7/19/11 Posted on HEAS from Dr. Bell
Received a call from a contact point in Mawiotie Bouret (South of Kenscoff) that a cholera outbreak has hit the remote river valley once again. This will effect many in the downstream villages of Grand Rivie and Belle Fontaine.

HEAS RESPONSE TEAM UPDATE 12/11/10:

We are moving quickly now to intercept and evaluate reporting we discovered in the Obleon – Furcy corridor by multiple locals of roughly ten fatalities each in the communities of Bel Fountaine and Mohotiere Brouette. Infection believed to have been acquired after travel to the Sequin area as opposed to PaP, however we will investigate this further. Brief stop at the Baptist Mission located between Kenscoff and Fermante indicates they've seen 8 patients total, none from these communities, no fatalities with two discharges. No patient surge noted, and the staff had not heard about the abovementioned communities.

We have teamed up with MMRC Global's Paul Sebring and the good folks from Open Hands to get on–site quickly. It is a long off–road drive with possible on–foot hiking into these areas. We have been told by locals there is zero medical support. If true, we expect to see a very bad situation, and one for which we may not be prepared with our recon team. With the multiple days of lockdown we've all experienced thanks to the demonstrations, we believe the disruption in NGO activity has contributed to a bad situation. We hope we are wrong.

I am copying PAHO ARO for their awareness of the possibility we may need immediate assistance for rapid mobilization of a CTC/CTU capability. We estimate we will be able to last 24–48 hrs on–site without support, however there is a great deal of uncertainly what we will truly find. All helo's are grounded last time we checked, so again we hope the situation is not as bad as what the locals claim.

Cheers,
Jim

FROM THE WEBSITE:

Cholera Outbreak Affects Local Churches
The recent Cholera outbreak in Haiti has brought national attention to Port–au–Prince, where more than 3,300 cases have been confirmed. Reports have come in from the rural districts where BHM serves, and cholera has struck several of our partner churches.

Local pastors reported that between 10 and 15 people have died from Cholera in their congregations, and they are seeking help to prevent more deaths.

We have already assembled basic hygiene supplies and disinfectants to help stem the spread of the disease in the affected districts.

Though international news agencies are reporting that the spread of Cholera is slowing, local pastors indicate that the rural areas where we serve are still under siege, and we are preparing for the worst.

This is the first Cholera outbreak Haiti has experienced in over 100 years, and it has left many health officials scrambling to control the spread of the disease. Basic hygiene plays a crucial role in preventing Cholera, but many impoversiehd communities, especially in the rural areas where we serve, simply don't have dependable access to supplies like bleach and other disinfectants.

We need your help to respond effectively to the Cholera outbreak and prevent needless deaths.

You'll help save lives when you contribute to our Cholera relief fund.

Health Cluster – Cholera Outbreak Response – Organizations and Activities
(LIST MAINTAINED BY PAHO. LAST UPDATED: NOVEMBER 13, 2010 2:50PM)

THIS SITE IS A CTU/UTC per the 12/6/10 PAHO LIST

UTC DEFINITION: Unit for the/Cholera (UTC): a health center, mobile clinic or hospital alone which has built a space to be able treat patients cholera, or in a tent or ente or in a house of the structure. THE UTC is able to make oral rehydration and intravenous use. Capacity 2-20 beds. Opening: at least during 12 hours. Staff : doctor, nurses, agent sanitation, health worker.

MANAGING ORGANIZATION:
ALIMA

The representative of the organization:
Amel Chillas; Guillaume Le Duc, responsible for programs

CONTACT:
alima.portauprince @ gmail.com, 3486 8446; Guillaume Le Duc 3785 4383

Main Contact of the place of intervention (Name, telephone, e-mail):
Dr. Marie Claude Francois, 3449 1530, marieclaudieclaudy@yahoo.fr / Jean Adrien, 37602901

Current Capacity beds of the place of intervention:
30 – Extendable to 40

What are your main domains of activity?:
Health promotion and awareness, social mobilisation, ORD corners x22

What do you need to support your work in Haiti?:
Supply of rehydration intrans, SRO & Ringer

FROM THE ALIMA SITE 10/25/10:

Haiti: Alima is mobilizing to respond to the epidemic of cholera

A cholera epidemic is causing dozens of deaths in Haiti in recent days. Victims suffer from diarrhea and dehydration very fast, symptoms of cholera. The deaths of patients can respond very quickly, just hours after the onset of symptoms. Yet, clinically, the disease is easy to treat, simply rehydrate the patient for two to three days.

For Haiti, it is the most serious health alert since the earthquake of January 12. The disease has already killed 253 on 3000 cases were identified by the Haitian authorities. The epidemic broke out in central Haiti, in the Artibonite and Central Plateau, where many refugees are survivors of the earthquake of January 12.

This epidemic may spread significantly to the rest of the country, especially in large overcrowded camps in the capital, where the earthquake nine months ago has made 1.5 million homeless, in addition to more than 250,000 dead. The situation of people in Port–au–Prince remains precarious, particularly in terms of habitat quality and hygienic conditions.

An emergency medical response to cope with the spread

The analysis of living conditions in these camps (quantity and quality of available water, sanitation systems and waste treatment, housing density) suggests that if the epidemic could spread it 's expect a peak of the epidemic particularly intense and fast.

ALIMA – present in Haiti since the earthquake of January 12, 2010 – is preparing a medical response to cope with the possible spread of the epidemic in Port au Prince. At this stage Alima studying the various possibilities for intervention under the coordination of the Haitian Government, which oversees the medical response to this epidemic.

This assessment work is undertaken locally by the President of Alima, Thierry Allafort Duverger and program manager, William Duke. This first team will be strengthened by the middle of this week with the arrival of a coordinator and several additional nurses and logisticians.

NEWS –

22 November 2010 SOLIDARITES INTERNATIONAL: fighting the cholera epidemic in Port au Prince

SOLIDARITES lNTERNATIONAL, a humanitarian aid organisation specialising in access to drinking water and sanitation, is stepping up its emergency response to the cholera epidemic in Haiti, in coordination with other humanitarian organisations.

According to the latest official figures, the cholera epidemic in Haiti has claimed the lives of 1250 people, and over 20,000 people have been hospitalised in the Artibonite, Centre, West, North West and North provinces. In the meantime, cases in Port au Prince have increased sixfold in one week, with 46 deaths to date. The Haitian Ministry of Public Health and Population (MPHP) estimates that there are 600 to 800 new cases every day.

In close coordination with its partners and with other humanitarian organisations, SOLIDARITES INTERNATIONAL is stepping up its emergency activities in Port au Prince:

Emergency awareness about basic hygiene in displaced persons' camps using megaphones, posters and flyers. Training of hygiene promoters.
Targeted emergency distributions of soap and Aquatabs (water purification tablets) in high–risk areas.
Cleaning sanitary facilities and spraying chlorine solutions at all the sites where SOLIDARITES INTERNATIONAL is present.
Cleaning drinking water tanks.
Chlorinating 22 wells and water points, training of chlorinators.
Construction of latrine blocks and supplying drinking water, to support the medical NGO ALIMA which is setting up ORPs (Oral Rehydration Points) and CTUs (Cholera Treatment Units) at the sites where SOLIDARITES INTERNATIONAL is present.
Preparation for round–the–clock monitoring.
Construction of latrine blocks, to support the medical NGO Merlin which is setting up CTUs.
Organisation of waste cleaning days at intervention sites.

SOLIDARITES INTERNATIONAL was present in Haiti from 2005 to 2007 following hurricane Jeanne, and is currently providing assistance to 124,000 people in Port au Prince, Petit Goave and Grand Goave, with a team of 22 volunteers and 150 Haitian staff, in the wake of the January 2010 earthquake.

–––

26 October 2010 SOLIDARITES INTERNATIONAL: our teams are on the front line against cholera in Port au Prince

10 June 2010 Haiti 5 months on: after the earthquake, the rains… the cyclones to come… the emergency continues

17 February 2010 Haiti: President Sarkozy, the emergency continues, and we must increase our aid for over one million Haitians who have lost everything

4 February 2010 SOLIDARITES INTERNATIONAL: the quake victims that we are helping in Haiti need the generous support of the French general public

15 January 2010 Haiti: our solidarity must measure up to their suffering
