They are asking for Haiti donations and there is a donation collection site in Durham, NC

Attention healthcare providers –
Home Page –

We expect to send more medical relief teams to Haiti. Please contact us with your personal details if you wish to be emailed when a team is coming together.

In the meantime, Ashley Aakeson aaakesson @cnphaiti.org of the Children's Nutrition Program in Leogane, Haiti, has agreed to be the contact person for organizing teams to the Leogane community for people who want to travel to Haiti immediately. We encourage you to contact her.

You can also sign up via https://www.servnc.org/ and go with a Duke University or another team that is assembled for a particular purpose. Read more about Duke plans at Duke.edu/haiti

Medical Relief Teams to the Blanchard Clinic

Five teams worked at the Blanchard Clinic beginning January 31st and continuing through April 2. Fifty–eight volunteers served over 3500 patients.

The teams included 21 doctors and 10 nurses from across the US. Twenty–one other volunteers from varied backgrounds provided support.

Each volunteer paid their own way and slept on the floor of Family Health Ministries' Blanchard Clinic, near the Port–au–Prince airport. Fortunately, the two–story clinic was not damaged in the quake.

While many of the volunteers were seasoned providers, some of the teams had members who had never been to Haiti. In addition absorbing scenes of the devastation caused by the earthquake, the team members had to adjust to the heat and humidity and the challenging living conditions.

Services offered: Demographic Served: Survivors, Natural Disaster Impacted Communities; Information Resource * (ANY/ALL Types); Information Resource, Online Networking, Blog; Medical, Services, Medical Care * (ANY/ALL Types); Medical, Services, Primary Care; Medical, Services, Public Health Education / Awareness; Medical, Volunteer, First Response, Volunteer Services * (ANY/ALL Types); Medical, Volunteer, General, Medical Volunteer Services

Nazarene Clinic – "CTU (UTC) – CHOLERA TREATMENT UNIT" (Supported by: Samaritan's Purse)

Medical Facility · Open

Ruelle Odiede, Pont Rouge; 18°35'18.14" N 72°19'31.81"W; GPS Coord. Confirmed by Samaritan's Purse; 18°33.770' N 72°20.294' W, Cite Soleil

Hours 12 Hours Daily
Service Temporary

On 1/6/11 Sam's Purse posted an update on their Cholera facilities correcting the PAHO list documentation on the HEAS. This site is a CTU/UTC (not a "CRO"), has a bed capacity of 20, and is called "Nazarene Clinic". The corrected GPS coordinates were also added.

ON THE PAHO/HEALTH CLUSTER 11/19/10 LIST AS A 'CRO':

CRO DEFINITION:

A center of oral rehydration (CRO) with staff non–medical in a neighborhood or camp : made the rehydrating oral and decontamination. Need for staff minimum 3 persons, including one for ensuring decontamination. Need to organise the home visit of the sick and the IEC to the community.

CONTACT:

Betsy Hall:
BLHall @ samaritan.org

SOURCE: 11/27/10 Health Cluster Bulletin #5

Samaritan's Purse's Nazarene Rehydration Center in Cite Soleil is also serving as a training center for medical staff. At least 110 Haitian doctors and nurses have been trained in cholera treatment at the center. Construction of a new 200–bed CTC in Cite Soleil has been completed. Medical and administrative staff are preparing to begin receiving patients early next week.

Email dated 11/19/10 from Tom Wood/Sam's Purse:

* Name of facility for your CRO Pont Rouge?
Nazarene Cholera Treatment Unit, Pont Rouge Open with 20 IV beds and 80 ORS stations
* Address or GPS Coords if available? 18°35'18.14" N 72°19'31.81"W

Per Samaritan's Purse 11/11/10:

The Rehydration Center designation used by Samaritan's Purse is for those centers not in operation overnight. Rehydration is started IV and/or ORS and the patient observed. When rehydration is adequate to assure the safe discharge of the patient, they are provided a supply of ORS and released. Those patients requiring continuing care overnight are then transported to a full CTC for admission. The Rehydration Center is open 12 hours daily.

A Cholera patients care is provided under the supervision of a medical provider. One physician over 5–6 nurses who each supervise 2 medical assistants.

For now we have adequate staff and a JIT supply line.

HEAS Post 11/11/10

For addition to the register of available CTC's, Samaritan's Purse has a 40 bed CTC in full operation in Bercy, Haiti. All beds full and adding more. Patients presenting for treatment are predominately children. We would like to get this facility added to the CTC list. Also, in addition to the 100 bed facility in Cite Soleil that is already registered, we opened a rehydration center on Ruelle Odiede, Pont Rouge, Cite Soleil Commune today. This facility will receive and rehydrate patients transferring those requiring treatment beyond one day on IV's on to a local CTC.

11/10/10: MSF treating increasing number of suspected cholera cases in Port–au–Prince, Haiti

EXCERPT: "At all of MSF's own four facilities in Port–au–Prince, teams have treated an increasing number of suspected cases since Saturday, November 6. These facilities have more than 300 beds already set aside for treatment in cholera treatment centers (CTCs). MSF is currently constructing an additional 320–bed CTC in the Sarthe neighborhood, where the organization already maintains a post–operative care facility".

SOURCE: http://www.doctorswithoutborders.org/news/article.cfm?id=4474&cat=field–news

MSF Activities as of May 2010:

Sarthe: In February, MSF opened a new post–operative center in a converted soft drink factory in the Sarthe area of Port–au–Prince, with a potential capacity of up to 300 beds. 160 patients are receiving post–operative care – wound care, more specialized orthopedic or reconstructive surgery – in this structure. Handicap International physiotherapists are working in collaboration with MSF to optimize rehabilitation and patient adaptation to prosthetics. Mental health care is also provided. In addition, there are also 100 external consultations per week for post–operative care.

We haven't implement yet Ambulance Services in these communes. We have implement first aid program and training to receive the Ambulances and implement an Ambulance Services and also (National Emergency Rescue Network– NERN). We asking for help (equipments, materials, grants) to facilitate our actions to be more effective. As we know the land and have great cooperation with the civil society , groups and organizations in these regions it is more profitable for us to implement development programs to help those people. As the epidemic cholera is running fast where there are no infrastructure(rural, province comunity) we pledge for help and scale up funding also in the Grand'Anse.

We want also to note that these areas are the most vulnerable beyond the others where we don't yet have programs.

Working in the following towns:

OUEST DEPARTMENT: Croix des Bouquet,Delmas, Carrefour, Gressier,Leogane

2/9/10 Emailed current list of Urgent Needs from Rebecca Hackworth (on the ground in Haiti on site):

Hello Leslie,

Good to hear from you, I brought your list to Gladys Thomas here at the Foundation for the Children of Haiti to make sure she knew about the resources you mentioned to us. Yes, I'm still in Haiti working.

Gladys said she could use about 200 tents. We have patients ready to discharge from the hospital who are homeless. There are also many of our staff without homes here in Haiti.

We are getting some donation of food but cannot seem to get any powdered milk or sugar so those things are needed.

Soy formula for the babies is also needed.

Diapers we are using here on the pediatric unit and actually we need them in all sizes for many of the patients who are not ambulatory yet.

We could use some gently used clothing for babies, children and adults in good condition but this would probably be at the bottom of our needs list - we could use some for the patients we are discharging without anything.

We are looking for mattresses (twin size) for the hospital, flat sheets all sizes, towels and washcloths

Hygiene items like toothbrushes, toothpaste and soap, shampoo, etc. to send out with patients leaving as well.

Those are some, and we are keeping our list of needs updated on our website too at www.usfch.org

Bless you in your work, Leslie!

Rebecca

1/28/10 LTel: Spoke to Rebecca Hackworth w/Haiti Home for Children to gather needs/status assessment.....

–Supply needs on the site are only a few days old & accurate
–3 orphanages on site (55 older kids – 40 younger – 40 special needs from babies to adults) – Total number of children is 135 + staffers
–School on site
–Childrens Hospital on site fully staffed – Accepting injuries from the community – all ages
–Provided detailed food list – they had enough groceries for a week just before the quake – they are running low and supplies are very hard to come by
–Rebecca will be on the ground in Haiti in 2 days and will stay for 5 days – email contact only or contact stateside (see internal contact info)
–Earthquake damage – The older children's bldg. is unsafe and a wall came down – this is why they need the grout to shore it back up safely
–This is a secure site – The PaP Haitian Police are guarding the hospital and the U.S. Military has offered additional security details
–Medical supplies and food remain the most ongoing urgent need
–Rebuilding needs to take place with haste due to hurricane season coming in 5 mos.
–They are anxious to hook into an ongoing supply delivery if it becomes available
–Stateside donation collections of supplies is slowly trickling in – they can use the support to continue to ship in supplies if they cannot be secured on the ground
–This operation was rated in the TOP TWO with rave approval rate from UNICEF – They only granted this rating to two orphanages in the entire country
–96% of donations go directly to Haiti relief

1/27/10 LTel: This site will be visited by Michael Andrew's list shortly for status/needs assessment.

NEEDS LIST FROM WEBSITE: http://www.usfch.org/medical_list.htm

Your contributions of money will be used to purchase the following items. Go to the site to DONATE for these supplies or If you have these items to donate,
let us know by e–mail and send them to:

Haiti Home for Children is a safe, clean, Christian based orphanage for up to ninety children ages two to fourteen. The children live in family groups of ten to twelve, divided by age and gender, with a Momma who sees to their physical, emotional, social, and spiritual needs. Each apartment has a kitchen, dining room, bathrooms and one or more bedrooms. Not only do the children find security and stability in eating and sleeping together, they study, play, and worship as a family group.

After completing elementary education, children who have extended families leave Haiti Home. Those who have no known family are allowed to stay, helping with the younger children and continuing their educations.

FONDATION POUR LES ENFANTS D'HAITI

Fondation pour les Enfants d'Haiti (FEH) is a non–profit organization established in Haiti in 1989 to continue the work begun earlier in the 1980's under the name of Caribbean View Home for Children. FEH is managed and directed by Haitians, people who know best the needs of the children of their country and how to work within that country. It's Board of Directors is comprised of volunteers dedicated to serving children through FEH.

Fondation pour les Enfants d'Haiti is founded in the teachings of the Christian church. Jesus is our guide and God is our Master.

All who seek to better the lives of children in Haiti are invited to foster the work of FEH either directly or through support organizations in the United States (United States Foundation for the Children of Haiti) or in Canada (Canadian Foundation for the Children of Haiti).

POSTED ON HEAS – November 9, 2010 3:39 PM

We have now 2 more patients who have rapid tested positive for cholera 01 at Hospital Bernard Mevs. One is 41 year old woman who lives in Salt in La Plain in a house, also has not travelled outside of her area in over a year. The other is a 33 year old woman who lives in a tent city not 10 minutes from Hospital Bernard Mevs that is called Cite Renord. Her water source is apparently a communal water source; she also has not traveled. This water source in this tent city should likely be investigated.

We have one gentleman who rapid tested negative, but the diarrhea is just copious amounts of water. We will bring all specimans to the National lab for verification as per their protocol.

Toni Eyssallenne, MD, PhD
Chief Medical Officer Hospital Bernard Mevs/Project Medishare

POSTED ON HEAS 11/8/10:

Just wanted to report that I have received confirmation of a case of cholera here in Port au Prince at Hospital Bernard Mevs. The case is as follows:

3 year old boy with nausea, vomiting and diarrhea for less than one day (he was brought the same day his symptoms started). The physicians that cared for him described him as severely dehydrated and gave him IV fluids and doxycycline. He rehydrated well overnight and they continued with oral rehydration and he was sent home with oral rehydration and hygeine instructions. The stool was watery grey. Since it was our first credible case, we took the sample to the national lab on Delmas 33 and I received the report today that the stool was culture positive for vibrio cholerae 01. I called the patient's father and he said he is much better although he has not regained his appetite. He presented on 10/31/10, he is from a tent city near Route Batiment across the street from a place that sells macaroni. They have not travelled in over a year and have had no contact with anyone from the Artibonite region or St. Marc.

Strictly outpatient– no cholera beds– stabalizes and transfers out cholera pts.

Community is receiving education on Cholera prevention
Source of Water: WATER TANK FROM HAITI WATER INTERNATIONAL – purified
Electricity and internet power from generator

Volunteer
http://haiticlinic.org/how–to–help/volunteering/

Our clinics are located in Cite Soleil – a slum on the outskirts of Port au Prince. We depend on the help of volunteers like you to help treat patients in dire need of medical attention. For over 2 years, we have brought Doctors, Mid–level providers, Paramedics, Pharmacists, Nurses and non–medical support staff to this poverty–stricken village and its nearly 300,000 residents – providing basic, emergency, and preventative care.

We work closely with our Haitian partners to ensure that our volunteers are taken care of properly while in Cite Soleil. We stay together at a local hotel (meeting basic American standards) and our partners provide us with translators, patient intake functionality, and safety and security precautions.

This type of volunteer work is a major contribution and an absolutely vital component to our cause. However it is not without cost. Team members donate not only their time and effort but also pay for their travel, lodging and food expenses. The cost for one weekend is approximately $700 and team members are encouraged to keep receipts of these costs for tax purposes. This may seem costly, but the help it brings is priceless.

For more information on volunteering at one of our clinics in Cite Soleil, download our Volunteer Information packet.

VISIT website for more details.
