10 stay overnight
4 deaths
MSF delivered supplies last on Dec. 11
Needs supplies for CTU
STAFF: 1 doc, 1 nurse, 1 lab tech, 1 aux nurse

11/22/10 UPDATE FROM THE SITE:

According to the Associated Press on Monday November 22, Haiti's Ministry of Health announced that more than 1,100 people have died from Cholera. This death toll is more than 150 counts higher than reported by BBC World News and other sources last weekend.

Thankfully, International Child Care has reported no cases of Cholera amongst patients and staff. A Cholera Response Plan has been developed by ICC Haiti, and measures are in place to prevent outbreaks from occurring at GCH and in surrounding tent cities. ICC's primary weapon in fighting the outbreak is through education of the public about how to prevent the transmission of the infection by using good hygiene practices like hand washing. In light of this epidemic, ICC is acquiring a stock of medicines, such as antibiotics like Doxycicline and oral re–hydration salts, and has developed a contingency plant to treat and monitor those who contract the infection. Two tents will be erected on the hospital grounds in the near future and will serve as treatment facilities.

As days go by hundreds of people in Haiti are contracting this often fatal intestinal disease that is caused by the ingestion of contaminated water or food and is transmitted by feces. What makes this situation even worst is the fact that the unsanitary living environments in many parts of Haiti are ideal conditions for the rapid transmission of this infection. The Associated Press reports that many people living in the Cap–Haitien area claim that the outbreak was brought to the island by UN peacekeepers. In October, just weeks after an outbreak in Nepal where Cholera is endemic, soldiers were deployed and stationed on the Artibonite River System which is the site of the infection's first occurrence. The Centre for Disease Control has confirmed that the bacterial strain in Haiti matches a strain specific to South Asia. Moreover, as the infection continues to spread, suspicion about its origin continues to fuel fear and riots between UN soldiers and residents in Northern Haiti and in Port–au–Prince.

Medical Facility · Open

Medical Clinic

MSPP location 19.4694° N, 72.1147° W, clinic is listed on the map; Google Earth 19°28'10.26N, 72°06'53.44"W, Bahon
**Service** Permanent

12/14/10 CHHN Update
130 pts total
15–20 pts staying overnight
2 deaths in last 24hr

CHHN gave 15 cases of chlorox and 200 pks of aquatabs 12/13/10
Say they need IV's, but actually have 500 bags. Still supported by MSF– last delivery was Dec. 11, 2010

12/8/10 From Karen with CCH
Bahon in the North between Grand Rivier and Pignon has 119 cases has a small Catholic clinic and small government clinic with minimal staff has 119 cases and 11 deaths. They are requesting stretchers to move patients down from the rural sections of Mountenwa, Bayi, and Bois–pins. They also have no to few supplies. CCH is working with MSPP in the area to get a specific needs list, but

1) ORS, Lactated ringers, aquatabs, antibiotics are desperately needed. Water source is river and a few wells.

12/7/10 From CHHN Report
Started seeing patients Nov. 10th. MSF supporting with supplies and staff since Nov. 30th
Have had 117 pts. total/ 19 staying overnight/ 1 death in last 24h
3 nurses, 3 aux nurses. Requesting 2 volunteers/ no room for accommodation
Needs: IVs, meds,
ALERT: Has no transport to pick up supplies

12/2/10 Email from Patty Gaines
Have not seen any cholera patients yet.
STAFF: 1 doc weekly on Sat. 9–2pm/ 2 RNs Mon–Fri.
Okay at present staff levels
Patty will be on the ground Dec. 4–8 and will check to make sure staff is getting cholera training
Uses DSI in Haiti for water system
Could p/u supplies in Cap Haitien if necessary.
Uses individual water systems– DSI in Haiti
Nearest Clinic/hospital GOV'T CLINIC IN BAHON – MILOT (I HOUR AWAY)

30,000 in community
