FROM THE SITE 3/11:

FH responding
Food for the Hungry is responding in collaboration with Japan International Food for the Hungry (JIFH). JIFH staff is assessing the most urgent needs in Sendai. Initial response includes distribution of canned bread, rice and water. Sendai is a coastal city in northeastern Miyagi that suffered catastrophic damage following the 8.9–magnitude earthquake and resulting tsunami that struck Japan's northeastern area on Friday.

The head of the JIFH assessment team, Hirohisa Seike, expressed his initial reaction, "Be amazed at the size of the tremendous destructive power of the tsunami."

An FH partner on the ground relayed the gratitude of a local pastor searching for 60 church members out of 210 still unaccounted for. "When he heard that so many foreigners are coming to help, he could not help but cry. Thank you. That was followed by a simple request, "Please pray as we go."

From the InterAction site – 2010 Pakistan Floods

FH is working through a local partner, Interfaith League Against Poverty (I–LAP), who is responding in Nowshara and Charsaada Districts through the distribution of food, NFIs, tents and hygiene kits for 8,000 families.

Since 1971, Food for the Hungry has boldly served and spoken out for the poor, sending courageous men and women to help communities, by the power and grace of God, achieve sustainable, lasting transformation. Food for the Hungry is more than a relief and development organization. We are a tested, trusted and innovative partner who respectively walks with the poor in more than 26 countries worldwide while intentionally reflecting the love of Jesus.

Food for the Hungry goes to the hard places to bring hope to many who face seemingly hopeless circumstances. "God calls us particularly to those places of poverty that are hurting and often unstable," says Food for the Hungry President Benjamin K. Homan.

**Services offered:** Demographic Served:  Low Income Folks; Demographic Served:  Survivors, Natural Disaster Impacted Communities; Demographic Served: Sustainable Communities; Donations, Disaster Fund; Food * (ANY/ALL Types); Food Distribution, Emergency/Disaster Food Distribution; Internship Program, International; Jobs, Paying; * KITS, HYGIENE KITS; Medical, Services, Public Health Education / Awareness; Medical, Supplies * (ANY/ALL Types) ; Shelter, Supplies, Tents (For Disaster Survivors); Sponsorship Program, Children (Education/Health Care/Food, etc.); Support for "All" Disasters; Volunteer, Long–Term Volunteer Opportunities; Volunteer Opportunities, In General * (ANY/ALL Types); Volunteer Opportunities, International; Volunteers, Short Term Volunteer Opportunities

NEWS RELEASE: Operation USA to Aid Domestic Relief Efforts in Wake of Hurricane Sandy
FOR IMMEDIATE RELEASE

OPERATION USA TO AID HURRICANE SANDY RELIEF EFFORTS IN US

LOS ANGELES, CA (October 30, 2012)—Los Angeles–based International relief agency Operation USA announced today that it will provide emergency aid where needed across the Eastern Seaboard in the wake of Hurricane Sandy.

The storm, which has left millions of people without power and caused flooding through a wide swath of the nation's most populous region, has been described as the worst "superstorm" in 100 years, colliding with cold weather fronts from the west and north. Threatening roughly 50 million people in the eastern third of the country. President Obama has signed the state of emergency declaration in the District of Columbia, Massachusetts, New York, Connecticut, Pennsylvania, Maryland, Rhode Island and New Jersey.

Operation USA is ready to send essential aid where needed—from emergency, shelter and cleaning supplies, to assisting community health clinics restore services to best serve their communities.

The agency has previously announced that it is working to aid relief efforts in storm impacted Haiti and Cuba—focusing its efforts on providing access to safe water, support for long–time hospital and clinic partners. Operation USA staff in Haiti are assessing shelter, safe water, food and other needs.

HOW TO HELP:
Donate online at www.opusa.org, by phone at 1.800.678.7255 or, by check made out to Operation USA, 7421 Beverly Blvd., Los Angeles, CA 90036. Text AID to 50555 and donate $10 to Operation USA's disaster relief efforts.

Corporate donations of bulk quantities of disaster–appropriate supplies are also being requested. United and Continental air miles can also be donated to Operation USA through United Airlines Charity Miles program at www.united.com.

NEWS RELEASE: Tsunami Hits Japan After Massive Earthquake–OpUSA Prepares Aid

FOR IMMEDIATE RELEASE

OPERATION USA TO SEND EMERGENCY AID TO JAPAN FOLLOWING 8.9 MAGNITUDE EARTHQUAKE

LOS ANGELES, CA (March 11, 2011)—Los Angeles–based International relief agency Operation USA announced today that it will prepare to aid Japan as necessary as part of the relief efforts following the earthquake that hit last night.

The 8.9 quake, the most powerful recorded in Japan's history, struck 250 miles north–east of Tokyo, trigerring a massive Tsunami. The earthquake hit at 1446 local time at a depth of about 24km, causing great human loss and extensive damage to infrastructure.

Although the death toll is unclear, the first police reports indicate that approximately 300 bodies have been found. Many people are still missing.

Tsunami warnings have been issued across the Pacific to North and South America.
Operation USA appeals for donations of funds from the public. The organization also calls for bulk corporate donations of health care materials, which it will ship to the region from its base in the Port of Los Angeles.

HOW TO HELP:
Donate online at www.opusa.org, by phone at 1.800.678.7255 or, by check made out to Operation USA, 3617 Hayden Ave, Suite A, Culver City, CA 90232.

Corporate donations of bulk quantities of disaster–appropriate supplies are also being requested. Air miles can also be donated to Operation USA through United Airlines Charity Miles program at www.united.com.

NEWS RELEASE: Earthquake Strikes Chile–OpUSA Prepares Aid
FOR IMMEDIATE RELEASE

OPERATION USA TO SEND EMERGENCY AID TO CHILE FOLLOWING 8.8 MAGNITUDE EARTHQUAKE

LOS ANGELES, CA (February 27, 2010)—Los Angeles–based International relief agency Operation USA announced today that it will send medical aid to Chile as necessary as part of the relief efforts following the earthquake that hit last night.

The 8.8 quake hit off the coast of central Chile, about 200 miles southwest of Santiago, the capital. First reports count over 100 people dead, with numerous collapsed buildings and roads, phones and power grids—as well as tsunami warnings triggered as far away as Hawaii and Japan.

Operation USA appeals for donations of funds from the public. The organization also calls for bulk corporate donations of health care materials, which it will ship to the region from its base in the Port of Los Angeles.

HOW TO HELP:
Donate online at www.opusa.org, by phone at 1.800.678.7255 or, by check made out to Operation USA, 3617 Hayden Ave, Suite A, Culver City, CA 90232.

Text REBUILD to 50555 and donate $10 to Operation USA's disaster relief efforts in Chile.

Corporate donations of bulk quantities of disaster–appropriate supplies are also being requested. Air miles can also be donated to Operation USA through United Airlines Charity Miles program at www.united.com.

HAITI-NEWS FROM THE FIELD: 30 days later… A letter from Fr. Rick Frechette
On the one month anniversary of the January 12 earthquake, we wanted to share this letter from one of our local partners in Haiti–doctor and community organizer Father Rick Frechette. He and his small team have built an orphanage, medical clinics, street schools, and a pediatric hospital (St. Damien's Pediatric Hospital/St. Luke's Schools) that Operation USA is proud to support.

offices in both Los Angeles and New York

In Kind/Product Donations
One of the most compelling images of a relief operation is an air drop into a remote region of a poor country, or an area ravaged by natural or man–made disaster. That sturdy iconic crate carries far more than urgently needed supplies. It brings hope for the recipients—made possible by the generous corporations providing materials and support to make the delivery possible.

Operation USA's logo of a DC–3 airplane plays to that symbolism, but behind the symbol is the day–to–day running of a materials–based relief program and the importance of what goes inside the box. Our material aid program is dependent on listening to the needs of the communities we work with; reliable partners at home and abroad; and sending aid in the most expeditious and economical way. Over the past 30 years, we have matched materials with real–time needs around the world—delivering $350 million in relief and development aid to 99 countries.

Operation USA maintains a 24,000 sq. ft California Board of Pharmacy–licensed warehouse at the Port of Los Angeles and a 5,000 sq. ft warehouse in the Port of San Francisco where donated items are received, staged and stored. Our shipments typically include a range of donated materials, such as medical supplies and equipment, medicines and vitamins, education and shelter materials.

GET INVOLVED

Volunteer
SHINE Humanity is always looking for volunteers and interns to assist the mission both on the ground at the field office in California.

Field Volunteers
SHINE Humanity welcomes field volunteers. We have year–round opportunities for medical professionals and students. We suggest a minimum stay of 10 days, and will provide full ground support. To register with us, please fill out our on–line Volunteer Form. Once your information has been processed, our Volunteer Coordinator will contact you. Please rest assured that all of your information will remain confidential. For additional questions, please contact info@shinehumanity.orgThis e–mail address is being protected from spambots. You need JavaScript enabled to view it or call 714–389 9800.

Administrative volunteers & Interns
SHINE Humanity has openings for volunteers and interns. Volunteers and interns need to commit a minimum of 4 hours per week. Enrolled students with a declared major in Communication Studies, Business, Public Relations, Journalism or minor in any of these areas are welcomed. Student interns should have strong computer skills, be able to answer the phone and do basic administrative tasks as well as drive. Their responsibilities will be to support the administrative and communications team. For additional questions, please contact info @ shinehumanity.org or call 714–389 9800.

3/16/11 FROM THE SITE:

Japan Emergency: Helping Survivors

In the wake of the devastating March 11 earthquake and resulting tsunami, Japan is in a full state of emergency. The scale of the disaster continues to grow as the official death toll continues to rise, thousands are reported missing and more than 300,000 people have been forced to leave their homes. Entire villages have been washed away, basic infrastructures such as water and electricity are nonexistent and there is now threat of possible nuclear meltdown.

Relief International is providing support to and through local doctors on the ground now working in the city of Sendai in the most devastated Miyagi Prefecture. Local doctors are working around the clock to treat those seriously injured in hospitals, as well as setting up medical units where communities are seeking refuge temporarily. In addition to injuries caused by debris in the earthquake and tsunami, these medical teams will soon face diseases brought about by lack of clean drinking water. At present, the UN estimates that 1.4 million people are without safe drinking water, making humanitarian assistance an urgent matter. Miyagi Prefecture was inundated with the violent wall of water caused by the tsunami and where relief operations are just starting to reach those most in need.

FROM THE SITE/RELIEF WEB:

MCC shares resources to assist people in Pakistan
August 13, 2010

WINNIPEG, Man. – Pakistan's worst floods in 80 years have killed more than 1,600 people and disrupted the lives of more than 14 million – about 8 percent of the population.
About 2 million people are homeless and there are fears that outbreaks of water–borne diseases such as cholera could create a health crisis. These numbers are expected to rise as rain and flooding continue across Pakistan.

The floods, which began in late July after heavy monsoon rain over the upper reaches of the Indus river basin, have ploughed a swathe of destruction more than 1,000 km long from northern Pakistan to the southern province of Sindh.

“The floods have destroyed homes, farms, factories and the livelihoods of millions of people,” said Willie Reimer, director of Mennonite Central Committee’s (MCC’s) Food, Disaster and Material Resources program. “Many people have lost everything and are in desperate need of assistance.”

Although MCC does not have an office or staff in Pakistan, it has a history of relief and development efforts there, said Joe Manickam, director of MCC programs in Asia. Most recently, following the 2005 earthquake, MCC supported a large relief and housing reconstruction project implemented by Church World Service–Pakistan/Afghanistan.

“This is a major disaster of enormous magnitude and we want to walk alongside the people of Pakistan during this time of great devastation,” said Manickam.

As in previous disasters in Pakistan, MCC is sharing resources and finances with other like–minded, experienced organizations, such as Church World Service–Pakistan/Afghanistan, that are responding to emergency and humanitarian needs there.

In partnership with members of Canadian Foodgrains Bank (CFGB), a coalition of 15 church–based agencies in Canada, MCC is supporting projects undertaken by two member agencies, Christian Reformed World Relief Committee and Presbyterian World Service and Development, to distribute food kits.

MCC is contributing $20,000 toward the distribution of food kits to 11,000 vulnerable households in Balochistan and Khyber Pakhtunkhwa provinces, some of the worst–affected areas.

MCC also is sending a container of 2,000 relief kits to support the emergency response efforts undertaken by Christian Reformed World Relief Committee.

In partnership with members of the Canadian Churches in Action, a coalition of 10 church–based development agencies in Canada, MCC is contributing $2,000 for the purchase of tents. This is part of the coalition’s matching funds toward a $68,000–project supported by Manitoba Council for International Cooperation.

“Working in partnerships with church agencies allows us to combine our gifts, contacts and resources as we respond to this serious humanitarian crisis,” said Reimer.

MCC asks for relief kits, comforters, sheets for Haiti
Linda Espenshade
January 19, 2010

AKRON, Pa. – In addition to donations of money, Mennonite Central Committee (MCC) is asking the public to supply 20,000 relief kits, 10,000 heavy comforters and 10,000 sheets to be sent to Haitian earthquake survivors.

The supplies will help relieve the discomfort and suffering of Haitians who are sleeping on streets and in open areas because their homes are destroyed or because they don't trust the safety of the buildings that remain.

MCC's staff in Haiti and the initial support response team that arrived there Saturday are requesting these supplies as one way MCC can respond to the needs they see around them.

Relief kits include personal hygiene supplies, laundry soap, towels and bandages. People who donate kits are asked to provide complete kits with only the specific items on the list of relief kit supplies that can be found at mcc.org/kits.

The relief kits can be packed in a box or bag and delivered to any of the drop–off locations in Canada or the United States listed at mcc.org/kits/dropofflocations by Feb. 28. MCC will then repackage the kits in new, five–gallon buckets.

Heavy comforters and sheets also are being accepted at any drop–off location until Feb. 28.

MCC asks that the comforters be new and filled with quilt batting or a blanket for extra warmth. Twin–size comforters are preferred, but double/full–size comforters are accepted. Specific requirements are online at mcc.org/kits.

Flat sheets, which also will be used as mosquito netting, can be double–, queen– or king– size. Sheets, with at least a 300–thread count, should be new, cotton and light–colored, which is not as attractive to mosquitoes.

MCC is grateful for the generous financial gifts that people have given to MCC for the people of Haiti, starting just hours after the 7.0 earthquake devastated the poorest country in the Western Hemisphere.

Some of those funds are already at work in Haiti, being used to purchase food and supplies that are available there. MCC is airlifting 70,000 pounds or 31,750 kg of canned meat and 1,000 water filters into Haiti as soon as possible. Another shipment of at least the same amount of meat, probably more, will be sent by sea. MCC is also purchasing thousands of tents and tarps.

MCC is planning a multimillion dollar response over a number of years, focusing on rebuilding homes and livelihoods.

Donations to MCC's response in Haiti are welcome. They should be designated Haiti Earthquake. Donations can be made online or by telephone, toll free, 1–888–622–6337 (Canada) or 1–888–563–4676 (U.S.). By mail, donations may be sent to MCC and MCC U.S., P.O. Box 500, Akron, PA 17501 or any provincial office in Canada.

Linda Espenshade is MCC News Coordinator.

SD Fires Force Thousands to Evacuate
Heroes at MiraCosta College Host Evacuation Center

Fires reeked havoc around the San Diego County last week, with more than 300,000 people displaced and more than 1,000 homes lost in the National Emergency of the San Diego Fires of 2007. With all the destruction and loss, it is nice to know that empathy and care were at the forefront of the City of Oceanside and Vista who outpoured support for more than 250 people from neighboring Fallbrook and local areas displaced by the fires.

The MiraCosta College, under the leadership of John Hendrickson, offered their gymnasium and the Scientology Disaster Response Team opened the evacuation center on Monday night at the request of the San Diego Sheriff's office. By Tuesday night there were more than 135 people staying at the shelter with an outpouring of assistance from MiraCosta faculty, administration, students and the citizens of Oceanside.

The heroic efforts of the city of Oceanside, the city of Vista, the Red Cross and the Scientology Disaster Response Team along with hundreds of private citizens and local business create a virtual shopping mall in the MiraCosta gym fulfilling every need of the evacuees. The North County Humane Society provided crates, food, and veterinary care for more than 50 pets and volunteers aided guests with clothes, personal items, wheel chairs, entertainment while people waited to return home or find a new home.

Security was managed by the MiraCosta Police Department under the guidance of Chief Norcross and included mutual aide from the San Diego Sheriff's office, the DEA, the Border Patrol and the Oceanside Police Department. The guests were really impressed with the security and all the comfort provided by the college. One youngster was heard to say on leaving with her mom, "Do I really need to leave, I really like it here!"

The City of Vista provided a huge trailer of supplies from Costco and other local businesses like Denny's, Chick–Fil–A, The Olive Garden, Starbucks, Urban Kitchen, Islands, Take A Break, and many others provide meals for hundreds of people throughout the week.

The President of the MiraCosta College acknowledged the Scientology Disaster Response Team of volunteers for opening the shelter when no one else was able to help. Within 4 hours of the call, the volunteers opened the shelter and sent out the word for donations and help to the community. The Scientology Disaster Response Team gained recognition at the 911 disaster in New York, Katrina and tsunamis in the Pacific Rim and includes more than 50,000 volunteers worldwide.

David Meyer, President of the Church of Scientology of San Diego, acknowledged the efforts of MiraCosta College, the City of Vista, the City of Oceanside and hundreds of volunteers from all over the county saying "We all came together in the name of help and compassion for those in need. Mr. Hubbard, our founder, said 'Something can be done about it' and this is a great example of how San Diego reaches out and helps their neighbors proving that we all can help!"

One volunteer reported "It makes me proud to be a San Diegan. With all the disaster and chaos, there were so many people helping others!"

For more information on the Scientology Disaster Response Team, contact David Meyer at 619–239–2091.

EMI's Response to the Catastrophic Earthquake in Haiti

Update – February 19, 2010
Gary MacPhee is leading our fourth team of volunteers departing Monday, February 22nd and returning March 6th. They will be serving Compassion International and several local partners assessing over 40 damaged buildings for structural integrity. This team is stacked with California structural engineers specifically trained for post–earthquake damage assessment.

Please pray that this team would bless people by giving them the confidence to move back into safe homes, hospitals, clinics, churches, orphanages, and the like. Pray that they would gently release those who are still holding onto hope that their unsafe home could somehow be rehabilitated into the realization that they might need to start over. Pray that God would give Gary and his team the words to say in those times.

Pray also that, even as the demand for their services keeps them focused on their task, that they would not miss key opportunities to show the love of Christ at a critical time.

Help EMI's Effort

If you are interested in helping, please consider making a donation to cover the costs of these efforts at: https://emisecure.org/donate.html

From RELIEF WEB:

AmeriCares Airlifting Medical Aid to Help Flood Survivors in Pakistan
Source: AmeriCares Foundation
Date: 09 Aug 2010

Pakistan's worst flooding in 80 years has claimed at least 1,600 lives and has left more than 4 million people homeless. AmeriCares has mounted relief efforts, helping deliver lifesaving medicines and medical supplies for survivors in the region.

The medical aid is tailored for conditions common in the aftermath of a flood and will help treat people suffering from severe infections, malaria and dehydration. AmeriCares will airlift additional relief supplies to Pakistan in the coming days, including critical medicines and surgical items.

"The health care needs of millions of families affected by the devastating floods are overwhelming," said Christoph Gorder, AmeriCares senior vice president of global programs. "The floods wiped out crops, destroying the major food supply and livelihood in the region, leaving children and fragile elderly men and women vulnerable to malnutrition."

Local communities are still recovering from last year's armed conflict between the Pakistani Army and Taliban militants. Over two million innocent civilians were forced to flee during the conflict. Many families returned to remnants of rubble where their homes once stood, leaving them with little protection against the fierce floods.

"Washed out roads and bridges, hastily rebuilt during the aftermath of the Taliban conflict, have left large areas cut off from emergency relief," reports Gorder. "We are working with our local partners to ensure the delivery of medical aid in order to prevent a public health catastrophe."

AmeriCares emergency relief experts are working with local partners to deliver assistance to flood–affected communities. Since 1982, AmeriCares has delivered nearly $47 million in assistance to Pakistan including relief supplies ranging from medicines, medical supplies, equipment, health care facilities and nutritional support

From the InterAction Site: AmeriCares's Response to the Floods in Pakistan

AmeriCares is mounting disaster relief efforts in response to the flooding in Pakistan. We are delivering and distributing lifesaving medical assistance and emergency aid to flood–impacted communities. AmeriCares has been providing critical medicines, medical supplies, nutritional support and humanitarian aid to Pakistan since 1982. In 2009, we delivered urgent medical aid to

the Swat Valley to help populations displaced by intense fighting and in 2005; we built and equipped a transitional field hospital with medicines, medical equipment and supplies in the aftermath of the deadly earthquake in northern Pakistan. For more information, visit the site.

From the site – 2010 Pakistan Flood Response:

AmeriCares Sending Relief to Pakistan to Help Flood Survivors
August 2, 2010

Severe floods have killed over 1,000 people in Pakistan's vulnerable Swat Valley. Nearly one million men, women and children have been affected; many families are now homeless, stranded without water and medical care. In response, AmeriCares is mounting disaster relief efforts; sending lifesaving, emergency medical aid to the region.

A powerful monsoon brought torrential flooding to the devastated northwest region of Pakistan. Over a foot of rain fell in 36 hours, causing flash floods and overflowing river banks. Officials worry forecasted rains in the coming days could put thousands more families at risk and will hamper relief efforts.

Local communities in the Swat Valley are still recovering from last year's armed conflict between the Pakistani Army and Taliban militants.

"Washed out bridges, hastily rebuilt during the aftermath of the Taliban conflict, have left large areas cut off from emergency relief," reports Christoph Gorder, AmeriCares senior vice president of global programs. "Emergency medical aid is needed now in order to help avert a public health catastrophe."

Over two million innocent civilians were forced to flee during last year's conflict. Many families returned to remnants of rubble where their homes once stood, leaving them with little protection against the fierce floods.

AmeriCares emergency relief experts are working with local partners to deliver assistance to flood–affected communities. Since 1990, AmeriCares has delivered 84 shipments valued at more than $57 million in assistance to Pakistan including relief medicines, medical supplies, equipment, transitional field hospitals and nutritional support.

From the NYVOAD Member Directory:

Organizational Structure

Save the Children is an international not–for–profit organization whose mission is to create lasting, positive change in the lives of children in need. We provide a wide range of programs, including:
• Training new mothers with prenatal care
• Supplying life–saving immunizations for young children
• Building schools in developing countries
• Improving literacy and nutrition for children living in rural poverty in the U.S.

Disaster Program

When major disasters strike the U.S., Save the Children responds to the needs of children and families. In each emergency response, Save the Children's Domestic Emergency Unit structures its programs to respond to community needs. However, there are several areas on which we often focus our work:
Creating Child–Friendly Spaces– safe, designated areas where children can play socialize and begin to recover– in shelters and other gathering places, like disaster assistance centers.
Helping children and their caregivers reestablish a sense of safety and normalcy through our menu of disaster recovery and resilience–building programs. These programs also help children and caregivers build the skills to cope with their experiences.
Supporting organizations that children and families depend on, like child care and after–school programs, through small grants for recovery purposes.
Working with families living in temporary housing sites to create protective environments for children and improve access to services.

From the InterAction site – 2010 Pakistan Floods

The American Red Cross is helping people affected by flooding in Pakistan through a $100,000 contribution to the International Federation of Red Cross and Crescent Societies. To meet the immediate humanitarian needs from the flooding, the global Red Cross network is providing food, relief items, shelter, water and sanitation services and emergency healthcare. The American Red Cross continues to work with our Red Cross and Red Crescent partners to evaluate additional response options.

From the site – 2010 Pakistan Floods:

Mules Bring Relief to Pakistan's Stranded Flood Survivors

By Patrick Fuller, International Federation of Red Cross and Red Crescent Societies

Friday, August 06, 2010 — Pakistan continues to reel from the historic floods, which the UN now estimates have affected 4.5 million people. As the monsoon rains continue, the flooding is penetrating further south in the country.

The government ordered the evacuation of more than 350,000 people in Sindh province where new areas are expected be engulfed as swollen rivers fail to contain the vast body of water heading south toward the Arabian Sea.

In the northwest part of the country, the Pakistan Red Crescent Society continues to dispatch truckloads of food relief to desperate communities who have been forced from their homes by the floodwaters. For Atta Muhammad with the German Red Cross, reaching some of the worst hit areas is no easy task.

Atta works in the remote districts of Kohistan and Shangla in Pakistan's northern province of Khyber Pakhtunkhwa. These districts remain virtually cut off from the rest of the country since the floods swept down from the mountains six days ago. All the bridges in the area have been destroyed and no other aid groups are delivering relief in the area. Atta's team of volunteers is on their own and they face a tough task, but because they are based in the area they know the communities here well.

"The only way to reach the affected areas is by foot. But trying to get food to 25,000 people scattered in small settlements throughout these valleys isn't simple," said Atta.

The solution is a tried and tested means of traditional transport in Pakistan's mountain ranges: mules.

"Today we sent a week's rations by mule train to Olander village for 120 families. It's a ten–hour return trip and in the coming days we'll be doing the same for other villages."

Finding food for the ration packs hasn't been easy. Stocks of basic commodities such as wheat flour, rice lentils and oil have dried up in Kohistan and reaching the nearest wholesale market has been a major challenge.

"It took our volunteers eight hours to reach the town of Besham yesterday. They went by foot and used tractor trolleys and a manual chair lift to cross rivers where bridges had been washed out," explained Atta.

Tales from survivors recount a wall of water that swept through the valley taking with it many of the small settlements that once stood along the banks of the Khan Khwer River. Mohammed Abdullah and his four brothers could only watch as their homes and the green fields surrounding them were engulfed in the flash floods.

"All that remains is a pile of rocks," recounted Abdullah. "We are a family of 40 and now we are living in the house of a relative in a single room. The women and children are weeping and sobbing; they can't sleep at night and cry at the sound of any loud noise. I don't know what will happen to us. We have lost everything."

Over the next nine months, the collective global Red Cross and Red Crescent network plans to support the Pakistan Red Crescent Society in its plans to aid 35,000 families with relief items, emergency healthcare, access to safe drinking water, sanitation services and psychosocial support. As part of these efforts, 5,000 families are expected to receive basic shelter support in the form of tools and building materials. The American Red Cross is providing an initial $100,000 to support their ongoing relief efforts targeted at the most vulnerable populations, including women and children.

From the InterAction site – 2010 Pakistan Floods Response:

MAP International continues to monitor the situation in Pakistan and is coordinating with in–country health institutions and programs for the delivery and dispensing of medicines and medical services. Current support is directed through partners in D.I. Khan District, however additional areas will be included following the receipt of further field reports.

FROM THE SITE:

MAP International provides $10 million in medical supplies to Haiti relief

MAP International is continuing to provide medicines and medical supplies to help the people of Haiti as they begin what is sure to be a long recovery, following the massive earthquake that struck the island nation on January 12. Within 10 days of the quake MAP had medicines and medical supplies valued at $10 million dollars committed to the relief effort in Haiti. Much of this desperately needed cargo has already been received by medical partners in the country and more is currently in route to Port–au–Prince by air or sea.

On Monday Feb. 1, John Garvin, MAP's Director of Relief returned to the country for a second time to assess the need of our partners on the ground. On his first trip John delivered the first 14 boxes of medicines, wound care supplies, water filters and communications gear to Christian Aid Ministries, one of our long–term partners. At that time, he also successfully contacted some of MAP's other major long–term partners, assessing their needs and mobilization efforts.

MAP has a 40+ year history of supplying medical shipments to clinics and hospitals throughout Haiti. Because we make regular shipments to clinics and hospitals in Haiti almost $3 million dollars worth of regular support shipments to the country could quickly be diverted to the hardest hit areas. MAP was in a unique position get critically needed supplies out of its distribution center in Brunswick, GA and into the hands of health professionals already working in the country. These initial shipments were among the first to reach caregivers in the Port–au–Prince area.

Two Interagency Emergency Health Kits, which are large modules specially designed to provide crisis care for 10,000 people for three months, are set to ship to MAP partners already operating in Haiti. As conditions begin to stabilize and the country starts the rebuilding process, these shipments will help to provide for longer term healthcare needs of Haitians as they heal and put their lives back together.

Please continue to pray for the Haitian people and the aid workers who are serving them.

2010 HAITI EARTHQUAKE

Brethren Disaster Ministries
The Church of the Brethren is responding to the devastating 7.0 earthquake that shook Haiti's capital city of Port–au–Prince on January 12, 2010.

http://www.brethren.org/site/PageServer?pagename=serve_brethren_disaster_ministries_HaitiEarthquake

How to contribute to the relief effort in Haiti
The Emergency Disaster Fund is now receiving donations toward earthquake relief work in Haiti. Find the online donation page at www.brethren.org/HaitiDonations

A special web page "Prayers for Haiti" has been created for church members, congregations, and others concerned about the people of Haiti to express their prayers following the earthquake, go to www.brethren.org/HaitiPrayers .

An online updates page offers updates on the Haiti earthquake relief effort, find it at www.brethren.org/HaitiEarthquake .

Donations of relief supplies also are needed. Brethren Disaster Ministries is requesting donations of Gift of the Heart Hygiene Kits and School Kits, which will be in large demand in the area affected by the earthquake. The kits should be sent to the Brethren Service Center, P.O. Box 188, New Windsor, MD 21776. For instructions to make the kits, go to www.churchworldservice.org/site/PageServer?pagename=kits_main .

From the InterAction site:

CRS is organizing shipments of humanitarian aid to Balochistan, where the flooding struck earlier. The aid packages include water purification tablets, soap, cookware, jerry cans and more. In the areas of Kohistan and Shangla, CRS will provide emergency shelter kits and hygiene supplies. In several areas including Swat, CRS is also planning cash-for-work projects, paying people affected by the disaster to build irrigation channels, pathways and retaining walls. Communities have begun creating rope bridges to replace road bridges that were washed away.

From the site - July 2010 Pakistan Floods:

Floods Tear Through Northern Pakistan

During the last ten days of July, heavy rains caused catastrophic floods across large sections of northwest Pakistan. More than 1,500 people have been killed and at least one million people have been affected by the disaster, described as the worst flooding in Pakistan in almost a century. Raging floodwaters have washed away homes, bridges, schools, water systems and medical facilities. CRS is responding with shipments of humanitarian aid.

From the site - Work in Pakistan

CRS Work in Pakistan

CRS promotes peace, justice and reconciliation within Pakistan by improving access to food and credit, and by increasing the capacity of community-based organizations. Furthermore, CRS fosters harmony and collaboration between people of different faiths, supports education and human capacity development, and assists those unable to provide for themselves.

Pakistan has had issues regarding poverty, poor access to health care and education, and inadequate hygiene facilities, which were exacerbated by the October 8, 2005 earthquake that shook northern Pakistan. CRS has one major goal to serve the communities affected by the earthquake: to assist earthquake-affected rural families to rebuild their lives. Working with local partner organizations and Caritas, CRS has implemented four strategic objectives to achieve this goal.

* Earthquake-affected families live in a secure environment in their community of origin
* Earthquake-affected communities have improved access to water and sanitation facilities

* Earthquake–affected children have resumed their primary education in their communities of origin
* Earthquake–affected communities have resumed their livelihoods

In addition, CRS has strengthened its focus on nonformal education, care and support to people living with HIV and AIDS, and teaching people how to support themselves in the long term in drought–prone areas. Some specific examples of our other work include:
Drought Mitigation Program

The U.S. Department of Agriculture funds this program, which is serving over 21,000 individuals in the provinces of Sindh and Balochistan. The program improves people's access to water for consumption and production, with a particular emphasis on the role of women.
Nonformal Education

This program improves education opportunities for out–of–school children and adolescents in four provinces by developing stronger parent–teacher associations; creating nonformal schools to serve older and otherwise marginalized children, and training teachers in modern, participatory education methods.
HIV and AIDS Program

CRS has worked with local institutions and partners to provide nutritional, social and financial assistance to HIV–positive people, and trained health care providers to be sensitive towards patients with HIV and AIDS, who are often reluctant to seek treatment for fear they may face discrimination in health care facilities.

FROM Relief Web:

Lutheran World Relief responds to massive flooding in Pakistan
Source: Lutheran World Relief (LWR)
Date: 09 Aug 2010

Baltimore, August 9, 2010 — Recent monsoon rains in Pakistan have caused the worst flooding in the country in 80 years. The floods, which began in late July, have claimed at least 1,600 lives, left more than 700,000 people homeless and have affected nearly 14 million Pakistanis, according to official reports. Lutheran World Relief (LWR) is working quickly with partners on the ground to deliver critical relief to people affected by this crisis.

"These floods bring even more devastation to poor, and disaster prone, areas of Pakistan," says Joanne Fairley, LWR's regional director for Asia and the Middle East. "LWR is working with our partners to distribute vital aid to families coping with this disaster."

The provinces of Khyber Pakhtunkhwa, Balochistan, Punjab and Sindh were most heavily affected by flooding. With so many families left homeless, and more monsoon rains expected, the people of Pakistan are in dire need of food, water and shelter to survive this disaster.

LWR is a member of the ACT Alliance, a global coalition of churches and agencies engaged in development, humanitarian response and advocacy, and is supporting the coordinated ACT response in Pakistan.

ACT Alliance members are working on the ground to distribute emergency relief, including shelter items and food packages. So far, ACT members have reached 155,200 people in Khyber Pakhtunkhwa and Balochistan and are working to reach even more.

LWR is also partnering with International Relief and Development to send 3,300 quilts, 13,000 health kits and 1,500 layettes to help displaced families.

The floods hit as people living in this region were still struggling to recover from five years of successive major disasters, with many families still living in makeshift shelters.

In 2005, a massive earthquake devastated parts of Pakistan. 2006 and 2007 brought floods that claimed lives, destroyed homes and killed livestock. In 2008, another powerful earthquake rendered thousands homeless in Balochistan at the onset of winter, and in 2009 millions were displaced as a result of conflict between the Pakistan military and militants in Khyber Pakhtunkhwa and Waziristan.

Throughout these years, severe droughts and water shortage severely plagued the country's agricultural system and crippled its food supply. With this new disaster, millions of Pakistanis are in danger of going hungry.

Lutheran World Relief is accepting donations on behalf of the Pakistan floods. You may make a monetary donation online at lwr.org, by phone at by phone at 800–597–5972; or by mail at P.O. Box 17061 Baltimore, MD 21298–9832, USA.

In addition, those wishing to donate to LWR's quilt and kit ministries may visit lwr.org/beinvolved or contact LWR by phone, or e–mail at lwr @lwr.org, for more information.

FROM THE SITE:

PAKISTAN FLOODS
Emergency Alert – Updated August 13, 2010

Background:

Torrential rains, along with excessive water flow, continue to cause floods, overflow river banks and force thousands more from their homes in Pakistan where monsoon rains, which began in late July, are causing the worst natural disaster in the country in 80 years.

The floods, which began in northern parts of the country, have spread to four provinces, covering more than 50,000 square miles. As a result, the Indus and Chenab Rivers have swollen beyond their banks and have forced more than 700,000 people to evacuate their homes in search of safety and relief.

Relief workers are now concerned that people have insufficient access to sanitation and healthcare. The longer people remain without shelter, food or safe drinking water, the higher the risk for illness. With monsoon season ongoing, the number of people in dire need of emergency food, shelter, water and healthcare is likely to increase. So far, the flooding has claimed approximately 1,600 lives and has affected more than 14 million people in Pakistan, according to official reports.
LWR AND PARTNERS ARE RESPONDING

ACT logoLWR is a member of the ACT Alliance, a global coalition of churches and agencies engaged in development, humanitarian response and advocacy. LWR is supporting the ACT response in Pakistan.

So far, ACT members have delivered 70 tons of food to 500 households in Balochistan and Khyber Pakhtunkhwa and are currently preparing to deliver another 630 additional tons of food for 4,500 households in these provinces as well as in Sindh. ACT members will also dispatch 2,500 tents to Balochistan and Khyber Pakhtunkhwa later this week as well as deliver another 70 tons of food assistance to 500 flood affected families in the Allai District.

LWR is also partnering with International Relief and Development to send 3,300 quilts, 13,000 health kits and 1,500 layettes to help families displaced by the floods.

FROM RELIEF WEB:

Team headed for Japan
Source: Convoy of Hope (COH)
Date: 23 Mar 2011

A Convoy of Hope disaster response team is headed to Tokyo. They will continue the work of an initial team of responders, which was temporarily based in the Philippines and shipped to Japan enough food, water and relief supplies to fill a 40-foot-long container.

While in Japan, the team's primary goals will be to work through port logistics, ensure current channels are in working order and Convoy of Hope's footprint in Japan is expanded.

Help Convoy of Hope help Japan.

"Since the earthquake and tsunami we have been able to provide food and supplies, through our in-country partners, to meet people's needs," says Kary Kingsland, senior vice president of Global Initiatives for Convoy of Hope. "We will continue meeting needs and are dedicated to finding the most efficient ways to help many more survivors now and in the coming weeks and months."

Convoy of Hope's medical advisor, whose knowledge base will be a valuable asset to the team and the treatment of Japanese nationals, will accompany the team headed for Japan.

FROM THE SITE 3/12/11:

If the tsunami causes major devastation on the West Coast, Convoy of Hope will deploy teams and supplies to devastated areas.

Ron Showers, director of Global Outreach, is in Honolulu making preparations for an upcoming community outreach. Last night he left his hotel and moved to higher ground after tsunami sirens started to sound.

“Thousands of people fled the low-lying areas,” he says. “Gas stations were packed with people trying to get fuel, many locals and tourists fled to high ground and sought shelter in hospitals and high school gyms.”

Showers will monitor the situation in Hawaii after the tsunami hits.

According to Kingsland, the Disaster Response team will closely monitor further developments and move forward with plans to help the victims of the disasters.

Convoy of Hope is not seeking volunteers at this time.

Length of Stay: No Minimum Stay Required (Day/local volunteers are welcome.)
Maximum Team Size: There is no limit on team size for this response.
Skills Needed: Chainsaw skills are helpful but not required.

Project Description: Samaritan's Purse is responding to the most devastating outbreak of tornadoes in the state in more than 20 years. According to news reports, the storms killed at least 23 people statewide including 14 people in Bertie County. The state of emergency management director described the storms as "the most severe, wide-spread tornadoes we have seen since the mid-1980s." Governor Beverly Perdue declared a state of emergency for the entire state. Samaritan's Purse will set up in three locations in Central and Eastern North Carolina. Volunteers are needed for all three sites.

For volunteer project opportunities go to:

http://spvolunteernetwork.org/

NOTE - URGENCY NEEDS were pre-set to Tornado response! Items added for Hurricane Irene/Lee needs!!!

**Services offered:** Cleanup, Debris Removal, Volunteer Services; Construction, Rebuilding, Volunteer Services; Distribution, Clothing, For Disaster Survivors; Donations, Disaster Fund; First Responder, Carribean Region; First Responder, International; First Responder, Nationwide (All U.S. Regions); Food Distribution, Emergency/Disaster Food Distribution; Housing, Volunteer Housing * (ANY/ALL Types); Information Resource, Online Networking, Blog; International Disaster Response; Meals, Volunteers, Meals for Volunteers; Medical, Supplies * (ANY/ALL Types) ; Sanitation, Supplies, Water Treatment/Purification/ Filtration Supplies/Equipment * (ANY/ALL Types); Shelter, Supplies * (ANY/ALL Types); Sifters, Ash/Fire Debris Sifters; Support for "All" Disasters; Volunteer Opportunities, In General * (ANY/ALL Types); Volunteers, Groups of Volunteers (This facility accomodates Groups of Volunteers); Volunteers, Individual Volunteers (This facility accomodates Individuals Volunteers); Volunteers, Short Term Volunteer Opportunities; Volunteers, Teen Volunteers (This facility accomodates Teen Volunteers)

Earthquake in Japan: ACF Responding to Tsunami Threat in Philippines

Source: Action Against Hunger–USA
Date: 11 Mar 2011

Action Against Hunger's disaster prevention programs install early warning systems to help at–risk populations evacuate

CATADUANES, PHILIPPINES—In response to the threat of tsunamis resulting from the 8.9–magnitude earthquake in Japan, the international humanitarian organization Action Against Hunger | ACF International has launched emergency measures with local and national authorities to help more than 45,000 people evacuate from at–risk areas of Cataduanes, an island province of the Philippines.

Highly prone to natural disasters, the Philippines has worked to prioritize a series of risk management projects, and the current evacuations were made possible by the early warning systems that Action Against Hunger installed last year as part of this broader natural disaster prevention framework. "Action Against Hunger worked closely with the populations in the villages and barangays, installing radios and signal repeaters and preparing evacuation plans in the case of typhoons, tsunamis and other natural disasters, which made today's warnings possible," states Manila Suresh Murugesu, Action Against Hunger's Water & Sanitation Coordinator in the Philippines.

"At the moment the population has not begun to panic and is following the instructions provided by local authorities over the radio," explains Eric Fort, Country Director for Action Against Hunger in the Philippines. "Our own staff have now also taken refuge in the evacuation centers."

FROM THE WEBSITE:

In response to the earthquake on January 12th in Haiti, AJWS has created the Haiti Earthquake Relief Fund to send immediate emergency aid to communities affected by this disaster. Particular focus is being placed on aiding populations in the crisis zone that have not already been targeted for large–scale relief, such as poor and rural areas outside Port–au–Prince. AJWS's long–standing partnerships in the region have enabled us to send funding directly to our grantees in hard–hit areas on the ground who have the knowledge and capacity to spend the money effectively where it is most immediately needed.

How you can help
Create your own personal fundraising page for reaching out to friends and family to enlist their support for Haiti.

Make a contribution to AJWS's Haiti Earthquake Relief Fund. Your donation will go directly to:

•Support search and rescue efforts by community volunteers
•Provide food and shelter for survivors
•Provide emergency health services and education to help reduce the second wave of casualties due to wounds, contamination from corpses and human waste
•Clear roadways to facilitate rescue and distribution of emergency supplies
•Provide emergency psychosocial support to survivors
•Fund humanitarian aid being sent from the Haitian–Dominican community in the Dominican Republic that includes two mobile clinics, medical supplies, donations and volunteers
•Support longer–term recovery (in the months following the earthquake) including rebuilding of community centers, clinics and schools; replanting of crops and farms to reestablish the local food supply and provide a source of income; and support to community–based organizations' efforts to rebuild civil society.

Grantees on the Ground
Donations contributed to AJWS's Haiti Earthquake Relief Fund are currently supporting the efforts of 10 extraordinary grassroots organizations, which have mobilized to serve the needs of some of the most marginalized victims of the earthquake. These agencies are among AJWS's longstanding grantees in Haiti. They are working around the clock in hard–hit areas beyond the scope of large–scale relief efforts, mostly in poor and rural areas on the margins of Port–au–Prince.

KONPAY is gathering and distributing food from regional farmers and coordinating volunteers to provide shelter, medical assistance, food and water in Jacmel, a region south of Port–au–Prince.

Mouvman Peyizan Rankit (MPR) is coordinating emergency relief efforts and assisting with emergency replanting to prevent famine following the disaster.

Oganizasyon Gwoupman Peyizan pou Devlopman 8eme Seksyon Kominal Akaye is coordinating relief efforts and providing emergency health services including education about hygiene and disease prevention.

Movimiento Social–Cultural de los Trabajadores Haitianos (MOSCTHA) a grassroots organization based in the Dominican Republic, has reached Port–au–Prince and the nearby city Jacmel by traveling across the Haitian–Dominican border by truck caravan and boats. It is establishing mobile field hospitals, distributing food, medicine and temporary shelters, and providing disease prevention education and psychosocial support.

Partners in Health/Zanmi Lasante has mobilized the more than 120 doctors and nearly 500 nurses who work at Zanmi Lasante's sites. It has set up field hospitals in Port–au–Prince and has readied its facilities in the Central Plateau to receive the flow of patients from the disaster zone.

The Lambi Fund of Haiti is supporting peasant groups to obtain food and essential provisions. With AJWS's support, Lambi will respond to communities' immediate needs and conduct reconstruction initiatives such as repairing rainwater cisterns, rebuilding grain mills and sugar cane mills, and helping farmers obtain agricultural materials.

Mouvman Peyzan Bayone 2eme Section Communale des Gonaives is coordinating relief efforts and providing emergency health services including education about hygiene and disease prevention.

Red de Encuentro Dominico Haitiano Jacques Viau (REDH–JV) is organizing the Haitian and Haitian–Dominican population in the Dominican Republic to provide humanitarian emergency aid in the communities of Jacmel, Puerto Príncipe, Croix–des–Bouquets and Petionville. The organization will provide medicine, food, material goods and will organize local meetings to coordinate relief efforts.

Fonkoze will provide immediate general relief by establishing an emergency operations center, re–opening community banks and providing new loans to borrowers devastated by the earthquake.

AJWS to Assist Victims of the Haiti Earthquake
New York, NY; January 12, 2010—AJWS is collecting donations in response to this afternoon's massive earthquake in Haiti, which registered a 7.3 on the Richter scale. Donations to AJWS's "Haiti Earthquake Relief Fund," which can be made at www.ajws.org/haitiearthquake, will enable AJWS's network of grantees in Haiti to meet the urgent needs of the population based on real–time, on–the–ground assessments.

With a per capita income of $3.60 per day, Haiti is the most impoverished country in the Western Hemisphere. Thus, its population is especially vulnerable to natural disasters, such as today's earthquake. Based on initial reports of widespread devastation and a high number of casualties, AJWS anticipates that the immediate and long–term needs will be profound and is coordinating with its in–country representatives to respond immediately.

"We are assessing where the gaps in service are and putting a process in place to help specific communities that might not be immediately served otherwise," said AJWS's vice president for programs, Aaron Dorfman. "Because of the economic and political situation in Haiti, disasters like this have devastating consequences throughout the country. Our long–standing partnerships with grassroots organizations in Haiti allow us to reach the poorest and most remote populations with the speed necessary to save lives."

Founded in 1985, American Jewish World Service (AJWS) earned its eighth four–star rating from Charity Navigator in 2009 as well as an "A" rating from the American Institute of Philanthropy.

From the NYVOAD Member Directory:

Disaster Program

The Church World Service (CWS) Emergency Response Program assists disaster survivors through support of local faith–based partner organizations. CWS achieves this mission by helping the faith community play its special role in disaster mitigation, preparedness, and response in the United States and around the world. One aspect of this mission is enabling its 36 member communions to collaborate in disaster preparedness, mitigation, response, and recovery. CWS encourages religious organizations to coordinate with others in the faith community so that when disaster strikes, those affected will receive efficiently the most effective assistance.

CWS trains and equips faith–based partners to mobilize resources for survivors of natural and human–caused disasters, as requested, through:

• community organizing for disaster recovery
• seed grants for developing recovery organizations
• pastoral care to support survivors and care–givers in the recovery process
• material resources such as blankets, clothing, basic health care supplies, school supplies, and household supplies

CWS Disaster Response & Recovery Liaisons work year–round in planning for and mitigating against disaster impact as well as in response and recovery. This year–round responsibility is carried out in liaison with the inter–religious community, the American Red Cross, State and Federal Emergency Management Agencies and VOAD's.

2020 Oregon Wildfires

https://www.medicalteams.org/how-we-heal/mobile-dental-program/emergency-dental-clinics/
Our Mobile Dental vans have transitioned to providing urgent dental care - an essential service during the COVID-19 outbreak. Our goal is to help relieve an overburdened healthcare system with these emergency dental services. Read the latest updates about our COVID-19 response.

Clinics in Oregon
All Oregon clinics will accept urgent dental procedures for patients who do not have private dental insurance, those who are low income and vulnerable populations, but we will not turn away a patient with emergency needs who have no alternative options for care. Urgent dental procedures include extractions and fillings for patients who have pain, bleeding and/or swelling.

FROM RELIEF WEB – 2010 Pakistan Flood Response:

Medical Teams International Responds To Crisis In Pakistan
Source: Medical Teams International
Date: 04 Aug 2010

Medical Teams International is responding to the recent disastrous flooding in Pakistan. They have shipped three containers of medical supplies to partners on the ground in the flood–affected area of the country. The medicines and supplies are enough to help hundreds of thousands of people and are valued at nearly $2 million.

The essential medicines and supplies have arrived in the Northwest region of Pakistan where heavy rain has caused rivers to overflow their banks. More than 1,500 people are known to have died in the floods. The supplies have been received by in–country partners, Hope International and Poverty Eradication Initiative, and are being used to respond to the urgent health needs of those affected by the flooding.

Medical Teams International will air–lift more supplies to their partner in Pakistan early next week. This unit is approximately one metric ton and will serve 10,000 people for 3 months. Valued at $421,000, it will provide urgently needed medicines and supplies to the partner's hospitals and clinics in Pakistan.

In addition, Medical Teams International will determine if teams of emergency medical professionals can be deployed to address emergency health care needs at a partner hospital. Medical Teams International is accepting donations for their response to the Pakistan floods. Please visit www.medicalteams.org for more information.

Disaster
We respond to some of the most devastating and difficult disasters around the world. Within 48 hours, we send volunteer medical professionals (MDs, RNs, NPs, PAs and Paramedics) to natural and manmade disasters to care for the sick and injured.

Development
Our volunteer teams and staff work to establish long–term solutions for international communities plagued by chronic poverty, lack of medical care and minimal educational opportunities.

Distribution
We partner with organizations in more than 70 countries to distribute medical supplies to people in need, passing the $1 billion mark in supplies shipped in January 2007. In the USA, we annually distribute more than $1.7 million in hygiene products and over–the–counter medications to social service
agencies.

Mobile Dental
Our Mobile Dental program serves more than 15,000 people annually, partnering with more than 200 organizations, including schools, social service agencies and churches. Professional dental volunteers treat the homeless and
uninsured in 39 Pacific Northwest counties each year.

PROJECTS ON GOING
Integrated Water Supply and Sanitation Project Changa Pani Program in Lahore

Changa Pani Programme a strategic initiative of the Government of Punjab through Urban Unit, Planning and Development Department in Partnership with City District Government Lahore, WASA Lahore ( Water utility) , Anjuman Samaji Bahbood(ASB) a civil society organization.

The Changa Pani means good water. The purpose is to design and implementation of integrated water supply and sanitation project for poor un served community.

The project will provide efficient, reliable, affordable and environmentally sustainable WATSAN system in poor Urban Area of Badar Colony UC 60 Lahore. The Community is contributing 39% in the infrastructure and rest is being funded by the Government of Punjab as a innovative project for policy learning and attainment of Millennium Development Goal.

For full project details please visit the Changa Pani web

http://www.changapani.org

FROM THE SITE:

Anjuman Samaji Behbood works with people in different cities of Pakistan to improve their quality of life through improvements to water, sanitation and hygiene education using local skills and practical, sustainable technologies.
Specially in Faisalabad the third big city of Pakistan.

Faisalabad city consists of chak numbers, or numbered villages, which have become urbanised over time. The layout of these chaks was planned in 1885. The original city is Chak number 212 and the area consisting of Peoples Colony, Madina Town and Kohinoor Textile Mill area is Chak number 213. Chak number 214 consists of 94 murabas, of these one is Dhuddiwala East and the other is Dhuddiwala West.

The rest of the murabas were agricultural land. Land in Dhuddiwala and the chak itself was owned by three bradries or clans. These were the Wattoos, the Kamonkas and the Balas. With the two murabas that constitute Dhuddiwala, the government had reserved land for expansion. On some of this land refugees settled at the time of partition along with a few families coming from the rural areas. These settlers were permitted to settle free of cost by the Chaudhries, or leaders of the clan, for humanitarian reasons. Due to this, and later developments, the population of Dhuddiwala has increased from 500 in 1947 to 8,080 in 1999.

From the Site:

HOW WE WORK

• Selection of Project Area
• Community Mobilizations

• Project Implementation
• Documentation of the Project

Find out the Major Cause

Normally inappropriate projects are the absence of documented existing physical and social infrastructure maps, which causes, corruption, inflated costs and severe problems of operation and maintenance, correct social profile of human settlements are necessary for assess the assets, developing revenues, planning and providing of social sector facilities. In absence of adequate Mapping all planning is done on ad–hoc base.

Low cost sanitation

• Mobilization of Social Capital
• Use of Local Material
• Use of appropriate Technology
• Enhancement of local skills
• Employing the local labor
• Elimination of contractor's role
• Capturing the volunteerism

Component sharing approach

Creates sense of ownership and Dignity, Reduces responsibilities, ensures financial and human resources, involvement of all stakeholders in the O & M,
ASB has developed a mutual trust between all stakeholders (policy makers, planners, implementers and NGO's) by understanding Governmental process, identifying service delivery gaps.

ASB assists municipalities in data based existing infrastructure documented GIS mapping of Water and Sanitation to analyze and reconcile for
master planning. This process ensures transparency, multi–literal monitoring and accountability which strengthen good governance and rebuild the trust of government departments.

Steps of Social Mobilizing

ASB field Team adopt the following steps for social mobilization and undertaking the physical infrastructure works.

• Identification of the project area
• Social Mapping
• Data Collection
• Existing Infrastructure Documented Map of the Area
• Preparing the poverty profile of the settlement
• Preparing design, cost estimation of Internal & External lines
• Community Dialogues

Examples of our Work

Faisalabad is the third biggest city of Pakistan with 2.5 million population, The numerous slums and squatter settlements around the city are a problem to access & clean water for drinking and sanitation services. Hasanpura, which is a typical low–income housing area of 1,000 households, there is no municipal provision for water supply and sanitation and the residents of Hasanpura pay heavily for the purchase of water and solid waste collection. The Poor drinking water has led to chronic gastric, skin diseases. Another major problem is The Open Drains seeped into foundation of houses, and polluting the underground water. Moreover 95% houses have been damaged due to improper sanitation and unhealthy water system.

Actors and their Roles for Sustainable development

ASB COMMUNITY TMA

Motivation Organization Public Consultation
Survey Lane Committee Formation Change in policy
Estimation Contribution External development
Technical Assistance Purchase of material Treatment plants
Capacity Building Supervision of work Pavement of streets
Monitoring House connections Mechanical Assistance
Training Internal O & M External O & M
Social Impacts

• Silent communities started thinking of their own betterment ,Individual shaped into organization
• The people felt empowered towards addressing their issues & become better off both in knowledge & in life style, poor people cease to wait for Govt., promises
• The idea of component sharing in development be came acceptable / viable,
Sense of ownership of infrastructure & its subsequent look after development, Skilled labour generated
• More responsibility is paying towards for civic services instead of considering them free commodities.

• ASB's approach has opened a way to build a sustainable co–ordination and Cohesiveness. As a successfull development model for Urban and Rural areas.

The Devolution

• Power plan strives for partnership between Govt. and community at grass root level.
• ASB Component Sharing Model evolved in the Water & Sanitation programme and demonstrated this partnership strengthening the Sense of ownership through Flexible modes of management and change in policy
• Component Sharing development model is only the solution
• In this way Government will be ensure Transparency, Accountability, Good Governance & able to reduce Tax net
• Community participation is not the problem.
• Government and professionals participation is needed in the people's work.
• Community initiatives need to be respected, accepted and supported by professionals and Government

Participation and Access to Information

• Projects can be sustain by effective partnership of all stake holders (Community, Government, Planners and NGOs)
• This process will ensure the transparency, multi– literal monitoring system and accountability as well.
• Positive role of stake holders will strengthen the good governance process and rebuild the trust of government departments.
• The resource of masses will be effectively utilized and government will save its resources automatically.

Element of Success

• Necessities of people justify it
• Scanty resources and unlimited wants, which increases with population growth, provides basis to initiate this process
• Cost Effectiveness with appropriate technology and standards supported with OPP thumb rules procedures
• Free from complexities of bureaucratic procedures and channels
• Making it possible for the people to work for themselves, use their own resources and benefit from it
• Government inability to provide services to address people's needs on time
• Time saving is one of the component
• Awareness has come to the government circle about successful community participation model
• Sense of ownership

Strategy

ASB always make the strategy before starts any work. Because without strategy you can't be complete your task.
ASB's approach has opened a way to build a sustainable co–ordination and Cohesiveness. As a successful development model for urban and Rural areas.

In order to plan development in a systematic way, available facilities, gaps and future needs are required proper documentation which will help to prepare and implement effective and integrated development plans.

FROM THE SITE:

Pakistan Humanitarian Response Plan 2010

IOM has appealed for USD 16 million in 2010 to contribute to relief and rehabilitation activities for families displaced by military operations in the northwest of Pakistan. The IOM appeal is part of a joint UN Consolidated Appeal also called Pakistan Humanitarian Response Plan (PHRP) 2010.

The IOM appeal includes funding to provide emergency shelter for returning vulnerable families; reconstruction and development of essential community infrastructure affected by military operations; security awareness training for the humanitarian community; mass communications and strengthening the capacities of local governments in terms of disaster risk management and preparedness.

Support to Conflict–Affected IDPs of NWFP and FATA

In the wake of mass displacement following the initiation of military operations against extremists in NWFP and FATA, shelter and accommodation became a top priority for the Government of Pakistan. IOM Pakistan's Emergency Support and Stabilization Unit developed a support programme for the displaced population in Mardan and Swabi residing with host families in line with the Displacement Guiding Principles and the identified priorities of the Pakistan Humanitarian Response Plan 2009.

IOM procured non–food items (NFIs) for up to 30,000 IDP families residing in camps and host communities and 5,000 tents for IDPs in camps. The population in camps was also supported with 22,000 jerry cans, 5,200 school packs and 200 NFI kits. Additionally, in response to the ongoing displacement from South Waziristan, NFI kits for 850 families were dispatched to Dera Ismail Khan.

Support to Returnees

Following the initiation of government–sponsored returns for IDPs of NWFP in July 2009, basic home toolkits were designed to increase the capacity of communities to restart livelihoods, sustain returns and undertake needed recovery and reconstruction work.

Under Phase 1, spanning from September to December 2009, 62,694 toolkits have been distributed amongst the registered returnee population of district Buner. Following a request by local authorities, approximately 5,000 toolkits were dispatched to the districts of Swat and Lower Dir to support vulnerable families affected by heavy snow and flash–floods in February–March 2010. Distribution of toolkits comprising of basic home repair and farming tools was carried out in Babuzai, Charbagh, Kabal, Khwazakhela and Mingora tehsils of district Swat and Adenzai and Blambat tehsils of district Lower Dir.

In addition to the toolkits, 1,550 shelter kits along with summarization or winterization kits targeting 13,020 vulnerable families in Swat, Lower and Upper Dir districts were distributed from September to December 2009.

EMERGENCY FLOOD APPEAL
SUPPORT TO FAMILIES AFFECTED BY THE CATASTOPHIC
FLOODS IN PAKISTAN

After a year wrought with conflict which led to the displacement of approximately 2.2 million people, Pakistan has now been hit with the worst floods in 80 years. The unprecedented flooding has been caused by very heavy Monsoon rains, and has affected all parts of the country. With the death toll rising everyday it has not been possible to get an accurate estimate of the individuals affected by the floods but conservative estimates put the number at 6 million, with over 1,800 deaths.
The floods have destroyed homes, inundated crops, killed livestock, washed away communication links and led to a scare of a health catastrophe. With further rains forecasted for the coming weeks, the dams full to capacity and the relief agencies stretched to their limits it is time for Pakistanis and for our friends all over the world to help these people - who have been the continuous victims of strife and hardship.

FROM THE SITE:

Regional Overview

Asia is a largest continent which contains more than half of total world population but available sources are many times less then required by it. Now we are focus on South Asia which contains a fifth of the world's population and nearly half of the world's poor. They are distributed across populous countries, one of them is Pakistan. The main development challenges facing in this region are:

1. Overpopulation
2. Lack of education especially the innovative education
3. High poverty levels in villages towns and even in cities
4. Non availability of health facilities
5. Agricultural downfall
6. Ineffective investment
7. Slow economic growth
8. Unstable and unobvious democratic situation
9. Widespread institutional failure
10.Discontinuation of Government policies

Keeping in view the situation there is a dire need to adopt proper system to overcome the above mentioned series of problems. We think this region demands special attention of the volunteers, financing agencies, Government and semi Government departments. The region may be upgraded by the joint venture of social scientists, funding institutions and volunteers belongs to different walks of life, having special packages for betterment of the public. We hope by adoption of above mentioned ways we will be able to bring quality in lives of deprived peoples.

Brief Background

While facing series of problems, social activists decided to become united and to organize themselves during the year 2001 in order to overcome the situation. Consequently they framed their alliance in shape of an NGO under the name of “Rural Development Organization” in 2001. Further more they got it registered from Government of Pakistan, social welfare department under the law prevailing in the country i.e. voluntary social welfare agencies (registration and control ordinance 1961). On first step, the NGO focused on the development for the people living inside District Toba Tek Singh. We have also planning for commencement of our projects in Punjab Province and in future its activities shall be expanded throughout the Pakistan.

**Service** Temporary

FROM THE SITE:

The Month of July brought horrible flood that created disaster in most of the areas of Pakistan. At this moment there is a need of joint efforts by Government and Non Government sectors to minimize the loss in flood affected areas. MOJAZ is well aware of the needs of time. In these turbulent times when the poor and marginalized have been pushed to depths of horrible darkness, food, drinking water, tents, non food items and medical services are needed most. MOJAZ has always worked for the needy and poverty–stricken people. So far, in collaboration with IRD, foundation is providing tents, kitchen kits, mosquito nets, first aid kids ,safe drinking water and medicine to some 200 families, for the viral diseases spreading in the area. MOJAZ is soon launching an awareness campaign on health and safety issues, as diseases like Diarrhea, Malaria, Cholera, and Food poisoning and Skin allergies are spreading not only in flood affected areas but also in relief camps. We expect enormous contribution from the philanthropist and the resourceful and intent to immediately dispatch relief goods to affected areas through a dedicated, committed and energetic team of our Foundation.

Let's join hands and integrate our efforts with the overall state endeavor, to salvage our people from despair in these testing times.

From the IOM Service Handbook (public)

ACTIVITIES:

FOOD:

**Serves** Balochistan and Khyber Pakhtunkhwa. Mansehra, Kohistan, Swat and Balakot.
**Service** Temporary

FROM THE INTERACTION SITE:

Initial CWS efforts have included providing 250 food and shelter kits in Sibbi. Based on assessments conducted by its staff and local partners, CWS plans to provide emergency assistance to 70,000 people – food assistance to 35,000 people, emergency shelter supplies to meet the needs of 17,500 people, and mobile clinic health access for 17,500 people, as follows. By category, this includes food distribution in Swat (14,000 persons); DI Khan (7,000); Sibbi (7,000); Kohistan (7,000). Non–food items, shelter kits and plastic sheets in Sibbi (10,500) and DI Khan (7,000). Mobile health unit access in Mansehra (10,500); and Swat (7,000).

CWS situation report: Pakistan flooding
Friday, July 30, 2010

Since July 21, widespread and unusually heavy monsoon rains have hit most parts of Pakistan; further torrential rain is forecast over the coming days. Among the areas affected are Punjab province and Khyber Pakhtoonkhwa, formerly known as the North West Frontier Province. CWS is distributing food packages and shelter material (plastic sheets) for flood affected families of in Balochistan and Khyber Pakhtunkhwa. CWS has also put into action a mobile health unit to provide emergency health assistance in Mansehra. More mobile health units will soon cover areas such as Kohistan, Swat and Balakot.

Updated July 31, 2010
Situation

Since July 21, widespread and unusually heavy monsoon rains have hit most parts of Pakistan, affecting all four provinces. Further torrential rain is forecast over the coming days. Among the areas affected are Punjab province and Khyber Pakhtoonkhwa, formerly known as the North West Frontier Province.

More than 1500 people have lost their lives; many more are stranded and exposed to disease and extreme lack of food. Thousands have been displaced. Other impacts include the loss of livestock and damage to agricultural crops and fields.

It is estimated that more than a million people have been affected thus far; the total estimated damages and affected population are yet to be determined due to inaccessibility caused by rising flood waters and disruption to communication networks.

Immediate needs include food, water, tents and other non–food items.
CWS response

CWS is distributing food packages and shelter material (plastic sheets) for flood affected families of in Balochistan and Khyber Pakhtunkhwa. CWS has also put into action a mobile health unit to provide emergency health assistance in Mansehra. More mobile health units will soon cover areas such as Kohistan, Swat and Balakot.

Church World Service and other members of the ACT Pakistan Forum are coordinating their responses and undertaking further assessments with local partners. CWS made an internal assessment of available supplies for immediate relief and its emergency response team and has begun deployment.
How to help

Contributions to support the emergency response work of Church World Service may be made online or by phone (800.297.1516), or may be sent to your denomination or to Church World Service, P.O. Box 968, Elkhart, IN 46515.

ACT Alliance Church World Service is a member of the ACT Alliance, a global coalition of churches and agencies engaged in development, humanitarian assistance and advocacy.

**Service** Temporary

InterAction site – Pakistan Armed Conflict 2010:

IRD is sending shipments of emergency relief supplies such as quilts to Pakistan. Our team is currently doing an assessment, focusing on support to IDPs in hosted households and collection centers, specifically providing shelter and water supply support.

From the site – Pakistan Armed Conflict:

In the first half of 2009, well over 1 million people fled their homes in northern Pakistan, pushed out by fighting between Taliban forces and the Pakistani military. While many of these people were able to find shelter with friends or family, or in formal camps for displaced people, some are staying in spontaneous settlements outside camps. These places have little or no water and sanitation, making the risk of disease high.

Through a four–month emergency program, IRD is providing sanitation facilities and water and medical supplies, as well as organizing hygiene committees. An estimated 30,000 people in the North West Frontier Province will benefit from this program funded by USAID's Office of Foreign Disaster Assistance.

Water and Sanitation
The program is rehabilitating and expanding sanitation facilities, including latrines and waste disposal; and rehabilitating, expanding, or constructing shower facilities and hand washing points for 3,000 families. This includes the construction of up to 850 latrines, built to adhere to both sanitation and local cultural standards. Emergency water supply interventions will include water point rehabilitation and new water point establishment. Each of the 30 water points will meet the water requirements for 100 families. To ensure water quality, tests will be conducted on each established point over the life of the project.

IRD is forming local hygiene committees to support ongoing hygiene awareness training as well as establish user committees for water supply and sanitation facility maintenance. The committees are working with IRD staff members to provide community–based hygiene education focused on personal hygiene practices including hand washing with soap, sanitation promotion, and safe water use.

Health
IRD is providing emergency medicines to at least eight rural health centers and functional basic health units and six maternal–child health clinics in the target communities. These facilities were chosen because they are most used by newly arriving internally displaced people. IRD is receiving $2 million worth of pharmaceuticals as a donation from United States–based METAD/MedPharm. An estimated 20,000 people will benefit from these donated drugs.

From the InterAction site – Pakistan Floods 2010:

IRD is among the only international NGOs with operations in two of the most heavily flood affected regions in the KPK region, D. I. Khan and Tank Districts. Initial needs assessments by IRD and our Partners in the region are prioritizing an immediate humanitarian response. IRD's emergency response is focused on shelter, provision of safe water and sanitation, non–food items (blankets, clothing, kitchen sets, other items), re–stocking of flood damaged health clinics, with a focus on the provision of water borne illness treatment, oral rehydration salts, and primary health care pharmaceuticals.

From the site – Pakistan Floods 2010:

Islamabad, Pakistan — August 2, 2010 — In response to more than a week of torrential rainfall in flood–stricken Pakistan, IRD has launched an urgent appeal and released emergency funding for the relief effort. The UN reports that more than 1,400 lives have been lost, at least a million people are in need of emergency assistance, and approximately 2.5 million have been affected by these downpours. Conditions on the ground are expected to get worse with forecasters predicting at least two more weeks of heavy rain.

IRD is moving quickly to address the emergency needs of thousands of families in two of the most heavily affected districts. IRD is among the only international NGOs with operations in both D. I. Khan and Tank Districts. Initial needs assessments by IRD and our partners in the region are helping to prioritize our immediate response.

IRD's emergency response is focused on providing shelter, safe water, sanitation, and non–food items, such as blankets and clothing. IRD is also re–stocking flood–damaged health clinics, focusing on treatments for water borne illnesses, oral rehydration salts, and primary health care pharmaceuticals.

The current monsoon rains have triggered the worst floods in Pakistan in more than 80 years, affecting people in every area of the country. In Khyber Pakhtunkhwa (KPK), the worst–affected province, the Provincial Government puts the death toll at nearly 800 people, with more than 100 people still missing. Rivers have burst their banks, tearing down 60 bridges and washing away roads and buildings. Hundreds of villages and towns, along with massive sections of agricultural land, are under several feet of water. The full extent of the damage from the heavy rainfalls and flash floods is still not clear, since access to affected areas is limited and most of the communication networks are disrupted.

For information on how you can donate and help raise funds, please call Daniel Puls, IRD Chief of Advancement, at 703–957–1452.

From the InterAction site:

Operation USA has worked with communities in Pakistan affected by the October 2006 earthquake, working with local grassroots partners to build clinics, houses, and other rehabilitation support to those displaced and affected by the disaster. Operation USA will work through our existing partners to support the relief efforts for the current refugee crisis in the Swat Valley and other areas.

From the site:

NEWS RELEASE: Operation USA Responds To South Asia Flood Disaster

FOR IMMEDIATE RELEASE

OPERATION USA RESPONDS TO SOUTH ASIA FLOOD DISASTER

LOS ANGELES, CA (August 3, 2010)—Los Angeles–based International relief agency, Operation USA announced that will provide disaster relief assistance in response to unusually heavy monsoonal flooding in a wide region of northwest Pakistan and northeast Afghanistan. Many of the areas which were devastated by the 2005 Kashmir Earthquake have been impacted. Operation USA has developed a network of local partner agencies and is limiting its assistance to areas already familiar to it.

The agency is appealing to the public for funds—and to companies for bulk disaster materials including water purification chemicals, shelter supplies, electric generators, medicines and medical equipment.

HOW TO HELP:
Donate online at www.opusa.org, by phone at 1.800.678.7255 or, by check made out to Operation USA, 3617 Hayden Ave, Suite A, Culver City, CA 90232. Text REBUILD to 50555 to donate $10 to relief efforts.

About Operation USA
Operation USA is an international relief agency that helps communities at home and abroad overcome the effects of disasters, disease and endemic poverty by providing privately–funded relief, reconstruction and development aid. Since 1979, the Los Angeles–based Operation USA has worked in 99 countries, delivering over $350 million for relief and development projects.

## OXFAM America (CLUSTERS: WASH/FOOD/HEALTH/SHELTER) – 2010 Pakistan Floods / Armed Conflict

Info/Hotline · Open

Non–Profit Humanitarian Aid
U.S. ADDR: 226 Causeway Street 5th Floor,; Boston, MA, 02114, United States; PAKISTAN, Various – See Area Served
**Phone** 1– 800–77–OXFAM
**Serves** Khyber Pukhtun Khwa, Punjab, and Balochistan Provinces
**Service** Temporary

From the InterAction site – 2010 Pakistan Floods:

Oxfam and our partners have launched a rapid–relief effort to quickly reach 400,000 people in hard–hit areas of Punjab, Balochistan, and Khyber Pakhtunkhwa with essential aid. We are installing toilets and water–storage tanks and delivering clean water by truck to prevent deadly waterborne diseases from sweeping through communities of displaced people. Soon we and our partners will begin distribution of kits containing hygiene materials like soap, and we will start providing cooked meals for those in greatest need. Throughout the response, Oxfam will look for cash–for–work opportunities, in which we pay survivors to carry out essential service projects for their communities.

7/31/10 – FROM THE SITE (2010 Pakistan Floods):

Oxfam aids survivors of Pakistan floods

Oxfam and partners are supporting rescue services and working to prevent outbreaks of deadly disease.

In response to one of the largest floods in Pakistan in 35 years, international agency Oxfam has started relief operations to assist the affected population in the provinces of Khyber Pukhtun Khwa, Punjab, and Balochistan.

Oxfam has sent two senior humanitarian experts to assess the situation in Rajanpur – a hard–hit district where flash floods have caused widespread destruction. Roads and other communication networks are badly damaged, and the affected population is in immediate need of rescue boats, safe drinking water, temporary shelters and toilets, vaccines to prevent water–related diseases, and basic food items.

Working closely with partners, Oxfam has identified the 13 most affected districts and is supporting rescue services there where possible. Over the course of the next three months, the agencies will provide water, sanitation, and hygiene services to 30,000 households in 13 districts, and will help many flood survivors who have lost their livelihoods begin to earn an income once more.

According to the National Disaster Management Authority's statement of July 31st, so far 494 people have died, 251 are injured, and 9,447 houses have been damaged. These figures do not include Khyber Pukhtun Khwa Province, where assessments have been severely hampered due to the breakdown of communication networks and damage to roads and bridges. There have been reports of massive displacement, with figures ranging from 400,000 to one million; flooding has impeded access to some of the affected population.

The true extent of the damage will only become clear once the rains have ceased and communications lines have been restored. The weather forecast for the affected area calls for more rain in the first week of August.

Though the rains triggered this disaster, existing infrastructure has contributed to the damage in Rajanpur.

“The water coming from the Hill Torrents cannot be accommodated in the canals, though they were built for this purpose,” says Jamshed Farid, relief worker with Help Foundation, an Oxfam partner based in Rajanpur. “The funds allocated for widening and lining the water courses last year were misappropriated.”

Oxfam is working closely with its local partners Help Foundation, Doaba, Beej, Lasoona, Sabawon, Shangla Development Society, and Integrated Rural Support Program to respond to this disaster.

FROM THE INTERACTION SITE (Work being done related to the armed conflict):

Oxfam is working with local partners to reach more than 360,000 people with assistance. Our focus is on protecting public health: we are constructing latrines, building and repairing wells, and providing water storage and distribution tanks. We are also distributing shelter materials, rehydration salts, hygiene kits, mats, and other essentials, and providing trainings on how to stay healthy in difficult conditions. We are working to ensure that aid reaches not only people living in camps but also those who have

taken refuge in makeshift settlements or with host families, paying particular attention to the needs of women and other vulnerable groups.

**Web** www.planusa.org
**Serves** Mardan, Swabi, and Charsadda Provinces / Province of Sindh in the districts of Thatta, Ghotki and Khairpur
**Service** Temporary

FROM THE INTERACTION SITE – PAKISTAN FLOODS RESPONSE 2010:

Plan is responding to the flooding in Pakistan. Emergency interventions, undertaken in six impacted districts of Punjab and Sindh provinces, are benefiting 90,000 to 100,000 people in 13,000 families. Immediate relief phase activities include the provision of tents, food and water, as well as health and hygiene kits in shelter camps. Plan is also working with local authorities to monitor and address possible disease outbreak. As the situation continues to develop, Plan will implement further response activities on the basis of assessed need. Once flood waters recede, Plan will provide returning families with shelter kits, dry food rations, and tool and household kits to assist them in rebuilding their homes and lives.

FROM THE SITE:

Plan responds to deadly floods in Pakistan
8/2/2010

At least 1,500 people are now confirmed dead in Pakistan, with another 1.5 million people badly affected by the worst flooding in 80 years.

Plan has begun relief work in the Southern Punjab areas of Rajanpur, Muzafargarh and Layyah, as well as districts in Sindh Province. Heavy rain fell on the Khyber Pakhtunkhwa, formerly North West Frontier Province, for 48 hours at the end of last week, causing almost all of the province's rivers and streams to overflow.

Emergency response

Local authorities have set up 17 emergency shelter camps in Rajanpur and 22 in Layyah – with an average of 60 to 70 families in each camp. Plan is providing bottled water, dry milk, rations and cooked meals to over 13,000 families. Child protection is a priority, and field staff are working alongside local teams to assess the emotional distress of people affected.

27,000 people are still stranded without aid and there are now further threats of flooding in previously unaffected areas.

Disease outbreak fear

An outbreak of diarrhea and cholera is also feared: Plan is working closely with health officials to monitor and address disease, and is considering setting up mobile health camps in Layyah. Currently, Plan is assembling 13,000 health and hygiene family kits for distribution.

"Rains have washed away hundreds of homes and shops, dozens of bridges, roads and destroyed communication networks, while livestock and crops have been lost," says Rashid Javed of Plan Pakistan.

Protecting aid supplies

As flood waters begin to enter Plan's Disaster Risk Reduction program areas in the province of Sindh in the districts of Thatta, Ghotki and Khairpur, Plan is looking to warehouse aid supplies so that they are not damaged.

Dams and barrages were expected to reach 'super flood' status over the weekend, while officials fear the true scale of the crisis is not yet known. Government efforts are focused on the evacuation of villages along the river banks and low lying areas.

Information for sponsors

We will contact sponsors directly if we receive any news about individual sponsored children. If you are planning a visit or have any particular concerns around this issue, please contact our Donor Relations staff at donorrelations @planusa.org or at 1–800–556–7918.

FROM THE INTERACTION SITE – ARMED CONFLICT RESPONSE 2010:

Plan's Pakistan Country Office is responding to the Child Protection and Psychosocial Support needs of displaced children and their families through the creation of "Child Friendly Centers" in camps and host communities of Mardan, Swabi, and Charsadda

Provinces. Working with local partner organizations, Plan's program will provide safe play areas, venues for psychosocial support interventions, and health and hygiene promotion activities for up to 10,000 displaced children and their families.

From the InterAction site – Pakistan Floods Response 2010:

Save the Children is mobilizing personnel and supplies, including food, water, plastic sheeting, and household and hygiene kits, to provide emergency assistance to flood–affected families in Pakistan. The agency also has sent mobile health teams, ambulances and medicine to Pakistan's Swat region to provide critical emergency health care to children and families.

FROM THE SITE:

ave the Children to Distribute Food to Thousands of Families

Heavy Rains Expected to Continue throughout the Week

WESTPORT, Conn (August 5, 2010) – Pakistan government officials have issued new flood warnings as monsoon rains continue to strand hundreds of thousands of people throughout the country, washing away homes, schools, roads and bridges. The United Nations estimates 980,000 people have lost their homes or been forced to evacuate, and the World Food Programme (WFP) reports 1.8 million people have a critical need for food supplies. Save the Children, in partnership with WFP, will distribute emergency food packages to 6,000 of the most vulnerable families in the remote areas of Swat Valley.

"Many families in these areas ran out of food days ago" said Mohammed Qazilbash, Save the Children's spokesperson in Islamabad. "Our relief teams are walking on foot through areas where roads have been destroyed, in order to reach families who have yet to receive aid."

Save the Children is also providing emergency health services in Swat, treating more than 1,000 people in the last four days.

"There has been a significant increase in complaints of acute respiratory infections, diarrhea and malaria," reported Qazilbash, "And conditions are expected to become worse as the heavy rains continue this week. We are particularly concerned about the young children who are living in temporary shelters without access to clean water."

In other areas, including DI Khan, Buner and Allai, Save the Children's medical teams are treating hundreds of flood victims and providing hygiene kits, plastic shelters, food ration packs and household supplies.

Background

Save the Children has been working with children and families in Pakistan for more than 30 years. The humanitarian agency provided assistance to those affected by Tropical Storm Phet this past June, the conflict in Khyber–Pakhtunkhwa Province in 2009, the flash floods in Peshawar, Kybery Agency and Rajanpur in August and December of 2008, and the massive earthquake in 2005.

For more information on Save the Children's response in Pakistan and for ways to help, please visit our Pakistan Flood Emergency page at:

http://www.savethechildren.org/emergencies/asia/pakistan–floods–2010/

Our Emergency Response in Pakistan

Work is taking place in regions where the agency provided relief to conflict–affected families in 2009 and after the country's epic 2005 earthquake.

Save the Children is working in partnership with national, district and local governments and is using all means of transportation available, including helicopters, mules and boats, to send health staff and supplies to communities that have been cut off by the floods.

* In Allai, a medical team and medicines were sent in by mules because of blocked roads.
* In Jambera, a medical team was airlifted to Kund to supply urgently needed medical care to a village which was cut off by a destroyed bridge.
* In DI Khan, Save the Children has deployed three mobile health teams and two ambulances to provide emergency medical treatment.
* In Buner District, Save the Children is providing emergency health services through three Basic Health Units (comprising a medical doctor, female health worker, and a person to dispense medicine) and two ambulances.
* In Swat, two mobile health teams and eight existing Save the Children health clinics are providing emergency health services.
* In Thakot, Save the Children has deployed a medical team and established a health clinic from a pre-fabricated structure, and supplied medicines to make-shift clinics by boat via the River Indus.
* Water purification tablets will be provided to 25,000 families.
* Save the Children is preparing to distribute some 800 "shelter-plus" kits to homeless families beginning on August 3. Kits contain tarps, buckets, water containers and ropes.
* Save the Children will partner with the World Food Program for an emergency food distribution as soon as possible.
* Ongoing assessments in affected areas continue to help us identify children's need and mobilize relief.

Save the Children has worked in Pakistan for more than 25 years.

FROM THE INTERACTION SITE - 2010 Armed Conflict Response:

Save the Children is assisting displaced children and their families who are living outside of camps and who comprise the majority of people who have fled fighting in the Swat Valley. Save the Children has provided essential household and hygiene supplies, and other services to more than 31,000 people, among them 18,300 children. The agency's health outreach has provided nearly 4,500 people with medical assistance through mobile teams of doctors and support of government clinics with staffing and supplies. In addition, it has established eight child-friendly spaces, benefitting 700 children, and will establish another 30 spaces over the next two weeks. Save the Children plans to reach 280,000 displaced people, including 168,000 children

UNHCR sends relief items to flood-affected districts in Balochistan

The UN Refugee Agency, UNHCR, has dispatched the first consignment of relief items to assist people in the flood-affected districts of Balochistan. The supplies will be distributed by the Provincial Disaster Management Authority (PDMA) and district authorities in Quetta.

The first convoy consisting of 17 trucks, carrying 585 tents, 2700 plastic sheets, 1760 kitchen sets and 4000 plastic mats for the two most affected villages of Talli and Sultan Kot in Sibi District where, according to UN-Habitat, an estimated 2,030 houses have been completely destroyed in the torrential rains and consequent flooding.

"Our office is committed to helping the people of Balochistan in need and we want to convey to them that UNHCR is fully aware of the difficulties the people are going through. We would like to assure them that we will always be there for them, whenever need be," said UNHCR Officer in Charge Mr. Bekele Negash.

The distribution of UNHCR's supplies will be carried out and monitored jointly by the district authorities and the agency's partner organisations present on ground. In addition to the provision of the non-food items, UNHCR together with the PDMA also provided transportation to carry the relief good to the affected areas.

UNHCR, upon the request of the National Disaster Management Authority (NDMA), has pledged to provide 2,000 tents, 4,000 jerry cans, 2,700 plastic sheets, 2,200 kitchen sets and 4,000 plastic mats to the flood–affected areas in Balochistan. The second consignment of the remaining items, consist of 10 trucks are due to arrive in the affected villages in the next few days.

“The situation is constantly evolving and it is too early to assess damages caused by the floods, however, UNHCR will continue and expand its support to other affected areas as well,” assured Mr. Negash.

**Services offered:** Jerrycans (Fuel/Water Container); * KITS, KITCHEN SETS; Shelter, Supplies * (ANY/ALL Types); Shelter, Supplies, Mats, Plastic Mats; Shelter, Supplies, Plastic Sheeting; Shelter, Supplies, Tents (For Disaster Survivors); Vehicle, Truck * (ANY/ALL Types)

From the InterAction Site – 2010 Pakistan Flood Response:

World Vision has begun distributing food and water to flood survivors, and plans to provide medical assistance, shelter, hygiene kits and other basic relief items as soon as possible. World Vision has worked in Pakistan since 1992, and has more than 150 staff.

FROM RELIEF WEB:

Pakistan: Flood relief efforts scale up as Ramadan begins
Source: World Vision
Date: 12 Aug 2010
by World Vision MEER Comms

As the scale of the crisis in Pakistan continues to grow, World Vision is stepping up efforts to meet the needs of families affected by the flood and who now face a month of fasting during Ramadan*.

On Wednesday World Vision began distributing shelter kits, cooking implements and gas cylinders to 100 families in Pashtun Garhi in Khyber Pakhtoonkhwa Province (KPK). Distributions of floor mats, bedding and food kits containing flour, sugar, rice, beans, tea, dates and oil to families in Charsada, Nowshera and Peshawar will start within a week.

World Vision has also opened two new health facilities, including a clinic in Koto and a sub–centre in Khazana, both in Lower Dir. To date more than 1,100 patients have been treated for acute respiratory infections, skin infections and diarrhea at the five health facilities World Vision has opened in Lower Dir over the last two weeks.

However, continued bad weather continues to hamper the response.

"The communication network is a big problem for us .... we cannot access field teams when they are in the field during rains," said Dr. Khaleed Rasheed, the Area Manager for Lower Dir. "Delivery of medicine is yet another big challenge we face in the wake of the damaged Khazana Bypass Bridge."

The continued rains and fresh floods are creating a miserable start to Ramadan; the Islamic month of fasting, which begins Thursday. Although devastated and hungry, not observing the Ramadan fast is unimaginable for most people, especially in the KPK, which has been the hardest hit by floods.

Pakistan's deadly floods have now affected more than 14 million people in six areas of Pakistan: Baluchistan, Gilgit Baltistan, KPK, Pakistan–administered Kashmir, Punjab and Sindh, according to figures released by UN Office for the Coordination of Humanitarian Affairs (OCHA). An estimated six million people need food, according to OCHA.

Approximately 722,500 homes have been destroyed, 1.4m acres (557,000 hectares) of crop lands have been flooded and more than 10,000 cows have died, according to figures released by Pakistan's National Disaster Management Authority.

Most of those affected by the flood have lost houses, belongings, crops and livestock, and are surviving on outside relief and occasional handouts while living in the open. Floodwaters continue to wreak havoc across Pakistan, devastating entire villages and damaging crops and livestock, as they now make their way into the southern province of Sindh.

From Relief Web:

World Vision to help 150,000 people affected by floods in Pakistan

Source: World Vision
Date: 08 Aug 2010
By Dwayne Mamo, MEER Communications (8 August 2010)

World Vision continues to help thousands in the northern Pakistan Khyber Pakhtoonkhwa province (KPK) and plans to help at least 150,000 people (20,000 families), including people living in Punjab and Sindh provinces to the east and south, as the flood waters and rain that continue to ravage the north move southward.

"This disaster is worse than the earthquake in 2005 because after the earthquake, people could recover things like jewelry, mattresses and utensils, while this flood swept away everything they had," said Shaharyar Bangash, World Vision's programme manager in Pakistan. "Because of this, recovering from the flood will take much longer."

According to various estimates, between four and fifteen million people will be affected by these floods and need a variety of help, including food, water, shelter, basic cooking and hygiene items, health services, community rehabilitation, and psychological/ social support.

"Fruit and vegetable crops have been lost, houses have been damaged or destroyed, and fresh water sources have been contaminated. Houses that are still standing are badly damaged and filled with mud and sand. Women especially need support. We also expect that farmers will need expert help over the coming months if the agriculture sector – a key economic driver in the region – is to recover," Bangash said.

Over the next three months, World Vision has immediate plans to help in four of the worst–affected districts; Peshawar, Charsadda, Nowshera, and Lower Dir in KPK, where it already works and has strong ties with the community. The organisation also plans to expand its operations into Punjab and Sindh as the continuing rains threaten those who live there.

World Vision has already delivered food and water to more than 14,000 people living in school buildings and on what's left of the main roads in Charsadda and Nowshera. The organisation has also opened additional emergency health clinics in Lower Dir and so far has treated over 100 people who are suffering from water–borne diseases and other illnesses related to the floods.

As flood waters recede and more communities become accessible, World Vision plans to distribute water purification packets and hygiene kits to 150,000 people, tents to 22,500, cooking items to 75,000, and food to at least 37,500. The organisation also aims to provide cash–for–work activities to 1,000 people, open seven health posts, set up 20 child–friendly spaces and 20 women–friendly spaces to provide a safe and comfortable environment for children and women to interact with peers and receive support.

World Vision continues to work closely and in partnership with the United Nations and other non–governmental organisations through the Pakistan Humanitarian Forum to ensure that effective, efficient, and timely assistance is given to the children, women, and men affected by the floods.

FROM THE SITE – PAKISTAN 2010 FLOOD RESPONSE:

Pakistan: Response continues; clinic opened in Lower Dir
4 Aug 2010
By World Vision staff

With evidence of waterborne disease on the rise, World Vision today opened an emergency primary health clinic in Lower Dir, an area of Pakistan severely hit by monsoons and floods. The clinic has already received an influx of patients from the area, including many who lost their homes.

World Vision is worried that waterborne diseases such as diarrhea and cholera will spread among the homeless. Increasing numbers of children are already reported to be suffering from skin diseases and eye infections.

Dr. Sheraz Iqbal said: “People are showing up at the clinic parched and hungry. They’ve walked through rain and mud with clothing caked to their bodies, carrying their children for hours. They’re suffering from ailments such as diarrhea and acute respiratory infections, which can become life–threatening unless treated. The situation is desperate.”

Lower Dir is a conflict–affected area where even prior to the floods, existing health clinics were damaged, medical supplies looted and health staff were driven away.

Crowded conditions, overstretched caregivers, poor sanitation, lack of clean water and inadequate nutrition contribute to high levels of mortality in young children.

World Vision’s permanent emergency health clinic in Lower Dir has been established at the request of local authorities and the World Health Organization. Though intended for use in the aid agency's long–term programmes for internally displaced people, the opening of the clinic has proven timely given the current disaster. It is staffed with two doctors, a pharmacist and a female health worker responsible specifically for women.

World Vision will also support six additional health clinics in Lower Dir, where it also plans to establish “women–friendly spaces” that will provide psychosocial and educational support to women in the conflict–affect areas. Women will be encouraged to visit and discuss maternal, child health and psychological issues with their peers through the facilitation of a trained health worker.

FROM THE INTERACTION SITE – 2010 ARMED CONFLICT RESPONSE:

World Vision is distributing health kits, mattresses and essential household items in Buner and hopes to raise $13 million to address the urgent needs of more than 200,000 people in Buner, Swabi and Mardan in northwest Pakistan.

ACF Provides Clean Water & Sanitation in Flood–Affected Pakistan
Emergency response to control water–borne diseases will reach tens of thousands
September 2, 2010

SLAMABAD, PAKISTAN—In spite of serious logistical challenges in reaching flood survivors in hard–hit areas of Pakistan, Action Against Hunger | ACF–International has launched emergency programs to stem outbreaks of deadly water–borne illnesses and help families who have lost everything. These programs target 52,500 people particularly affected by torrential rains in the Khyber Pakhtunkhwa and Sindh provinces.

“Action Against Hunger’s teams are fully engaged in responding to the urgent needs of families sheltering in temporary camps or returning to their villages in both the north and south of the country,” said Mohamed Mechmache, Emergency Coordinator for Action Against Hunger’s programs in Pakistan.

Flood water in northern and central Pakistan is gradually receding, leaving in its wake considerable damage. The flooding has now reached the south of the country, including the region of Thatta in the Sindh province, where ACF is one of few NGOs present. The Indus river has spilled over its banks, leaving fields and entire villages buried in muddy water.

During the first six months, ACF will focus on providing access to clean water, sanitation, and hygiene to prevent water–related illnesses like cholera and acute diarrhea. ACF has begun organizing daily distributions of 32,000 liters of drinking water through a range of methods, including water trucking, installation of pumps and portable reservoirs, and the restoration of some 100 water points and damaged irrigation systems. Its teams will also construct 600 emergency latrines, hand–washing stations, and showers to help ensure sanitary conditions in camps for the displaced and in nearby villages.

To meet basic hygiene needs, ACF has begun distributing 7,500 kits containing essential items like buckets, soap, detergent, sanitary pads, and water purification tablets. In conjunction with these distributions, the agency is training families on effective emergency hygiene practices to reduce the risk of water–borne illnesses and is launching programs to spray affected areas with insecticide and clear them of dangerous debris.

During initial assessments, ACF identified individuals and families whose assets and livelihoods were destroyed by the floods. “The men have returned first to evaluate the damage, and they are now being joined by their families. Some have lost everything, including their seeds, their crops, their livestock, and other sources of income,” explained Mechmache.

ACF’s “cash for work” and fresh food voucher programs will provide financial support to more than 10,000 affected families, helping restore their ability to feed themselves in the months to come. The most vulnerable households will also receive cooking utensils, blankets, sheets, mosquito nets, and mattresses.

Action Against Hunger launched its very first humanitarian intervention 30 years ago for Afghan refugees who crossed into Pakistan. In the 1990s, the organization returned to the country to address food and water insecurity across its southern and western provinces. More recently, ACF recently provided emergency assistance after the 2005 earthquake and the 2007 flooding in Sindh province.

RELIEF WEB SITUATION REPORT UPDATES for ActionAid – PAKISTAN FLOODS 2010:

http://www.reliefweb.int/rw/rwc.nsf/db201ShortName/ActionAid?OpenDocument

From RELIEF WEB:

Pakistan Update: desperate need as the rain hammers down
Source: ActionAid
Date: 13 Aug 2010

Relief efforts in Pakistan continue to be hampered by torrential rain, rising flood waters and ruined infrastructure as thousands remain out of reach despite aid workers attempting to reach victims by helicopter, boat, on foot or with donkeys.

A third of the country, a land mass the size of England, is now underwater as the flood wave passes through the southern province of Sindh. Water levels continue to rise ever further, threatening the Guddu and Sukkur barrages. Mass evacuations are seeing families pour out of villages and into relief camps as people anticipate the worst.

Muhammad Hayat Sial, who works for ActionAid, is part of the relief team in Kot Addu in Punjab providing aid to survivors in coordination with the district government:

"We were the first ones to reach those hit by the disaster in Koh Addu with rescue and relief support. So far, five relief camps have been set up in government buildings and 3,000 people are being provided with food, medical care and washing facilities. We are looking after the specific needs of women and girls and providing female doctors. In this camp there are 35 expectant mothers, three of which have just given birth," he said.

ActionAid is helping 23,000 people throughout the country, and plans to scale up coverage in the days to come as urgent needs for food, clean water, medical care, shelter and household goods continue to multiply.

The flooding has so far claimed the lives of at least 1,600 people and affected up to 14 million, more than those affected by the 2004 Indian Ocean tsunami (five million), the 2005 Kashmir earthquake (three million) and the 2010 Haiti earthquake (three million) combined.

From the InterAction site – Pakistan Floods 7/10:

ActionAid Pakistan works in many of the flood–affected areas. We will provide immediate support in terms of food, non–food items, water, sanitation, hygiene and construction of shelters in Upper Swat (union councils Matta, Kalam, Madian and Bahran). Our emergency response will also be targeted at flood affected communities of the Khyber Pakhtoonkhwa (KPK) province who have suffered damage to life, property and livelihood due to the heavy flash floods. We will attempt to support as many families as possible with special emphasis on women, children, people with disabilities and elderly people. Special attention will also be given to people living with HIV and AIDS and religious minorities in the area.

From the site – Pakistan Floods July 2010:

ActionAid appeals for support as floods ravage Pakistan

Floods caused by a week of heavy rain have killed more than 1,600 people in Pakistan's northwest, and rescuers are battling to distribute relief to tens of thousands of trapped people.

Please give generously now.

A westerly weather system moving in from Iran and Afghanistan, combined with heavy monsoon rain, caused dramatic floods in Pakistan in the past week, with the northwestern province of Khyber–Pakhtunkhwa (KP) the worst hit. The Pakistani authorities believe these to be the worst floods to have hit the country in the past 80 years.

The provinces of Balochistan and Punjab are also hard–hit. Authorities estimate that four million people have been affected, with infrastructure receiving major damage. Rushing water also has washed away crops, government buildings, businesses, schools, bridges, and homes. As the floods head south, more destruction is feared. In southern Punjab at least 1.1 million acres of crops have been destroyed, and the Government of Pakistan has established 170 relief camps for 22,000 people. In Sindh Province, to the south of Punjab, rescue workers are preparing for the arrival of the flood waters, and more than 350,000 people have been evacuated from low–lying areas.

The severity of the flooding has caused enormous damage to the country's infrastructure in both rural and urban areas. Entire settlements of mud–brick houses are reported to have been swept away, major bridges have collapsed, and some major provincial cities have been totally cut off after road and rail links were severed. The widespread disruption to the country's communications network has meant that reaching the worst–hit areas of the country is extremely difficult.

The Government of Pakistan has requested the support of the international community to meet the needs of those affected. The Pakistani meteorological office is also forecasting heavier rain than usual during this year's monsoon season and the country's major rivers, including the Indus, Jhelum and Kabul, are expected to reach dangerously high levels.
ActionAid's Response

ActionAid Pakistan works in many of the flood–affected areas, and is already providing food, personal hygiene kits and household essentials in 7 districts, with support for 4 more on the way. ActionAid will provide immediate support in terms of food, non–food items, water, sanitation, hygiene and construction of shelters in Upper Swat (union councils Matta, Kalam, Madian and Bahran). Our emergency response will also be targeted at flood affected communities of the Khyber Pakhtoonkhwa (KPK) province of Pakistan who have suffered damage to life, property and livelihood due to the heavy flash floods. We will attempt to support as many families as possible with special emphasis on reaching out to women, children, people with disabilities and elderly people. Special attention will also be given to people living with HIV and AIDS and religious minorities in the area.

Efforts will be made to cater to the needs of people who have suffered the most damages as a result of the flood. We will be implementing the project through partners and will be providing technical assistance to local partners throughout the project. ActionAid will closely monitor the project to ensure that standard emergency protocols are followed.

Just as importantly, ActionAid is already developing a framework for longer–term response, including strategies for disaster risk reduction and livelihood support. Please stand with ActionAid as we reach out to the people of Pakistan.

FROM THE SITE – Pakistan Armed Conflict(Not dated but viewed 8/2/10):

Work Continues to Meet Displaced Pakistanis' Immediate Needs

As millions of Pakistanis flee the Swat Valley, a hotspot of combat between the Taliban and Pakistani military, they're discovering that they've rushed into another crisis: uncomfortable, sometimes unsanitary camps overwhelmed by the influx of evacuees.

Despite the hardships, they know going back to their once–beautiful land is not an option right now.

"I miss my home where Taliban are living now," said Zartaja Bibi, a woman trembling in a camp in Takht Bhai. But the Taliban warned her that she could either leave or have her throat cut.

ActionAid, long familiar with problems in the country, was on the ground early and saw an urgent need for food, water, shelter, sanitation and health care. And, as workers visit camps, they see the need for aid growing.

Since May 2, escalated fighting in Swat and other embattled areas has forced an estimated 2.4 million people to relocate. Although most of those leaving the Swat Valley are now living with friends or family, in the dwindling number of apartments available for rent or in makeshift settlements of their own, those forced into the camps face stifling heat and scarce supplies. Massive international aid is needed to prevent a disaster in the camps, according to the U.N. high commissioner for refugees.

Nearly three–quarters of those leaving the Swat Valley and surrounding districts are children who face particularly dangerous hardships, in terms of both the journey, and when they arrive and settle in camps or private homes.

"Families have been separated as some members took to the road while their relatives remained at home, either unwillingly trapped due to fighting and curfew, or intentionally staying back to look after houses and livestock," said Javeria Ayaz Malik, communications coordinator for ActionAid Pakistan.

The journey is long and hard. Transport is scarce and children are walking more than 100 kilometers. Many become separated from their families or lost.

Takht Bhai, the first area on the way out of Swat, houses hundreds of thousands people who've fled the war–torn valley or the similarly embattled district of Buner.

With ice a rare luxury and temperatures surpassing 100 degrees, one man there said he couldn't bear to drink hot water; he fainted from dehydration. People say the food is tasteless, with nothing but cooked lentil gravy for flavoring.

Meanwhile, women and small children cram themselves into tents with hand fans, stepping outside only to use the toilet. Purdah — the Muslim veil tradition of secluding women from men — prevents women from leaving the privacy of the tents, and a lack of hygiene products feeds sanitation problems.

Diseases such as acute respiratory infections, acute diarrhea and lower respiratory infection have struck many and are spreading, according to the World Health Organization. In Takht Bhai, ActionAid met a 2–year–old boy covered in mosquito bites and a malaria patient whose family said they were plagued by mosquitoes but had no repellents or nets.

If conditions in the camps worsen, many fear that their angry and desperate residents will turn to the Taliban, the only organization to provide them with basic materials and a sense of respect.

So far, most people appear to support the government and its response, but the danger that displaced Pakistanis will turn to militant extremism grows as they are separated from their homes by a conflict with no clear end in sight.

“The fighting could continue for a longer period, so they will not be going home soon,” said Fikre Zewdie, director of ActionAid Pakistan. “Pakistan cannot handle a crisis on this scale without international help.”

ActionAid is on the ground helping to meet Pakistanis’ immediate needs. As of June, we are assisting 4,000 families in Swabi, Mardan and Hasan Abdul, in part by providing food and non–food items, as well as health and hygiene facilities

We are also collaborating with Shifa College of Medicines and Nursing to extended medical care and treatment and medicines to hundreds of people.

Abdul Jabbar, 41, is displaced from Koza Banday in Swat and is living with a relative in Kotha area of Swabi. Abdul came to ActionAid’s medical camp with his three children who were suffering from a viral chest infection.

“When you have no shelter, no money, no proper food and no medicine for your ailing kids, you are no where,” said Abdul. “I am jobless and homeless. I was depressed, as I could not get medicine for my three coughing kids. But with this medical camp in my area, a doctor examined my kids and they got medicine. I hope they will soon be better.”

Please support ActionAid and its critical work in Pakistan to provide supplies to those displaced by the ongoing fighting.

FROM THE INTERACTION SITE for Armed Conflict:

Crisis in Pakistan

ActionAid is providing immediate relief in the form of food, water, medical supplies and sanitation facilities. We are assessing medium on long–term needs, such as helping families secure copies of their registration documents which many families left behind when they fled but which are strictly required by the government. We are also trying to meet the needs for clothing and shelter. For the many women and children displaced there are concerns of increased sexual violence and exploitation. The capacity of cities to absorb these people has been increasingly exhausted, leading to ever greater competition for scarce resources and livelihood opportunities. ActionAid will continue to provide relief while working for long–term solutions.

FROM RELIEFWEB:

Pakistan: ADRA Refocuses Aid to Punjab Province
Source: Adventist Development and Relief Agency International (ADRA)
Date: 02 Sep 2010

Twitter: www.twitter.com/ADRAi

FaceBook: www.facebook.com/joinADRA

SILVER SPRING, Md. – As floodwaters move further south down the Indus River, larger numbers of people are being forced from their homes and communities, prompting the Adventist Development and Relief Agency (ADRA) to refocus the implementation of its emergency medical response to Pakistan's eastern Punjab province, report agency officials.

ADRA is working closely with World Health Organization (WHO) and the Ministry of Health for the Punjab province to establish operations of Mobile Health Units in unreached areas of the district of Muzaffaragarh, some 239 miles (385 kms) southwest of Lahore. In this district alone, some 750,000 flood victims remain extremely vulnerable and 2.6 million displaced persons throughout Punjab continue to need assistance. ADRA expects that this shift from its previous operations in the northern Khyber Pakhtunkhwa province will avoid overlapping with other relief efforts and provide increased security for its programs.

ADRA's Mobile Health Units are comprised of doctors, surgeons, pediatricians, and nursing staff that provide medical care around the clock, treating more than 220 patients a day for malaria, diarrhea, and other diseases and ailments resulting from the contaminated floodwaters. ADRA has also provided two ambulances to transport the most severely affected patents to the nearest hospital facility.

One of ADRA's medical teams will be operating in the Gaffoor Factory Internally Displaced Persons (IDP) camp near Shah Jamal, providing care for two additional camps with a population of more than 4,000 people. In addition, ADRA staff members are

providing clean drinking water for the immediate population using chlorine tablets and ten 100–liter (25.5 gallon) tanks, benefitting more than 5,000 people per day.

To deliver increased aid to the most vulnerable population, additional locations for three Medical Health Units are being identified, as there is little to no dry, elevated ground available to set–up operations.

Health education continues to take place, raising awareness regarding water–borne diseases and ways to treat those affected by them.

Insecurity and damage to the infrastructure has hampered the speed at which aid can be delivered to desperate populations. Estimates of displaced persons in Pakistan have climbed to more than 10 million with scarce access to food and clean water, according to government agencies.

More information will be provided as the response continues.

To send your contribution to ADRA's Emergency Response Fund, please contact ADRA at 1.800.424.ADRA (2372) or give online at www.adra.org.

From the site – Pakistan Floods 2010:

SILVER SPRING, Md. —As waters begin to slowly recede in northern Pakistan following some of the worst flooding in the area in 80 years, the Adventist Development and Relief Agency (ADRA) is assessing the immediate needs of affected communities, the agency reported.

Some of the most urgently needed relief aid, ADRA emergency response experts say, includes shelters for displaced families, blankets, hygiene kits, food, water, and medical assistance.

Since the flooding began in late July, more than 1,500 people have died, thousands have become homeless, and some three million people have been affected. The effect of the flooding on farmlands, crops, cattle, roads, buildings, and communication networks has been severe.

"The entire infrastructure we built in the last 50 years has been destroyed," a spokesman for the provincial Disaster Management Authority in Khyber–Pakhtunkhwa said.

According to the United Nations Office for the Coordination of Humanitarian Affairs (OCHA), 36 districts in the Khyber Pakhtunkhwa province, formerly known as the North–West Frontier Province, have reported flooding so far. In addition, the threat of water–borne diseases remains high in all affected areas, as the flooding has contaminated water sources.

"This is the worst ever calamity in our history," said Mian Iftikhar Hussain, information minister for the Khyber Pakhtunkhwa province.

As more heavy monsoon rains are in the forecast, government authorities expect the number of dead to climb further. In addition, the vast amounts of water, which are now flowing south through Baluchistan, Punjab and Sindh provinces, have already caused flash flooding and are threatening low–lying areas.

To contribute to ADRA's Emergency Response Fund, please contact ADRA at 1.800.424.ADRA (2372) or give online at www.adra.org.

Follow ADRA on Twitter and Facebook to get the latest information as it happens.

ADRA is a global non–governmental organization providing sustainable community development and disaster relief without regard to political or religious association, age, gender, race or ethnicity.

FROM THE INTERACTION SITE – PAKISTAN FLOODS 2010:

ADRA is assessing the situation and the needs of those affected by the recent flooding in Pakistan. As part of the response, ADRA expects to distribute aid such as shelters, blankets, hygiene kits, food, and water. ADRA is accepting donations online at www.adra.org or by phone at 1–800–424–2372 (ADRA).

Pakistan floods still spreading fast
Source: Age UK
Date: 12 Aug 2010

The number of people who have died in the monsoon floods has now risen to 1,600 and estimates of those affected stand at almost 14 million.

Despite mass evacuations, there are fears the death toll will rise as flooding reaches the southern province of Sindh and the risk of water–borne disease outbreaks increases in many areas.

Age UK, in partnership with sister organisation opens link in new window HelpAge, is currently responding to the emergency alongside medical aid agency Merlin.

Asma Akbar, Programme Manager for HelpAge in Pakistan:

"We know that older people make up approximately 7% of the general population. This means that almost one million older people may be affected by the floods.

"Obviously we are very keen that any official assessments taking place will include older people. This will help the humanitarian community respond effectively and urgently to older people's needs."

Our emergency response is currently targeting the most vulnerable older people and their families in Nowshera district in Khyber Pakhtunkhwa. We have staff members attached to Merlin medical teams who will specifically focus on the needs of older people affected.

We are distributing mobility aids, hearing aids, and emergency health assessment kits. We are also handing out food and emergency household items such as flashlights, bedding and water containers.

Asma adds:

"So many people we have spoken to have told us that they had time to take their most valuable belongings with them – maybe a rug, or their livestock.

"But they only have the clothes they are wearing so we are quickly putting together 2,000 new water resistant bags containing sheets, umbrellas, a shawl, and shalwar kameez. We're also including dates in this package for breaking of the fast (Ramadan starts this week)."

In the UK, the DEC Pakistan Floods Appeal has now reached £9.5m.

FROM THE SITE – 8/15/10 – Pakistan Floods:

Pakistan Flooding Wreaks Havoc

Death numbers have risen…more rains are expected…and the devastation continues in Pakistan.

The death toll is now at 1,600, with roughly 14 million people affected by flooding in Pakistan. Two million have fled their homes, and many mud houses have been carried away by the floodwaters, leaving families homeless. The floods have damaged or destroyed shops, buildings and crops, stealing people's livelihoods and sense of security. The threat of waterborne diseases looms, and health care is desperately needed.

Please Make A Donation Now to Provide Life–saving Assistance.

Jill, our Emergency Response Team Leader, sent us another update recently. Here are the highlights:

Areas in both Baluchistan and Swat (two regions in which we operate) were devastated. Our Pakistan team began assisting survivors immediately. By working with authorities and other partners, they provided essential lifesaving medicines and treatment, as well as preventive supplies, such as clean delivery kits and mosquito nets.

Our team is seeing a daily rise in acute diarrheal disease and respiratory illnesses – and with a severe lack of clean water, the incidence of waterborne disease is expected to climb. As people crowd together in whatever shelter is available, skin infections, scabies and other communicable illnesses are being seen. And all health teams are watching closely for any outbreaks of measles, particularly devastating for children in these dire conditions.

Some of our mobile teams traveled by boat to check on the status of our health units, which had been made inaccessible by washed–out roads and collapsed bridges.

All seven of our health units are now operational, and staff is present around the clock. In Swat, we are setting up medical camps in the areas where people are currently living…either in open air by the river, by the road, in schools or in other available

buildings. We also have a psychologist providing health messages and counseling people who have been traumatized by the crisis.

In Baluchistan, our health team has set out to provide medical care in the hard–hit Sibi District, where six health units have lost equipment, clean water and staff.

People are really suffering from lack of food and water, especially in the further–flung areas. We are requesting stocks of high–energy biscuits to provide to children in our target areas.

Thanks, and I will keep you posted,

– Jill

From RELIEF WEB:

PAKISTAN FLOODS: Worst Monsoon Floods in Decades Force 2.5 Million People from Their Homes

Source: American Refugee Committee International (ARC)
Date: 02 Aug 2010
American Refugee Committee Teams Travel by Boat to Assist Survivors

Minneapolis, MN (August 2, 2010) — The American Refugee Committee is assisting survivors of the floods in Pakistan, which have killed more than 1,100 people and forced more than 2.5 million people from their homes.

Health teams traveled by boat to visit medical centers in Swat, which had been made inaccessible by washed out roads and collapsed bridges. The team is also distributing critical supplies and medicines.

"The heavy rains washed away entire communities, as most homes here are made of mud," said Jill McGrath–Jones, Team Leader. "The rain came in torrents. Now there seems to be a collective holding of breath to see what happens next. The fear is that this is just the beginning—more rains are forecast, and we are just at the tip of the monsoon season."

Many of the water sources have been damaged by the floods. This could lead to a major public health crisis. Cases of diarrheal disease have already been reported.

"We are concerned about the worsening conditions in the flood–affected areas," said Daniel Wordsworth, President of the American Refugee Committee. "With experienced teams on the ground, we stand ready to help."

The American Refugee Committee team is coordinating with partners and assisting survivors in Sibi District in Baluchistan; and Barikot and Ghalegay, Khyber–Pakhtunkhwa (formerly North–West Frontier Province)—some of the areas affected most by the flooding disaster.

TO MAKE A DONATION: The American Refugee Committee is taking donations to support its relief efforts at: American Refugee Committee; 430 Oak Grove Street, Suite 204; Minneapolis, MN 55403 USA; tel 612–872–7060 or at, www.ARCrelief.org

ABOUT THE AMERICAN REFUGEE COMMITTEE: American Refugee Committee programs are built from the ground up. We work with people at the most vulnerable points in their lives, when they have lost everything to war or disaster. They let us know what they need most, and we work together to develop ways to help them get it. Our programs are as diverse as the people we serve, but they all work together for the same goal: to help people take back control of their lives. We help nearly 2.5 million people a year through programs around the world. The American Refugee Committee has been operating in Pakistan since 2002. We currently assist refugees living along Pakistan's border with Afghanistan, as well as people affected by the recent conflict in Pakistan's Swat Valley. We are based in Minneapolis, MN. For more information, visit www.ARCrelief.org.

From the InterAction Site – Pakistan Floods 2010:

The American Refugee Committee's Pakistan office responded to the crisis in a matter of hours. In coordination with line ministries and local authorities, ARC has deployed mobile health teams to Baluchistan in Sibi district to provide health assistance. In Swat, mobile health teams have been deployed by boat to reach areas made inaccessible by washed out roads and collapsed bridges. ARC Pakistan's maternal child health center in Swat remains operational and ARC's team is distributing non–food items to patients and offering health and hygiene sessions, emphasizing education around contaminated water. The team is also distributing essential medicines.

From the site – Pakistan Floods July 2010:

Heavy rains in the last two days have caused sever flooding in Pakistan's Northwest Frontier Province. Most of the homes in this region are made of mud, so when the flood waters came through they completely devastated entire communities. 800 people have been killed and more than 1 million are affected by this disaster.

Our Emergency Response team is on the ground there now. They'll begin work as soon as the flooding has subsided – providing clean water and mobile health clinics for survivors.

Please Make A Donation Now to Support the Relief Effort.

We received this message this morning from our Emergency Response Team Leader:

Dear All,

Flooding has been terrible. Swat, Nowshera, Mardan, and Peshawar seem hardest hit. The roads in and out of all those places are washed out, bridges gone, internet and telephone has just starting functioning today.

Information is sketchy. Some NGOs are trapped inside of affected areas with little supplies or trapped outside with no ways to get aid in.

The Govt has helicopters in the air but so far no camps have been set
up. The fear is that this is just the beginning – more rains forecast and we are just at the tip of monsoon season. There seems to be a collective holding of breath to see what happens next.

We have mobile health teams assembled and ready to go. They are coordinating with partners and authorities and will head out soon. Authorities are also requesting medicines. We've put together our entire stock of medicines and hygiene kits and given them to the World Health Organization.

With most water sources fouled by the flooding, our water and sanitation teamsare preparing to get in and get people clean water just as soon as the area becomes accessible. Contaminated water could lead to outbreaks of diarrheal disease, cholera and worse.

Thankfully, we're well positioned and prepared to help survivors.

I think that covers most of what's happening right now.

Thanks and I will keep you posted.

– Jill

FROM THE SITE:

BRAC and American Pakistan Foundation (APF) Join Hands in Post-Flood Rehabilitation Efforts in Pakistan

17 September 2010 – Almost 21 million people are now reported as having been directly affected by the devastating floods in Pakistan. With 23 out of 94 BRAC Pakistan's microfinance branches affected by the flooding, BRAC is close to the people and communities that have been suffering as the disaster began to unfold in July.

"The rains started on July 28th and within the weekend 9 out of 12 of our microfinance branches were flooded," said Sir Fazle Hasan Abed, Founder and Chairperson of BRAC. He noted that "As a NGO that originated in Bangladesh, we are very familiar with floods and cyclones. We have worked on emergencies for many years. In Pakistan BRAC started relief work immediately. People had lost everything and they needed us to help them."

BRAC Pakistan launched relief efforts using its institutional knowledge of emergency relief, and its network of community volunteers to identify and provide support to communities in greatest need benefiting over 200,000 people.

As the flood waters recede, rebuilding the lives of those who have most suffered will be the primary focus of the BRAC partnership with the American Pakistan Foundation.

Mr. Awais Khan, CEO of the American Pakistan Foundation, said "We want to ensure that people recover their assets and their ability to earn an income so they can regain their dignity. We are confident that our partnership with BRAC is a great step towards this recovery effort."

The American Pakistan Foundation will be supporting BRAC, through its U.S. affiliate BRAC USA, to start livelihood recovery efforts across three districts in the Khyber Pakhtunwa province of Pakistan. The program will enable 200 households, particularly the most vulnerable and marginalized, who have been completely devastated by the disaster, to recover their assets and livelihoods.

Susan Davis, President & CEO of BRAC USA, stated that “BRAC is committed to working with the flood affected communities and for Pakistan’s development.” She said, “We are very pleased to partner with the American Pakistan Foundation, because of its deep and long term commitment to the country.” Ms. Davis added that “BRAC USA encourages people to join this partnership and text BRAC to 20222 to give $10 through their cell phone. We hope to work together to mobilize wider support and empathy for the plight of those suffering from conflict and disaster, and generate greater action.”

From the InterAction site – 2010 Pakistan Flood Response:

BRAC has temporarily halted its normal operations in Khyber–Pakhtunkhwa to provide relief work. Due to the acute food shortage, BRAC Pakisan has begun to deliver food packets containing such items at rice, lentils, flour and water purification tables. In the immediate future, the team will also be distributing Oral Rehydration Salts (ORS) and sending out a medical team to begin assessing health needs. BRAC seeks to bring the people of Khyber–Pakhtunkhwa their years of experience in flood relief work in Bangladesh, a flood–prone country.

From the site – 2010 Pakistan Flood Response:

3 August 2010 – With the heavy rainfalls and the ensuing flood in Pakistan, BRAC temporarily halted its microfinance and health operations in Khyber–Pakhtunkhwa and is focusing on providing emergency relief. “Drawing upon years of experience in flood relief work in Bangladesh, a flood–prone country, BRAC Pakistan staff are rapidly and effectively assisting the people of Khyber–Pakhtunkhwa province,” said Susan Davis, President & CEO of BRAC USA.

The shortage of food is acute. BRAC Pakistan has begun to deliver food packets which contain rice, lentils, flour, and water purification tablets. To combat the threat of diarrheal diseases breaking out, BRAC is distributing Oral Rehydration Solution sachets. This is a staple commodity distributed by BRAC’s health program in every country where we operate, including Pakistan. Additionally, BRAC will be sending a medical team for assessment of health needs in the affected communities.

Of the houses that are still standing many are under water. BRAC’s staff in Khyber–Pakhtunkhwa expect the water to recede in 2–3 days, but “this part of Pakistan is not accustomed to floods,” said Mr. Aminul Alam, Executive Director of BRAC International. “In Bangladesh, we are used to this so we can prevent casualties there. But here the families and communities we serve are not used to this. We want to help because of BRAC’s experience of dealing with floods in Bangladesh over the years.”

BRAC Pakistan has been operating in Pakistan since 2007 providing microfinance throughout 94 branches to 106,000 people. Of BRAC’s 12 offices in Khyber–Pakhtunkhwa, 10 are under water. However, BRAC’s existing footprint in Khyber–Pakhtunkhwa and the extensive network of local staff give BRAC a starting point through which relief will be delivered.

“Many families that we serve have seen their houses washed away. Many houses of our staff members were also washed away. But as a BRAC staff member they can be effective in delivering relief to the families and communities that they serve every day,” said Mr. Faridhur Rahman, BRAC Pakistan CEO.

“Vehicles cannot go in to flooded areas, and there is a lack of boats in this area. We have no choice but to wade through water and deliver relief supplies on foot where we can, even in flooded areas,” said Mr. Rahman.

Pakistan floods: Two million children will miss out on school
Source: CARE
Date: 07 Sep 2010

CARE rehabilitates schools and plans psychological support for children

Islamabad, Pakistan (Sept. 7, 2010) – "On World Literacy Day, the international community should look at the catastrophic school situation after the floods in Pakistan", says Heribert Scharrenbroich, Chairman of CARE Germany–Luxembourg on World Literacy Day, Wednesday 8 September.

Because of the floods in Pakistan, two million children could miss out on school at the beginning of this school year, either because their school buildings were destroyed or are being used as emergency shelters. "If children cannot go to school for a long time, then education, one of the most important pillars of poverty reduction, is being set back. Education is the springboard for children and young people to a better future," said Scharrenbroich.

In September, the school year started again in Pakistan. But in the flooded regions the start was postponed. The situation for the people of Pakistan continues to be dramatic. According to the United Nations, nine million children are affected, about 10,000 schools were damaged and 6,600 schools are currently being used as emergency shelters for displaced persons.

CARE will rehabilitate 42 schools in the Khyber Pakhtoonkwa province, near the border with Afghanistan, and will equip it with furniture and school materials. Most of these schools are girls' schools.

"It is also important that you not only to take care of buildings, but also the souls of the traumatized children," the CARE chairman says. "In the coming weeks, CARE will assist children with a psychosocial program. In a disaster situation, it is not only important to distribute relief supplies and construct shelters but also to take care of children and young people with sports and play so we can handle their depression and trauma. We will also carry out workshops in which parents learn to recognize the trauma of their children and help them to overcome them. "

From the InterAction site – 2010 Pakistan Flood Response

CARE is supporting health teams, mobile clinics and the distribution of emergency supplies in the wake of flooding that has taken hundreds of lives in Pakistan and devastated wide swaths of the country. A convoy of eleven trucks has brought tents, shawls and other emergency supplies, providing shelter initially for around 1,800 people. Supplies also include mosquito nets, plastic floor mats, water purification tabs, hygiene kits and kitchen sets. As efforts continue, and based on initial assessment of the flood affected areas, CARE will provide nearly 100,000 individuals with relief efforts that will provide shelter and essential items, and assist with rebuilding.

From the site – 2010 Pakistan Flood Response:

CARE Sends Convoy of Relief Goods to Flood–Ravaged Pakistan
Humanitarian Group Helps Treat 3,000 Patients in Mobile Clinics

ISLAMABAD (August 3, 2010) – CARE International sent a convoy of eleven trucks to the Swat district of Pakistan today, bringing tents, shawls and other emergency supplies to families devastated by flooding there. The initial distribution will provide shelter for around 1,800 people affected by flash floods and landslides in the northwest province of Khyber Pakhtunkhwa. And it also includes mosquito nets, plastic floor mats, water purification tabs, hygiene kits and kitchen sets.

Over the next two days, CARE will send an additional 500 shelters and family supplies to the districts of Nowshera and Charsadda. CARE also is supporting health teams and mobile clinics in the wake of flooding that has taken hundreds of lives in Pakistan, washed away homes and roads and affected about a million people.

Working with partners, CARE is filling gaps in areas of health and the delivery and distribution of emergency items. Receding floodwaters, overcrowded shelters and poor access to safe drinking water and sanitation increase the risk of disease outbreak. "The current floods in Khyber Pakhtunkhwa underscore the necessity of investing in preparedness to reduce death and suffering in the event of a disaster" says Waleed Rauf, country director for CARE in Pakistan.

Hundreds of stranded people have been rescued from rising floodwaters by Army helicopters in a massive rescue effort. Damage assessments to determine relief priorities are still under way, with the worst–affected areas identified as parts of Khyber Pakhtunkhwa, the northern and southern parts of the Federally Administered Tribal Areas (FATA), Balochistan, South Punjab and the northern areas of Pakistan–administrated Kashmir and Gilgit–Baltistan. In those areas, up to 100,000 households are in need of assistance. "So far CARE has provided primary health services," Rauf says. "More than 3,000 patients have been treated through mobile clinics and basic health care units. CARE is also providing health awareness through health and hygiene sessions in mobile camps."

The impact farther south, in Sindh province, is not reported as critical yet. "But the situation is likely to change in the coming days, as the floodwaters move towards the south", Rauf says. "August is traditionally the month of heaviest rains, meaning that much more rain is expected."

From the site – 2010 Pakistan Flood Response:

CARE activates Clinics, Emergency Stockpiles in Pakistan
Humanitarian Group Works with Local Partners to Respond to Deadly Floods

ISLAMABAD (August 2, 2010) – CARE is supporting health teams, mobile clinics and the distribution of emergency supplies in the wake of flooding that has taken hundreds of lives in Pakistan and devastated wide swaths of the country.

The extent of the damage still isn't known as historic monsoon rains have swept away dozens of bridges, hundreds of roads and thousands of homes, making access to those affected extremely difficulty.

Working through a local partner, CARE has conducted eight mobile health clinics in the Swat Valley with a team of 4 doctors and 2 women health visitors. These are in addition to the four Basic Health Units (BHUs) operating in Behrain, Tirat, Mayedmn and Chail where CARE is providing primary health services. The mobile clinics and BHU's will continue for at least the next four months.

CARE also is transporting emergency stockpiles of tents, shawls, mosquito nets, plastic floor mats, family hygiene kits and kitchen sets in the Swat, Charsaddah and Nowshera districts of Khyber Pakhtunkhwa (KPK). Initial distributions are expected to reach 5,200 people.

CARE has partners already operating in Swat, Charsaddah, Peshawar, Rajanpur, DG Khan and most affected districts of Balochistan. They have assessed the damage and needs in these districts.

"The devastation has widely affected the KPK province and we are receiving information about the loss of life and property caused by the floods from all over the province", said Waleed Rauf, CARE's country director in Pakistan. "Thousands of survivors are now in need of shelter and tents and the basic health facilities as there is a possibility of an outbreak of water borne diseases in some affected areas. Therefore CARE is currently focusing on providing these."

The floodwaters also have wiped out crops, killed livestock and destroyed business throughout the affected districts.

CARE has developed an initial plan to reach about 100,000 people with both short term immediate relief and long term livelihood recovery. Emergency relief will take priority in the immediate future. In Khyber Pakhtunkhwa, where the army is evacuating people from their villages, some areas are only accessible by helicopter or boat.

"We are working with the Basic Health Unit's mainly in Mayedmn, Behrain and Tirat and we have send out an outreach team of doctors and staff to the areas where access through road is not possible" Rauf said.

CARE re–established operations in Pakistan in June 2005, after being out of the country for more than 25 years. CARE places special emphasis on gender issues and building the capacity of local grassroots organizations in Pakistan, working to improve education and livelihoods as well as maternal and childhood health. CARE also has responded to previous emergencies in Pakistan, including Cyclone Yemyin in 2007 and the South Asia earthquake of 2005.

NFI (kitchen set, buckets, beddings, sheet).

HEALTH:

Free mobile medical camps with both male and female doctors.

The worst floods in Pakistan in 80 years have washed away homes, bridges, schools, water systems and medical facilities and left people hungry and vulnerable.

Fourteen million have been affected by monsoon rains which have caused raging torrents and high waters. Many of them have lost homes and don't know where their next meal is coming from. The disruption to water supplies means people either go thirsty or risk falling ill through drinking dirty water.

As people seek refuge on any dry land they can find, Caritas has launched programmes to help provide them with shelter, water, food and medical help.

Read more about what we're doing – Caritas blog: http://blog.caritas.org/category/emergencies/pakistan-floods-2010/

Press Release from the site:

Flood-hit Pakistan desperate for help
12 August 2010

Caritas is appealing for US$5.5 million (4.3 million euro) to help Pakistan's flood victims as the situation grows increasingly desperate.

Over 1,600 people have died in the disaster and up to 14 million people are affected. Raging floodwaters have washed away homes, bridges, schools, water systems and medical facilities in Khyber Pakhtunkhwa (KPK) and Balochistan as well as parts of Punjab and Azad Jammu and Kashmir.

"The priority is to ensure people have food, water, shelter and medical help. There are so many people who are in grave difficulty. It's such a traumatic situation for those who have lost everything and who have to rely on others even for a drink of water," says Anila Gill, national executive secretary of Caritas Pakistan

The three-month project will help 250,000 people in KPK, Punjab and Sindh. Caritas will distribute food as many people's food stores, crops and livestock have been washed away. There will also be a focus on providing people with water, shelter and hygiene facilities.

Caritas will work with communities to identify infrastructure, such as roads, bridges and irrigation channels, that needs to be rebuilt. By doing this it will reconnect people to markets and other services.

Part of the Caritas commitment to protecting people's health will include medical camps which will provide emergency medical treatment, immunisation and vaccination services to approximately 8,000 people for the prevention of epidemic water borne diseases.

Another area of concern for Caritas is the vulnerability of women and children in the floods. Caritas will undertake awareness raising about rights, as well as counselling for women. Children will be provided with toys and a safe place to play. They will also benefit from counselling and medical services which will leave them less open to abuse.

As the monsoon season and heavy rains continue, new areas of Pakistan continue to be flooded. It is an ongoing challenge to Caritas and other agencies to identify these new areas and meet the needs of the people in them.

The floods are said to be the worst in eighty years in Pakistan. The sheer number of people affected means that the difficulties will persist long after the waters have dried up.

MORE AID REACHES PAKISTAN FLOOD SURVIVORS: Catholic Relief Services Battles Weather to Help Families from Remote Villages
Source: Catholic Relief Services (CRS)
Date: 09 Aug 2010

Baltimore, MD, August 10—Catholic Relief Services (CRS) is providing newly homeless families with water purification tablets, plastic sheeting, cookware and more as floods continue to ravage Pakistan. Though hampered by washed-out roads and bridges, CRS has reached thousands of people in the north and southwest parts of the country.

"Our teams are battling the weather, the terrain and the immense scale of the disaster," says Carolyn Fanelli, Head of Programming and Acting Country Representative for CRS Pakistan. "In places where water has begun to recede, it has left behind a trail of devastation."

In the past two days, CRS has distributed the sheeting, purification tablets, and other items to more than 150 families in the Swat Valley. "At first, we didn't get to as many families as planned because a new landslide blocked the way—our team got stuck on one side of it," says Fanelli. "But as of Monday, August 9 we've reached more than 1,500 people. Before that, CRS distributed supplies to 4,000 people in the Kohlu and Barkhan areas of Balochistan in the southern part of the country. "The rainy weather there also has made things much slower," says Fanelli.

A CRS team trekked to the Shangla District, hiking through steep and slippery mountainous terrain in the rain to meet with survivors in remote villages and find out what they needed. The team reports that almost all the water systems and existing walking paths have been destroyed

CRS engineers are now in the process of repairing five separate water systems in the region. The agency has years of experience building and repairing water systems in remote mountainous areas of Pakistan, having worked on hundreds of systsms following the 2005 earthquake there. CRS briefly had to evacuate its office in Besham, Shangla, on Sunday August 8 because of rising floodwaters, but staff returned the next day. CRS and it partners have opened an office in the Sharpor Valley of Shangla in order to better serve this remote area.

Millions of Pakistanis have been affected by the floods. Many have lost their homes, crops, livestock and small businesses. Once the most immediate needs are met, CRS will help farmers and others to regain their means of earning a living. In several areas including Swat, CRS is planning cash–for–work projects, paying people affected by the disaster to build irrigation channels, pathways and retaining walls.

"There's a long road ahead," says Fanelli. "But CRS staff are doing tremendous work under difficult conditions."

From the SITE:

Pakistan Floods Ravage North and South

Since July, torrential rains in Pakistan have caused flooding that washed out roads, homes and tracts of land, leaving millions destitute. Michelle Neukirchen is Catholic Relief Services' regional technical advisor for water, sanitation and hygiene in Asia, based in Afghanistan. She worked for CRS Pakistan from 2005 to 2008, helping with the earthquake recovery efforts there, and returned to assist with relief efforts after the devastating floods began. Recently, she spoke with Jennifer Hardy, New Media communications officer at CRS headquarters in Baltimore.

Jennifer Hardy:
Can you tell me about your recent visit to northern Pakistan?

Michelle Neukirchen:

I just returned from the CRS office in Besham. We've worked in this area of Pakistan continuously since the 2005 earthquake. The purpose of my visit was to support our team as they plan further flood response efforts, especially in the areas of water, infrastructure and hygiene.
Hardy:
What stood out to you the most as you visited communities there?
Neukirchen:

The difficulty of moving from one location to another. In one area we visited, the entire length of road connecting villages to the local market was washed away. We hiked from the market to the village, and although it was only three kilometers (less than two miles) away, it took us over two hours to reach the community. We had to climb over boulders and scramble over loose rocks.

It's important that roads are rebuilt in the north as quickly and safely as possible. People had to travel long distances for food and medical care before the floods—now those journeys are more difficult, and may be impossible for someone who is very ill. We also have to remember that some people depend on getting to markets to make a living, so the limited access has become an income issue as well.

Hardy:
How does CRS plan to help with water and roads in the north?
Neukirchen:

CRS is beginning to lay out pathways and build culverts to improve market access, as well as constructing retaining walls to limit landslides. Engineering teams are also repairing water supply systems to restore safe water access close to homes. We're teaching people about proper hygiene, water purification and water storage, which is essential to prevent disease. CRS is distributing water purification tablets and also talking to people about boiling water if tablets run out.
Hardy:
Where are displaced people staying right now?
Neukirchen:

Some families are taking shelter in local schools. People do have extended families, so many are staying with relatives. A few families even had leftover materials from the 2005 earthquake, such as tents and tarps, and they were able to grab them before the floodwaters rose.

Hardy:
Are there any special concerns that affect women in Besham?
Neukirchen:

We saw some women carrying children out walking with their husbands toward the market. Women don't leave the household very often, for cultural reasons, so if you do see a woman walking, it's likely for a serious reason. The biggest impact on women is collecting water. Tap stands are no longer working so they have to collect water further from home, which compromises their privacy. Now families have to work together to access water and other services.
Hardy:
Tell me about the difference between the disaster in the north and in the south of the country.
Neukirchen:

The floods in northern Pakistan were sudden and violent. People had very little time to move to higher ground, and the water cut 100–foot–wide and 40–foot–high gashes out of mountainsides. Water delivery systems, roads, bridges—everything was destroyed by the sudden force of the water. People's land has just vanished. It's not a matter of waiting for waters to recede; their land is gone for good. And we have to think about shelter solutions in the north right away. Winter comes earlier in the north, so aid agencies will need to coordinate with the government to ensure needs for winterized shelters are met before the cold sets in.

More people are affected in the south, but it's a different type of flood. The water that has inundated the lowlands is affecting people on a larger scale. Entire communities are displaced in the south, but their land, although damaged, will be there after the floodwaters go down. Only after the water recedes will we know the level of overall damage to homes, infrastructure and farmland.
Hardy:
What unique challenges will aid workers face with this disaster?
Neukirchen:

When you look at the whole country it becomes a complex response. The issues in Besham are completely different than in the south where there is standing water. In the north there is widespread, permanent damage to land. In the south, entire communities are displaced. The situations are very different. It's challenging us and other agencies to be flexible with our response, which must reflect the unique needs in both settings.

CRS is well–positioned to respond in both the north and the south. In the north, the communities' needs will be somewhat similar to what we saw in the 2005 earthquake. We already have established expert teams positioned to engineer solutions well–suited to rugged terrain.

In the south, the flood patterns and people's needs are similar to what we have seen in Pakistan's 2007 floods, as well as annual flooding in India and Bangladesh. We can draw on CRS' national and regional experience and expertise to respond appropriately in Pakistan's southern lowlands.

**Services offered:** First Responder, Middle East; Jobs, Cash For Work Program; Kitchen, Cooking, Cookware * (ALL/ANY Type of Cookware); Medical, Services, Public Health Education / Awareness; Medical, Supplies, ORT, Oral Rehydration Salts; Sanitation, Services, Sanitation / Water Systems Restoration; Sanitation, Supplies, Water Purification Tablets; Shelter, Supplies * (ANY/ALL Types); Shelter, Supplies, Plastic Sheeting

## Cluster, Camp Coordination & Camp Management – 2010 Pakistan Floods

Info/Hotline · Open

United Nations/UNHCR
PAKISTAN
**Service** Temporary

Camps are temporary sites designated specifically for hosting IDPs. CCCM does not advocate for setting up camps - camps should be established as a last resort. Camps, if properly managed, ensure that displaced individuals have access to their basic human rights and access to humanitarian services in various sectors. The main goals of CCCM are:

* Improve living conditions, assistance to and protection of IDPs in camps.
* Advocate for durable solutions.
* Effective common policy framework (policies, guidelines and standards) guiding humanitarian actors leading to better delivery of protection and assistance services.
* Consistency and common standards applied in all camps.
* Secure humanitarian space which includes unhindered access and delivery of humanitarian services to IDP camps.
* Secure camp coordination and camp management as a key sector which is resourced with adequate staff and funding.
* Organised closure and phase–out of camps upon IDPs return.
* Mainstreaming of cross–cutting issues including protection, gender, environment and HIV/AIDS.

**Services offered:** Directories, Cluster/EMA Contacts; Shelter * (ANY/ALL Types); Shelter, IDP Camp (Internally Displaced Persons Camp); Shelter, Management, IDP (Internally Displaced Persons) Camp Management

## Cluster, Community Restoration / Early Recovery – 2010 Pakistan Floods

Info/Hotline · Open

United Nations/UNDP
PAKISTAN
**Web** oneresponse.info/COUNTRIES/PAKISTAN/COMMUNITYRESTORATION/Pages/Community%20Restoration.aspx
**Service** Temporary

From One Response – Pakistan:

The Community Restoration Cluster (CRC) lead by the United Nations Development Program (UNDP) is responsible for addressing the early recovery needs of the conflict affected population of North West Frontier Province (NWFP) and Federally Administered Tribal Areas (FATA). In the present context, the Community Restoration cluster covers areas not covered by other clusters. It provides technical support and coordination to cluster members whose projects' activities fall under the following 5 areas:

· Non Farm Livelihoods;

· Governance;

· Social cohesion;

· Environment;

· Basic Community Infrastructure.

Response Plan Objectives and Strategy

The CR Cluster strategy aims at providing a coordination mechanism for cluster members working in humanitarian settings and establishing the foundations for post crises early recovery, addressing the needs of IDPs in and off camps, host communities, returnees and population in affected areas. In the designing of the response strategy, inputs from cross cluster assessments and community consultations are incorporated along with the following imperatives:

· Integration of cross–cutting issues in needs assessment, planning, monitoring and response such as age, sex, diversity, physical disability, environment, HIV and AIDS, disaster risk reduction and human rights;

· Gender–proactive programming and promotion of gender equality; ensuring that the needs, contributions and capacities of women are addressed to an equal capacity as compared to men;

· Incorporation of conflict sensitive approach in programming, so that peace building potential of the interventions are maximized;

· Support and strengthen the capacity of national and local institutions particularly the civil society organisations.

From RELIEF WEB:

Pakistan: Situation Report, 11 August 2010
Source: Logistics Cluster
Date: 11 Aug 2010
Pakistan – Monsoon Flooding

Highlights

– The Logistics Cluster is in the process of establishing logistics hubs in Peshawar, KPK Province, Multan, Punjab Province and Sukkur Sindh Province. Cluster Officers are being deployed to each of these hubs to augment the response capacity.

– All Logistics Cluster participants will have access to temporary storage facilities; all interested organisations should submit a Temporary Storage Request form that is available on the Logistics Cluster website (http://www.logcluster.org/ops/pak09a/temporary–storage–request).

Situation Update

– Torrential monsoon rains have lashed Pakistan for two weeks, triggering catastrophic flooding that the UN states has affected 14 million people; of which almost 6 million are in need of assistance. Flood waters from the country's North West have now moved south and reached upper parts of the Sindh province, where latest estimates from the Provincial Disaster Management Authority place the number of affected people at 1.3 million, with 700,000 evacuated. In eight affected districts of the Punjab

Province, the estimated figure of over 1.6 million people is likely to rise. In Baluchistan and Pakistan administered Kashmir (AJK) number of the affected currently stand at 300,000 and 120,000, respectively. The flood wave is now passing through Guddu and Sukkur barrages with the potential threat of the Sukkur Barrage overflowing, meaning Sindh will face as much devastation as that seen in KPK and Punjab Provinces.

Logistics Coordination

– KPK Province: The Logistics Cluster is liaising with the Government of Pakistan to coordinate requests from participants for air–lift operations for the distribution of relief supplies. The Cargo Request Form has been updated and is available on the Logistics Cluster website: (http://www.logcluster.org/ops/pak09a/cargo–movement–request).

– The Logistics Cluster has Mobile Storage Units (MSUs) on hand with 25 additional expected by the end of the week, the plan is to erect these in Peshawar. The MSUs will serve as a hub for temporary storage of humanitarian cargo.

– An LRT trained Logistics Cluster Officer will be deployed in Peshawar to augment the logistics and coordination needs for KPK by the end of the week.

– Punjab Province: The Logistics Cluster is establishing a logistics hub in Multan and has identified a Logistics Cluster Officer to be deployed to initiate coordination activities. In addition storage facilities have been identified to augment capacity.

– Sukkur, Sindh Province: The Logistics Cluster is on the ground establishing a logistics hub and has deployed a dedicated Logistics Cluster Officer for this hub.

– An Information Management Officer has been identified and will be based in Islamabad.

– For security reasons, limited maps are being published on the Logistics Cluster website. For information on maps please contact us at Global.LogisticsCluster @WFP.org.

Air Operation

– KPK: Heli–lift operations based in Ghazi continue to deliver humanitarian supplies to Kalam in Upper Swat, having been resumed after several days of suspension due to the poor weather conditions. Two additional heli–lift operations have begun: 1) a Khwazakhela–based operation to support flood affected areas in Swat and 2) an Abbotobad–based operation to support flood affected areas in Kohistan.

Road Conditions

– Gilgit and Hunza remain inaccessible and access to Muzaffarabad is possible by road, but the Neelum and Jhelum valleys are inaccessible from Muzaffarabad. Punjab: Road from Mianwali to Multan has multiple bottlenecks where roads are damaged/ flooded. IOM has suggested taking the following route from Islamabad to Multan: Islamabad–Pindi Bhattian– Chiniot–Jhang–Shorkot–Multan.

**Serves** Khyber Pakhtunkhwa (KPK) Province, including the Swat, Noswhera and Charsadda districts (Concern is assessing: Punjab and Sindh Provinces)
**Service** Temporary

From the Flood Service Handbook PUNJAB
August–September 2010

Location: Muzaffargarh (kot ado, jatoi, alipur), Rajan Pur (Jampur), Layyah (Karor)

Activities:

– FOOD: Food distribution
– SHELTER: NFI (tarpaulin sheet, floor mat, kitchen set, aqua tab, candles, match box, jerry can), Debri Kit (spade, wheel barrow) distribution in Jatoi, alipur
– WASH: hygiene sessions, water tankering, aqua tab, hand pumps installation in jatoi, Layyah and Rajan Pur.

From the InterAction site – 2010 Pakistan Flood Response:

With a 50–plus staff on the ground in Pakistan, where it has been active since 2001, Concern has begun rapid assessments and has launched an emergency response in Khyber Pakhtunkhwa (KPK) Province, including the Swat, Noswhera and Charsadda districts. Concern is prioritizing the distribution of: clean water, food, shelter, emergency medical assistance, mosquito nets, and basic hygiene and kitchen items. Concern is assessing the impact of the crisis in Punjab and Sindh Provinces, where we also have staff and local partners. Concern is currently reaching 63,000 people, but aims to scale up in the coming weeks.

From the SITE:

Facing challenges in Pakistan
18 August 2010

So far, 5,700 families have been helped by Concern Worldwide's emergency response in Pakistan.

Following our assessments in Sindh province in south Pakistan, we are planning to increase the number of people we're working with from 10,000 to 20,000 families. This means we'll be reaching over 150,000 people.
Urgent need

We will be targeting some of the worst–affected families in Sindh province, we will be distributing items such as kitchen sets, hygiene kits and blankets. We will also work to ensure they have access to clean water.

From the site – 2010 Pakistan Floods:

PAKISTAN APPEAL: RAGING FLOODS NOW AFFECTING 12 MILLION

(updated August 8, 2010)
For the millions affected by massive floods in Pakistan, the need for basic shelter and other survival essentials is urgent, according to UNOCHA. Unprecedented levels of heavy rain have triggered the worst flooding on record in Pakistan. The situation is worsening, with an estimated 12 million people now affected, losing their homes and livelihoods. Reportedly, over 1,400 are dead and 80,000 homes destroyed. More extremely heavy monsoon rains are on the way––and officials fear the worst. Concern's emergency team is on the ground reaching people with food, water, shelter, and emergency medical assistance.

RISING THREATS: MORE RAIN ON THE WAY
After causing huge damage and losses in KP Province, floodwaters are now surging down from the northwest through the agricultural "heartland" of Punjab Province: according to recent reports. over 1.4 million acres of land in Punjab have been devastated. such damage to farms and crops will devastate the economy. Concern has programs in Punjab and is working through local partners to do a rapid needs assessment and determine our response there.

Humanitarian assistance is urgently needed to reach communities affected by the raging floodwaters. More monsoon rains are expected to hit Pakistan in the next few days, escalating the damage and triggering even more floods.

We are currently responding in Khyber Pakhtunkhwa (KPK), reaching the most vulnerable people with the following:

* shelter
* clean water
* emergency medical assistance
* dry rations of food
* mosquito nets
* basic hygiene and kitchen items

Our Emergency Health response will involve mobile medical tents with facilities for men, women and children.

Concern has been working in Pakistan since 2001, with vastly experienced emergency personnel already in place in worst–affected areas to respond to this disaster. Floodwaters have cut off or totally submerged huge areas, particularly communities along the river Kabul in Charsadda District, making access difficult if not impossible at present.

Although access is difficult, our teams and local partners are on the ground trying to collect as much information on humanitarian needs as possible and reach affected populations. Roads and bridges have been damaged or cut off by floods, and the aid community is worried about public health threats posed by waterborne diseases.

Concern has over 50 staff in Pakistan, mostly local staff, and 9 local partners. Concern Worldwide Regional Director Brid Kennedy says, "This is a terrible catastrophe affecting some of the most vulnerable people in the world who are living in dire poverty."

## CRWRC (Christian Reformed World Relief Committee) – Changed Name to World Renew –2010 Pakistan Floods / Armed Conflict

Info/Hotline · Open

Faith–Based Disaster Relief/Development
HQ: 2850 Kalamazoo Avenue SE, Grand Rapids, MI, 49560–0600, United States; PAKISTAN

**Phone** 1–800–55–CRWRC
**Web** www.crwrc.org
**Serves** NW Pakistan / Nowshera and Charsadda Districts of Khyber Paktunkhwa Province
**Service** Temporary

From the InterAction site – 2010 Pakistan Floods:

CRWRC is responding to extensive rain and flooding in Northwest Pakistan with immediate intervention that includes tents, mosquito nets, hygiene kits, and trauma counseling. CRWRC will also provide emergency food assistance to 64,000 individuals displaced by the disaster in hard–hit Nowshera and Charsadda Districts of Khyber Paktunkhwa Province. CRWRC will work with

Pakistani partner Interfaith League Against Poverty (I–Lap) to provide 8,000 families with a one–month food supply including flour, salt, sugar, oil, beans, and spices. CRWRC has significant experience in the Northwest Provinces of Pakistan and is seeking donations to fund its response.

From the site – 2010 Pakistan Flood Response:

Pakistan Flood Survivors to Receive CRWRC Food Aid

CRWRC Newsroom | August 3, 2010

CRWRC is responding to widespread devastation in Northwest Pakistan resulting from weeks of extensive rains that have caused mudslides, collapsed buildings, and covered entire villages in water and mud. The agency plans distributions of immediate aid to flood survivors in hard–hit Khyber Pakhtunkhwa Province, including food assistance to 64,000 individuals displaced by the disaster.

The intense monsoon rains started July 21, and have caused unprecedented flooding that has killed more than 1,600 people, stranded hundreds of thousands, and displaced or otherwise affected more than 4 million people, according to news reports. Both the U.N. and U.S. governments have pledged $10 million in humanitarian assistance.

CRWRC's initial emergency response, focused in Nowshera and Charsadda Districts, includes 8,000 mosquito nets, 1,500 hygiene kits, tents, kitchen sets and psychological services. CRWRC will also apply for immediate funding for additional emergency aid to supply 8,000 families with food for one month. These distributions will include wheat flour, cooking oil, lentils, sugar, salt, and spices.

CRWRC has significant experience in the Northwestern provinces responding to previous disasters in 2005, 2008, and 2009. The agency's Pakistani partner, the Interfaith League Against Poverty (ILAP), is based in Islamabad.

In 2009 CRWRC, with ILAP, conducted a three–month relief program to provide emergency food aid to 2,000 internally displaced families who were fleeing violence between military forces and insurgents in Malakand, Swat, and the NorthWest Frontier Province. ILAP provided food supplies at that time, along with CRWRC non–food relief items to displaced persons and their host families.

CRWRC will continue to assess its response to current flooding in the coming months based on need and available funding.

From the InterAction site – 2010 Pakistan Flood Response:

Following the July 2010 disastrous floods in Pakistan, ACTED has been preparing a large scale emergency response in the districts of Swat, Lower Dir and Upper Dir, for 10,000 crisis affected families. The organization is planning to respond to the most pressing needs in terms of essential non–food items, water & sanitation, cash for work, emergency shelter and rehabilitation of basic infrastructure, in coordination with the UN, governmental authorities and NGOs. ACTED has more than 200 staff in Swat and Dir areas since 2009 following the last IDP crisis. More information and mapping of the current emergency assessment of the situation is available on: www.acted.org/en/floods–north–west–pakistan–over–2–million–affected–people.

From the site – 2010 Pakistan Flood Response:

First water deliveries by ACTED
Blanket food distributions for 60,000 flood–affected populations

Islamabad, August 6th 2010 - Since July 21st, unprecedented monsoon rains have hit Pakistan- the worst monsoon on record since 1929–, with massive floods claiming nearly 1,500 lives and affecting millions of people. In the North West of the country, the torrential rains have wrecked entire villages, swallowed up by rivers in spate that have turned into wrenching torrents sweeping away houses, crops and livestock.

10 days after the start of the crisis, over 4 million people have been affected, among whom are numerous families already facing harsh difficulties in the North West of the country, hit by conflicts last year which have led to the displacement of over 2.2 million people. ACTED's teams have been supporting these affected communities as they return to their area and throughout the long and difficult reconstruction process in the valley of Swat and Dir. Today, everything needs to be started all over again.

The massive floods have swept away the whole infrastructure, including bridges, roads and access routes, further isolating mountain villages in the North of the country. These harsh conditions have slowed down the arrival of relief which is urgently needed by the disaster victims who lack both food and water because of insufficient supplies reaching local markets. Communities are also facing increasing risks of water–borne diseases and other epidemics. In the Swat valley alone, hundreds of thousands of people have been affected by the catastrophe.

Since Sunday, ACTED's teams present in the worst hit areas, in the North of the Swat valley and North of the Dir valley, have been concentrating on the assessment of the most urgent needs and on setting up emergency relief operations. On Thursday August 5th , ACTED began the first water deliveries to some 2,600 people in the villages without water. Overflowing rivers have polluted clean water sources and destroyed most of the water supply network. ACTED staff have delivered some 20,000 liters of drinking water and will carry on the distributions in the coming days, until a return to normal.

In the next few hours, ACTED is starting massive food distributions for over 60,000 Pakistanis located in the isolated districts North of the valley of Swat. Over several days, tons of food items will be flown by helicopter to these remote areas, where affected families will receive food to cover their immediate nutritional needs and those of their children.

For the past five days, ACTED's resources in Pakistan have been fully devoted to responding to the emergency, with the transportation and delivery of basic non–food items (hygiene kits, tents, kitchenware, tools, etc.) and the setting–up of cleaning activities for the communities in order to clear away the mud which has filled homes and affected harvest and cattle, while providing the most vulnerable households with immediate cash.

The Evolving Context of Needs and Relief in Pakistan

ACTED began emergency relief activities in Pakistan after the fatal earthquake of October 2005. In 2006 and 2007 emergency interventions evolved towards a development approach. Currently, ACTED in Pakistan strengthens its previous interventions and extends them to new areas in the North West Frontier Province (NWFP) and the Southern Punjab Province with a special focus on immediate relief operations to meet the basic needs of communities affected by conflicts and floods.

Following the floods of August 2008, ACTED started emergency response projects in Dir Area, with disaster preparedness programmes and hygiene promotion components. Following the devastating floods in the Rajanpur district of Punjab Province, inundating more than 139 villages and affecting more than 100,000 people in August 2008, ACTED set up a threefold intervention strategy addressing needs in terms of infrastructure rehabilitation, lack of access to cash for rapid recovery as well as hygiene hazards that put populations at risk.

To meet the needs of the unexpected influx of IDPs/Returnees after the resumption of the conflict in the Federally Administered Areas (FATA) in 2008, ACTED began an intervention to improve living conditions in tented camps through health, food security, Income Generating Activities (IGA), and hygiene promotion activities and focused on the “winterization” of three IDP camps hosting about 5,000 families.

Since October 2008, our teams have been implementing relief operations in favor of the most vulnerable displaced populations of the North–West Frontier Province of Pakistan by providing them with essential items, access to drinking water, support in terms of sanitation and hygiene as well as in terms of income generation through the participation to basic rehabilitation works and clothes production for women. ACTED continues to assist the host communities in Mardan, Peshawar, Swabi and Nowshera districts, where IDPs are still present, while supporting the immediate recovery of the populations in the areas of return in Swat and Dir, as well as to those who have been unable to flee the conflict and who have remained in the region.

ACTED Pakistan also supports the implementation of the European Commission's “South Asia Invest” microfinance initiative.

In the future, ACTED in Pakistan will continue to support the development efforts following the emergency relief operations.

From the SITE:

GOAL is established in Sindh province in Pakistan and is providing life–saving support to some of the millions of people most affected by the devastating floods.

We are working with local NGO HANDS to support the emergency evacuation of the displaced populations by road and boat and providing water and food to some of those most in need of assistance.

Over the coming days, GOAL plans to continue this work and distribute crucial non–food items such as clothes, blankets, mosquito nets, cooking equipment and plastic sheeting for emergency shelter, while other assistance will be provided in the form of sanitation and medical support.

Up to three million people have been affected in Sindh province alone since the disaster began. Hundreds of thousands of people have been displaced by the floods in the province, the majority of them in the north, where GOAL is working.

More than 1,600 people have been confirmed dead across the country. Between 15 and 20 million people have been affected in total and more than two million have been made homeless.

From RELIEF WEB:

GOAL reaching thousands of flood survivors in Pakistan

Source: GOAL

Date: 16 Aug 2010

GOAL's emergency response team in Pakistan is delivering vital life–saving support to thousands of people most affected by the ongoing devastating floods.

GOAL has based its operations in Sindh province in the south–east of the country. Over the coming days, the aid agency plans to distribute food and crucial non–food items such as clothes, blankets, mosquito nets, cooking equipment and plastic sheeting for emergency shelter, while other assistance will be provided in the form of water, sanitation and medical support.

GOAL is also supporting the emergency evacuation of the displaced populations by road and boat.

"The crisis is still unfolding here - the floods are spreading and hundreds of thousands of people are being forced to vacate their homes, said GOAL's Emergency Co–ordinator in Pakistan, Brian Casey.

"I witnessed one village being washed away right in front of me yesterday. The needs are colossal, the roads are full of people moving away from the floods – some families have moved four or five times and have lost assets on each occasion.

"Others have stopped at informal camps that are hugely overcrowded. In one case over two thousand people were sharing two latrines and people had to resort to open defecation," added Mr. Casey.

Up to three million people have been affected in Sindh province alone since the disaster began. It is believed that up to 550,000 people have been displaced by the floods in the province, the majority of them in the north, where GOAL is working.

More than 1,600 people have been confirmed dead across the country. Fifteen million people have been affected in total and more than two million have been made homeless.

GOAL can be reached at PO Box 19, Dun Laoghaire, Co. Dublin; at 01–2809779, or by visiting www.goal.ie.

Floods in Pakistan: Handicap International intensifies its emergency relief activities
Source: Handicap International
Date: 10 Aug 2010

Montréal, 10 August 2010 – Handicap International has been providing relief to the victims of the current flooding in Pakistan for almost a week. The water distribution and clear–up activities set up by the organisation immediately after the start of the floods are continuing. The distribution of hygiene kits is also gradually being expanded. According to the United Nations, almost 14 million people are expected to be affected by the flooding, the worst since 1929.

The situation in Pakistan has seriously deteriorated over the last week, with heavy rainfall worsening the flooding in the north–west and south of the country. The Pakistani government has recognised that it is facing a natural disaster on a far greater scale than the 2005 earthquake. The UN Office for the Coordination of Humanitarian Affairs (OCHA) estimates the number of victims at around 14 million in the provinces of Baluchistan, Khyber Paktunkhwa, Sind and Punjab. The disaster has so far claimed more than 1,500 lives and destroyed over 290,000 homes. "During a natural disaster like the one currently affecting Pakistan, you're faced with an ongoing emergency", explains Stéphane Lobjois, head of mission for Handicap International in Pakistan. "For the last 13 days we have experienced a highly critical situation in which the population's suffering has shown no signs of abating and the situation is not improving."

On 2 August, Handicap International decided to release about $135,000 in general funds to ensure a swift response to the natural disaster.

Handicap International's Emergency Response Department acted very quickly to organise the distribution of clean drinking water, a key factor in preventing the spread of epidemics, in particular cholera. Drinking water is still being distributed in the area. Handicap International is also helping people access water by repairing water supply systems (pumps) destroyed by the flooding.

The organisation has also begun distributing 7,000 kits*, enabling families to purify and store water, and to wash and cook.

A clean-up project has also begun in the districts of Hangu, Swat and Kohat. Handicap International is involving local people in clearing away the waste and debris swept along by the floods and removing stagnant water from towns, enabling the population to return to the area and limiting the spread of disease. This project should soon be extended to other areas.

Present in the country since the 2005 earthquake, Handicap International runs several projects in Pakistan and has launched two large-scale emergency operations in the past, most recently in 2009 when three million people fled fighting in the Swat Valley. The organisation was therefore already present in the regions affected by the flooding. Handicap International currently has a team of around 150 people on the ground.

* 3,000 hygiene packs (soap, towels, toothpaste, cotton wool, mosquito repellent, etc.); 3,000 water treatment and storage packs (bucket, jerrycan, glasses, etc.); 1,000 cooking packs (saucepans, plates, etc.)

From RELIEF WEB:

Providing access to clean drinking water for flood victims
Source: Handicap International
Date: 06 Aug 2010

Handicap International has begun distributing humanitarian aid in the flood-affected areas of Pakistan. Present in the country since 2005, we were able to immediately mobilise our team in aid of the most vulnerable people.

Handicap International's teams in Pakistan have taken immediate action in response to the devastating floods – the worst since 1929 – that have struck the region of Khyber Pakhtunkhwa in the north west of the country. The disaster has so far affected 4.5 million people, claiming more than 1,500 lives and destroying more than 150,000 homes. 550,000 people have been evacuated from Sind and Punjab provinces.

Our teams were already present in the north west of the country before the disaster, helping people displaced by the fighting between the Taliban and the Pakistani army in 2009. Handicap International decided on Monday to release £83,000 of funding to ensure action is taken immediately. Drinking water distribution will begin today (Friday 6th August). The distribution of emergency kits (blankets, shelters, etc.) has already begun and will be scaled up over the next few days in the districts of Swat and Kohat.

Avoiding cholera epidemics

Handicap International is focusing primarily on providing access to clean drinking water, a key factor in preventing the development of epidemics, particularly cholera, which can easily spread in a flood situation where water sources are contaminated. Our initial goal is to distribute clean drinking water to 100,000 people, requiring 200 rounds a month by water tankers. Water treatment tablets will also be distributed along with jerrycans for collecting and storing clean water.

Handicap International teams will give simple hygiene advice to the population that can help prevent the spread of epidemics. In addition, we will provide the most vulnerable people with temporary shelters (sheets), blankets, cooking kits* and hygiene kits**. Some 3,000 families will benefit, representing around 21,000 people in total. Our teams will also help clear up the waste and debris swept along by the floods, and remove stagnant water from towns, enabling the population to return and limiting the spread of disease.

Handicap International has been present in Pakistan since 2005, since the deadly earthquake that killed 73,000 people and seriously injured 69,000 others. Our organisation has built up extensive expertise in emergency situations, including in El Salvador and India (2001), Iran (2004), Pakistan (2005), Indonesia (2005 and 2009), China (2008 and 2010), and Haiti (2010) to mention just our most recent operations.

*Cooking kits contain saucepans, stoves, cooking utensils, etc.

** Hygiene kits contain basic items such as towels, soap, toothpaste, tooth brushes, nappies, sanitary towels, rubbish bags, etc.)

From the SITE:

August 03 2010.
In the aftermath of the disaster /
FLOODING IN PAKISTAN: HANDICAP INTERNATIONAL TAKES ACTION

Present in Pakistan since 2005, Handicap International is organizing a rapid response to aid victims of the flooding currently ravaging parts of the country's northwestern region. The organization has released $131,800 in funds and it has set up a system to meet the basic needs of victims as quickly as possible.

For the last three days, the region of Khyber Pakhtunkhwa in Pakistan has been hit hard by the most serious flooding seen in the country since 1929. More than 3 million people have been affected by the disaster, which has left more than 1,500 people dead.

Many areas have witnessed a total breakdown in communications. The three most severely affected districts are Charsadda, Nowshera and Swat, and many areas are cut off from supplies of humanitarian aid.

Present in the country since the earthquake of 2005, Handicap International operates several projects and it has already launched two large–scale emergency operations, most recently in 2009 when 3 million people fled fighting in the Swat Valley. The organization was already present in the regions affected by the flooding.

Handicap International's Emergency Response Department has asked its team in Pakistan to organize an emergency response and to coordinate its efforts with other humanitarian aid operators in the field. The scope of the emergency response will be based on the outcome of an assessment mission currently underway. On Monday, the organization released $131,800 in funds to ensure action is taken immediately. Priority will be given to providing access to water, meeting basic needs (blankets, shelters, etc.), and providing health care.

Handicap International's field team currently consists of some 150 people, including seven expatriate staff members: a physiotherapist, a psychosocial project officer, the manager of the Peshawar base, an administrator, a logistician, a safety adviser and a head of mission. The team provides health care to vulnerable people affected by conflict, technical mobility aids, psychosocial services and packs to meet their basic needs. In addition, Handicap International improves and builds new health care facilities and ensures they are accessible to vulnerable people. Lastly, the organization raises awareness among people who are at risk from explosive devices. It is currently doing everything possible to provide relief to flood victims and to meet their most pressing needs.

8/11/10 FROM THE SITE – 2010 Pakistan Floods

The number of people who have died in the monsoon floods has now risen to 1,600 and estimates of those affected stand at almost 14 million.

Despite mass evacuations, there are fears the death toll will rise as the floods reach the southern province of Sindh and the risk of water–borne disease outbreaks increases.

HelpAge is currently responding to the emergency alongside medical aid agency Merlin.
Almost one million older people may be affected

Asma Akbar, Programme Manager for HelpAge in Pakistan said:

"We know that older people make up approximately 7% of the general population. This means that almost one million older people may be affected by the floods.

“Obviously we are very keen that any official assessments include older people. This will help the humanitarian community respond effectively and urgently to older people’s needs.”
Targeting the most vulnerable

Our emergency response is currently targeting the most vulnerable older people and their families in Nowshera district in Khyber Pakhtunkhwa. We have staff members attached to Merlin medical teams who will specifically focus on the needs of older people affected.

HelpAge is distributing mobility aids, hearing aids, and emergency health assessment kits. We are also handing out food and emergency household items such as flashlights, bedding and water containers.
"They only have the clothes they are wearing"

Asma adds:

“So many people we have spoken to have told us that they had time to take their most valuable belongings with them – maybe a rug, or their livestock.

“But they only have the clothes they are wearing so we are quickly putting together 2,000 new water resistant bags containing sheets, umbrellas, a shawl, and shalwar kameez. We’re also including dates in this package for breaking of the fast, as Ramadan starts this week.”

In the UK, the DEC Pakistan Floods Appeal has now reached GBP9.5 million.

FROM THE SITE:

HHRD's Floods Emergency Response:

Currently HHRD is actively providing emergency relief across the country.
This includes District Swat, Buner, Dir, Char Sadha and Mianwali.

– Food Distributions: $25 food package will feed a family of 6 for 1 week.

Food Package includes: Flour, Sugar, Cooking Oil, Rice, Lentils, Biscuits and other basics.

Food package distributions have been made to over 8000 individuals.

– Medical Assistance: $500 provides for 1 week's supply of medicines.

Every day more than 500 patients are receiving treatment and medicines at HHRD's medical camps.

– Shelter: $100 is the cost of one tent.

Tent distribution is being made to help those whose houses have been washed away by the floods.

Comprehensive Primary Health Care Services are being provided in collaboration with World Health Organization (WHO), and HHRD is running a Mother Child Health Center as well. Ambulance services are also being provided.

Pakistan Floods 2010:

The death toll has passed 1500 and the floods have affected over 3.5 million people across Pakistan. This year's monsoon season caused the worst floods in the history of Pakistan. Flood waters devastated and washed away hundreds of villages and the livelihood of many, in its course.

According to HHRD's Emergency Response Team, thousands are stuck on rooftops, have limited access to survival. Lack of drinking water is a constant threat to health of millions and they are facing water borne diseases.

People from remote areas are walking 8 to 10 hours to reach a place where food could be available. Some displaced people are staying with relatives but many are sleeping out in the open. They have lost their houses, shops, and livestock. They cannot reach for help due to damage to paved roads and bridges. Tents are needed.

Please help in any capacity; there are a lot of people suffering and need our assistance.

Helping Hand for Relief and Development has launched a $1 Million appeal for Floods Relief in Pakistan.

For latest updates and to donate, please visit www.hhrd.org or call 1–888–808–HELP(4357).

–HHRD Team

Five medical camps are operating in the flood affected areas:

* Charsadda, Khyber Pakhtunkhwa Province
* Nowshera, Khyber Pakhtunkhwa Province
* Deer, Khyber Pakhtunkhwa Province
* Sawat, Khyber Pakhtunkhwa Province
* Mianwali, Punjab Province

Date: 10 Aug 2010

– From7–9 August, HHRD distributed food packages among 800 families in Nowshahra, Charsada, Swat and Dir (Khyber Pakhtoonkhwa).

– From 4 – 9 August, through medical camps, HHRD treated 4000 patients in Charsada and Dir

– Health activities begin in district Dera Gazi khan and District Muzafar Garh. As, today, HHRD medical camp team has approached.

– By tomorrow, HHRD team will begin to provide health assistance in district Nawab shah

– One of HHRD aid worker loses life during relief activities

HHRD is providing health and food assistance in following 9 locations

Khyber Pakhtoonkhwa:

District
– Noshehra
– Charsada
– Dir
– Swat

Punjab
– Mianwali
– Layyah
– Muzafar Garh
– D.G.Khan

Sindh
– Nawab Shah

FROM THE SITE:

Torrential rainfalls have caused the worst floods in the history of Pakistan, in what is being termed as the “Floods of the Century”.

The extent of this disaster can be gauged from the numbers affected by these floods: 1 in every 10 Pakistanis has been directly affected. There has been widespread devastation of roads, bridges, homes, crops, livestock, and displacement of millions of people including women and children. It is a massive task to provide immediate relief and to help communities rebuild their lives.

IDS is committed to alleviating the suffering of the flood affected people. In response to this widespread devastation IDS has decided to lead the emergency flood relief efforts.

As a first step, IDS has set up Donation Collection Centers in District Sheikhupura and has already dispatched Relief teams for immediate provision of vital supplies including food, water, medicine, cooking utensils, and other necessary provisions.

IDS has also partnered with Glamourati & Gold Agency to raise funds for the flood victims by organizing events of international celebrities in Pakistan. IDS has already engaged EDWARD MAYA http://www.edwardmaya.com/tour–a–events, a famous Singer/ DJ who is the No 1 top selling artist of 2010 with 55.6 million fans worldwide to perform at the Lahore Expo Centre on the 18th of September 2010. Funds raised by these events will be utilized for the affected flood victims.

**Service** Temporary

From the InterAction site – 2010 Pakistan Flood Response:

International Medical Corps deployed a team of male and female doctors, paramedics and psychosocial counselors to a school in Peshawar, where more than 2,100 people have taken refuge. Within three hours, more than 110 patients - 80 percent of them women and children – were provided health care services. Ten of the women were pregnant. International Medical Corps will deploy nine medical teams, along with psychologists and hygiene promoters, to address the needs of the population in the worst affected districts, including Peshawar, Charsadda, Nowshehra, and Swat. Teams are seeing cases of acute respiratory infection, diarrhea and skin diseases. With the lack of clean water there is a high risk for outbreaks of disease, including cholera.

From the site – August 6th, 2010 Pakistan Flood Response Situation Report:

International Medical Corps Addressing Critical Psychosocial Needs of Pakistan's Flood–Ravaged Displaced:

August 6, 2010 - Los Angeles, CA

International Medical Corps' staff is on the ground in Pakistan providing medical services along with psychosocial support to help people whose lives have been devastated by the floods.

Heavy monsoon rains in the last week of July triggered flash floods in several parts of Pakistan resulting in widespread destruction and displacement. An estimated 1,600 have lost their lives and more than 1.5 million have been displaced, with over 4.5 million affected. International Medical Corps immediately deployed mobile medical teams in the most severely affected Charsadda, Peshawar and Nowshehra Districts to provide emergency services. In addition to medical care to address basic health needs, teams are working to strengthen local coping mechanisms.

In Charsadda, International Medical Corps met Abid, a 14–year–old boy, who saw his grandmother drown during the floods and is now experiencing grief. "I cannot forget that moment, I am constantly getting flashbacks and even in dreams I see water going up and I wake up screaming," said Abid. "I am happy that I am safe but I am also sad that my home and school were destroyed". International Medical Corps' local staff members are trained in psychological first aid and are able to provide access to basic

services and support to those experiencing normal reactions to disasters – fear, anger, grief and a range of other emotions – and to address each case with sensitivity.

In a school in Peshawar – where more than 2,100 individuals have taken refuge – International Medical Corps met with a mother of 5 who recalled what her family had endured during the floods. "When the floodwater entered our house, we were all in a panic. Manahil [her 4–year–old daughter] saw my elder daughter Amina being swept away by the floodwater. She was saved and pulled out of the water, but since then, she is afraid of the water when I am bathing her and gets very restless when she is alone". International Medical Corps is now helping the woman care for Manahil and Amina by teaching her basic relaxation techniques to reduce anxiety.

International Medical Corps makes mental health care a priority in its emergency relief efforts by addressing the immediate psychosocial needs of communities struck by disaster and offering help to those with pre–existing mental health disorders. The organization's teams in Pakistan are comprised of local, trained staff members who can communicate in the local language and understand the cultural context of the situation.

International Medical Corps has been operating in Pakistan since 1984, providing primary health care services and water/ sanitation facilities to displaced Pakistanis and Afghan refugees in the frontier areas.

International Medical Corps Teams Treating Victims of Flash Floods in Pakistan
Los Angeles, CA, August 6, 2010:

Following monsoon rains that have unleashed the worst flooding in Pakistan in 80 years, International Medical Corps has deployed 6 mobile medical teams to assist victims in the hardest hit areas of Khyber Pakhtunkhwa Province in the northwest. In addition, GlaxoSmithKline, with facilitation from AmeriCares, has donated urgently needed medicines for immediate distribution by International Medical Corps to those in need.

The latest government figures indicate more than 1,600 people have died and as many as 1.5 million have been forced to flee their homes, approximately 4.5 million affected. Authorities expect the number of dead is much higher as communication networks are disrupted and roads and bridges have been washed away by floodwaters, making access impossible. As the flood situation may further be aggravated by oncoming monsoon rains, the humanitarian situation in Pakistan stands to worsen.

Immediately following the onset of flooding, International Medical Corps deployed a team of doctors, paramedics and psychosocial counselors to a school in Peshawar, where more than 4,000 families have taken refuge. More than 300 patients – 80 percent of them women and children – were provided health care services. Ten of the women were pregnant. A total of 75 patients received psychosocial support, many of them suffering from depression, stress and phobia.

International Medical Corps has also deployed mobile medical teams, along with psychologists and hygiene promoters, to address the needs of the population in the worst affected districts, including Peshawar, Charsadda, Nowshehra, and Swat. As the organization makes mental health care a priority in emergency relief efforts, International Medical Corps is also providing psychosocial support including teaching local coping mechanisms to help those whose lives have been devastated by the floods.

"Our priority is getting people desperately needed medical services. We are seeing cases of acute respiratory infection, diarrhea and skin diseases," said Sonia Walia, International Medical Corps Regional Coordinator for Asia. "With the lack of clean water we are extremely concerned about outbreaks of disease, including cholera. Compounding this tragedy is that many of those affected were already displaced by ongoing conflict in the region, so their mental health needs are also enormous."

International Medical Corps has been operating in Pakistan since 1984, providing primary health care services and water/ sanitation facilities to displaced Pakistanis as well as to Afghan refugees in the frontier areas.

Since its inception 25 years ago, International Medical Corps' mission has been consistent: relieve the suffering of those impacted by war, natural disaster, and disease, by delivering vital health care services that focus on training. This approach of helping people help themselves is critical to returning devastated populations to self–reliance.

International Medical Corps Teams Providing Relief to Flood–Affected in Afghanistan – August 6, 2010:

Jalalabad, Afghanistan – Monsoon rains that have unleashed the worst flooding in Pakistan in 80 years have also severely affected people in neighboring Afghanistan, where International Medical Corps' teams are providing health care services in the eastern provinces. Local populations have been forced to flee their homes or refugee camps and heavy rainfall has caused the destruction of two main bridges in the region, leading to blockage of critical medicines and supplies.

In the immediate aftermath of the flooding in the last week of July, International Medical Corps mobilized quickly to administer basic health care services and assess needs in Nangarhar, Kunar, Laghman and Nuristan Provinces, the worst–affected areas in Afghanistan. Mobile medical teams have visited returnee settlements to provide first aid and distribute supplies throughout the region. Teams have provided pre–positioned household kits, which include hygiene materials, blankets, stoves and kitchen supplies for families. International Medical Corps will continue to offer health, nutrition and protection services in its areas of operation within the flood–affected provinces.

As flooding may be aggravated by additional rainfall in the coming days and weeks, International Medical Corps' staff will continue to monitor the situation, in particular emergent outbreaks of waterborne illnesses such as cholera. International Medical Corps is supported by 278 community health workers in Nuristan Province, who will provide health education at the community level to prevent outbreaks of disease.

International Medical Corps launched its first program in Afghanistan in 1984 during the Soviet occupation. It has continued to provide life–saving medical care and training throughout the country ever since and is the only international NGO operating in Nuristan Province.

From the site – "Our Work in Pakistan::

Pakistan has the world's sixth largest population and is the second most populous Muslim nation behind Indonesia. After its independence from Britain in 1947, Pakistan fought three wars against its eastern neighbor, India, before its security concerns shifted westwards following the 1979 Soviet invasion of Afghanistan. Afghan guerrilla groups turned Pakistan's Northwest Frontier Province (now Khyber Pakhtunkhwa Province) into an armed camp during the 1980s and 1990s. Today, the rise of militant Islam in the loosely administered tribal lands along the Pakistan–Afghanistan frontier poses the greatest security challenge, both to the Pakistani government and much of the world. It is here that remnants of the Al Qaeda terrorist group have taken sanctuary and where the resurgent Taliban have launched their challenge to the U.S.–backed government in Kabul. Armed conflict between militant fundamentalists and Pakistani security forces in recent years has created the world's largest displaced population, including 1.8 million refugees—mainly from Afghanistan and an undetermined number of internally displace Pakistanis.

International Medical Corps has worked in Pakistan since 1984, initially providing basic paramedical training to young Afghan refugees, who then returned home to treat neglected local populations. Our assistance extended in 1999 to the local Pakistani population in volatile frontier areas and in 2005, we were among the first to respond to the massive earthquake in the frontier area. Today, International Medical Corps provides primary health care services to internally–displaced Pakistanis in the frontier areas, offers comprehensive basic health services to Afghan refugees who remain on the Pakistani side of the border, operates an emergency obstetrics care center in the city of Peshawar and runs water and sanitation facilities in the tribal areas for internally displaced Pakistanis and Afghan refugees.

IOCC Mobilizes Food Aid to Flood Victims in Pakistan

Source: International Orthodox Christian Charities (IOCC)

Date: 12 Aug 2010

Baltimore, MD (IOCC) — Torrential rains and flooding over the course of July and early August have now affected an estimated 14 million people in Pakistan according to reports from the Government of Pakistan. Widespread flooding has devastated large parts of the country destroying homes, leaving people without food, clean water and shelter and exposing millions to the threat of disease.

In response to the emergency, IOCC has mobilized food assistance to vulnerable people in the flood affected communities of Wazirabad, Gujranwala and Faisalabad, Pakistan. The IOCC response is being coordinated with the Orthodox Mission in Pakistan with the blessing of His Eminence, Metropolitan Nektarios of Hong Kong and South East Asia.

"We pray for those who have perished and for the millions of people whose lives are threatened by this ongoing disaster," says IOCC Executive Director Constantine Triantafilou. "With rain continuing to fall, the magnitude of this disaster continues to grow and much more aid will be needed."

You can help the victims of disasters around the world, like the floods in Pakistan, by making a financial gift to the IOCC International Emergency Response Fund, which will provide immediate relief as well as long–term support through the provision of emergency aid, recovery assistance and other support to help those in need. To make a gift, please visit www.iocc.org, call toll free at 1–877–803–IOCC (4622), or mail a check or money order payable to IOCC, P.O. Box 630225, Baltimore, Md. 21263–0225.

IOCC, founded in 1992 as the official humanitarian aid agency of the Standing Conference of Canonical Orthodox Bishops in the Americas (SCOBA), has implemented over $330 million in relief and development programs in 33 countries around the world.

**Service** Temporary

From the InterAction site (2010 Armed Conflict response):

The International Rescue Committee (IRC) has been engaged with the displacement response since November 2008. IRC is working in partnership with the Government of Pakistan, UNHCR, UNICEF and other agencies as a key actor providing services for internally displaced people (IDPs) affected by the conflict. Currently, IRC works in protection, education, and water and sanitation inside the camps. IRC will be extending humanitarian relief services, including water and sanitation and protection, to vulnerable IDPs who have not found refuge in camps and make up the majority of displaced people in Pakistan. IRC is also assessing health services for out–of–camp IDPs, with plans to address identified gaps.

From the Site – Floods Response:

IRC on the Ground in Flood–Ravaged Pakistan: “The Situation Is Desperate”

The International Rescue Committee is on the ground providing aid to victims of the worst flooding in Pakistan’s modern history. At least 1,400 people have been killed and three million people have been affected by the devastating monsoon rains.

“Our greatest concern right now is that people’s supplies of drinking water have been contaminated by the flood waters,” said the IRC’s Pakistan director Tammy Hasselfeldt. “The reports of diarrhea and gastrointestinal problems are rapidly increasing.”

In response, the IRC will, in the coming weeks, launch a major aid effort to clean contaminated wells and repair broken water systems.

“In the first phase, as water levels are slowly receding, we are also going to distribute plastic sheeting for shelter, blankets, bednets to prevent malaria, hygiene material, water purification tablets and other essential material,” Hasselfeldt said.

The monsoon rains continued this week making it extremely difficult for aid workers to reach the affected areas. IRC teams on the ground report that large areas of northwestern Pakistan have suffered extensive damage with entire villages, roads, bridges and dams washed away in the deluge. The communication infrastructure has also been destroyed, effectively cutting off towns and villages from the outside world.

“While we are active in 11 districts across northwestern Pakistan, our response at present will target the worst affected districts: Khyber–Pakhtunkhwa, Noweshera, Charsadda, Swat and Dir,” Hasselfeldt said.

In the past week, IRC teams visited some 200 villages in Swat district and estimates that nearly 200,000 people remain trapped by broken roads and bridges and are awaiting assistance. On July 31, IRC teams rented all–terrain vehicles and ferried 300 desperate people from villages in the Bahrain, Maidan and Matta areas to higher ground across a treacherous mountain pass.

“Our staff report that the floods have caused extensive landslides across Swat,” Hasselfedt said. “Whole villages have been washed away in the current, along with livestock, medical supplies and food. Residents have few means to find shelter from ongoing rainstorms or the daytime heat.”

Soon firewood too will be in short supply. The little dry wood that is available is prioritized for cooking and staying warm in the cool evenings rather than for boiling water, which has contributed to the increase in disease.

To make matters worse, forecasters predict more flash floods in the devastated northwest and other parts of the country in the coming days. So far, nearly one million people have lost their homes or have been forced to flee, according to the United Nations. Some 1.8 million are in need of food aid.

“The situation is desperate,” Hasselfedt said. “It will take a very long time and increased support from the outside world to help people recover from this catastrophe.”

From the InterAction site (Pakistan Floods Response 2010):

IRC is mobilizing its staff and resources immediately to respond to the floods in Pakistan. IRC plans to target the most heavily affected districts of Charsadda, Nowshera, Lower Dir and Swat in Khyber Pukhtunkhwa (KPK) Province. IRC will also be conducting assessments in DI Khan, Tank, Kohat and Hangu districts. IRC has been active in these areas providing quick emergency response to villages affected by conflict with field staff already based in these areas. Immediate program assistance for flood affected areas will focus on water, sanitation and hygiene (WASH), non–food item distributions, and shelter

From RELIEF WEB:

UK Agencies provide quick humanitarian assistance to flood affected communities in Pakistan

Source: ActionAid; Catholic Agency for Overseas Development (CAFOD); CARE; Christian Aid; Concern; International Rescue Committee (IRC); Islamic Relief (IR); Oxfam; Save the Children; Tearfund

Date: 06 Aug 2010

The newly established CBHA (Consortium of British Humanitarian Agencies) launched an immediate response to the devastating floods in Pakistan through an emergency response fund (ERF) established with support from DFID in March 2010. The aim of the ERF is to enable UK agencies to deliver fast, appropriate and high quality humanitarian assistance to people affected by disasters. In this instance £750,000 has been allocated to support immediate needs and will provide emergency health services, clean water, sanitation, food and shelter items to approximately 170,000 people to reduce the risk of outbreak of diseases.

"This fund has kick–started a coordinated and speedy response by nine member agencies. We are able to address life critical needs in the worst hit Khyber–Pakhtunkhwa Province (KPK) whilst further funds are being raised for a larger and more comprehensive response. Quick action like this is vital in saving lives," said Sarah Moss, the interim Director of the CBHA

Agencies will be distributing much–needed all–weather tents, emergency food and hygiene packs, medical services and water and sanitation equipment. Many agencies will continue to provide these services and help to rebuild communities and livelihoods in the months ahead with additional funds provided by public appeals such as the DEC (Disasters Emergency Committee)

Andrew Mitchell, the British Governments Secretary of State for International Development said: "Our fast response funding through the CBHA will help get more disaster experts to flooded districts as quickly as possible to kick–start vital life–saving work. With more rains expected over the next few days, we must get aid to them as quickly as possible"

Members of the CBHA include ActionAid, Action against Hunger, CARE International UK, CAFOD, Christian Aid, Concern Worldwide UK, HelpAge International, International Rescue Committee UK, Islamic Relief Worldwide, Merlin, Oxfam GB, Plan International UK, Save the Children UK, Tearfund and World Vision UK.

For more information on CBHA or this response please contact Marieke Hounjet, Coordinator CBHA, M.Hounjet@savethechildren.org

Further funding is needed for UK agencies to provide life saving assistance to communities affected by the devastating flood in Pakistan. To donate, please contact the DEC at www.dec.org.uk or by telephone on 0370 60 60 900.

From the InterAction site – 2010 Pakistan Flood Response:

Islamic Relief USA has launched an emergency campaign to aid the victims of the floods that have affected more than 1 million people and claimed more than 1,100 lives thus far.In Noshara, which is 100 km north of Pakistan's capital city Islamabad, Islamic Relief's team is providing food and water for 700 families. Islamic Relief staff is also distributing tents and blankets throughout the flood–devastated region. Working with the United Nations World Food Program, Islamic Relief is also distributing food to 2,000 families in Bakhtiarabad. Islamic Relief workers on the ground are continuing needs assessments, and international staff–members are working hard to help raise funds and awareness.

From the site – 2010 Pakistan Flood Response:

Current Situation

Hunger and waterborne diseases are spreading rapidly amongst the more than four million people affected by severe flooding in northwest Pakistan.

Shortages of food, water, clothing, shelter, and supplies are making it difficult for the victims. Waterborne diseases like diarrhea and cholera have contaminated nearly all the water wells and are beginning to infect the most vulnerable of the people. Children are especially at risk.

After devastating Pakistan–administered Kashmir and the Khyber–Pakhtunkhwa (KPK) province, floodwaters are now affecting areas of Punjab and Sindh. At least 1,300 villages have been affected in Punjab so far, with the toll steadily climbing.

Two million people are now homeless and more than 1,600 lives have been lost.

Flashfloods and landslides washed away entire villages and uprooted thousands of acres of farmland.

Due to the sheer magnitude of the rains, which caught most victims off–guard, many have lost their livelihoods and have no idea how they will survive after the disaster.

Islamic Relief USA's Adnan Ansari, vice president of programs, is part of the IR team in Pakistan helping with aide efforts and assessing the needs of the people. He reported, "Outside the camps, many people were staying put in their villages, despite their homes being destroyed and the roads being cut off. 'This is all we have left,' one of the victims who stayed home (which had no walls left) told me. 'I can't risk leaving my belongings unattended.'

"People's dreams were hit hard by the floods. But their ability to overcome the hardship is a testament to the resilience of the human spirit. Still I wonder how long they can hold up."

Hardest–hit areas

* Pakistan–administered Kashmir and Khyber Pakhtunkhwa were hardest hit with the rains initially, but Punjab and Sindh are now on high–alert, as hundreds of thousands flee their homes.
* Peshawar, Nowshera and Charsadda, where at least 700 people have drowned, and about 5,000 people are awaiting help at a campsite.
* The Shangla and Swat districts, where hundreds have been killed and bridges are washed out.
* Areas in Pakistani–administered Kashmir, which have been cut off by landslides.

Islamic Relief's Emergency Response

* Set up a camp for internally displaced families in Nowshera & started to setup another camp for 2,000 families in Khyber–Pakhtunkhwa
* Provided vehicles to the local authority in Muzaffarabad to help rescue stranded victims
* Distributed tents in Muzaffarabad, Nowshera and Neelum Valley
* Distributed emergency food parcels to 2,000 families in Muzaffarabad
* Built latrines in a camp in Nowshera serving over 2,000 families
* Distributed hygiene kits to over 4,000 families in Mardan and Nowshera
* Purchased large quantities of tents, food and non–food supplies

People are continuing to pour into camps and register for food distributions, but supplies and capacity are dwindling rapidly. Donate today to help Islamic Relief aid as many people as possible.

Facts about Pakistan

* More than 73 percent of the population lives on less than $2 a day.
* 24 percent of the population is undernourished.
* 38 percent of children are underweight.

FROM THE SITE:

Current Endeavours

The crisis unleashed by floods across Pakistan since July 2010 are the main focus of MICT's attention. So far, we have despatched emergency food supplies to parts of south Punjab, the district of Mianwali and Dera Ismail Khan in the Khyber–Pakhtunkhwa province. We are convinced that the fallout from the floods will require a long term rehabilitation effort across Pakistan. Our main objective is now to help with the rehabilitation of floods victims in areas of our focus. Our present work follows our ongoing commitment to intervene in crisis stricken areas, as demonstrated through our support for victims of violence in parts of Khyber–Pakhtunkhwa, as well as through our support to students in need of support across Pakistan.

PRESS RELEASE FROM THE SITE:

Malteser International in Pakistan: Additional medical relief for Kohistan/ Project volume amounts 2 million euro
20.08.2010

Swat/Islamabad. Malteser International, the worldwide relief service of the Order of Malta for humanitarian aid, is now expanding its help for Pakistan's flood victims. Now also Kohistan, neighboring district to the Swat–Valley, is in focus for the relief work. "We will provide medical relief to the about 50,000 people that are living in this area," says Dr. Jürgen Clemens, Malteser International Pakistan expert.

In the last few days, Malteser International has already expanded its emergency relief and provided 2,800 families in the Swat–Valley with food, drinking water, non–food–items and hygiene kits. In reaction to the rising number of acute diarrhoea caused by contaminated water and the crowded accommodation of the flood victims, Malteser International teams were carrying out hygiene awareness campaigns in some villages in the Swat–Valley. They explained the dangers of dealing with contaminated water to the people and distributed more than 1,000 water treatment tablets, electrolyte preparations and hygiene kits including soap and towels. The Malteser International medical teams also provide medical treatment for the affected in regions that are still not accessible with off–road vehicles. "In doing so, it becomes increasingly clear to us that the extend of the destruction in the Swat–Valley cannot be estimated at this point, " says Alexander Bühler, Malteser International staff in Pakistan.

As local markets that are still functioning, Malteser International is now distributing checks to the worst affected to buy food. A decision about expansion of Malteser International's help to Punjab in Southern Pakistan depends on the results of assessments carried out by the WHO and a Malteser International team this weekend.

All in all, Malteser International's effort in emergency relief and reconstruction in Pakistan amount to a project volume of more than two million euro. The money comes from funds of the Federal Foreign Office, the Federal Ministry for Economic Cooperation and Development, the United Nations and also from donations (own donations, German Relief Coalition and donations from the worldwide network from the Order of Malta). Malteser International can account for the efficient and appropriate use of the funds.

This is confirmed amongst others by independent auditors in Germany and Pakistan. Furthermore, Malteser International also has to report the use of funds in detail to its donors like the German government.

From the SITE:

Floods in Pakistan

Since July 30, the arrival of monsoon flooding in the valley of the Indus. Especially in the provinces of KPK (NW Pakistan), where Médecins du Monde since 2009 provides humanitarian assistance to populations displaced by military operations. Flooding also affected the Punjab, Balochistan and "tribal areas" of Pakistan.

It is the greatest episode of flooding since 1929.

The recent figures are alarming. There are more than 1,600 dead or missing, mostly in the province of KPK, and nearly 14 million people were affected. In the region of the KPK, 90% of homes were "totally or partially flooded. "Health facilities are paralyzed, cases of diarrhea have doubled compared to the period before flood" reports our team.

Teams MdM

In Pakistan, Medecins du Monde has a national team of 192 people. Among the local team, some people were already working with MdM in the earthquake of 2005.

National medical and logistics personnel: 185 (106 before the floods)
7 Medical personnel and logistics from France: 7

Activities

Medecins du Monde has deployed two mobile medical teams covering 50,000 people, Nowshera, Charsadda and continued his previous actions in Swabi and Kohat. (Programme humanitarian assistance to people displaced by military operations.)

These mobile teams are designed to enhance three primary health centers where the number of consultations has exploded.

In terms of health, it appears that the main needs are to:

–strengthening of health facilities in difficulties following the floods
–the treatment of acute diarrhea cases in which the number increases significantly
–anticipation and prevention of epidemics such as cholera and malaria medium term

Per Flood Service Handbook PUNJAB
August–September 2010

Location:
Kot Ado

Activities:

HEALTH: Tehsil Headquarter Kot Ado. Diarrhea treatment.

From the website, 9/30/2010:

MSF expands Pakistan emergency response into newly flooded areas in the south as concern mounts for waterborne diseases

More than five weeks since the first floods overwhelmed regions in the north of Pakistan, Médecins Sans Frontières (MSF) emergency medical and water and sanitation teams expand operations to the south of Punjab and in hard–hit Sindh province, where millions of people have been displaced by fresh flooding.
Major concerns about waterborne diseases, malnutrition, shelter and clean, safe water prevail as teams rush to establish new

bases in Hyderabad and Sukkur in a bid to access flood affected communities on either side of the Indus River. Priorities for MSF include water supply, medical care for dehydration, acute watery diarrhoea and distribution of essential non–food items and shelter.

TOTAL FIGURES
Since the beginning of the floods in Pakistan MSF:
Distributed 24,834 non–food item kits
Distributed 6,801 tents
Performed 27,151 medical consultations
Set up seven Diarrhoea Treatment Centres
Continuously conducts 12 mobile clinics
Distributes 718,000 litres of clean, safe water per day
Built 258 latrines
Installed 11 Oral Rehydration Salt points

There are 152 international staff are working alongside 1,279 Pakistani staff in MSF's existing and flood response programmes in Pakistan.

SINDH PROVINCE

Sukkur

Officials report more than 4.5 million people displaced in Sindh province alone, including more mass evacuations of regional centres last week. MSF is planning more assessments to identify pockets of vulnerable people.

In Sukkur, in northern Sindh, MSF has been operational for four weeks providing support to the Intensive Therapeutic Feeding Centre (ITFC) ward of the Railway Hospital – the ITFC provides treatment for severely malnourished children under the age of five who have medical complications. In the first five days of being operational 30 children where admitted. MSF is conducting two 'nutrition' mobile clinics in surrounding areas and camps, in addition to distribution of non–food item (NFI) and hygiene kits. The treatment of the water plant in Sukkur town has also been completed by MSF including the distribution of 80,000 litres per day has started since Monday (30 August).

Last week 110 consultations were completed in mobile clinics in Sukkur IDP camp and 24 patients were admitted to Railway Hospital with serious medical consultations. 1,247 patients received Oral Rehydration Therapy for diarrhoea and light dehydration; and 2,561 people received health education in camps and at the hospital throughout the week.

Distributions of NFI also took place last week around Sukkur including 265 tents, 453 hygiene kits, 539 cooking sets, 539 tarpaulins, and 539 jerry cans in the following locations: Sukkur Old Airport Rd, Shara–e–Abassi Sukkur and C–Government High School and C–Government College Pir Illahi Bux.

Hyderabad (Jamshoro)

In the last week MSF also arrived in southern Sindh and set up a base in the town of Jamshoro on the western side of the river near Hyderabad. After identifying pockets of displaced people on both sides of the Indus River who had received almost no assistance up to now, MSF started new activities in recent days.. .

The main objective is to tackle the water situation as the priority issue for the region and the aim is to provide five litres per day per person to these small groups of people. On 27th August the MSF team distributed 30 m3 of chlorinated water in Jamshoro town, but in three days our capacity had already reached 180 m3 a day in six locations for approximately 10,000 people.

Daily mobile clinics have also started this week achieving 130 consultations a day per site in the and a further 500 tents have been ordered for the NFI distributions which will also begin this week targeting 5,000 to 10,000 families.

On the northern axis (from Jamshoro, up to Sehwan, on the west side of the river) MSF has located more than 10,150 people in open settings. There are at least seven small pockets of displaced people who are living by the side of the road.

Only one of these small pockets has received any kind of assistance thus far, while shelter is a high priority as groups of people can be seen actively looking for shade. They have no access to water, and healthcare is an obvious question as they are on the main road, and not getting the same attention as in Jamshoro/Hyderabad camps.

In the same region villages are also struggling because of the floods. Approximately 50–70% of the population of the villages that MSF already encountered have been evacuated. As mentioned earlier those who have evacuated have gone to camps in Jamshoro/Hyderabad. However some residents remain with little assistance: often with no access to drinkable water, and with poor hygiene conditions, and poor access to medical care – what is clear is that resettlement of many of these villages will be quite delayed because of flood damage. However MSF has been able to identify potential abandoned structures in flooded districts that may serve as potential locations for a Diarrhoea Treatment Centre (DTC) if needed.

Around Jamshoro there are two types of displaced populations: those who've moved to relocation centres and those who remain in open settings. MSF has identified four relocation centres in Government High Schools in which the displaced have found refuge. The conditions are often the same as those that MSF encountered in flood affected regions in north Sindh, where living conditions are extremely unhygienic and susceptible to disease. Many of these centres however have received some assistance

but MSF intends to monitor to make sure that further hygiene kits are provided if necessary. As usual a clean water supply might be an issue in coming weeks.

Open settings where the displaced have sought refuge are also common in Jamshoro. For example around the University of Medicine (LUMSH), approximately 2,000 people have gathered from areas as far away as Jacobabad and Balochistan. Fortunately relief teams from the university are already providing food, water and healthcare. This location appears to be a transit stop before people can find somewhere better to settle.

There are many other camps located around Jamshoro where the needs remain high and tension exists amongst the population who are frequently desperate for help.

In Hyderabad one main camp has been identified, New Sabzi Mandi camp where approximately 10,000 people so far have settled. Local organisations have already responded therefore it remains to be seen whether MSF also needs to support.

On the South axis road out of Jamshoro on the way to Karachi on the west side of the river, there is a large displaced population staying in the Khuda Ki Basti colony; a huge compound with around 300 blocks of four houses/apartments each. The complex is completely full to capacity of approximately 6,000 to 8,000 displaced people. This is another site that has poor sanitation and hygiene conditions. Nearby there are two more large tented camps with populations of around a thousand each.

BALOCHISTAN PROVINCE

Nasirabad

Dera Murad Jamali

In Dera Murad Jamali or DMJ, in Nasirabad district MSF continues to operate a DTC which on 28 August had 46 admissions. MSF continues to receive information of additional flooded towns and villages where people remain stuck and evacuations not planned in places like Tambu, Babhakot.

Around DMJ MSF hears reports of more diarrhoea–related deaths in IDP camps such as Patfeeder Canal, Degree College, Notal and Model College camps. Clean water is still a major problem in DMJ and tankers continue to supply water that is below emergency standards. MSF will not start distributing water until it is allowed to start the purification of water sources.

MSF is conducting several mobile clinics in the DMJ area and in the past week made 1,047 consultations. The mobile clinics are treating cases of acute watery diarrhoea skin infections, malnutrition, and supplies for women. For malnourished children who are recorded by MUAC in the red–orange scale are provided with a Ready–to Use Food (RUF) supplement for seven days and are followed–up for progress a week later.

In the coming week MSF will change its mobile clinic out–patient strategy to focus more on nutrition/ANC/lactating women. 40 new cases of severe acute malnutrition were recorded in the the past week in DMJ. Ten cases were referred to the hospital ITFC of which six were as a result of the flood (displacement); and 30 in the mobile clinic, plus 23 follow–up cases from the previous last week.

MSF is under the impression that we can more effectively address morbidity through a more focussed approach to nutrition inn its mobile clinics. Pregnant women will also be offered limited ANC (ferfol, albendazole, safe delivery kit) and supplemented with BP5 (high energy biscuits).

In the meantime, after many negotiations, we are in the final stages of signing a contract for 250 latrines in the same camp. MSF is also planning to build latrines in Barchoki (Mangoli Camp) which has a further 2,500 displaced people. We plan to construct more than 125 latrines and install a 15m3 water bladder as soon as our tanker arrives and we produce enough water from the water plant.

In Mangoli Camp there is currently one small filter plant that runs about 300 litres per hour for 12 hours a day. Three deaths related to diarrhoea have been reported in this camp over the last week. Health educators have been dispatched in camps around town and soap will be distributed from this week.

With regards to the water supply in DMJ, MSF tested and treated the water tank last week and on 28th August all tankers were re–routed to this tank which now has an acceptable quality of water. During the past week 265 tents were distributed and the MSF team employed 20 daily labourers to pitch 150 tents at the Degree College. The water and sanitation team will also provide 30 latrines and ensure water is delivered to the site as soon as possible.

Since the beginning of the intervention in DMJ (10 Aug) MSF has achieved 5,117 consultations, distributed packets of 100 aqua tabs to 551 families and supported 1,050 consultations with Ministry of Health clinics.

PUNJAB PROVINCE

Kot addu

Last week, on the 24th August the MSF 35–bed DTC was fully occupied with patients severely dehydrated therefore the centre's capacity was extended to 75 beds. . During the week more human resources were brought from other projects in the north to reinforce the response. However more patients are coming or being referred by MSF ambulance from neighbouring health centres, so we may have to extend once again the capacity of the DTC to 100 beds.

In this DTC MSF currently receives 150 patients a day, 45 of whom are hospitalised in the DTC. In total 1,138 patients were treated for watery diarrhoea last week (338 were severe and 446 were children under five years of age). There are also increasing cases of malaria seen in triage presenting with fever.. Occasionally severely malnourished children are also seen and treated with therapeutic feeding although these are very small numbers.

MSF is also considering strengthening some neighbouring health facilities where Oral Rehydration Points could be installed to ensure that dehydrated patients can receive treatment as quickly and as close as possible to their homes.

IDP settlements have been assessed North of Kot Addu, where more than 2,000 flood affected families did not receive any relief support so far, so MSF is planning to assist them with NFI and tents.

Rajanpur

This week, MSF teams are also assessing Rajanpur district of South Punjab, one of the most flood affected districts bordering Sindh province. Already our medical teams are observing dozens of IDP settlements which have received almost no assistance at all. A large increase of diarrhoea and malaria cases have been recorded over the last few weeks at local health facilities, and a worrying number of malnourished children under the age of five are also seen. Based on the results of this assessment MSF is considering opening a new project in this area.

KHYBER PAKHTUNKHWA PROVINCE (KPK) former North West Frontier Province

Peshawar

MSF performed 845 consultations in the last week at the three supported Basic Health Units (BHUs), mainly for skin diseases and watery diarrhoea. MSF might handover the daily activities of some of these health facilities to the MoH or other organisation, in order to focus only on the case management of malaria and watery diarrhoea.

MSF is also continuing to distribute NFI and tents where flood affected population are not benefiting from the assistance of other organisations. Therefore NFI and tents were again distributed last week to almost 2,500 families, in some settlements close to the river and north of the district, and to Afghan Refugee Camps south of Peshawar. Since the beginning of the flood response, MSF provided NFI and tents to over 7,000 families of Peshawar district. New distribution should take place in the coming weeks to cover the needs of the population who were until now living in schools, but who may have to find another refuge as schools may open very soon.

Charsadda

Mobile clinics have been operating this past week in Charsadda making 7,191 consultations since the beginning of the floods. Analysis shows that the majority of cases are for skin diseases followed by acute watery and respiratory infections while four new sites were idenitified this week. In terms of the medical response in Charsadda the mobile clinics will reduce in coming weeks as more people return home and have their immediate primary health needs met. However the MSF team is working on emergency preparedness and set–up of a Diarrhoea Treatment Centre should that be required in the second phase of the disaster.

MSF is distributing an average of 93m3 per day in Charsadda and in the period 15 to 25 August 10,206m3 of water have been distributed. Since the start of the project here MSF has distributed a total of 2,250,000 litres in Painda Khel, Babra, Zoor Bazar, Giddra and Shulgara.

MSF has installed 27 tanks of 500 litre capacity in the ‘Motorway camp’ (on the Islamabad–Peshawar Highway) – they will receive 14m3 per day from MSF. The organisation is still providing 19m3 per day in Hizara Camp and a further 15m3 per day in Utmanzai Camp

A well cleaning program was started last week with two teams operating in the periphery of Charsadda. The first teams work will begin in Zoor Bazar, Babra and Shulgara. The second team started cleaning wells this week in the villages of Tangi area. The hygiene promoters will also join the well cleaning teams to disseminate IEC information.

NFI distributions in Charsadda will be finished this week and in total 4,870 NFI kits have been distributed since the beginning of the intervention. Villages will also be assessed in coming weeks for distribution of reconstructions kits to help 2,500 families begin their return home.

Nowshera

At the beginning of last week, 170 consultations at the OPD and 474 at the Emergency Room of the hospital were performed. But since then, MSF handed over the management of the hospital back to the health authorities, so that resources can be diverted to regions experiencing more urgent medical needs, particularly in the south of the district. However, MSF will set up an epidemiological early warning system in the district, in order to follow up the evolution of acute watery diarrhoea and anticipate a potential waterborne disease outbreak.

As other medical organisations are finally coming to support the area, MSF decided to focus on water and sanitation activities, increasing everyday the amount of chlorinated water provided to the populations, in addition to the ongoing distribution of NFIs.

Between the 9th and 22nd of August MSF has managed to distribute 903,000 litres of chlorinated water. In the past week MSF provided almost 240,000 litres of water per day in 10 locations of Nowshera, such as Pir Sabak, Akora Khatak and Nowshera town. Also, three water points have also been rehabilitated, with automatic chlorination in Pir Sabak.

Last week, MSF distributed NFI to 1,780 families and tents to 350 families. Since the beginning of the flood response, MSF provided NFI to almost 5,800 families in Nowshera district.

Swat

In Mingora hospital there is a slight decrease in the number of activities in the emergency room but after the bridges are repaired and access to health care returns, MSF expects an increase of patients. Blood bank training has been given to all senior nurses and laboratory technicians in the hospital for the care and transport of blood and transfusions.

Mobile clinics continue in the Mingora area and MSF has started to refer surgical patients from our mobile clinics to Timurgara because the bridges on this side are cut off and Kabal and Matta patients can easily access Timurgara. With a return of a number of actors in Swat health structures, MSF is now spreading its mobile clinics to new areas with populations where no other actors are present. The new locations for MSF mobile clinics include Manja, Kalagei and Tarkani which are all close to the border of Dir district.

MSF plans to extend mobile activities for a further two weeks while waiting for better access to Mingora for patients still cut off. Since the beginning of the flood intervention MSF made 1,600 consultations in the region.

The Diarrhoea Treatment Centre in Mingora last week was still receiving close to 100 patients a day but most of the cases are watery with mild to moderate dehydration. The emergency phase is most likely reducing in the DTC. However MSF is still sharing data with its Health promotion and Water and sanitation team in order to respond to where suspected cholera cases are coming from. Since the beginning of the flood response MSF has treated 1,262 patients.

MSF's water distribution activity has continued in the past week in Swat making the total distributed 4,500,000 litres. Our water treatment unit has also provided a further 2,000,000 litres of water that has been distributed by other non–government organisations (NGOs). The Health Promotion team in Mingora continues to join the water and sanitation team that is cleaning wells doing hygiene promotion and hygiene kit distribution. Thus far MSF's water and sanitation team has cleaned 26 wells (averaging three wells per day).

MSF has recently ceased its NFI distribution work in Swat which managed to distribute 50 kits for 50 families in the area.

Timurgara (Lower Dir)

Last week MSF did an assessment of the DTC at the District Headquarters Hospital (DHQ) in Timurgara (Upper Dir) and plans to assist in terms of drugs, quality care and human resources, improve hygiene, implement ORS corner and provide infusions.

MSF has just started to support the Rural Health Centre (RHC) in Munda and our staff support the emergency room and manage suspected cholera cases (average six per day). MSF's mobile clinics are also continuing in this region to Summerbagh and Tauda China taking the number of consultations to 109. In Tauda China MSF has also managed to distribute NFI kits to 55 families and 8,000 litres of water at the Khazana bypass.

Dargai (Malakand)

The acute phase of the emergency is over in Dargai where the DTC is now averaging just two cases of acute watery diarrhoea per day. NFI distributions are now also completed in Malakand with kits delivered to 466 families in the region. Mobile clinics in Dargai have now reached a total of 624 consultations. MSF continues to distribute water in Dargai reaching a total of 450,000 litres so far.

In the last week the mobile clinics in Kalangi performed 105 consultations for diarrhoea, respiratory infections, skin infections and some malaria. The mobile clinic have stopped as there are no serious medical conditions that can not be treated by access to our mobile clinics on the other side of the river in Dir. Access is possible through a traditional suspended chair. Medical staff stationed in Dargai have been sent on to Sindh where they are much more needed.

Hangu

In Hangu MSF has been responding to an outbreak of Acute Watery Diarrhoea since July, and treated more than 1,800 cases in less than two months in the 80–bed DTC. It seems since last week that the outbreak is now almost over, as from a high of 55 patients per day two weeks ago, MSF is only seeing five patients per day now.

Federally Administered Tribal Areas

Sadda, Kurram Agency

In Sadda, Lower Kurram, in a project run by MSF since 2006, an Acute Watery Diarrhoea outbreak has been confirmed therefore MSF has decided to set up a 30–bed DTC, which is now fully operational. MSF currently receives 20 patients per day, five of them on average being severely dehydrated and needing hospitalisation.

Since 1988, MSF has been providing medical assistance to Pakistani nationals and Afghan refugees suffering from the effects of armed conflicts, poor access to health care, and natural disasters in Khyber Pakhtunkhwa, the Federally Administered Tribal Areas, Balochistan, and Kashmir. MSF does not accept funding from any government for its work in Pakistan and chooses to rely solely on private donations.

From RELIEF WEB:

As Flood Waters Continue Raging, Mercy Corps Ramps Up Operations in Southern Pakistan

Source: Mercy Corps
Date: 19 Aug 2010
Thirty–five percent of Sindh Province under water; 2.5 million people affected

Portland, OR— As flood waters rise in southern Pakistan, Mercy Corps is quickly expanding efforts to assist families in four districts of Sindh Province. The aid agency is making multiple daily trips to displacement camps with water tankers, building latrines, and preparing to open two mobile health units to meet pressing medical needs. The United Nations estimates that 35 percent of Sindh Province is underwater and 2.5 million people in the province have been affected by the floods.

"This tragedy is unfolding from north to south. In the southern part of Pakistan, flood waters are still flowing in, rushing through communities, and creating tremendous destruction," said Mercy Corps Pakistan Country Director Steve Claborne. "People are desperate and confused. They're staying in crowded camps, with friends and family, or even camping out on roads or wherever they can find higher ground."

The Mercy Corps team based in Sukkur reports that clean water is the most pressing need in Sindh Province. In response, the agency has started trucking water tankers into displacement camps three or four times daily, providing 250,000 liters of water per day for 15,000 people. In addition, Mercy Corps plans to bring multiple high–volume filtration units to Sindh in the coming days, and is working closely with local organizations to determine how to best support their efforts.

Mercy Corps also expects to open two mobile health units in Sindh Province early next week to provide basic medical care for 300 people per day. The most pressing health needs are treatment of water–borne diseases such as gastro–intestinal problems and upper respiratory infections. Lack of clean drinking water and deplorable sanitation conditions threaten to create more widespread and serious outbreaks of disease.

"We will be faced with enormous public health challenges in the next four weeks," explained Mercy Corps Director of Public Health Dr. Arif Noor. "This could get much worse if people do not receive adequate drinking water soon. We have not yet seen outbreaks of cholera, but we have seen many incidents of diarrhea and other serious water–borne illnesses."

Mercy Corps continues to meet needs in the hard–hit Swat Valley, where the agency is providing clean water for 10,000 people per day via water tanks, high–volume filtration units and water purification tablets. Yesterday, the Mercy Corps team began delivering hundreds of food kits containing staples such as cooking oil, sugar, salt and rice, and tool kits with wheelbarrows, shovels, hammers and other tools to facilitate clean up and rebuilding.

Mercy Corps has been working in Pakistan since 1986, running a range of health, economic development and emergency relief programs. The agency previously operated in both Swat Valley and Sindh province, focusing on a mix of boosting incomes, promoting health and caring for livestock.

HOW TO HELP:

Pakistan Emergency Fund
Dept NR
PO Box 2669
Portland, OR 97208
www.mercycorps.org
1–888–256–1900

FROM THE INTERACTION SITE 8/1/10:

Mercy Corps received notice of an almost $1.2–million grant from the U.S. Foreign Disaster Assistance (OFDA) office of USAID. The grant will allow Mercy Corps to expand operations to help displaced people over the next four months. The agency plans to distribute much–needed cash to families in the Mardan District. These funds will enable more than 20,000 families – 120,000 people – to purchase household supplies and food items. Mercy Corps will also address the needs of pregnant women. An

estimated 70,000 pregnant women have been displaced and are in immediate need of medical attention and delivery assistance. Mercy Corps is a leader in maternal and newborn health in Pakistan and plans to set up a number of birthing stations in Mardan.

## MERLIN USA (Medical Emergency Relief International) – 2010 Pakistan Floods / Armed Conflict

Medical Facility · Open

HQ: 1600 K Street NW Suite 450, Washington, DC, 20006, United States; PAKISTAN
**Phone** 202–449–6399
**Web** www.merlin–usa.org
**Service** Temporary

FROM THE SITE:

September 14 2010

Merlin is ramping up our work in Pakistan to respond to the approaching peak of malaria season.

"We must be prepared to respond to as many as two million cases of malaria over the next four months in all areas that are mildly or severely flood–affected," says Naeem Durrani, Merlin's malaria expert in Pakistan.

"By comparison, last year's estimated figures for all of Pakistan were around 1.5 million cases for the whole year."

Once scale up is complete, the Merlin–trained network of over 2,000 health workers in 16 districts will provide malaria control services through 155 health centres.

Durrani points out that malaria is widespread in all 62 districts that have been severely affected by the floods.

Furthermore, the prevailing and most dangerous strain — Plasmodium falciparum — causes cerebral malaria.

As people have been displaced by the flooding, the potential for disease transmission has significantly increased, exposing 20 million people to life–threatening malaria outbreaks.

"This is the key to saving lives"

Durrani explains why there is an expected surge of malaria outbreaks:

"What you need to trigger an epidemic is a breakdown in health services, a lack of trained health workers, large population movements and favourable climactic conditions, such as a prolonged summer and excessive rains."

"Should the flood–affected areas experience an extended month of hot and wet weather, it could lead to a health disaster," he adds.

Noting Merlin's significant efforts in preparation for the peak of malaria season, Durrani says that this is a Herculean task, given the scope of the flood–affected areas.

"People are asking 'Are we ready?' and I tell them that no one can be truly ready," he says.

"But we are ahead of the curve with a programme designed to improve early diagnosis and in turn prompt treatment and efficient outbreak response. This is the key to saving lives."

FROM Relief Web:

As the floods continue to rage in Pakistan, our long term work to deliver health care in the country continues.

Source: Medical Emergency Relief International (Merlin)
Date: 13 Aug 2010

Merlin has worked in Pakistan since the Kashmir earthquake in 2005, which killed 73,000 people, left thousands homeless and destroyed much of the country's health infrastructure.

Since then, Merlin has responded to Cyclone Yemyin and the flooding in Balochistan in 2007, displacement caused by conflict in the Federally Administered Tribal Areas (FATA) region in 2008 and the Khyber Pakhtunkhwa region in 2009, as well as to the flooding devastating the country at the moment.

The health outlook in Pakistan is one of the bleakest in the world, with around one in ten children dying before the age of five. The recent conflicts and disasters have only made things worse, further extending the population's need for health care.

What we do

Merlin's work in Pakistan is made possible through a network of over 600 health workers, working tirelessly to provide primary health care, reproductive health and emergency nutrition outreach services throughout the country. We also work to combat malaria in 19 districts in the FATA, Balochistan and Khyber Pakhtunkhwa provinces.

Additionally, in cooperation with Help Age International, Merlin provides services specifically to the elderly in the Swat and Buner districts. And in the Khyber Pakhtunkhwa area, we deliver health care to internally displaced people in both camps and host communities.

From the InterAction Site – 2010 Pakistan Flood Response

Medical Emergency Relief International (Merlin) responded immediately to the floods in Pakistan and has scaled up existing operations in northern Pakistan where the worst flood in decades has caused widespread devastation. Merlin's team of 600, including 300 medical experts responded immediately.4 million people have been affected and 1,500 people have died. Merlin teams working in the worst affected areas have treated over 4,000 patients in the last two days alone. Merlin has set up 28 health clinics and deployed 18 mobile teams. Merlin medics are running 24–hour clinics in Jalozai camp, home to over 100,000 vulnerable people, in response to a significant spike in diarrhea and other waterborne disease.

From the site – 2010 Pakistan Flood Reponse:

August 4 2010

Merlin has scaled up existing operations in northern Pakistan, as fears rise that waterborne diseases could exacerbate the situation following last week's severe flooding.

Merlin has more than 300 medical experts responding to the emergency, which is Pakistan's worst flooding in decades. Our teams are on the ground now in some of the worst affected areas, including Swat Valley, Khyber–Pakhtoonkhwa, and Nowshera district.

Marinella Bebos, Merlin's operations manager, said: "With water supplies contaminated and an estimated 2.5 million people affected, Merlin's main concern is to manage the spread of disease – diarrhea and other infectious diseases will claim thousands of lives if we do not act fast."

Merlin’s 300 medical experts are working around the clock to respond to the growing needs of survivors caught up in the floods.

Critical situation for survivors

Dr Fayaz, Merlin's regional health co–ordinator in Pakistan, told us the seriousness of the situation for those affected: "The rains have wiped out whole villages, forcing people to flee their homes with nothing but the clothes on their backs.

"Roads and bridges have collapsed, making it difficult to get help through to survivors, who are congregating in makeshift shelters and camps. "Access to clean water or proper sanitation is nonexistent in places, making this a perfect breeding ground for deadly diseases."

With water sources contaminated by the monsoon rains and landslides, families who were already already vulnerable and homeless now faced the very real risk of disease outbreaks. Our teams have already seen a spike in diarrhoea cases, an infection that tends to plague and adversely affect young children. If patients do not take fluids rapidly, the infection can quickly lead to acute dehydration, which can in turn prove fatal.

Widespread devastation

Whole villages have been washed away by the monsoon floods, with hospitals and health centres destroyed and the infrastructure left on its knees. Tens of thousands of survivors still cannot be reached with land access impossible in some areas. Merlin is airlifting our medics into areas cut off by the floods, setting up health clinics and sending mobile teams out to treat survivors.

There is a desperate need for temporary shelter, clean drinking water and toilets to avert a public health catastrophe. People also need medical care and food along with basic household items to replace those that were lost.

In Swat, one of the worst affected areas, we have already sent in three mobile teams by helicopter. Merlin has been working in the area for two years before the flooding, with 12 functioning health facilities in the region. We plan to keep all 12 health facilities operational and to run at least five mobile teams in the area.

Huge influx of people

We also have six clinics in the Jalozai camp for internally displaced people, in Nowshera. Jalozai is one of the biggest camps in Pakistan and home to more than 100,000 residents; it was cut off by flooding for three days. Our health teams expect an influx of people seeking support over the next few days as we plan to expand our work in the district.

Merlin is also active in Buner District and is monitoring the situation in Charssadda and Shangla, the other two worst affected districts. It is only the beginning of monsoon season and forecasts suggest that the extreme rains will continue for three more days.

This is the worst flooding in 80 years and will demand long–term funding to rebuild health services destroyed in the floods. Merlin was here before this disaster and we are committed to staying for along as it takes. We are appealing for £250,000 to support our emergency response.

**Service** Temporary

FROM THE SITE:

Weeks in, over 20 million people have been affected by the Pakistan floods with 6 million of those seeing no humanitarian assistance whatsoever.

Nearly 6 million people are left displaced and abandoned as their homes have collapsed or swept away in landslides. Rivers across North West Pakistan simply could not bear the colossal toll of the monsoon rains and many burst their banks.

MH has a team of 348 staff and hundreds of volunteers working through the affected regions of Khaybar Pakhtunkhwa, South Punjab, Sind, Muzaffarabad and Kashmir.

The greatest need at the moment remains for a constant supply of food– both cooked, fresh food as well as family food parcels containing staple food items.

Our Emergency Relief Coordinator– Irfan Khan– is travelling across the country to upscale the already extensive aid efforts of our 6 permanent field offices in Pakistan.

Here, he outlines the most urgent needs according to what he has witnessed first–hand on the ground:
Food
The main priority is and remains providing food.

MH is focusing on providing cooked and family food parcels to as many of the affected people as possible– all of whom insist on keeping their fast despite their desperate conditions.

Millions of people who have had their homes, crops and livestock washed away have no way to access a supply of food for themselves and their families. Hungry flood survivors are now facing the threat of malnutrition causing weakened defences against infections.
Medical camps

MH is establishing medical camps in areas where most people have gathered. The few functioning hospitals of Muzzafarabad are too far for many survivors to reach. Those worst affected are people living close to the river banks as their homes, crop and livestock have been destroyed.

Water–borne infections

The number of people with water–borne infections is steadily on the rise. There have been outbreaks of cholera reported and an alarmingly high rate of diarrhoea, especially amongst children. Doctors at the MH medical camps are also frequently seeing snake bite cases.

This is because the flood has moved snakes to areas which are now overcrowded with displaced people. MH medical teams desperately need support to set up more camps where we can provide basic medication.

Mobile medical clinics

There is HUGE DEMAND for mobile medical clinics, since it is near impossible to set up medical camps in many parts of the affected zones. Mobile clinics also ensures that people in remote areas are given medical attention.

MH currently runs 5 mobile medical clinics but we need at least 10 more. Each vehicle costs £6000 and has a running cost of £2000 a month. Each clinic can treat up to 500 people per day.

Shelter

Shelter is a pressing priority and certain areas of Baluchistan, Punjab, Khaybar Pakhtunkhwa and now insha'Allah Neelam Valley too will be provided with family tents as the vast majority of people are still sleeping outdoors with no protection from the weather or insects and snakes.
Ongoing: Our work in numbers

* Food packs distributed to 6,040 affected families
* Cooked food distributed to 60,850 people
* Safe water supplied to 1700 families
* 7000 affected people have been provided with medical care
* 550 families have been provided with tents

Tax Exemption Update

Import of relief goods into Pakistan For the tax/duty–free import of relief goods into Pakistan, donors and aid agencies can obtain a No–Objection Certificate (NOC) from the National Disaster Management Authority (NDMA). The Standard Operating Procedures for obtaining this NOC is attached below. In addition, please find attached two letters (one from the Federal Board of Revenue and from NDMA) confirming the Cabinet Division's decision of 3 August 2010 to exempt relief goods for flood affectees from taxes (note that this should include exemption from the 25% import tax, the 5% customs tax, and also the 5% civil aviation authority tax). Please do not hesitate to use these letters, or approach the Logistics Cluster or NDMA for support in case you run into any problems with the import of approved relief goods.

http://oneresponse.info/Countries/Pakistan/publicdocuments/Pakistan%20Humanitarian%20Update%20No%2013.pdf

2010 Pakistan Humanitarian Response Plan:

http://oneresponse.info/Countries/Pakistan/publicdocuments/PHRP_PAKISTAN_2010.pdf

The Cluster approach was a key recommendation of the July 2005 Humanitarian Response Review (HRR). The clusters create a single framework for coordination in bringing together a variety of different actors, including international governmental organizations, national and international non–governmental organizations, government and the military, for regular coordination meetings. It was implemented during the response to the South Asia Earthquake in Pakistan for the first time. The UNDAC team, together with the Humanitarian Coordinator and the UN Country Team established a set of ten Clusters, covering the main relief work, in Islamabad. Clusters of particular relevance to the environmental experts included health, water/sanitation, and early recovery and reconstruction. Subsequently, field cluster sites were established in each of the main UN field presences, i.e. Muzaffarabad, Bagh, Batagram and Mansehra, and were called Humanitarian Hubs. In response to that humanitarian emergency, the use of the following coordination structure was agreed upon national authorities and the humanitarian country team:

Clusters and Cluster Leads

* Agriculture (FAO)
* Camp Management (UNHCR)
* Community Restoration (UNDP)
* Education (UNICEF / Save the Children)
* Shelter and NFI (UNHCR)
* Food (WFP)
* Health (WHO)
* Logistics (WFP)
* Nutrition (UNICEF)
* Protection (UNHCR)
* Water, Sanitation and Hygiene (UNICEF)

OPERATION BLESSING INTERNATIONAL RESPONDING TO DEADLY PAKISTAN FLOODING
Source: Operation Blessing International
Date: 04 Aug 2010

OBI Teams Up With Longtime Partner, German Charity Humedica To Provide Relief

VIRGINIA BEACH, VA (August 4, 2010) –– Operation Blessing International (OBI) has teamed up with its longtime disaster relief partner, the German charity Humedica, to provide flood relief in Pakistan. Due to the worst monsoon flooding in 80 years, some 2.5 million people have been affected and 1,500 are feared killed.

Kumar Periasamy, OBI's Director for International Operations and Programs will arrive in Pakistan in the coming days and will work with Humedica to provide medical relief and to distribute food, clean drinking water and emergency building supplies to thousands.

The OBI–Humedica team plans to set up a medical clinic in Peshawar, a city in northwest Pakistan, which is currently being used as a refugee center for the hardest hit area. The team will provide medication to combat a host of water–borne illness, since clean drinking water is scarce.

Operation Blessing International has provided humanitarian relief in Pakistan as recently as 2009 when it helped 60 families who were attacked by extremists. OBI also provided relief in 2007 when 400,000 people were displaced by flooding caused by torrential rains in southern Pakistan.

**Services offered:** Building Materials / Supplies * (ANY/ALL Types); Food * (ANY/ALL Types); Food Distribution, Emergency/ Disaster Food Distribution; Medical, Facility, Clinic, Outpatient Clinic; Medical, Services, Emergency Medical Services; Medical, Supplies * (ANY/ALL Types) ; Water, Potable Water

• Psycho social support for traumatized children

FROM THE SITE:

Emergency appeal – Floods affect millions

Plan is on the ground in Punjab and Sindh providing emergency assistance to thousands of families caught up in the worst flooding in Pakistan for 80 years.

So far our response includes distributing cooked food to over 248,450 people, providing health and hygiene kits, setting up tents and installing water hand pumps in camps.

Please support this vital work by donating to the Pakistan floods appeal today.

Plan has been operating in Pakistan since 1997, helping marginalised children to access their rights to health, education, livelihood and protection.

Through long–term programmes we work with around 100 communities across the country, benefiting about 21,000 children.

**Services offered:** Advocacy, Child Advocacy; Counseling, Childrens Counseling ; Demographic Served: Children; Demographic Served: Vulnerable & Marginalized Populations; Distribution * (ANY/ALL Types); Food Distribution, Emergency/Disaster Food Distribution; Food, Dry, * Dry Food Goods (ANY/ALL Types) ; * KITS, BABY SUPPLY KITS, NEW Items ONLY; * KITS, HYGIENE KITS; Meals, Hot Meals; Meals, On Site Meals Served to Disaster Survivors; Medical, Education, Hygiene Health, Awareness; Medication, Rx, Vaccination, * (ANY/ALL Types); Mental Health Services; Sanitation, Services * (ANY/ALL Types); Sanitation, Services, Hand Pump Installation; Sanitation, Services, Water Systems Repair; Sanitation, Services, Water Testing; Sanitation, Supplies, Water Purification Tablets; Shelter, Activities, Children's Activities in a Shelter Setting, Volunteer Services; Shelter, Emergency Shelter; Shelter, Management, IDP (Internally Displaced Persons) Camp Management; Water, Potable Water

PODA Staff
SEE EMAILS BELOW

Ms. Sameena Nazir, Executive Director since January 2007.

Sameena Nazir established PODA in 2003 and served as a Board Member from 2003 to 2006 and now serves as Executive Director. Ms. Nazir has worked in development and human rights advocacy sector for 20 years. She has been writing and working for women's rights, equality, development and social justice issues since 1990. Before joining PODA she was a Project Director at New York city based NGO, Freedom House (2003–2006) where she directed an international study on women's rights in Middle East and North Africa. Earlier she worked as women's rights program coordinator at the International Human Rights Law Group in Washington DC (1995 to 2003) and established women's rights projects in Afghanistan, Morocco, Pakistan and Yemen focusing on legal literacy. From 1989 to 1994, she worked in Pakistan as a journalist with daily The Muslim. Ms. Nazir has studied English Literature and Law from the University of the Punjab, Lahore, Pakistan and has specialized in International Agriculture and Rural Development from Cornell University, NY, USA.

<info @poda.org.pk>

Ms. Yasmin Akhter, Finance/Admin Director since 2003.

Ms. Yasmin Akhter has worked with PODA since April 2003 and has been working as Finance Manager since January 2006. She has worked in all the departments of PODA starting from artisans workshop finance officer to micro–credit project supervisor for rural women. She is contributing to the continued development of PODA through pro–active membership of PODA's Management Team. Ms. Yasmin Akhter has represented PODA at various national and international events including women rights meetings in USA and Thailand. She has studied Education and participated in several trainings about NGO financial management and operations. She can be reached via email at

<yasmin.akhter@ poda.org.pk>.

Ms. Naheeda Abbasi, Regional Manager, Potohar – North Punjab since January 2006.

Ms. Naheeda Abbasi is responsible for over sight of PODA's work in the Potohar region including projects on Rural Women Teachers Capacity Building in District Chakwal, and a region wide project on the elimination of violence against women. Before joining PODA she worked at Plan Pakistan in Chakwal from May 2002 to December 2004 as Assistant Education Officer and earlier worked as the Head Teacher in Chief Grammer School, Chakwal from August 1998 to December 2000. Ms. Naheeda Abbasi has a M.Ed in Distance and Non–Formal Education from Allama Iqbal Open University and BA in Philosophy and Educational Psychology from University of the Punjab, Lahore. She can be reached via email

<naheeda.abbasi @poda.org.pk>.

Mr. Mohammad Arif, Regional Manager, Khyber–Pakhtunkhwa, since June 2010

Mr. Mohammad Arif is responsible for implementing PODA's projects in Khyber Pukhtoonkhwa province. Before joining PODA he worked as Child Protection Coordinator with Save the Children Alliance–USA in D.I. Khan and as Field Protection Officer for International Rescue Committee (IRC) in Peshawar, Buner and Swat. He also served as a Team Leader, Registration & Verification Project–Pakistan Emergency Response for IDPs conflict for SACH (NGO) in Attock, Rawalpindi and Islamabad and was a Field Officer for 'Help in Need Organization' in Sakahakot. Earlier, Mr. Arif was a Campaign Support Person in Malakand Agency for the World Health Organization and has also worked as a Social Organizer, Monitoring & Evaluation Officer for Sabawoon Welfare Foundation in Malakand. Mr. Arif has been a volunteer for the Human Rights Commission of Pakistan in Malakand and has also worked at the National Rural Support Program. Mr. Arif has an M.A in Gender Studies from Department of Gender Studies, University of Peshawar and BA in Law and Sociology from Islamia College, Peshawar University. He can be reached via email at

<muhammad.arif @poda.org.pk>.

Mr. Zubair Malik, Regional Manager, South Punjab, since April 2010

**Phone** 0845 054 7206
**Web** www.redcross.org.uk
**Service** Temporary

From RELIEF WEB:

Red Cross increases Pakistan relief plan five–fold
Source: British Red Cross
Date: 16 Aug 2010

The Red Cross will increase its relief operation in Pakistan five–fold, to reach more than two million people with aid in the coming months.

Severe flooding in Pakistan has now affected around 14 million people, with nearly 900,000 homes damaged or destroyed. As much as 50 per cent of the country has been inundated with floodwater, causing loss of crops and livestock.

Monsoon rains could continue for another month, worsening the existing flooding and affecting new areas, particularly in the south of the country.

Severe challenges

Damage to infrastructure and the ongoing bad weather continue to hamper relief efforts, with more than 100 bridges in the Upper Dir and Swat regions destroyed. Major landslides are also blocking road access to some affected regions, particularly in Pakistan–administered Kashmir.

Originally planning to reach around 350,000 people with relief, the International Red Cross and Red Crescent Movement is responding to the deteriorating situation by revising that figure massively upward to 2.1 million people.

Unimaginable disaster

Senator Nilofer Bakhtiar, chairperson of the Pakistan Red Crescent Society said: "The time to act is now – this is a disaster of unimaginable proportions. We are scaling up our response significantly together with Red Cross and Red Crescent partners from around the world."

Working on the ground since the disaster began, the Pakistan Red Crescent has distributed relief to more than 250,000 people, across seven provinces.

Food being distributed includes rice, ghee, sugar, salt and tea. Other items include blankets, tents, tarpaulins, kitchen sets, hygiene kits, jerry cans and stoves.

Relief goods

The International Federation of Red Cross and Red Crescent Societies and the International Committee of the Red Cross are supporting it, as well as co–ordinating aid from overseas.

The British Red Cross has contributed large amounts of goods to the relief effort, including 25,000 blankets, 9,000 tarpaulins, 6,000 mosquito nets and 6,000 jerry cans.

Its Pakistan Floods Appeal has raised more than £1.3 million to date, but more is desperately needed.

**Services offered:** Camping Gear, Camp Stove; Food * (ANY/ALL Types); Food Distribution, Emergency/Disaster Food Distribution; Jerrycans (Fuel/Water Container); * KITS, HYGIENE KITS; * KITS, KITCHEN SETS; Linens, Bedding, Blankets * (ANY/ALL Types); Long Term Recovery, International; Mosquito Nets; Shelter, Supplies * (ANY/ALL Types); Shelter, Supplies, Tents (For Disaster Survivors); Tarps

Pakistan: Flood Rapid Assessment Report KHYBER PAKHTOONKHWA
Source: Relief International (RI)
Date: 15 Aug 2010

EXECUTIVE SUMMARY

The recent floods in Pakistan have resulted in devastation across the country. On July 27, heavy rains started falling throughout Khyber Paktoonkwha (KPK) Province, impacting more 1.5 million people, and severely damaging at least 156,934 homes. Due to the inaccessibility of many affected areas, agencies are still determining specific data regarding the magnitude of the destruction. August 3 to 6, the RI team in KPK collected primary data in KPK. The most vulnerable populations at present are pregnant women, elders, and children. RI's team found that most of the population in the flood affected areas have been forced to leave their villages and are seeking shelter on higher ground or host communities, while shelter and basic needs are unmet due to the level of the destruction in the area and the inaccessibility that the flood has created for government and relief agencies.

FROM THE SITE:

Pakistan Flood Emergency Response
Since Friday, July 30, Relief International has been providing immediate humanitarian relief through emergency health services and the provision of clean water, shelter and emergency supplies to families affected by the heavy rains and floods in Pakistan.

To date, an estimated 1,500 people have perished and up to one million are displaced after monsoon rains –– considered the worst since the 1920s –– triggered raging flood waters in the northwest region of Pakistan.

Relief International has been working in Pakistan since the 2005 earthquake. Our team of more than 300 staff was already working with populations displaced by recent conflict in Khyber Pakhtunkhwa (KPK) and Balochistan as the monsoons hit, impacting the same population.

Relief International's immediate support efforts in KPK and Balochistan provinces of Pakistan include:

* Deployment of mobile emergency health units to ensure families immediate access to primary care and medical supplies, with the first team of 10 seasoned local emergency medical staff deploying to the remote Swat Valley, which has been cut off due to nearly 40 bridges collapsing.
* Distribution of Emergency Family Kits that include water purification tablets, clean water receptacles and shelter materials (plastic sheeting and rope).
* Provision of adequate drinking water to communities suffering from water contamination and to those communities with no access to water at all; this includes distribution of water treatment supplies and clean water resources to prevent spread of water–borne disease such as cholera.
* Distribution of lifesaving food rations to thousands of families in Swat and other regions.

Please help flood–affected families in Pakistan today with a donation to the Pakistan Flood Emergency Response.

Pakistan is a developing nation that faces challenges to growth on various fronts, including low education levels, high unemployment rates, and political instability. Internal military operations in tribal zones and the war in Afghanistan contribute to Pakistan's increasingly volatile domestic state of affairs. As one of a select few organizations to respond immediately to the deadly 2005 earthquake, which claimed over 70,000 lives and innumerable buildings, Relief International–Schools Online has worked in Pakistani communities ever since to spur local development and meet disaster related critical needs. RI–SOL serves the Pakistani people through projects in construction, livelihood development, emergency response, and health and nutrition.

From the InterAction site – Pakistan Floods Response 2010:

Relief International is mobilizing to immediately aid communities affected by the heavy rains and floods in the Khyber Pakhtunkhwa (KPK) and Balochistan provinces of Pakistan. Immediate efforts include: –Deployment of mobile emergency health units to ensure families immediate access to primary care and medical supplies. –Distribution of Emergency Family Kits that include water purification tablets, clean water receptacles and temporary shelter materials. –Provision of adequate drinking water to communities suffering from water contamination and to those communities with no access to water at all. –Distribution of lifesaving food rations to families in Swat and other regions.

FROM THE INTERACTION WEBSITE – ARMED CONFLICT RESPONSE 2010:

Relief International (RI) continues to respond to the massive crisis in Pakistan's North West Frontier Province, ensuring that 19,000 displaced families - 150,000 men, women and children – receive essential goods and services. RI is providing hygiene supplies, mosquito nets, and other critical items which prevent disease and promote dignified living, giving cash grants to families to pay for shelter in unfamiliar villages, providing temporary work for displaced men, and distributing emergency food rations to 32,000. RI plans unique services for displaced women, including building safe centers where women can receive expert and peer mental health counseling.

2010 PAKISTAN FLOOD RESPONSE - FROM THE SITE:

The recent floods in Khyber Pakhtunkhwa have affected more than 2.25 million population. As per official figures, this is worst flood in history of Khyber Pakhtunkhwa since 1929. The death toll is 1,100 as of August 2nd, 2010 and is still rising. Massive devastation and destruction have been reported. At least 37,000 houses have been swept away by the floods, while bridges, roads, water and sanitation supply schemes, irrigation channels, health and education facilities are also badly hit by these heavy floods. The food grain has also been lost and all major crops/vegetables/fruits have been washed away besides irreparable damages to livestock.

SRSP based on its experiences of Earthquake and IDPs operations has launched a relief and rehabilitation operation for flood affected population in eight districts of Khyber Pakhtunkhwa including Peshawar, Nowshera, Charsadda, Shangla, Kohistan, Swat, Chitral and Upper Dir. SRSP in these eight districts has significant coverage and adequate infrastructure to support relief and rehabilitation activities. Initial meetings were called upon by Chief Executive Officer to review the current situation in Khyber Pakhtunkhwa. An initial assessment of staff, equipment and resources was also conducted to be able to launch an initial response. The district teams in eight affected districts of KPK were also asked to send their field teams and gather all necessary information. The Head Office team led by the Chief Executive Officer also visited three districts (Charsadda, Nowshera and Chitral) to assess the damages incurred as a result of these floods. As per initial reports, a total of 133 union councils have been hit by these recent floods.

FROM RELIEF WEB:

French military to fly 200 more ShelterBoxes into Pakistan
Source: ShelterBox
Friday, 13 August 2010

International disaster relief charity ShelterBox is sending enough aid for another 200 families into Pakistan.

A further 200 emergency shelter boxes will leave ShelterBox and will fly from France to Islamabad, Pakistan by the French military at no cost.

The boxes will then be distributed in partnership with the French Embassy Islamabad and National Disaster Management Authority Pakistan.

ShelterBox partners have already distributed over 1,000 ShelterBox tents to displaced families. These tents were pre–positioned in Pakistan in June following predictions of a particularly bad monsoon season.

John Leach, Head of Operations, said: 'We've worked with the French military in the past to get aid into Niger and Haiti and we're delighted that they have once again stepped up and offered us free transport to Pakistan.

'The need for shelter in Pakistan is growing by the day. We need to get more aid in as quickly as possible. By working with our international partners we can make this happen.'

These Shelterboxes will join the 200 boxes of aid that have already left the ShelterBox HQ in Helston, Cornwall. Each ShelterBox contains a disaster relief tent for an extended family, a stove, blankets and other items essential for survival.

An additional 224 boxes are due to leave next week bringing the total number of ShelterBoxes in Pakistan to 624.

Agha Ali Javad, NRSP General Manager, said: 'I've visited the affected areas and witnessed peoples' miseries. Shelter is always the first priority.'

Public donations are vital to ShelterBox's continuing work. To make a donation please ring +44 (0)300 0300 500 or go to www.shelterbox.org to donate online and get the latest updates on our response to disasters around the world.

FROM RELIEF WEB:

More ShelterBoxes en–route to Pakistan
Source: ShelterBox
More ShelterBoxes en–route to Pakistan
Thursday, 11 August 2010

200 ShelterBoxes are due to leave ShelterBox headquarters tomorrow (12 August) destined for Pakistan and more boxes will follow.

These boxes are in addition to the pre–positioned ShelterBox tents which are currently being distributed in the flood–hit country.

The boxes will be flown to Islamabad, Pakistan, where they will be distributed to displaced families by ShelterBox local partners, the NRSP (National Rural Support Programme).

Each ShelterBox contains a disaster relief tent for an extended family, a stove, blankets and other items essential for survival.

John Leach, ShelterBox Head of Operations, said: 'Within days of the disaster hitting Pakistan our pre–positioned tents were being distributed to the thousands of people displaced by the flooding.

'The need for aid in Pakistan is worsening by the day and it is now imperative that we employ the fastest and most efficient way of getting shelter to those who need it most. To ensure this happens we continue to work closely with our partners in Pakistan to get our equipment distributed in the flood–hit regions.'

'This disaster is still evolving as the flood water moves further south towards the Arabian Sea displacing thousands more people as it spreads. Our hearts go out to everyone caught up in the disaster.'

Public donations are vital to ShelterBox's continuing work. To make a donation please ring +44 (0)300 0300 500 or go to www.shelterbox.org to donate online and get the latest updates on our response to disasters around the world.

FROM RELIEF WEB:

Families housed in ShelterBox tents days after Pakistan floods
Source: ShelterBox
Monday, August 2, 2010

Homes washed away, infrastructure destroyed and hundreds dead. This is the scene in Pakistan after the worst flooding in more than 80 years.

406 ShelterBoxes, from international disaster relief charity ShelterBox, have already been distributed to families rescued from the floods in the Punjab and Khyber Pukhtunkhwa (KPK) regions. A further 600 ShelterBoxes are set to be distributed in the next 24 hours.

Each ShelterBox disaster relief tent, made by Vango, can house an extend family of up to ten people. The tents undergo rigorous testing in wind and rain tunnels and can withstand extremes of high and low temperatures.

ShelterBox Field Operations Advisor, Mark Pearson, returned from Pakistan two weeks ago where he was coordinating the distribution and storage of 1,900 ShelterBoxes.

'I was working in Pakistan in response to flooding in the south and the north but also to pre–position ShelterBoxes to ensure a rapid response to a disaster of this magnitude,' said Mark.

'We've worked with NRSP (National Rural Support Programme) and Rotarians in Pakistan for the past five years and they requested our equipment be pre–positioned as they knew the worst monsoon season in years had been predicted.

'Because of our work with NRSP, we were able to respond instantly and just days after the floods and families are now being sheltered beneath our tents.'

NRSP say there is a desperate need for shelter, food, water, non–food items, medicine, tools and support to begin the rebuilding process.

The unprecedented floods in KPK region has hit the districts of Charsadda, Nowshera, Peshawar, Mardan, Swabi, Malakand and Swat. People were caught in the middle of the night when rushing flood waters engulfed their homes leaving thousands homeless within a matter of minutes.

ShelterBox Head of Operations, John Leach, added: 'Our forward planning and strategic alliance with NRSP means we've been able to get aid to families in most need within 48 hours of the floods hitting.'

Rains in Pakistan have now stopped but Pakistan's Meteorological department say more rain will hit the country in the coming days.

So far in 2010 ShelterBox has deployed to thirteen countries and despatched more than 30,000 ShelterBoxes.

Daily Update of Torrential Rain and Flood situation across the country – September 22, 2010 at 10:30 pm

Strengthening Participatory Organization (SPO)

SPO Response Flood Situation in Pakistan

September 22, 2010

Overview:

Over the course of July and early August 2010, Pakistan experienced the worst monsoon–related floods in living memory. Heavy rainfall, flash floods and riverine floods have devastated large parts of Pakistan since the arrival of seasonal monsoon rains on 22 July, 2010. Latest estimates indicate that around 20 million people have been affected by the floods. Assessments are ongoing to ascertain the scale of damages in the affected areas. The official death toll has risen to 1,754, with 2,697 people are reported as injured. The latest NDMA report indicates that over 1,844,850 houses have been either damaged or destroyed. But the figures may rise further as information from different parts is yet to come.

Details damage assessment is going on across Sindh and Southern Punjab by UN–OCHA and SPO is also part of joint assessment in Sindh. Data currently available indicates that Shikarpur, Kashmore, Jacobabad, Khairpur, Dadu and Naushahro Feroze have been the hardest hit districts in Sindh. Similarly, districts Layyah, D.G. Khan, Muzzafargarh and Rajanpur are hardest hit districts in southern Punjab.

The flood wave continues to make its way through the southern province of Sindh, where millions have been affected from the combined impact of torrential rains and unprecedented water levels in the rivers.

Through rapid assessments, humanitarian agencies are identifying desperate needs of affected communities and so far identified desperate needs include: food, clean drinking water and water purification materials, emergency health services, tents and shelter kits, cooking sets, mosquito nets, and other non–food items (NFI).

In order to facilitate coordinated humanitarian response in the affected areas and enable humanitarian organizations to have substantial planning for their humanitarian activities, SPO, with the support of its partner organizations, initiated rapid assessments in the affected areas and share it with relevant stakeholders in the form of daily update. Date–wise situational update and rapid assessments of damages caused by torrential rains and floods are available on SPO website and can be accessed on URL http://www.spopk.org.

Daily update for 22nd September 2010, providing details of SPO's response to the emergency situation and relief activities being carried out for mitigation of the miseries of affected communities across the country, is provided below:

SPO intervention in Flood affected areas till September 22nd, 2010

Keeping in view the essential needs of displaced communities, SPO teams besides coordination of humanitarian efforts at Provincial levels in Baluchistan –Quetta, Khyber Pakhtunkhwa – Peshawar and AJK – Muzafarabad, have initiated various humanitarian interventions. A brief of relief activities carried out by SPO in Sindh are provided below:

Sindh Province:

SPO Regional Office Hyderabad:

SPO Hyderabad team with the support of various partner organizations, donor agencies and individual philanthropists has carried our various relief activities in the flood affected areas of Sindh. A brief summary of hither to reported activities are provided below:

Resource Mobilization:

SPO Hyderabad mobilized resources worth 26 million rupees from different organizations and individual philanthropists for carrying out relief activities in flood affected areas of Shikarpur, Sukkur, Ghotki, Matiari and Hyderabad.

Vulnerability being a reality of peoples' lives influenced Sungi's rights based development approach to include disaster management as one of the main elements and cross cutting theme. Sungi responded to a number of disasters including "South Asian Earthquake 2005" & "IDPs Crisis 2008-09", contributed significantly and added the learning in its institutional capacity of humanitarian response through its organized and trained community organizations.

In view of the disaster prone nature of Sungi's working areas and experience gained in this regard. Sungi is committed to provide humanitarian assistance to vulnerable sections of society and develop capacities of the marginalized women, men and children to mitigate and respond to disasters. Developing resilient communities is the main objective of Sungi's disaster management programme. Cascading effects of the natural and man-made disasters would be minimized by preparing communities to respond to emergencies as first responders and provide timely relief as disasters strike.

Disaster Management Programme has three thematic areas: Preparedness & Mitigation; Emergency Response; and Advocacy.

Sungi developed disaster management committees and emergency response teams in the most vulnerable areas, based on the vulnerability mapping. This is one of the tested sustainable models of community based disaster management.

Sungi is a member of HAP (Humanitarian Accountability Partnership) International. Sungi follows humanitarian standards in emergency response in addition to this Sungi is stepping forward for HAP certification by ensuring accountability principles in its work.

Sungi Development Foundation is currently working in different areas of Pakistan its offices are:

## Trocaire – 2010 Pakistan Floods

Info/Hotline · Open

Trócaire Head Office: Maynooth, Co., Kildare, Ireland; PAKISTAN

**Web** www.trocaire.org
**Service** Temporary

From the SITE:

Trócaire is getting aid to survivors and we have launched an appeal to the Irish public for help.

Trócaire has been working in Pakistan for almost 40 years which means we are well placed to respond quickly to this disaster and get help to where it's needed most.

Funding from the Irish government through Irish Aid helped us to respond fast but more help is needed. We are calling on our supporters to give what they can to help some of the fifteen million people affected by the flood. The numbers affected are even greater than the Haiti earthquake and Asian tsunami combined.

On the ground

Cecil Dunne, Trócaire's emergency officer in Pakistan says the situation is really desperate for survivors: "Floodwaters have washed away people, homes, bridges, water systems and medical facilities. Survivors have been left with nothing: no homes, no food and no livestock. Yet more rain continues to fall."

We are getting food, water, water purification tablets, cooking utensils, high energy biscuits for children and sanitary supplies to survivors.
Survivors in northwest Pakistan appeal for help

What some of the survivors of the floods have to say:

"Right now everything is out of our hands, there is not even rubbish to search through because all is washed away. We sit here and wonder if it will be the rain or the heat from the sun that will kill us off"

"We only want you to rescue our children"

"These roads and bridges are not our losses, these are the governments' and will be replaced. Our losses are our homes and our belongings, who will replace these?"

"Do not come to watch us die, please do something....."

Our response

Trócaire is getting food, water, water purification tablets, cooking utensils, high–energy biscuits for children and sanitary supplies to survivors.

In one area called Nowshera, in the northwest, our partners began providing pre–cooked meals to over 300 families the weekend the flooding began. In another area near the city of Peshawar, Trócaire's partners are providing food, water and sanitary supplies to over 1,500 families in four villages.

Families in Peshawar have lost everything and will need support in the coming weeks and months to rebuild their lives. As the floods swept through the northern districts, Trócaire began looking south to Sindh, where the waters would inevitably flow and where we worked with communities to prepare for the worst. We and our partners helped families prepare to move quickly to higher ground if the waters came, which they sadly did. Families were also stockpiling food, water and other essentials. This last few days, as the rains continued to pour, these evacuation plans became a reality.

Our work so far has included the evacuation of 8,000 such people trapped in at–risk areas from the area surrounding Manchar Lake in the southern province of Sindh.
In the northwest of Pakistan, Trocaire's already supporting another 10,000 survivors with food, water, water purification tablets, cooking utensils, high energy biscuits for children and sanitary supplies to vulnerable families.

Specifically, 5,700 families have received food packages; 4,500 families received packages containing blankets, plastic sheets for shelter and kitchen utensils; and 5,000 families have received hygiene kits. The threat of disease is huge.
Disease

As the flood waters begin to recede from the northern Provinces, water–borne diseases are becoming a threat. Already cases of cholera have been confirmed. "All the water systems are contaminated so getting people clean water to affected people is crucial," according to Cecil Dunne. "Without clean water supplies, disease will spread like wildfire."

"People are extremely vulnerable and desperately need our support – not only in the coming weeks but in the coming months and years that it will take to rebuild communities."

From RELIEF WEB:

Evacuations underway in southwest Pakistan
Source: Trócaire
Date: 06 Aug 2010

Trócaire's partners have begun evacuating 8,000 people from over 30 villages in western Sindh, as the floodwater from the northwest has moved down into the province.

Earlier this week in Sindh, Trocaire was helping communities to prepare for the worst and get contingency plans in place so that families would be ready to move quickly to higher ground if the waters came. Families were also stockpiling food, water and other essentials. Yesterday, as the rain began to pour these evacuation plans became a reality.

In the northwest Trocaire's is already supporting 10,000 survivors with food, water, water purification tablets, cooking utensils, high energy biscuits for children and sanitary supplies to vulnerable families.

"All the water systems are contaminated so getting people clean water is crucial" according to Cecil Dunne, Trócaire's emergency officer in Pakistan. "Without clean water disease will spread like wildfire."

"People are extremely vulnerable and desperately need our support not only in the coming weeks but in the coming months and years that it will take to rebuild communities."

Millions of livestock dead or in danger in Pakistan

Source: Food and Agriculture Organization of the United Nations (FAO)
Date: 20 Aug 2010

Urgent need for animal feed to prevent further economic destruction

Rome, 20 August 2010 – Millions of livestock have been affected by the floods in Pakistan and are badly in need of food and medicine, FAO said today.

Around 200 000 cows, sheep, buffalo, goats and donkeys have already been confirmed as dead or missing but the final numbers will be much higher, possibly into the millions. If you count poultry losses, then millions of animals have already died with the entire poultry stock wiped out in some areas. FAO estimates that millions of surviving animals are now facing severe feed shortages, threatening generations of Pakistan's livestock.

Many animals died because people had to leave them behind when they were rescued by the Pakistan military and other rescue services. "You can put chickens, goats and sheep in the boat and take them with you but you can't take a buffalo or a cow," said Simon Mack, Chief, FAO Livestock Production Systems Branch.

"In almost every picture you see of flood victims being rescued, someone is clutching a goat or a chicken." FAO field staff report that in the Sindh province, flood victims are turning up at concentration points with large numbers of animals.

The floods have affected the most densely populated livestock areas in Pakistan. Livestock make up about half of agricultural GDP.

"Livestock in this country are the poor people's mobile ATM," said David Doolan, Senior FAO Officer, in charge of FAO programmes in Pakistan. "In good times people build up their herds and in bad times they sell livestock to generate cash. Every animal we save is a productive asset that poor families can use to rebuild their lives when the floods finally pass."

The main priority — and challenge — is to get feed to those animals that have survived as much of the country's traditional animal feed — straw and forage — has been lost in the floods. For buffalo and cattle, it is essential to enable the herds to rebuild quickly during the next breeding season.

It is also imperative to get medicine to animals that have fallen weak or sick because of the disaster.

The UN has asked for $5.7 million in emergency assistance for livestock and FAO has mobilized $1.4 million of funds for the procurement of feedstuff and for animal health vaccines. FAO will be asking for more money for this sector once the full scale of needs is clear.

"We are still trying to get a feel of how much feed is available in country as much of it has been destroyed. Then we have to transport the feed which is also challenging with so much of the infrastructure damaged" said Mack.

Where straw and fodder are available it can be supplemented with multinutrient feeding blocks which are produced in Pakistan. Animals can also be fed cereal grains, pulses and by–products — such as bran — but these are also in high demand to feed the human victims of the flood.

From the site:

Fast Facts

* Pakistan is ranked 141 of 182 on the Human Development Index.

* The country is highly prone to natural disasters.

* Over 2.7 million people were displaced at the height of the current crisis in July 2007 and over 1.66 million have now returned to their places of origin.

* The country is currently subject to mass–casualty attacks against civilian and military targets. A suicide bombing at the World Food Programme (WFP) compound in Islamabad on 5 October killed five and wounded six UN staff members. This attack, and the recent assault on a UN guesthouse in neighbouring Afghanistan, will inevitably have direct ramifications for ongoing humanitarian operations, specifically in the North West Frontier Province (NWFP) and the Federally Administered Tribal Areas (FATA) of Pakistan.

* Displacements resulting from the continuation of military operations by the Armed Forces of Pakistan against armed opposition groups are continuing across areas of the NWFP and FATA.

* Though UN–led advocacy continues, access to most displacement/ conflict zones remains extremely limited for UN workers, with limited access granted in some instances to national staff.

Humanitarian response activities in Pakistan remain extremely complex, with a protracted conflict generating four principle categories of people in need: returnees; those who have remained in conflict zones during operations; IDPs who remain in camps or with host families; and host families providing food and shelter to IDPs. These groups will continue to require OCHA support well into 2010. However, should the Pakistan armed forces achieve and maintain greater levels of control thus inducing enhanced stability across areas of the NWFP and FATA, OCHA functions may begin to transition. The focus might thus change from current life–saving operations to an expansion of early recovery actions, with a view to widening developmental/reconstruction activities.

The rapidly changing environment in Pakistan is a significant challenge to OCHA coordination efforts. The in–country security environment remains extremely volatile. OCHA will be faced with small–scale and cyclic population displacements throughout 2010. Local conditions and requirements will determine the nature of the response (humanitarian, recovery, development). In some areas, the various phases of response (life–saving and time–critical) will be required simultaneously (e.g. in the Malakand Division of NWFP and in parts of FATA).

The existing cultural barriers for women will exacerbate the vulnerability of female and child–headed households. Special efforts will be required to ensure that gender considerations are adequately taken into account in the design and implementation of humanitarian activities. Access will continue to pose a challenge for OCHA in 2010. The bombing of the WFP compound in Islamabad that killed five and injured six United Nations staff on 5 October 2009 – and the rapid increase in mass–casualty attacks against the civilian population since that attack – is already affecting OCHA and wider humanitarian community work. And an increased burden is being placed upon the NGO community to maintain the provision of assistance.

OCHA will address the access concerns and rapidly changing environment by the following actions: improving security (i.e. by employing a security advisor whose role will be to ensure the safety of OCHA staff; deploying armoured cars for future field visits; ensuring adequate preparedness by keeping abreast of developments and constantly analyzing the context in close support and cooperation with the United Nations Department of Safety and Security.) OCHA will furthermore fulfill its mandated leadership and support function for the work of the Humanitarian Coordinator, United Nations agencies, funds and programmes, NGOs and government by:

* Identifying gaps in the humanitarian response and providing tools, information and data to better target response actions.
* Supporting the daily functioning of the clusters, by striving to ensure greater inter–cluster dialogue to reduce the duplication of work.
* Acting as a common link between the humanitarian community and the government.
* Advocating with the government on behalf of those displaced to ensure that humanitarian assistance is provided with respect and with dignity.
* Working closely with the donor community to keep them informed of humanitarian developments and encourage coordination of bilateral funding activities.

Given the limited government capacity to respond to the complex and constantly evolving situation, OCHA plans to maintain its in–country support function throughout 2010. With the likelihood that the instability will persist, OCHA will continue to reinforce coordination structures and systems, with a view to commence dialogue on transitioning its functions to longer–term actors as relative stability returns to the country.

From Relief Web:

PAKISTAN: NUMBERS OF AFFECTED PEOPLE CONTINUE TO RISE
Source: United Nations Office for the Coordination of Humanitarian Affairs (OCHA)
Date: 08 Aug 2010

(New York / Geneva / Islamabad: 08 August 2010): Pakistan's deadly floods have now affected over six million people, according to the latest estimates produced today by the Provincial Authorities of Baluchistan, Khyber Pakhtunkhwa (KPK), and Punjab, in cooperation with the United Nations. As of yesterday, the estimate was of just over four million.

"Things will probably get worse, before they start getting better", said Martin Mogwanja, Humanitarian Coordinator in Pakistan, "We are working at full speed to respond to the most urgent needs of the affected populations".

The riverine floods caused by the waters of the Indus River have meanwhile reached Sindh Province, located in the country's south, and hundreds of villages have been flooded. The protective bund at Torhi, located near Sukkur in the province's north, has been breached. Several barrages and embankments are also at risk of breaking. "While comprehensive estimates are not yet available, it is certain that hundreds of thousands, if not millions, are being affected in this province", said Dennis Bruhn, a United Nations disaster management expert who arrived in Sindh today. According to forecasts, heavy rain will continue to fall in Sindh for at least the next three days.

Until the waters recede, it will be nearly impossible to access some of the worst–affected areas for assessments and delivery of assistance. "We are particularly concerned about the needs of 600,000 people, who remain completely cut off in the north of KPK", said Wolfgang Herbinger, Country Director of the World Food Programme (WFP), "especially as no helicopter deliveries have been possible for three days because of bad weather".

While the amount of funds required for the relief operations cannot be known until needs are more comprehensively assessed, it is expected that the amount required over the coming months will be several hundreds of millions of dollars. "And with so much destruction to agricultural land and to infrastructure, more hundreds of millions, if not billions, will be required on the longer term

to restore livelihoods, as well as services including the health system", said Dr. Ahmed Shaboul, officer–incharge for the World Health Organization (WHO) in the country.

The floods are the worst in Pakistan's living memory, and the needs arising out of this disaster are comparable to those that followed the 2005 earthquake. So far, the province worst affected is KPK, located in the country's north–west, where an estimated 3.9 million people have been affected, including 1.5 million who are homeless.

From Relief Web:

PAKISTAN: OVER FOUR MILLION AFFECTED BY FLOODS
Source: United Nations Office for the Coordination of Humanitarian Affairs (OCHA)
Date: 05 Aug 2010

(New York / Geneva / Islamabad: 05 August 2010): Over four million people are estimated to have been affected so far — to different degrees — by floods, which have been hitting Pakistan since last week.

"This is a disaster of major proportions with immediate but also medium and long–term implications," said Martin Mogwanja, United Nations Humanitarian Coordinator for Pakistan, adding that the emergency continued to evolve.

Assessments are still underway. However, estimates issued by the provincial authorities, and produced with the assistance of the United Nations, indicate that over four million people have so far been affected in different ways — including those who preventively left their homes. At least 250,000 dwellings are reported to have been destroyed or severely damaged, leaving at least one and a half million persons homeless.

United Nations agencies and their partners have already provided tents or plastic sheeting to at least 100,000 people, food to at least 150,000 and clean water to at least 750,000.

Over the past days, the floods gradually moved from north to south. Khyber Pakhtunkhwa Province, located on the country's north–west on the border with Afghanistan, was the worst hit, with an estimated 155,000 homes destroyed. In the north–eastern parts of Baluchistan and the south–western areas of Punjab, respectively, an estimated 300,000 and 1.8 million people were affected, according to Government estimates.

In the next hours, the floods are expected to reach the country's southern Sindh Province, potentially affecting 11 of its districts. Approximately 350,000 people in the province have already relocated to safer areas.

"Without knowing how the situation may further develop, we are ready to continue assisting the Government in responding to any deterioration of the situation", said Mr. Mogwanja.

Since last week, the National Disaster Management Authority (NDMA) embarked on the most critical phase of the response— rescuing those in need. At least 500,000 have been evacuated from low–lying areas.

"In terms of emergency relief, the most urgent needs of the population are food, clean water, medical care, shelter and household goods", added Catherine Bragg, United Nations Deputy Emergency Relief Coordinator. "In some affected areas, crops have been destroyed or severely damaged, which will significantly affect livelihoods in the medium term", she added.

The flooding follows torrential rains that hit the area during the course of last week, leading to the worst floods in the country in at least 80 years.

From Relief Web site:

UNHCR calls public to support flood relief efforts
Source: United Nations High Commissioner for Refugees (UNHCR)
Date: 10 Aug 2010

ISLAMABAD, Pakistan, 10 August 2010 – The Untied Nations High Commissioner for Refugees, (UNHCR) has set up a dedicated bank account to receive donations for its operations to help people affected by the torrential floods in Pakistan.

Individuals and organizations who wish to assist the victims of the monsoon flooding may channel support via UNHCR which is working with carefully selected local partner charities.

Please find details of the account:

Account title: UNHCR Special
Account number: 08–7316410–02
Swift Code: SCBLPKKX
Bank Name: Standard Chartered Bank (Pak) LTD
Branch Address: F–7 Markaz Branch, Plot number 19–A, F–7 Markaz, Islamabad (Pakistan)

UNHCR is calling on the public to help fund relief efforts to reach devastated Pakistani communities affected by the flooding. The agency will shortly launch an emergency appeal for additional funds to assist up to 560,000 people, including local Pakistanis, conflict–affected displaced people from border areas and Afghan refugees.

In addition to providing tents, plastic tarpaulins, transitional shelters for women–headed households and other assistance, UNHCR plans to rehabilitate communal facilities that have been destroyed by the floods, such as water points and sanitation facilities, clinics, schools and access roads.

So far UNHCR has dispatched more than 41,000 plastic tarpaulins, 14,500 family tents, 70,000 blankets/quilts, 40,000 sleeping mats, 14,800 kitchen sets, 26,600 jerry cans, 18,600 plastic buckets, 17,700 mosquito nets and 13.3 tons of soap. On Monday UNHCR sent 1,000 tents to southern Sindh Province, where floodwaters are still cresting. Today, in Khyber Pakhtunkhwa, we plan to dispatch items to Utmanzai, Upper Dir, Khazana, Azakahel and Khursan.

Pakistan: Getting bogged down
News Stories, 10 August 2010

ISLAMABAD, Pakistan, August 10 (UNHCR) - Pakistan's flooding is testing the limits of the country's emergency response capacity as well as that of UNHCR and other UN and international agencies.

"The situation is one of the most difficult we have ever faced," said Mengesha Kebede, UNHCR representative in Pakistan. "We are smack in the middle of a catastrophe, people in need are everywhere, some routes are blocked, and even when we deliver tents some people may lack dry land where they can be erected."

Thousands of villages and towns in low–lying areas have not seen flooding on this scale in generations. Across the country, Pakistan's Federal Flood Commission puts the number of homes destroyed or damaged at more than 300,000, with more than 14,000 cattle dead and 2.6 million acres of cultivated land under water. So far some 1,600 people have been killed, but many millions of Pakistanis and Afghan refugees have been affected by the flooding.

UNHCR's main relief work has been in the north where flooding has been most severe. Normally our work there is geared towards Afghan refugees and conflict–displaced Pakistanis, but in this instance we are working equally for all affected communities, both Pakistani and Afghan.

Main roads are blocked, and in several places we are contending with difficult security conditions, making it difficult for staff to move freely. All 29 bridges in the Swat Valley have been washed out, for example. Continuing bad weather has grounded helicopter airlifts to the region. Some aid is being delivered by mule or on foot. When we deliver tents, there is little dry land on which to erect them.

Although we have the benefit of a presence in Pakistan's Khyber Pashtunkhwa and Balochistan provinces dating back more than 32 years, meeting the demands of this crisis is a massive challenge.

In Balochistan Province, for example, our stockpiles are nearly exhausted. Trucks despatched from Peshawar, Karachi and and Lahore carrying additional tents and other items have been delayed in some instances for more than a week by flooded roads.

In parts of the Swat Valley of Khyber Pakhtunkhwa Province (KPK), in Pakistan's mountainous north, landslides and washed out bridges have completely cut off thousands of people in need.

"Amongst those caught up in the floods are many tenant farmers and also Afghan refugees living out on the inundated flood plains," Kebede said. 'Many of these people are now without shelter and have lost their food, livestock and all their possessions."

So far UNHCR has provided more than 41,000 plastic tarpaulins, 14,500 family tents, 70,000 blankets, 40,000 sleeping mats, 14,800 kitchen sets, 26,600 jerry cans, 18,600 plastic buckets, 17,700 mosquito nets and 13.3 tons of soap. On Monday we sent 1,000 tents to southern Sindh Province, where floodwaters are still cresting. Today, in Khyber Pakhtunkhwa, we are dispatching 300 tents and family kits to Utmanzai, 500 tents and 1,000 family kits to Upper Dir, 193 tents, family kits and plastic tarpaulins to Khazana, 300 tents, family kits and plastic tarpaulins to Azakahel and 75 of each to Khursan.

UNHCR is calling for more help from donors to reach the neediest. It will shortly launch an emergency appeal for additional funds to assist up to 560,000 people affected by the crisis. In addition to providing tents, plastic tarpaulins, transitional shelters for women–headed households and other assistance, UNHCR plans to rehabilitate communal facilities that have been destroyed by the floods, such as water points and sanitation facilities, clinics, schools and access roads.

2010 UNHCR country operations profile – Pakistan
Working environment

The context

The humanitarian situation changed dramatically in Pakistan in the first half of 2009, with approximately 2 million people uprooted by the emergency in the North–West Frontier Province (NWFP) and the Federally–Administered Tribal Areas (FATA). The speed and magnitude of the crisis was unprecedented, prompting the Government of Pakistan and the humanitarian community to expand the existing humanitarian operation plan. Within months of the emergency, the Government initiated a return strategy, shifting the emphasis from providing immediate humanitarian assistance to supporting return, early recovery and reconstruction efforts.

In addition to assisting some 2 million people who have fled their homes, Pakistan continues to host some 1.7 million registered refugees, one of the largest populations of its kind in the world. Almost all are from Afghanistan, and live in refugee villages and urban areas. A very small number of refugees and asylum–seekers, primarily from Somalia, Iraq and Iran, also live in the country.

Since March 2002, approximately 3.5 million Afghans have repatriated from Pakistan with UNHCR's assistance. More than 270,000 Afghan refugees returned home in 2008, and in the first half of 2009 some 50,000 Afghans repatriated. The reduced numbers are largely due to the profile of the remaining Afghans and the deteriorating security situation, as well as uncertainty around the elections in Afghanistan. The Government of Pakistan's commitment to the extension of the Proof of Registration (PoR) card for Afghans until 2012 will enable Afghans to remain living in Pakistan until return becomes a more viable option.

Security imperatives have also changed the way UNHCR and the humanitarian community operate in Pakistan. In 2010 UNHCR will continuously review the operating environment and adjust its programmes accordingly.

The needs

UNHCR will facilitate voluntary repatriation in 2010 for all Afghans with a valid PoR card. It is estimated that some 150,000 Afghan refugees will repatriate, taking into account the absorption capacity in Afghanistan.

Under the Registration Information Project for Afghan Citizens (RIPAC), three initiatives were considered for registered Afghans in 2009 and these will be pursued in 2010. The first is the Smart Card for Afghan Citizens project which will allow refugees to have a formal identity document. The second is the conducting of community and household surveys, aimed at identifying short– and long–term protection needs and solutions for different groups, with a focus on resettlement. Based on the outcomes of the surveys, the third initiative – the Special Assistance Fund (SAF) – will target in–country assistance to identified individuals and groups.

RIPAC will also ensure that all registered Afghans under the age of 18 are issued with birth certificates. It is expected that some 1 million Afghan children will receive these documents under the project.

The Refugee–Affected and –Hosting Areas (RAHA) initiative was officially launched by the Government with the support of UNHCR and UNDP in 2009 in the context of the UN Delivering as One programme. This five–year development programme, which aims to address social, economic and environmental factors, will be implemented initially in Baluchistan and the NWFP. Its aim is to promote the peaceful co–existence of Afghan refugees and the local communities that have hosted them for more than three decades.

UNHCR will continue to assist people affected by the emergency in 2009 by supporting the efforts of the Government and local NGOs in such key areas as transportation, protection monitoring (through social and legal referral centres), the provision of non–food items and temporary shelter. As some people of concern will not be able to return home in the near future, UNHCR will continue to help them through its role as cluster lead for emergency shelter, protection, and camp coordination and camp management. As the security situation is likely to remain precarious in 2010 in some areas of NWFP, Waziristan and Baluchistan, emergency preparedness and contingency planning for new displacement will be an important component of UNHCR's work.

Main objectives

Favourable protection environment

Advocate for the inclusion of refugee–affected and –hosting areas, return areas and Afghan populations in the national development agenda, development programmes supported by other UN agencies, and the UN Delivering as One initiative.

Fair protection processes

Help the Government to manage the Afghan refugee population by implementing the Registration Information Project for Afghan Citizens (RIPAC), with particular emphasis on reducing the vulnerability of Afghans through the issuance of identification documents by the Government.

Basic needs and services

In response to the emergency situation, continue to provide humanitarian assistance, such as shelter materials and non–food items, to people of concern; establish camps and assist in camp management; support host communities; and protect the most vulnerable populations.

Durable solutions

Provide international protection and solutions to refugees and asylum–seekers.

Ensure that that the returns of Pakistanis affected by the emergency in the NWFP and the Federally Administered Tribal Areas (FATA) are voluntary and sustainable and support the Government's efforts to provide the necessary humanitarian assistance to returnees and host communities.

Logistics and operations support

Ensure the security of all staff.

Key targets for 2010

Some 150,000 Afghans repatriate voluntarily from Pakistan.

Under the RIPAC project, Smart cards are issued to Afghans, replacing the PoR cards, and individuals and groups will be identified for assistance as a result of the household surveys.

Up to 30 projects are implemented under the RAHA initiative.

UNHCR will continue to provide humanitarian assistance to people of concern through registration, the provision of non–food items and emergency shelter.

UNHCR will assist some 800,000 individuals affected by the humanitarian situation with registration, shelter, non–food items, protection support through legal and social referral centres, transportation and temporary shelter in areas of return although the numbers may change due to the evolving situation.

More effective safety measures enhance staff security.

DONATIONS:

WHAT YOUR MONEY CAN BUY:

$6 can provide three 10–liter collapsible water containers for transporting and storing water.

$60 can provide 20 sheets of tarpaulin, providing simple shelter or ground sheeting for several families.

$200 can provide one recreation kit for 90 children to enjoy physical activity and play in times of emergency or displacement—containing items such as frisbees, jump ropes, footballs, volleyballs, handballs, whistles, a chalkboard and chalk, etc.

InterAction site – Pakistan Floods Response 2010:

UNICEF and partners have set up nine medical camps and are providing medicine, water treatment tablets, nutritional supplements, hygiene kits, and jerry cans. The agency is also supporting the local authorities by providing clean drinking water.

FROM THE SITE:

8/3/10:
Pakistan floods affect over 3 million; UNICEF responds for children

NEW YORK (August 3, 2010) — More than 1,400 people are dead and more than a million children are in need of emergency assistance after the worst floods to hit Pakistan since 1929 devastated large parts of the country in recent days.

Khyber Pakhtunkhwa, located in the mountains of north–western Pakistan, is the province worst affected by the floods. Many of the province's estimated 3.5 million residents lost their crops and saw their homes flooded, damaged or destroyed.

Crucial needs

Communication networks in many areas remain down or disrupted, and ground access is limited because bridges, highways and roads have been blocked or destroyed by the floods.

"There are crucial needs for food and safe drinking water," said UNICEF Representative in Pakistan Martin Mogwanja. "Potential disease outbreaks among survivors are a major concern."

Mogwanja has just returned from visits to two flood–affected agricultural districts where UNICEF is working to prevent the spread of deadly diarrheal diseases in young children.

Providing safe water to the hundreds of thousands of people whose water supply has been polluted or damaged by the floods is now essential. UNICEF is working with the Pakistani authorities to repair wells and drinking water sources as quickly as possible — and to provide chlorine tablets so that water can be treated before it is consumed.

Pakistan Flood – U.N. Situation Report 8/3/10:

http://www.pakresponse.info/sitreps/OCHA_SITREP5_3_August.pdf

FROM THE INTERACTION SITE – ARMED CONFLICT RESPONSE:

At present, UNICEF, with its government, UN, and humanitarian partners, is providing children and their families with safe water and sanitation, nutrition, health support, education and child protection wherever possible. Estimates suggest that tens of thousands of people are trapped in the conflict areas, where access is severely limited. UNICEF's request for $41.4 million is part of the inter–agency revised Pakistan Humanitarian Response Plan (PHRP), which is seeking $543.2 million to cover the work of major humanitarian actors. The Government of Pakistan has welcomed the PHRP as complementing its own National Response Plan to this massive and expanding humanitarian crisis.

Responding to the Humanitarian Emergency in Pakistan
Date: 20 August 2010

UNIFEM (part of UN Women) works to ensure that gender concerns are fully integrated into relief and recovery operations in Pakistan, following the floods that have affected the lives and livelihoods of millions of people.

Within the framework of international humanitarian response in Pakistan, UNIFEM leads the Gender Task Force with UNFPA to coordinate the integration of gender issues across the work of all humanitarian clusters. UNIFEM also collaborates with national NGOs and with relevant national bodies, including the Ministry of Women Development, the National Commission on the Status of Women as well as the Women Development Departments in the provinces, including the Federally Administered Tribal Areas (FATA) and Pakistan–Administered Kashmir (PAK).

In particular, UNIFEM focuses on supporting assessments of the conditions and needs of women and girls in affected areas, and on preventing, monitoring and addressing gender–based violence among vulnerable populations.

At the same time, ongoing development work carried out by UNIFEM will continue, with programme teams making efforts to address some of the issues arising from the emergency.

UNIFEM participates in the UN system–wide flash appeal issued on 11 August for US$459.7 million to provide immediate relief to millions of people affected by the natural disaster.

For more information, please contact Ms. Alice Shackelford, Country Programme Director, alice.shackelford[at]unifem.org, or Ms. Roshmi Goswami, roshmi.goswami[at]unifem.org, +1 212 906–6891.

WHO responds to health needs in Pakistan floods

3 AUGUST 2010 | ISLAMABAD | CAIRO | GENEVA –– The worst floods on record in Pakistan are placing the health of hundreds of thousands of people at risk, with a high threat of waterborne disease outbreaks and immense damage to health facilities. WHO is coordinating the response of health partners and supporting Pakistani authorities by sending medicines and related health supplies capable of treating more than 200 000 people to the affected areas in the northwestern region of the country.

Major health concerns at the moment are the control of waterborne diseases, including diarrhoeal diseases and respiratory infections, treating the injured, helping to ensure the quality of clean drinking water and ensuring public access to health facilities

with the emphasis on increasing the number of female health workers.
Many health facilities destroyed

About 46 of Pakistan's 135 districts have been affected by the flooding. At least 39 health facilities have been destroyed, resulting in a loss of tons of medicines. There is a tremendous need for more medical and related materials to treat people affected by the humanitarian emergency, as well as to immunize children, particularly against polio and measles.

Static and mobile medical teams are providing outreach services to affected areas especially with maternal, neonatal and child health, nutrition and psychosocial support. By the end of 2 August, dozens of mobile teams and fixed health facilities had treated more than 15 000 patients, many of whom were suffering from diarrhoea.
WHO response

WHO is working with the Pakistani Ministry of Health, National Disaster Management Authority, Provincial Departments of Health as well as partner healthcare providers within the Health Cluster network of international and local organizations. A disease outbreak early warning system is active and, as yet, no outbreaks of diseases have been confirmed, however concern of the disease outbreaks remains high.

WHO has sent large shipments of medicines and supplies to treat people for diarrhoea, respiratory infections, wounds, and other health conditions. To ensure people have access to clean, safe supplies of drinking water, WHO has also provided 102 000 aqua tablets and 4600 water purifying sachets to health facilities in Peshawar and Nowshera.
Unmet needs

But the scale of the emergency means more medical supplies will be needed. Other urgent needs identified by an initial assessment conducted by UN agencies include:

* providing psychosocial support to the affected population;
* hygiene promotion interventions – providing water purification tablets, safe water, water chlorination;
* tents for temporary health facilities;
* strengthening the referral system to higher levels of health care; and
* vaccination campaigns.

USAID Sends Additional Aid to Pakistan Flood Victims
August 10, 2010

WASHINGTON, D.C. – The U.S. Agency for International Development (USAID) announced today an expansion of its ongoing humanitarian assistance for victims of flooding in Pakistan, which has included providing shelter materials, emergency food supplies and preventative medical care to curb potential disease outbreaks.

The additional $20 million brings the total financial assistance to date from the United States to $55 million. As the flood waters recede and the overall needs in Pakistan become better known, these contributions may continue to grow.

This new money will be used to expand existing programs and activities through flood–affected regions of the country, including in the south, where there has been a light humanitarian presence until now. The initial funding was used for flood assistance in parts of Khyber Pakhtunkhwa Province, where USAID is already working with a network of NGOs and UN agencies.

USAID continues to actively monitor the flood's path. As it moves south, the additional funding announced today will be used to expand grants to NGOs and UN Agencies to allow them to work further south, in Sindh and Baluchistan Provinces. This assistance will be provided through the international humanitarian community, as well as through an existing mechanism that provides funding to Pakistani humanitarian organizations, which have unique access to many of the flood–affected areas.

USAID's presence in Pakistan continues to grow in response to the flooding. A Disaster Assistance Response Team is on the ground and will be expanding to eleven disaster assistance experts by the end of the week.

The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations. A list of humanitarian organizations that are accepting cash donations for flood response efforts in Pakistan can be found at www.interaction.org. Information on organizations responding to the humanitarian situation in Pakistan may be available at www.reliefweb.int .

Cash donations allow aid professionals to procure the exact items needed (often in the affected region); reduce the burden on scarce resources (such as transportation routes, staff time, warehouse space, etc); can be transferred very quickly and without transportation costs; support the economy of the disaster–stricken region; and ensure culturally, dietary, and environmentally appropriate assistance.

The United States stands ready to provide further assistance as additional needs are identified by the Government of Pakistan.

For more information about USAID and its programs around the world please visit www.usaid.gov .

USAID Pakistan Floods Fact Sheet #2
Key Developments

* To date, USAID/OFDA has awarded more than $10 million to programs in the sectors of health, shelter and settlements, and water, sanitation, and hygiene (WASH), as well as to an umbrella grant that allows USAID/OFDA to fund Pakistani NGOs for a range of activities throughout flood–affected areas.

* On August 10, USAID/OFDA pledged an additional $20 million in humanitarian assistance for flood–affected communities in Pakistan, bringing the total USAID/OFDA commitment to $30 million to date. USAID/OFDA will use the new funding to expand existing programs throughout flood–affected regions nationwide, including in the south where few humanitarian organizations were operating prior to the floods.

* A USAID/OFDA flight carrying 1,153 rolls of plastic sheeting and 17,000 blankets arrived in country on August 10 for distribution in flood–affected areas of southern Pakistan. The plastic sheeting is expected to provide emergency shelter assistance for approximately 11,530 families, or 66,000 individuals, and to complement ongoing emergency shelter programs in affected areas.

* On August 8, USAID/OFDA activated a Disaster Assistance Response Team (USAID/DART) in Pakistan to assess humanitarian conditions and coordinate U.S. Government (USG) relief efforts in collaboration with the Government of Pakistan (GoP), U.N. agencies, and non–governmental organizations (NGOs). In addition, on August 9, USAID/OFDA stood up a Washington, D.C.,–based Response Management Team to support the USAID/DART.

* On August 6, the GoP National Disaster Management Authority (NDMA) announced a two–track donor funding framework for international flood–response assistance. Donors may contribute to a U.N. response plan or to a GoP response fund that NDMA will establish. NDMA plans to disburse funds to the provincial disaster management authorities for emergency and recovery activities, with the Pakistan Red Crescent Society as the implementing agency. To ensure oversight and transparency, the NDMA also plans to establish a fund management committee, including representatives from development banks, the U.N., and donor governments, to monitor funds.

* According to the U.N. Office for the Coordination of Humanitarian Affairs (OCHA), access to affected populations in northern Khyber Pakhtunkhwa (KPk) Province is the greatest challenge as of August 10. In contrast, access does not present an issue in Punjab and Sindh, but the number of affected individuals in those provinces—estimated to be more than 8.8 million people collectively—will likely generate significant humanitarian needs in coming weeks.

Pakistan Emergency Fund

Please help people affected by Pakistan's worst flooding in 80 years.

We urgently need £110,000* towards our initial relief effort in Pakistan, please donate now. Here's how your gift will help:

* £20 will buy hygiene kits of essential items for a family of four, which include a 30 day supply of water purification tablets.
* £36 will pay for a tanker to provide clean water in areas where safe water supplies have been destroyed.
* £60 will pay for a hygiene education session to displaced people, giving them the vital knowledge to help keep their families safe from water–borne diseases.

By supporting this emergency appeal today, your gift could help save lives and give thousands of vulnerable people in Pakistan the support they urgently need to survive.

* We are continually assessing the need on the ground and it is possible that further work will be required over the next few weeks should the situation worsen.

Your donation will be used to fund our response to the flooding emergency; in the event that we raise more funds than are needed, any additional funds would be spent on our wider programme in Pakistan.

Please note, WaterAid is not an emergency response organisation, we do however respond where disasters like this affect our long–term work and where we have local partners on the ground ready and able to take action.

**Services offered:** * KITS, HYGIENE KITS; Medical, Services, Public Health Education / Awareness; Sanitation, Services * (ANY/ALL Types); Sanitation, Supplies, Water Purification Tablets; Services, Disaster, Post Disaster Needs Assessment; Water, Potable Water; Water, Tanker

2010 –

Sunday, October 10, 2010 marked the official beginning of Water Missions International's Church Campaign: Gifts of Water! Gifts of Water is a series of challenge campaigns aimed at getting many people involved in giving small gifts that change lives.

Here is how it works:
• $10 = the Gift of Safe Water for 1 person
• Give your $10 by texting WMI to 85944 – giving online – or by mail to:
Water Missions International at P. O. Box 31258, Charleston, SC 29417
• Getting 10 friends to give $10 each = 10 more people getting safe water
• 250 groups of 10 friends giving $10 each gives Gifts of Water to an entire community

There's more!

• Sign the Gifts of Water gift card that will go with the water filtration system to the community you and your friends are helping to sponsor.
• Provide Gifts of Water with your email address and we'll send you a video link to the celebration when the safe water is first pumping into the community.
• You and your friends will get to be a part of the celebration!

Gifts of Water TEN launches on 10–10–10 (October 10, 2010). You can join then or jump in at any time during the following 10 weeks.
• Goal: 100 communities get safe water – potentially up to 300,000 people!!
• Goal: 100 communities hear the Living Water message of God's love for them.
• Goal: Deliver this good news to 100 communities by Christmas 2010.

Sign up now to order Ten cards for your church and join with us in our goal to give the gift of safe and living water to 100 communities by the end of the year.

Visit www.giftsofwater.com to learn more!

Water Missions Haiti
Port Au Prince, Haiti
Number of Systems Installed: 103
Number of Staff: 12

In August Julio and Elsa Paula transitioned from leading the Sri Lanka program to heading the Haiti program. At the time, Julio kept asking, "Why us? Why Haiti?" On January 12th 2010 a 7.0 earthquake shook the Water Missions International compound in Port–au–Prince, Haiti and they received their answer. This married missionary team was in Sri Lanka during and after the South

Asian Tsunami; the Paulas are well equipped to coordinate massive disaster responses ultimately transitioning into long term community development projects.

To date, Water Missions International has shipped 93 Living Water™ Treatment Systems and 81 Erosion Chlorinators. With the guidance of the Paulas, these disaster response projects will start to transition into communities for long–term development projects. The Haiti program is going through a period of change as WMI addresses the array of issues that arise while transitioning from a period of immense, rapid growth to a stable development program.

2010
Six Water Systems Provide Safe Water In Pakistan
http://www.watermissions.org/six–water–systems–provide–safe–water–in–pakistan

Thank you for all your prayers and support in response to the flooding in Pakistan.

Water Missions International currently has six water treatment systems installed – each capable of purifying up to 10,000 gallons a day and providing safe water to thousands of people. Two additional systems arrived recently and will be installed shortly.

Please continue to keep the flood victims and displaced people in Pakistan in your prayers.

GET INVOLVED
There are many hands–on ways to get involved in the work of Water Missions International. We count on individuals to help us get the word out about what WMI is doing around the world. We also count on volunteers to keep costs low. In this section, we offer examples of how you can help, but these are just ideas. Please use your imagination, be creative, and most of all – pray! It is essential to our mission and we count on your prayers to accomplish the good work that the Lord has begun.

From the site:

Islamic Relief teams up with local NGO to help the people of Japan
24 March 2011

.

Islamic Relief has teamed up with a Japanese NGO in to get help to vulnerable people struggling in the aftermath of an earthquake and devastating tsunami.

The full scale of the disaster is now starting to emerge, following a devastating tsunami which swept the north–east of Japan after a massive earthquake struck just off the coast. The tidal waters swept away homes, livelihoods and infrastructure, and a nuclear emergency has been declared with explosions at least one power station. More than 200,000 people were evacuated from the area, and 300,000 people had to flee their homes across the country. Immediate humanitarian needs are water, food, and blankets.

Since the earthquake on 11 March, the current confirmed death–toll has risen to 9,000. More than 12,500 people are still missing. With damage to road networks and transport infrastructure, movement around the country is still severely restricted. Japanese people also face the threat of further earthquakes and fears over radiation released by damaged nuclear–power stations.

Islamic Relief is now working with a Japanese NGO to get vital aid and humanitarian assistance to vulnerable people. The charity, which is called JEN, has worked with Islamic Relief in Pakistan and Iran and has extensive experience in emergency response. JEN has distributed cooked food, hygeine kits, food staples and water tanks to 12,000 people at Takasago school – currently used as an evacuation centre – and is also identifying the needs of evacuees in the districts of Aoba, Wakabayashi, and Miyagino.

Please support our efforts to help the people of Japan: Donate to our emergency appeal today.

## Worldwide

### HumanitarianReform.org (an effort of One Response)

Info/Hotline · Open

Human Rights
**Web** www.humanitarianreform.org
**Service** Temporary

The document:

http://www.humanitarianreform.org/humanitarianreform/Portals/1/cluster%20approach%20page/clusters%20pages/WASH/Manual%20HRTWS%20in%20emergency_july2009.pdf

One Response:

http://oneresponse.info/Coordination/ClusterApproach/Pages/Cluster%20Approach.aspx

OneResponse is a collaborative inter–agency website designed to enhance humanitarian coordination within the cluster approach, and support the predictable exchange of information in emergencies at the country level. The website will support Clusters and OCHA fulfill their information management responsibilities as per existing IASC guidance. Key characteristics of the site include:

* A global entry page, where all global cluster guidance materials located on www.humanitarianreform.org is currently being migrated.
* Country or emergency specific content will be hosted on the field level site.
* A specific disaster site will be created within 24 hours, during the onset of a new emergency.
* A low–bandwidth version of the site is available, to enable access and exchange of information in poor connectivity environments.
* Information can be categorized as either public or private. This allows sensitive information to be made accessible only to cluster specific working groups.
* Clusters will directly manage their own content on the site.
* OCHA owns the website and is responsible for its management.

2. Who is the target audience for the website?

The primary audience for the website are humanitarian workers at the country level, including Cluster Leads, cluster members, OCHA, UN Common services etc. The secondary audience is global, including the global cluster staff at HQ, cluster members, donors, and OCHA.

3. What is the background to OneResponse?

In order to avoid the multitude of one–off ad hoc websites developed in each new emergency, there was inter–agency consensus in early 2008 that a single website was needed to support the predictable exchange of information in emergencies at the country level.

The inter–agency web platform was first field tested in May 2008 in response to Cyclone Nargis in Myanmar. Since then, OCHA has continued to develop the website based on the requirements and functionalities identified in partnership with the Cluster/Sector Information Management focal points and Microsoft, as well as lessons learned from both the Myanmar website and www.humanitarianreform.org. OneResponse is the successor to three different OCHA sites: www.humanitarianreform.org, www.humanitarianinfo.org, and ochaonline.un.org/fieldoffice, plus numerous ad–hoc non–OCHA sites.

In December 2008, the IASC Working Group requested the IASC Task Force on Information Management develop “an improved inter–agency web–platform to support and manage the exchange of operational information in emergencies, taking into account relevant existing web platforms and avoid duplication of existing agency web based resources”.

4. What is the role of Microsoft?

Microsoft’s collaboration with OCHA on OneResponse is based on a public private partnership initiated in early 2006, to work together on information management and information technology issues in humanitarian response. Building on this partnership, Microsoft committed to developing, hosting and supporting the Inter Agency Website, based on the functional requirements defined by the Clusters and OCHA

5. What is the role of the Clusters/Sectors in the website?

The role of the clusters/sectors is to manage their own content at the global and field level, as well as provide feedback to OCHA on changes they would like made to the website.

6. What is OCHA’s role?

OCHA's role is to manage the website and ensure that sufficient guidance material and support is provided to the clusters so they can manage their content effectively. The IASC endorsed 'Operational Guidance on Responsibilities of Cluster/Sector Leads & OCHA in Information Management' requires OCHA, in collaboration with the clusters, to provide a country–specific or disaster specific humanitarian web–site.

7. How can I learn more about OneResponse?

2012 HURRICANE SANDY –

Response to Sandy

We express gratitude to the several volunteers who have already offered to serve, however, right now, all response efforts for Hurricane Sandy remain to be in the emergency and rescue stage.

UMVIM will continue to communicate via email, Facebook posts, and Twitter any news that we receive. Rebuilding is a long and arduous process. We will continue to keep those affected in our prayers and ask that you do the same.

UMCOR Cleaning Buckets:

We encourage churches, mission groups, and individuals to spend a day creating cleaning buckets. The need for cleaning buckets and also school kits are currently being requested by the Northeastern Jurisdiction and UMCOR staff. Instructions can be found at www.umcor.org

PREPARE –
Cleaning Buckets or School Kits

For more information for shipping, please email our office or contact your Annual Conference. Several Annual Conferences will have collection points set up and we can connect you with those contacts.

Regional contacts:
http://new.gbgm–umc.org/about/us/mv/mission–teams–umvim/jurisdl–umvimcoords/

INFO From website:
http://new.gbgm–umc.org/about/us/mv/programs/disasterresponse/

The first contact point for volunteers after a disaster is the United Methodist Committee on Relief (UMCOR) Volunteer Hotline, 1–800–918–3100. Your name will be registered to receive information on volunteering at a site. You will be contacted as the area is able to receive volunteers.

Disaster Relief Link:
http://www.umvim.org/Disaster_Response.htm

Update on hurricane relief:
http://new.gbgm–umc.org/umcor/work/emergencies/ongoing/hurricane2005/

For the latest information on breaking Disasters see the UMCOR Hotline.

Disaster areas that receive volunteer teams for long term recovery require sufficient time to assess damage and coordinate a response. Potential teams must be patient in the early stages of disaster, as the only persons allowed into such areas are Emergency Management Agency and certified personnel and law–enforcement officials.

The first contact point for volunteers after a disaster is the UMCOR Volunteer Hotline (800) 918–3100. Your name will be registered to receive information on volunteering at a site. You will be contacted as the area is able to receive volunteers.
