Haiti

Jan Makout (Location – Not Facility Name) – "CTU – CHOLERA REHYDRATION CENTER"

Medical Facility · Open

Jan Makout

Service Temporary

1/27/11 Notes from Lpar
There are several small communities around this end of Haiti. La Plateform is on the map at 19°37 52.09 N, 73° 22 21.22 W. Don't know if JanMakout is east or west of La Plateform.

Coordinates of the other communities that I found in the area:

West of LaPlateform: 19° 37 37.22 N, 73° 18 54.42 W
East of LaPlateform 19° 38 43.82 N, 73° 24 25.04 W
East, east of La Plateform 19° 39 13.22 N, 73° 25 09.60 W

Re: Emergency RFA: JanMakout, Bombardopoulis

Update from the same partner:

"I have now talked to Chandra from IMC. They will visit again and reassess and are aware of situation. They said that some of the volume may be due to difficulties discharging treated patients and lack of housing for accompanying people.

IOM will work on providing nonmedical WASH supplies, ringers, and perhaps contract a boat or truck for ambulance."

From an HEAS partner:

In consultation with IOM directors Port au Paix and GNV, and MSPP in Bombardopoulis and Baie de Herne, IOM Anse Rouge sent a team on a 4 day factfinding and cholera education/NFI distribution trip to JanMakout and Platform, isolated coastal communities of the commune Bombardopoulis. In JanMakout they found a crisis situation characterized as follows:

A makeshift CTU in a school tent presently with 34 cases
One auxiliary is entire medical staff, with some volunteers
Multiple members of families at the CTU often sharing same cot or floor space. Uninfected children in same space.
General state of fear in community including fear of fishing in the bay, cancellation of school, some houses abandoned, volunteers fearing to handle patients
Ringers supply down to 4 to 6 cases. Catheters limited. Minimal chlorine products.
No phone or electronic communication. Physician for commune visits occasionally but is overwhelmed at Bombard hospital.
Current drinking water source brackish surface pool.
IOM visited patients, visited 750 people in homes for sensibilization, and distributed soap, aquatabs and ORS.

Contacts in area: wife of auxiliary Innivais Davilus 3879-6661, 3624-8929
Mayor: Norvilus Camwens 3794 6008
Dr. Leandre Moise: 3801 5577

Note: Both IMC and the Cuban brigade have visited this community recently

Services offered: Medical, Facility, Cholera, Rehydration Center (CTU or UTC)
Campaigns: 2010 /2011 Haiti Cholera Epidemic; Cuban Medical Brigade (BMC); United Nations – IOM (Internal Office of

Migration)
