Haiti

Bercy Clinic – "CTC – CHOLERA TREATMENT CENTER" (Supported by: Samaritan's Purse)

Medical Facility · Open

GPS Coord: 18°46.025' N 72°27.894' W; (Confirmed by Samaritan's Purse), Bercy

Hours 24/7
Service Temporary

LTEL 1/29/11:

Commune was corrected 1/8/11 by LPar – It is NOT "Fonds des Blancs" as reflected on the PAHO/MSPP list.

Sam's Purse posted corrections on HEAS dated 1–6–11 – this site is called "Bercy Clinic" and they provided corrected GPS coordinates, bed capacity of "50 expandable to 100".

This site is designated as a "CTC" per the PAHO list dated 11/19/10

CTC Definition:

Center for the treatment of Cholera (CTC): a center set up for the treatment of cholera with a staff recruited for this 40 to 300 beds which receives the sick suspects of cholera. In the case ideal, there are tents for rehydration iv and tents or rooms for the phase of re–convalescensce. Capable of processing of complications such as pulmonary edema. Open 24 on 24/ 7 on 7. Receives the sick who come spontaneously and cases referred to it.

CTC CONTACT:

Tom Wood
TEWood @ samaritan.org

Betsy Hall:
BLHall @ samaritan.org

11/19/10 email from Tom Wood/Sam's Purse: Bed Capacity is now 185 & we are at capacity

Email from Tom Wood: 11/11/10
Increased beds to 75 because of need.

Posted on HEAS 11/10/10

For addition to the register of available CTC's, Samaritan's Purse has a 40 bed CTC in full operation in Bercy, Haiti. All beds full and adding more. Patients presenting for treatment are predominately children. We would like to get this facility added to the CTC list. Also, in addition to the 100 bed facility in Cite Soleil that is already registered, we opened a rehydration center on Ruelle Odiede, Pont Rouge, Cite Soleil Commune today. This facility will receive and rehydrate patients transferring those requiring treatment beyond one day on IV's on to a local CTC.
In Him, Tom Wood

4/22/11 MEDICAL FACILITY - CHOLERA QUESTIONNAIRE

Facility TYPE/NAME: Centre Sante de la Grace de Bon Samaritain, Cazale or Cazale Cholera House

Principal Contacts (Name, Email & Phone #): Lori Moise, RN, lori @ realhopeforhaiti.org, 3782–7316

On the ground contact (Name, Email & Phone#): same as above
(Languages spoken by ground contact):english, kreyol

Supporting Organization(s)& their contact (eg. MSPP, MSF, MTI? etc.): Real Hope For Haiti

Facility Location:

Department:Ouest
Commune: Cabaret
Village/Town:Cazale
Street Address and/or directions/GPS coordinates: by the Catholic church

Days per week clinic/hosp. is open? 24/7

If you have not seen any cholera patients, do you have:

a) Educational Materials: yes
b) ORS or ingredients to make your own: yes
c) IV Ringers and supplies yes

Has your staff received any training for Cholera?: yes (from me and Samaritain's Purse)

Is your community receiving education on Cholera prevention?: yes

If you are not a CTC, how will patients get access to the nearest CTC? Bercy, by tap–tap, moto How far away is it? 45 min drive

Date began treating Cholera patients?: Nov 9, 2010
Total number of patients since that date: 1285
Total number of fatalities since that date: 5 inpt, 2 DOA
Number of Cholera patients in the last week?:79
Number of fatalities in the last week? 0
Has number of Cholera patients stabilized or is it fluctuating?: fluctuating
Number of non–cholera patients last week? 500

Bed Capacity for the entire hospital? Nutrition center – 70
Bed Capacity for Cholera patients?: 25
Bed Capacity for non–Cholera patients? Nutrition center – 70
Have you established an Isolation Unit for Cholera patients? Please describe it (indoor/outdoor, tent, cots, patients on floor, etc): all cholera ptsall in one house

What is the population of the area your facility serves: have served 109,000+ pts since opening in 1998

How many patients did you normally average in a month, BEFORE Cholera patients started arriving:clinic 3500, nutrition center – 65

Closest CTC or CTU to your facility (Please provide location): Samaritan's Purse, Bercy

How far do Cholera patients have to travel to receive treatment at your facility?: up to 6 hr walk

Average number of Cholera patients that require inpatient treatment/IV Fluids?: not sure, would have to calculate, under 60%

Medical Staffing (How many Doctors, Nurses, Non Medical Staff on hand)?: nurses (or ppl smart enough to put in IVs/give meds, not nurses, but I trained them for cholera) - 5
Education – 1
Helpers - 6
Wash - 1

Runner btwn clinic/depot and cholera house – 2
Gate/security – 3
12 hour shifts

Medical Staffing needs?:I like to hire staff from the area. Education of staff or new staff that will be hired in the future would be helpful.

Does your Facility provide Mobile Medical Clinics to the community?: no
How often?

Describe accessibility to your site (e.g. Passable roads? Helicopter Landing Pad or spot? Airstrip for small planes? Please provide conditions for air landings and GPS coordinates): have road – about 20 min from Cabaret, not sure of coordinates

What is your water source?: river, capped source
Is your water purified?yes
If so, through a holding tank or through buckets?Tanks (10,000gal/day)

Can you pick up supplies?: yes

Medical Supply needs (List by PRIORITY please): diapers (child and adult), 24angiocaths,zithromaxsusp, hygiene kits, gloves,bleach or HTH

Additional comments: We get lots of supplies from Christian Aid Ministries. They will be bringing IV fluid and other supplies on Tues. We are pushing our limits right now, but I'm not panicked or nervous. The only thing that we are totally out of is kid's diaper, but cutting adult ones and pinning them. Our 24g angios are getting low too.

7:10 PM PST from Real Hope for Haiti's facebook page:

Cholera: final count for the day was 20 new pts. 26 spending the night here. Please pray for strength for our staff, quick healing for our patients, and open ears for education for everyone.

10:40 a.m. from Real Hope for Haiti's facebook page:

"no more room in cholera house. setting up extra cots. kids sharing cots with adults. starting to refer incoming pts to a larger cholera hospital in another town"

LTEL emailed Lori Moise and Dr. Jen Halverson for update to see if any supplies are needed at this time.

PRESS RELEASE: Thursday, January 28, 2010

Earthquake Victims Need Continued Medical Attention

Global Outreach continues to move medical supplies, food, tents, and medical teams into Haiti. Wednesday night, shortly after 10 PM, a medical team out of Mississippi and Kentucky returned as a medical team out of Chattanooga, Tennessee, went in.

David Vance, nurse–anesthetist of Tupelo, Mississippi, returned today after two weeks in Haiti. David shared that the extreme urgent care seems to be slightly diminishing; however, there remains a considerable need for follow up medical care to treat patients who had amputation of limbs, open wounds, treat infectious disease, and they continue to see large numbers of burn victims.

Volunteer teams continue to share, as we've seen on news outlets, that there is a tremendous job ahead to rebuild Haiti. Our Global Outreach Haiti missionaries have begun to see some shops opening, food shops, markets, and hardware.

Our newest missionaries to Haiti, Joe and Linda Sullivan, arrived in Haiti this week and immediately immersed themselves in the ministry. Our staff asked that we pray that they will be able to get donated goods through Haitian customs clearance without too much delay.

Message from Judy Heady The days continue to be long and busy on the "Oasis in the Desert" compound. Many of the ministries that are staging out of our compound are beginning to receive the equipment and supplies to minister to the needs of the people. I heard the other day that 300,000 rolls of plastic have been given out. Lots of food is being distributed. Yesterday David located a few warehouses that had food supplies for sale. He has also been able to take a filming crew out to film much of the devastation. The branch bank that we use is finally open and we are able to do our normal banking transactions. Haitian people are so resilient. They have the ability to pick up and go on with their lives . . . even with the little that they have. Please continue to pray for them. Pray for our staff on the ground in Haiti. They are growing weary with the heavy load they've carried for the last few weeks.

From the Brumley's . . . Hi Everyone, It's hard to know where to start with this update – so much has happened in the last week. We are so thankful for all your prayers and encouragement. It means so much to us. We are tired, and at times frustrated by so many logistical details, but we are encouraged by the progress we are making and, prayerfully, the difference we are making in our community here. The aftershocks have greatly diminished. We don't think we have felt one now in 3 days or so. That is a wonderful blessing!! Please pray that none return again – it strikes so much fear in everyone when they happen. We attended a church service a short ways from us this morning and it was standing room only. So many are coming to churches and people want to hear about hope and they are open to the gospel now more than ever. Our church in Ti Tanyen did their service outdoors again at 6 this morning and they said the whole area was full of people, many more than they could fit inside the church. The Lord is using their fear to return inside a building in His favor. We do pray that we can at some point soon start repairing these buildings, so the church and school facilities will be used again. We are still awaiting a structural engineer to check out all our buildings, so we know what work will need to be done both on our own compound and also our buildings off the compound. We are continuing with the medical care at the clinic and it is manageable now with cases usually done by 11 or 11:30 each day. There are 4 of us working in there every morning (Susan Bruns and Sheryl, one Haitian nurse, and Mme. Frank, our helper) and occasionally other doctors/allied health people join us as well. We are still treating the 5 men burned from the flour mill and they are all improving. We are starting to treat skin infections, eye irritations, coughs and colds now from everyone sleeping outside on the ground and the wind blowing dust every night. We have hygiene kits that we are giving out to each family (soap, toothpaste, toothbrushes, shampoo, etc.) to help them with cleanliness. While we are not doing food distribution directly from the clinic (more about that later), we are keeping stashes of granola bars, peanut butter, etc, so we can give at least a little to those who come because they are hungry, not sick. We have been able to set up a system of food distribution in our village of Ti Tanyen, whereby the community has been divided into 4 quadrants and we have 3 people responsible in each quadrant plus people helping them and we have taken the big sacks of rice, beans, and cornmeal over to the Kindergarten and some of our teachers and leaders in the church bagged up everything we sent and distributed it to as many families as possible in each quadrant. David Heady had our school director and some others do an informal census of Ti Tanyen before we started this, and we have come up with about 6000 people that now live there. (When we moved here 7 years ago, it was about 2000 or so.) We will work with Samaritan's Purse to continue this distribution so we can keep feeding them for some time to come. We will also be able to do another large tarp distribution to several communities to replace the sheets that people have used to build shelters. Some organizations are passing out tents (mostly in Port–au–Prince where the damage is much worse) and we wish we had some, but tarps are the next best thing. The basketball court that was almost completed is now a helicopter pad and hanger for the Samaritan's Purse helicopter. Some day it will be completely finished and used to play basketball, but for now it's a helipad. Chris and his crew will finish the one last section on Tuesday to complete the cement base of the court, so the helicopter can be wheeled in and out of the hanger with ease. Our campus is home to
several displaced Haitian families, about 60 members of Samaritan's Purse, a group of Friendship International people that will be setting up tents and camping here, a missionary group out of the Dominican that are also camping here and using our space as a drop–off and storage area for fuel and food distribution to ministries in Port–au–Prince, two different medical organizations that are coming in for 7 to10–day stays and both groups are committed long–term. As one in each group rotates out, another rotates in. Josh says it feels like we are on an extended mission trip and in one sense we have lost that "Oasis in the Desert" that we had here, but we know the compound is being used to fulfill His purpose

HUMAN RESOURCES: multiple teams, Neurosurgeon

PARTNERSHIP: Convoy of Hope, Window of Hope, Haiti One, 40 org on ground

FROM THE SITE:

Since January 12th, 2010 we have:

* Delivered over 2 million meals
* Treated over 2,000 patients
* Provided rescue and medical teams
* Handed out over 1,000 tents

Mission of Hope has been in Haiti since 1998, and we plan on staying. We need your donations and support to help rebuild Haiti, and provide hope.

Currently, the Hospital of Hope consists of an outpatient clinic, mobile clinic, prosthetics lab, and a community health program. We are also in the process of expanding the hospital facility, which will allow us to have a surgical unit and 24 hour emergency room.

Clinic of Hope
At the Clinic of Hope we typically treat between 70–100 people each day. Daily our medical team of Haitian doctors, pharmacists, lab techs, and nurses are there to serve the people of Haiti. We are able to provide quality medical and dental care to many unreached communities that have no other access. We also operate one of the only ambulances in Haiti, which expands our ability to serve, particularly in trauma situations. The clinic is equipped with a pharmacy, lab, dentist facility, urgent care center, and operating room.

Common illnesses that are treated at the clinic are malnutrition, malaria, anemia, gastritis, and high blood pressure to list a few. There are many that have injuries and open sores that if not treated could cost them their lives. Daily the Clinic of Hope staff members are saving lives that would have been lost without their help.

Mobile Clinic
Many people that are in Haiti are unable to travel to the Clinic of Hope due to distance, sickness, and/or finances. With our mobile teams we are taking the clinic to them, by leading teams into the mountains and remote areas.

Prosthetics Lab
After the devastating earthquake in 2010, Mission of Hope began a prosthetics lab to help the many amputees throughout Haiti. At this facility, patients receive prosthetic limbs as well as much needed physiotherapy. To learn more, please visit our prosthetics page.

Community Health Program
The goal of the community health program is to educate Haitian communities about healthcare. Many community health sessions focus on proper hygiene methods, to help prevent the spread of sickness and disease. Doctors and nurses also teach simple home treatments for minor health issues, as well as educate the community on which symptoms require advanced medical attention.

Services offered: Camping Supplies, Tents; Demographic Served: Children; Demographic Served: Survivors, Natural Disaster Impacted Communities; Demographic Served: Vulnerable & Marginalized Populations; Distribution * (ANY/ALL Types); Distribution, Supplies, Local Distribution of Supplies; Donations, Disaster Fund; Facility, Childrens Home (For Orphaned Children); First Responder, Carribean Region; Food * (ANY/ALL Types); Food Distribution, Emergency/Disaster Food Distribution; Information Resource * (ANY/ALL Types); Information Resource, Online Networking, Facebook Page/Group; Information Resource, Online Networking, Twitter Page/Twitter Feeds; Meals * (ANY/ALL Types) ; Medical, Education, Health Awareness; Medical, Facility, Clinic, Field Clinic (Tent); Medical, Facility, Clinic, Mobile Field Medical Clinic; Medical, Facility, Clinic, Outpatient Clinic; Medical, Facility, Hospital, Field Hospital; Medical, Services, Ambulance Services; Medical, Services, Rehabilitation, Physical Therapy; Medical, Services, Rehabilitation, Prosthetics & Orthotics Workshops; Medical, Services, Rehabilitation (Trauma/Amputee Patients); Medical, Volunteer, General, Medical Volunteer Services; Medical, Volunteer, Medical Missionary Teams; Medical, Volunteer, Surgical Volunteer Services; School, Mission School; Services, Church/Worship Services; Sponsorship Program, Children (Education/Health Care/Food, etc.)
