disaster Impacted Communities; Donations, Disaster Fund; Information Resource * (ANY/ALL Types); Information Resource, Online Networking, Blog; Information Resource, Online Networking, Facebook Page/Group; Information Resource, Online Networking, MySpace; Medical, Services, Medical Care * (ANY/ALL Types); Medical, Volunteer, General, Medical Volunteer Services; Medical, Volunteer, Surgical Volunteer Services; Training * (ANY/ALL Types of Instruction)

OMS Clinic – 2010 Haiti Earthquake (MEDICAL TEAMS/CLINIC/COUNSELING/ FOOD DIST.)

Medical Facility · Open

Cap Haitian

Web www.onemissionsociety.org
Serves Cap Haitian, Port, Haiti
Service Permanent

Since the evening of Jan. 12, life for those living in Haiti has drastically changed. The 7.0 earthquake that rocked the capital city of Port–au–Prince and the surrounding areas caused more than 150,000 deaths. Hundreds of thousands are now homeless and without food or water. It has been a heart–wrenching time for many as loved ones' bodies have been inhumanely dumped into common graves out of sheer necessity.

In the midst of this indescribable devastation, thousands of relief workers from many countries have poured into Haiti to bring hope to those who are unable to help themselves. Our One Mission Society team, based in Cap Haitien, (approximately 150 miles north of Port–au–Prince) has joined many other mission organizations to show Christ's love by taking food, water and supplies to the needy. Our missionaries in Haiti have transported several large trucks filled with rice, beans, sugar, water and cooking oil, along with needed medical supplies. A trip from Cap to Port takes seven hours one way due to the poor road conditions, yet they continue to send truckloads of supplies almost daily.

We have a medical clinic set up near Port. OMS sent in a medical team of 11 on Saturday, Jan. 23. During the first day, they treated 256 people, and 20 people accepted Jesus (many Haitian Christians, including six our seminary students and staff, have come alongside the workers to share the Good News). In day 2, the medical team treated 311 people, with 11 conversions. The team is staying in the OMS guest house, known as "The Villa." We have several more medical teams planning one–week to 10–day trips in the coming weeks. These include: 14 leaving on January 30, 9 leaving on Feb. 3 and 9 leaving on Feb. 9. We have not scheduled more trips beyond this as we are waiting to hear what the field requires. Please pray for these medical personnel as they minister to these hurting people.

OMS also has a medical clinic in the north in Cap Haitien. We are seeing our patient load increase daily because of displaced survivors from Port that are fleeing to Cap, Haiti's second largest city and a major center of ministry for OMS. This migration has created a food problem in the north, so we are now providing food through our Emmaus churches (the denomination that OMS works with in Haiti) to feed thousands of people.

In February, we will begin sending in trained trauma and grief counselors. Prayer is vitally needed. Pray for all those who are working in these heartbreaking conditions, assisting those who survived. Pray for the scores of people who have been left without family, home or food. Pray earnestly that God will continue to enable the many Christians in the country to show the love of Christ and lead people to faith in Christ, which will give them hope for the future. We will also be monitoring the emotional, mental and spiritual needs of our OMS team. It is almost impossible to describe what they are facing daily.

Our radio station in Cap, Radio 4VEH continues to be used of God to bring hope and comfort to the many listeners who have depended upon this station for up to 50 years as their main source of news and Christian programming. The station is fulfilling a vital ministry at this time. It has been broadcasting in Port daily from 10 p.m. to 1 a.m., in addition to its schedule in Cap. Please pray with us that God will supply the additional funds to buy the fuel needed to keep the station on the air for these additional hours.

In addition to your prayer support, we continue to need your financial assistance. We are using the money to buy much–needed food and medical supplies. As God directs you, would you send a generous gift to OMS today to enable us to continue helping in Haiti. You can give online or you can mail your check to: One Mission Society, P.O. Box 1648, Monument, CO 80132. Please mark your gift for project #405120.

11/29/10 Email from Greg Parker CHHN Team Member
I was around Cap today. Talked with father Andrew and Sister Rosemary who are noth connected with the Azile. I am going to try and visit there tomorrow morning. The Azile's cholera treatment is confined only to their own people. They are not receiving outsiders. What I learned from Sister Rosemary who works there daily is that the brothers were transporting all severe kids to Milot because of some connection they had made there. I told her and will discuss with them that that is too far and they need to go to the Gymnasium. This will also significantly help the issue they are stating in regards to transportation. Also the gymnasium has an area reserved just for children who have noone with them so these kids could go there. It sounds like Father Andrew wants to have a doc that could watch the sick ones there, but from a sanitation aspect and care aspect I'm not sure how good an idea this is when there is a facility nearby and medical personnel could be used at facilities seeing more patients. I will update after I visit the site tomorrow.

Also, Hannah found out that Handicap Intern'l is providing services in Cap Haitien and will get with them tomorrow.

Also, Dr. Kaplan suggested the possiblity of Healing Hands getting involved.

11/27/10 Action for CHHN team member
Call Handicap International – Carole Dubrulle – Health/Disability Coordinator – hial.santehaiti@yahoo.fr 3491 5518
to see if can coord. transport for Cholera patients.
11/27/10 Note made by Lpar
Dr. Kaplan advised Father Andrew to only treat patients that could be treated with ORS and send the rest to the CTC's in the area. Father Andrew's response was:
The brothers are doing that already. They have been transporting the patients to nearby hospitals.
They have access to medicine and IVS..
The Brothers are understaffed now because everytime they are bringing the patients to the hospitals, some of them have to stay with the patients because they need special attention due to their handicappies (some are mentally unstable). Plus, these brothers have to tend to the facility. They do all the jobs their including feeding hundreds of handicap children and adults.
But we appreciate any helps for now.

11/27/10 From Father Andrew
the facility is calle Azile Communal at Saint Filomine (at the back of the Catholic Church of Saint Filomine) Everyone knows the Azile there.

The contact person is Fr. Henry– he speaks english (filipino as well)..number is 34213502..

we hope to get a doctor there so we can just CONFINE the patients inside the facility..and avoid the risk of more exposure..if we can contained the patients inside the facility I think it will be helpful to the Missionaries.

if you have doctors on the ground there, let them call me at 37651324..
I am sending our parish –lone student doctor there on monday is there's a flight available.. but i will need him soon as well as cholera cases are becoming apparent in the community as well.

11/27/10 Post for Confirmation on HEAS by Amy
Missionaries of the Poor is running a handicapped children/adult facility in Cap Haitien.
"Their center is ravaged with cholera (5 reports of death already)....a doctor will be a miracle for them!"

Sent to me from friend Fr Andrew Labatorio – 3765 1324

Can anyone on the ground call to confirm details & report back to the group?

Hey, gang, the cholera epidemic has hit many parts of the north, and HELP IS NEEDED NOW.

Particularly the following supplies:
IV normal saline or lactated ringers, with tubing and catheters
water purfication tabs or small systems
sanitization supplies and materials
antibiotics, especially doxycyline and cipro (and erythro for children)

Volunteer medical personnel(especially nurses) who can come help support Haitian medical personnel with administering oral and IV hydration to affected inpatients are urgently needed too.

Rick Sante of ALFA is receiving and arranging transport (air and by Royal Caribbean) from Miami. He tells me today that some boxes have come unlabeled or mislabeled, so please label your donated boxes clearly with a list of what is inside, and address either to a particular clinic/organization (that is expecting this and can help with transport) or to the Cap Haitien Health Network, c/o:

Richard (Rick) Sante
Airlift Flyers Aviation LLC (ALFA–AERO)
10815 NW 33rd Street Miami FL 33172 USA
ph: 305–470–1500 (M–F 8am–8pm)

Please also email a note with these same details to me so we will be aware of what is in the pipeline.

Thanks for your help, Ted Kaplan, MD

The Cap Haitien Health Network using a Yahoo group for group communications. http://health.groups.yahoo.com/group/caphealth/

Files are posted on the Yahoo Group about using this database for supplies as well as a list of the Network Members.

Supplies from Project Cure and DRI will be available near the end of Sept.2010 Watch notification on Cap Haitien Health Network Yahoo Group. If you need help getting on the group, contact Laura at capbham @aol.com

The For Haiti with Love clinic is just beyond the old water tower at the entry to the Hotel Beck.

FROM THE WEBSITE 1/14/10:

Earthquake Update
Thank you for your prayers and concern.
For Haiti with Love is center on the North Coast of Haiti so we were only "shaken up" but not damaged by the earthquake. Roseline and Presume are in Florida until January 25, flights permitting.

Our ministry need is $$ –– we have additional medical supplies ordered for the clinic and praying for the funding to cover those. From past experience we KNOW that we will be seeing injuries – one way or another some will make it from Port au Prince to Cap Haitien to find free medical help – we need to be ready.

All focus is on the south around Port au Prince, but the north is having major issues with rain and more rain meaning mud, land slides, etc. They have had rain all during December and forecast is for another big storm. We need prayers and feel our best service is to remain focused on the north, handle the ever increasing number of patients to the clinic and those who will be coming from Port au Prince.

God Bless.

January 20, 2010
http://pressherald.mainetoday.com/story.php?id=310109&ac=PHnws

CAP HAITIEN, Haiti — Women and children crowd up to the door of the Justinian Hospital's pediatric outpatient clinic, waiting to see the health agent, who can help them with basic needs such as vaccinations or checkups.

Inside, a newer power backup system keeps the lights on at night, even during the frequent blackouts. The hospital was able to put away the kerosene lamps it had been using – a serious danger around the oxygen used for patients.

And in a neonatal intensive care unit, family members watch over quiet babies in incubators, as doctors talk to parents of new patients.

"Every bit of equipment in there is from Maine Med," said Nate Nickerson, executive director of Konbit Sante, a Portland–based nonprofit that has been working for nine years to help improve northern Haiti's health care system through its work at the Justinian Hospital and a clinic at Fort St. Michel, Cap Haitien's poorest neighborhood.

In fact, signs of Maine are everywhere in the Justinian Hospital.

Hospital Status reported from:

How You Can Help

Your mission, if you accept, is to join with me or one of our partnering groups on a medical relief trip to Haiti. Contact us with your availability and special interests, and we will work with you to find a meaningful mission for you. If you have other team members you would like to bring, we will find a program that can accommodate them.

We are also looking for subspecialists that are willing to take email consultations from Haitian physicians and mission teams about cases in their specialty. Of course, you are most welcome to come in person, as well.

If you are interested in volunteering your time, there are trips available with reputable organizations leaving throughout the year. Individuals and teams can be accommodated, and residency rotations are also available. Subspecialists are needed for email consultation with Haitian doctors and mission teams. Please send an email to info @missionpediatrician.org and we will contact you with more information. Merci, thank you!

Organisation des Handicapes de Fourgerolle

Open

Fort Saint Michele

Service Temporary

11/25/10 Posted on CHHN Blog
Greg, Juline and I visited Organisation des Handicapes de Fourgerolle, in Fort Saint Michel this afternoon. They provide a day centre once a week for 103 people with disabilities. They have a volunteer physiotherapist (outreaching from Action Sanitaire) who visits to provide some therapy input.

Their vision is to extend the day centre to five days a week to provide people with disabilities with:
– Psychological and peer support and are keen on addressing the barriers of stigma with disabilities in the community
– Education to help with employment options

– Input from doctors and nurses
– Food during the day

With regards to cholera

They are NOT providing treatment for cholera and they are NOT a medical centre/clinic. however, they are finding many of their 'patients' are coming to them for help with cholera symptoms as many taptap/taxi drivers will not take them to the CTCs. The facility are therefore helping families with payment for transport to local CTC (currently gymnasium).

Actions

We:
– Educated the whole team (6 staff) on WASH principles
– Emphasised importance of early treatment
– Informed them of the new ORP opening up in FSM (5 min drive away) (should be opening in 2–3 days) and showed them site
– Investigested together the new Oxfam/Konbite Sante WASH point 100m from their site – providing hand washing training, ORS (1 box daily at each point) and as from tomorrow treated water from communal tank.

– Gave them the contact number of Action Sainitaire to link with their psych team
– Contacted Oxfam to ask them to provide further WASH training so they can provide it to their clients.
– Contacted CBM to consider applyication of funding for Day Centre Project

11/22/10 Posted on HEAS by Carol Fipp
I received the email below from Bertho Aureius, baynoulebwa1@yahoo.fr, of the "Organisation de Handicapes de Fourgerolle" in Cap–Haitien. He reports that they need medical supplies. I do not have any details other than the email below. Unfortunately I do not know his exact location in Cap–Haitien, his telephone number or specific supply needs. Can anyone please assist him?

Greatly appreciated,
Carol Fipp

Fort St. Michel Clinic (MSPP clinic supported by Konbit Sante) "Cholera CTU"

Medical Facility · Open

Konbit Sante Cap Haitien Health Partnership; P.O. Box 11281; Portland, ME 04104; HAITI, Fort St. Michel

Phone	207–347–6733
Web	www.konbitsante.org
Checks payable to	Konbit Sante
Service	Permanent

12/30/10 Email from Nate Nickerson
Confirmed that they have been an official CTU for about a month.

12/27/10: Update from CHHN
Linking up with HHA, OXFAM, Action Sanitaire and MSPP employing health promotion and sanitizing campaign.
Needs Chlorox, soap, aquatabs and training materials

11/24/10 Email from Nate with Konbit Sante
MSF is looking to put a CTU annex to the Fort St. Michel Health Center, but there is a lot of community opposition at this point… Hopefully will be dealt with in the next couple of days.

Posted on HEAS 11/10/10

There have been a number of deaths in the community around FSM (Fort st michel), and I understand people don't want to stay at the gymnasium.

In 2003, Konbit Sante expanded its work to the clinic at Fort St. Michel. This well–organized public clinic is under equipped and under staffed to serve the needs of this impoverished neighborhood of 40,000 people on the edge of Cap–Haitien. There is no electrical service or safe drinking water in Fort St. Michel. Most homes are very fragile dwellings constructed on refuse and vulnerable to flooding. Tuberculosis is the leading infectious cause of death in the Fort St. Michel neighborhood.

Our Lady of Miracles

Medical Facility · Open

Gobert
Service Permanent

5/16/11 Email from Hannah CHHN
I have confirmed with MSF that they have set up the ctu again with all the necessary equipment. The MSPP will be providing 2 nurses as of tomorrow.

5/16/11 Email from Mary Lee Dorough
Just received an email from our doctor who runs the clinic in Gobert stating that they have another outbreak of Cholera with some deaths involved. They have a tent from Doctors without Borders, but need a nurse. His name is Dr. Librice and email is: drlibrice@hotmail.com
Gobert is not very far from Plaisance, and about 2 hours from Cap H. up in the mountains. If anyone can help him, that would be great!

4/19/11 CHHN Update from Hannah
Cholera: MSF left mid Jan, but CTC still in situ near clinic. No cases at this clinic as go straight to CTC.
Water: use well, no pump, not purified.

2/4/11: Email from Mary Lee
Arrival (hopefully!) 2/5/11, Departure 2/12/11 Team of 16, 2 Doctors, 7 R.N.'s, 2 pharmacists, 3 Dentists, 1 electrical engineer, and 1 Haitian interpreter from Nashville, Tn. Setting up clinic in Gobert, Haiti at Our Lady of Miracles. Anticipate seeing 1500 to 2,000 patients while there. Sponsored by St. Matthew Catholic Church, Franklin, TN through the Twinning Parish Program. Hope to do Cataract surgery on 50 pts. during the week.

1/3/11 Post on HEAS
Have a Dr. up there who is seeing 13 cases per day...one fatality was a child. Do not know what we will be facing when we get there. Hope to bring more IV fluids. Shipped some, but do not know if all has been used. Do not know what he is disinfecting with at present. Lots of unknowns at this point.

Centre de Sante Labadee

Medical Facility · Open

Commune Confirmed. Lpar 2/5/11, Labadee
Service Temporary

2/5/11 CHHN SNAC
3 cholera patients in nov, one more 2/2. (NOTE: Clinic not treating cholera patients, but MSF ORP connected to it)

2/5/11 CHHN Louissaint Maxime
I went to Labadee today just to check with the clinic and the water purification system.

Firstly I spoke with Meme Rosette, one of the two nurses working at the clinic.
She said to me there's one cuban Doctor there currently but she'll be leaving on 25 or 27 of February. She also said volunteers are more than welcome to assist the Labadee clinic, because the clinic's always full of people particularly now because they used to have two or three Cubans at a time.

With regards to the water purification system, I went to see the old building they used to use for communal access to treated water. It hasn't worked for over three years, the equipment is old and damaged. The system that was in place treated the water through uv rays, but the glass has been smashed.

Vwa Aiyti distributed water filters last year to the three schools and some of the most needy families in Labadee.

I didn't see the mayor of the village because his not in haiti right now.

4/19/11 CHHN update from Hannah
Cholera: 1-3 per month. Given ORS and sent to HHA CTC. One doctor, one nurse. Not able to keep patients overnight but CTC nearby.
Water: water well serves clinic and community. PURIFIED

1/3/11 CHHN Update
Not much change.
Requests 3-4 cases fluid, soap and ORS

12/27/10 CHHN Update
Seen a reduction in pts 0-2pts/day
Were providing ORS which CHHN had provided, but have run out. Still not making their own. Providing IVs where necessary still and ref. to OM or gym.

12/17/10 CHHN Update
ORP supplies given 12/17/10

4 boxes of LR and other cholera supplies
CHHN reinforced use of home–made ORS. This clinic not supported by MSF

12/14/10 CHHN Update
Starting seeing cholera patients Mid Nov.
Designated ORP.
Gets 4–5 pts./day max 10
Do NOT provide ORS, send straight to the Gym
Would benefit from more education on treatment and supply of ORS
STAFF: 1 doc, 1 nurse, 3 support staff
Can pick up supplies

11/27/10 Email from Hannah with CHHN re cholera epidemic
Lutheran are very close to an ORP opening up by MSF in FSM and of course the CTC in QM so they just need support in providing oral rehydration before referring elsewhere.

Happy to write you this on the behalf of the "Clinique Medical Le Lutherien" to submit to your attention the list for the meds, supplies and equipment needed as you have requested to all the network partners. Thank you for the great job you are doing in the midst of the Haitian people.

1) Address of the Clinic: Route Galman Du Plaa, Madeline Cap–Haitian (Eglise Evangelique Lutherienne du Cap–Haitien) Tel: 3476–2655/3756–5478/3448–2499.

2)People served in the community: 30,000 (Church, schools, Sewing Center, Clinic and the neighborhood)

3) People served in clinic: About 125 per weeks and sometimes over.

4) Needs in Medications:

a) Antibiotics: Ciprox co,– Amoxiciline susp. and pile,Metronidazole susp. and pile, Sulfaprim susp. and pile Cloxacilline susp and pile, Mebendazole susp and pile, cholroquine susp and pile, Ibuprofen susp and pile, Acetaminophen susp and pile.

b) Supplies: Gloves– cotton– alcohol– gaz sterile– Thermometers– Filling cabinet– Otorinon–laryngoscopie– Tensiometre– Unico–Spectophotometre.

c) Allergy meds–Coffing and cold meds– Antibiotic for yeast infection (Women deseases)– Vitamin for children, babies and adults– Antacid– Peptobismol– Acid folic pile– Vitamins c– Iron– Sulfaguanidine 500 mg– Antibio cream Antifongal Cream Adhesive– Seringue.

As many as you could provide in this list would be welcome.

Would appreciate your comments and questions about this list. Look forward to hearing from you as soon as you can.

Rev. Eliona Bernard!

3/5/11: Email from Dr. Eugene
We were able to serve another poor community named Nativity Village with sanitation supplies(Soap, Bleach and soap) last Monday

12/2/10 Assesment questions answered by Dr. Eugene Maklin
Haven not received any cases of cholera yet at the clinic
1 doc and 2 nurses
Can pick up supplies in Cap haitien
Roads are passable
Supplies needed are ORS, IV fluids, tubing soap, bleach, aquatabas, socy, cipro, Asith, Bactrim Erythromycin, Metronidazole

From Dr. Eugene Maklin
I work at that clinic every Monday. I didn't find any Cholera case
the last I was there. I have just talked with the nurse who work there
full time. She let me know there is a death at the village this week,

but it is not due to cholera, according to her. The person had been ill for many months.

I plan to distribute soap , clorox, Aquatabs to purify their drinking water on Monday. I will see if I can find some IV fluids and ORS, in case we find a case in the Nativity Village.

I will keep you posted,

Eugene Maklin MD

SOIL Clinic – 2010 Haiti Earthquake (Sustainable Organic Integrated Livelihoods)

Medical Facility · Open

Haiti, Shada

Web www.oursoil.org
Service Permanent

1/5/11 CHHN Blog
Thanks to AmeriCares we were able to distribute much needed ORS, IV sets and fluid, antibiotics, gloves, disinfectant, hand sanitizer, children's bandages and nutritional supplements. Madame Bwa and all the clinic staff where there to receive the supplies and were extremely grateful: the pharmacy is being restocked as we speak.

Before these supplies came the community of Shada was relying on Madame Bwa to make home–made oral serum day and night because of the poor access they have to treated water.

We also supplied some MSPP posters and creole educational info for the clinic staff

12/23/10: CHHN Update
Started seeing cholera pts. Nov. 13, 2010
Over 100 deaths last month
Needs bleach and ORS (HHA and Konbit Sante will be starting ORP program next week)
SOIL has put in water tank for hand washing

FROM THE SITE:

Cholera Outbreak Emergency Update
Submitted by leahnevada on Wed, 10/27/2010 – 12:25

Thank you for keeping us in your hearts as you read the news about the spreading cholera outbreak in Haiti. SOIL has the dubious honor of being one of the very few organizations or institutions actually treating human waste (as opposed to the typical practice of dumping it untreated into locations where it continues to contaminate the groundwater) and with this comes a serious level of responsibility. SOIL is taking every precautionary measure possible to contain the extent of the outbreak, including:

* Continuing to provide clean and hygienic sanitation services for over 20,000 people in the Port–au–Prince metropolitan region and 5,000 people in Northern Haiti.
* Setting up cholera information stations in every one of the thirty one camps in which we work in Port–au–Prince. A team of health promoters will be onsite to provide water treatment tablets and information on the closest clinic to seek medical care.
* Implementing new measures at SOIL's urban waste compost sites to protect groundwater and contain any possible contaminated waste.
* Setting up strict disinfecting procedures for all trucks entering or leaving SOIL's compost sites.
* Monitoring the availability of treated water and clean hand–washing stations at the camps where SOIL is working as well as the other camps throughout the city to ensure accountability in the provision of appropriate sanitation services.
* Working with the government ministry of water and sanitation (DINEPA) to set new standards for the containment of sites receiving human waste in light of the increased risk of cholera spreading from these locations.

In addition, in the past few days we have:

* Educated all SOIL staff who come into contact with human waste on safe practices for the safe treatment and disposal of waste.
* Visited every single family in every one of the thirty one camps in which we work in Port–au–Prince in order to pass out information on the prevention and treatment of cholera.
* Distributed 520 hygiene kits, buckets and soap to the most vulnerable families in the communities in which we work.

SOIL's cholera prevention team visits families in Port–au–PrinceThank you all so much for all your kind wishes and your support over the past few days and thank you to our friend Emily Johnston of Seattle who wrote us to say: “The first reason to think about

cholera in Haiti is basic decency; people are dying because of the lack of functional sanitation systems and a few pennies worth of oral rehydration solution. There is nothing acceptable about this." We couldn't agree more strongly. This devastating tragedy demonstrates all too poignantly how the lack of access to basic sanitation services is undermining the recovery effort in Haiti. As the director of our Haitian sister organization, SOL, Baudelair Magloire puts it: "Without health, we have nothing."

SOIL's Cholera Prevention Team visited every single tent in every one of the camps where we provide sanitation services within the first week after the announcement of a cholera outbreak.

Together we will fight this outbreak and together we will do everything we can to make sure nothing like this ever happens again. Thank you for joining us.

Sincerely, the SOIL team

Cap Haitien Network team member reports that Shada would like to add a lab so that they can properly diagnose their patients as the patients tend not to go to other clinics because they can not afford it. MONEY is needed to set up the clinic.
