Clinic Eau De Vie: Imminent cancellation of Request For Assistance
Saturday, January 15, 2011 6:37 AM
From: "James Wilson"
To: "Michael Martin"
Cc: Capbham @ aol.com, mnstuffy @ yahoo.com, leslie @ citizenactionteam.org

Hi Mike,

I noticed Carol Stufflebeam is copied on your communique… she had submitted a Request For Assistance for Clinic Eau De Vie on 1/8 that did not contain enough information for us to be able to act on the request. Several requests for clarification have gone unanswered, and we will close out her request Monday COB if she does not respond.

Do you know anything about this site and whether there is a true need?

Cheers,
Jim

1/13/11 Email from Dr. Mike Martin
International Faith Missions, Love–A–Child, Christ pour Tous (Haitian Christian Mission), Foundation for Peace, and World Vision are working together to operate and fund the 1 COC / CTC in Fond Parisien on International Faith Missions property in the hospital known as Centre Hospitalier Eau de Vie.

1/13/11 Email from Carole Stufflebeam

Love A Child, in Collaboration with two other clinics, L'Eau De Vie and Chris Pour Tous are working in collaboration with World Vision in order to provide both a COC and CTC. We are in Fond Parisien but the CTC/COC is located at L'Eau De Vie in LaSous. Mike Martin Director of L'Eau De Vie would be the person to speak to as we are the distributors to see that it happens and Mike is the Director of al the functions of the CTC.

It is right off the main highway to the Dominican. It is open and staffed 24 X 7.
Staffing: MSPP Cholera Coordinator for Fond Parisien area (Generalist/ Pediatrician/ LAC Medical Director)
2 Doctors
24 nurses
4 house keeping
1 Laundry
4 Ambulance Driver
3 ORS attendees
2 Central Supply
1 Administrator
1 Health Management Officer
16 Health Agents
Supply needs are gowns and ORS
Community classes held by Health Agents through out the zone

Opened Nov 15th
Total received 2300

1/4/10 Email from Love A Child/Carole Stufflebeam to HEAS:

I am e–mailing on behalf of the CTC lactated in MalPasse at Clinic Eau De Vie. We are MSPP designated and have 3 local clinics in the zone working in coordination to make this happen. Our Love A Child organization is responsible for the supplies required and we have needs in order to keep it going. We are currently seeing approx 60 patients a day, of which approx 75% have to be admitted, and can not keep up with the need for ORS. We would like to register to be informed by your organization of the current situation and the contacts for getting the needs met for the CTC.

We have a very limited number of cots (30) and the plastic to put on the cots. We have had to put patients on the floor to make space for them.

Our biggest needs are as listed:

ORS
Cots
Plastic
Ango Caths 18G, 22 G and 24G
IV tubing
L/R
Hand Sanitizer
Laundry Soap
Gowns for the staff

Services offered: Medical, Facility, Capacity, Hospital Beds; Medical, Facility, Cholera, Cholera Treatment Center (CTC); Medical, Facility, Clinic, Outpatient Clinic; Medical, Services, Cholera Treatment

With hospitals collapsed throughout Port–au–Prince and scarce supplies, medical care is of urgent concern throughout Haiti. Many injured Haitians are being transported to the Jesus Healing Center, a medical facility we support through Love A Child, in Fond Parisien, approximately 30 minutes from Port–au–Prince.

Ways You Can Help:

Pray fervently for everyone affected by the earthquake
Donate financially. By supporting financially you can bring immediate relief to those suffering.
Donate medical supplies. You will find a list of the most needed items and how you can help provide them.

Supplies and Doctors Arrive Safely
Our medical missions' staff has been working tirelessly to secure relief for this facility. After many hours of phone calls and coordination, we've shipped 19,000 pounds of medical supplies to Miami, en route to Haiti—including a portable X–ray machine.

A thank you from Sherry Burnette, cofounder of Love A Child.On Tuesday, January 19, we sent 3 orthopedic surgeons, an emergency room physician, a Love A Child staff member and 904 pounds of the 19,000 total pounds of medical supplies to help with the efforts following the deadly earthquake in Haiti.

The 3 orthopedic surgeons have already begun performing surgeries at a hospital in the Dominican Republic, near the Haiti border. The ER physician is treating patients at the Jesus Healing Center, and referring those who need surgery to the hospital in the Dominican Republic.

A special thank you to Major League Baseball players Pedro Martinez and Juan Guzman, and their wives, Carolina Martinez and Ana Guzman, as well as Hammond and Associates for all their help. Their support was instrumental and critical to getting the relief in place.

Other Relief Efforts
All of the grocery stores are collapsed as well, leaving people desperate for food and water. Love A Child staff members are

taking disaster sacks into the city to distribute. Each sack contains clothing, food, toiletries, and other items to help the homeless and hungry.

We're also supporting the relief efforts of Convoy of Hope, which is currently distributing food and water.

"The situation regarding food and water remains dire," says Kevin Rose, Haiti director for Convoy of Hope. "The lack of fuel and security issues has made it very difficult to move food around the city. But through our network of partners, we are getting food into some of the most desperate places."

Get Involved: Immediate Supplies Needed for Haiti Relief
We have all been stunned by this disaster in Haiti. But thankfully, if we all do our part, we can help in a big way. Love A Child, our ministry partner in Haiti, is caring for those injured in the recent earthquake and are in desperate need of medications, medical supplies and other miscellaneous items.

This is your opportunity to get involved. Come together with your family, office or church and send as many items as soon as possible. No donation is too small. Every little bit helps.

Because many of the hospitals collapsed during the earthquake, Love A Child is treating patients 24 hours a day at the Jesus Healing Center.

Thank you for your support. And please, don't forget to pray for everyone who has been affected by this disaster.

Most Urgent Needs:

Large 5 gallon buckets with lids
Blankets
Sheets – used or new
Mats to lay on
Drapes
Bottled water
Non–perishable foods
Sandals or flip–flops
Toiletry sacks (containing a washcloth, soap, tooth brush, tooth paste, deodorant)
Large T–shirts
Small tents
Gauze – any size, but preferably 4X4
Dressings – sterile and unsterile
(Coban, Tegaderm, Steri–strip, Surgilast)
Sutures
Neosporin or triple antibiotic ointment
Ace bandages (or anything specifically for wound care)
Ibuprofen
Oral rehydration salts
Betadine wipes and sticks

Other Items Needed

Medications:

Diclofenac – (injection and oral)
Tylenol
Motrin
Multivitamins (children and adult)
Zantac
Benadryl
Hypertension medications
Blood pressure medications
Cough medications
Anti–diarrheal
Antibiotics
Lidocaine

Medical Supplies:
Alcohol pads
Band–Aids
Blades – sterile only
Bulb syringes, stub adapter; no loose/single units; spinal
needles
Casting supplies
Compression stockings

Gloves: all sizes, sterile/non–sterile
Gowns - (surgical and patient, head & shoe covers; goggles, masks)
IV supplies – tubing in sterile packages only
IV Serum
Needles - butterfly, angio catheter
Pediatric supplies
Scalpels
Splints - for legs, ankles and arms
Sponges – surgical only (includes X–ray detectable)
Surgical towels– cloth/paper
Syringes
Tape – all types
Thermometers
Tongue depressors

Mail supplies to:

Love A Child, Inc.

FROM THE SITE:

Cholera Epidemic
October 28, 2010

Most of you have heard by now about the cholera epidemic taking place in Haiti right now. The story first hit the news last Thursday when it was reported that 135 people had died. The number of deaths is now at almost 300.

Cholera is a bacterial infection of the small intestine that causes profuse watery diarrhea, vomiting and abdominal pain that can lead to rapid dehydration and death within a matter of hours if left untreated. The primary treatment is to give rehydration fluid orally or, if need be, intravenously. Antibiotics can shorten the duration of the illness and reduce fluid loss. It is transmitted through contaminated drinking water or food. Cholera has not been seen in Haiti for 50 years.

If you look at news reports today there are conflicting opinions on whether the epidemic is slowing down or just getting started, whether it's spreading or being contained. Whatever the case may be, we wanted to let you know how Haitian Christian Mission is being affected and how we are responding.

The epidemic began in the Artibonite Region about 60 miles north of Port–au–Prince. HCM has a church and school in La Croix Perisse, a village southeast of Gonaives and in the affected region. So far 35 people have died in La Croix, eight of whom were members of the HCM church. It has been reported to us that a thousand people are infected in that small village.

Fond Parisien is located several hours drive away from the center of the epidemic, but four suspected cases of cholera have been seen in the clinic. Betty Prophete and our Haitian physicians are doing all they can to prepare for a possible influx of patients with cholera in the Fond Parisien area. Dr. Patrick attended a meeting at the Ministry of Health today and is hoping to get medication from the Haitian government. Betty has been buying supplies in Port–au–Prince and has a tent prepared for quarantine. As is often the case with Betty, she is very busy but is staying positive and hopeful.

At the HCM schools and churches, teachers and preachers are educating the people in their communities about the disease and prevention. Preachers are also coming to Fond Parisien to get water purification tablets to distribute.

During the last two weeks teams from FAME have been staying busy in Fond Parisien and in mobile clinics. They are seeing a number of emergency cases. Future mission trips to Haiti are not being cancelled but those traveling to Haiti are advised to visit the CDC site.

We ask that you join us in praying for the people of Haiti and for those caring for the sick.

FROM THE SITE:

Christ For All Health Center

The HCM clinic, Christ For All Health Center, serves a population of 80,000 people who have very few other options for healthcare. The center, staffed with Haitian physicians, nurses, assistants and lab technicians operates a day clinic Monday through Friday. It remains open 24 hours a day to provide inpatient care and emergency services. A fully stocked pharmacy and a lab allow patients to get much of what they need all in one place. The clinic is frequented by visiting medical teams that at times provide more specialized care.

Formosa Obstetrics and Gynecology Center

The OB/GYN center, located next to the health center, was built in 2008 as a cooperative effort with Project Haiti Heart and the Taiwanese government. It contains a delivery room, consultation room, operating room, ten–bed patient room, sterlization room, storage space, bathrooms and showers. It was built so that C–sections and other life–saving surgeries could be performed on site rather than having to send patients to Port–au–Prince. While we do not yet have a Haitian physician who can perform these surgeries, visiting American surgicial teams have been able to use the facility to perform a variety of surgeries. What an incredible thing it is to now have one of the best operating rooms around stocked with all the necesary equipment and supplies! Haitian midwives and doctors deliver many babies in that building as well.

Mobile Clinics

When medical teams visit HCM they often hold mobile clinics in the various HCM churches through the countryside. The patients they see have no other healthcare available to them in their area. The teams take all their medication with them and often prepare to treat dozens of children for worms and scabies among other things. What a wonderful way to show the people of Haiti's far flung villages that we have not forgotten about them and we care about their wellbeing! Often teams take along bags of rice and other donations to give to the people.

The Future

Many of the dreams we have had regarding our medical work are now a reality thanks to the help and generosity of many individuals and organizations. We therefore have no reason to stop dreaming big. We are currently making plans to build a hospital on land we have purchased in Fond Parisien. Emergency services are a huge need there as we are located along a busy highway so we want to enhance our ability to meet those needs. We also want to be able to host more specialized foreign physicians and care for more sick patients. To meet another need that Haiti has, we also hope to incorporate a medical school in the facility.

(VOLUNTEER INFO) FROM THE SITE:

MISSION TRIPS:

About the Trips:

Taking a trip to Haiti is often a life–changing epxerience. The people that HCM ministers to are always blessed when we have mission teams visit us, but at the same time the team members end up reaping as much benefit from the experience as those they go to serve. The HCM guesthouse in Fond Parisien is a busy and exciting place to be and we welcome teams that are ready to work hard and share Christ's love with the Haitian people to come alongside us and help.

Mission Trip Basics:

The town of Fond Parisien is located about 45 minutes east the Port–au–Prince airport. It is there that the HCM guesthouse, the Plunkett House, is located. The living quarters are located above the mission clinic and can accomodate about 35 people at one time. The trip fees cover housing, all meals, transportation in Haiti, and interpreters.

Medical Mission Teams:

Teams made up of medical professionals can serve in the HCM clinic and hospital in Fond Parisien and can travel out to hold mobile clinics. We have been visited by family physicians, various specialists, surgeons, dentists and optometrists. Teams normally include enough support personnel to man the triage stations and pharmacy.

Construction Teams:

We have had teams help build homes, benches, mission buildings and more. Often the team works alongside Haitian workers.
Evangelistic Teams

Teams of all ages and sizes come to hold Vacation Bible Schools and seminars and to preach and teach in our churches and schools.

Trip Cost:

6 day trip = $350 plus airfare
10 day trip = $470 plus airfare

These fees cover the cost of all lodging, meals and transportation in Haiti as well as the costs for generator fuel and interpreters.

Partnered with FAME
Partnered with Project Haiti Heart to add an OB–GYN facility next to hospital

At the Ganthier health center in Bosquet, routine immunization against vaccine–preventable diseases continued Nov. 16, in conjunction with cholera education and treatment activities. PAHO/WHO staff and Health Ministry staff also distributed cholera posters and pamphlets, and trained health workers in cholera diagnosis and prevention at three health centers: Ganthier Center in Bosquet, Hospital Communautaire Christ pour Tous in Fond Parisien and “Love a Child” in Fond Parisien. This week marked the launching of Children’s Health Week in Haiti, in which health staff check routine immunization status and perform catch–up campaigns. Traditional midwives also received training in improved childbirth practices on this visit.

http://www.loveachild.com/blogs.php?id=journal&entry=cholera–spreading–through–villages

This Cholera Treatment Center is operated by the Mennonites at dlo lavie – Water of Life. They are our neighbors and we have been working closely with them. Now, they have outgrown their Cholera Center and it is time for Love A Child, World Vision, Dlo Lavie and one other clinic to come together to build a HUGE CHOLERA TREATMENT CENTER on this spot. The foundation for the new Center will be 35 feet X 110 feet and this new foundation for the HUGE CHOLERA TENT will need to be poured on Tuesday of this week to allow us all to get ready for the deluge of Cholera patients in this area.

(SEE SITE FOR complete blog report)

We have had a very hard time getting enough staff and supplies to care for the large number of victims. So far, we have examined over 1300 Cholera victims in just three weeks. With such a large number of patients, we are using on average every day the following: 8 IVs per person, 720 packages of re–hydration solution, 5 gallons of Clorox, plus IV needles and tubing.

We are in a terrible crisis and an extreme emergency situation. We desperately need more supplies and we need them quickly.

LOCATION: Fond Parisien

HUMAN RESOURCES: 20 physicians, 1 PT, 20 nurses, 1 OT

PARTNERSHIP: Love A Child

PROJECTED EXIT DATE: 01–Jun–10

FROM THE SITE:

In response to the Haiti earthquake disaster, the Harvard Humanitarian Initiative (HHI) is playing a lead role in supporting the coordination of the Harvard–wide response including that of the Harvard–affiliated hospitals within Partners Health Care System. By leveraging HHI's unique position as an academic and research center with long–standing ties to leading medical and public health personnel, HHI has been able to facilitate the deployment of more than 70 surgeons, emergency physicians, anesthesiologists and nurses to Haiti in the immediate aftermath of the earthquake.

Field emergency medical teams from Harvard hospitals are currently managing a post–operative field hospital at Fond Parisien on the Haiti–side of the border with the Dominican Republic. Harvard affiliated teams have performed hundreds of critical surgeries, and are working to meet the needs of thousands of injured survivors.

In addition to deploying medical and public health personnel and delivering plane loads of donated supplies, HHI is providing episodic situation updates detailing the Harvard–wide relief efforts. This includes tracking and reporting on all of the current activities of Brigham and Women's Hospital, Massachusetts General Hospital, Beth Israel Deaconess Medical Center, Children's Hospital, and others as they continue to support Partners in Health and the humanitarian relief effort on the ground in Haiti. This level of coordination is a powerful testimony to the solidarity of the Harvard system in support of Haiti and our partnering organizations providing relief to those who are in desperate need.

The HHI Fond Parisien Disaster Recovery Center:

The Harvard Humanitarian Initiative has taken a lead role in coordinating a large displacement center and medical compound in Fond Parisien on the Haiti side of the border with Dominican Republic. The project is managed in cooperation with several academic centers and the American Refugee Committee. The camp, started by Hilarie Cranmer and Stephanie Rosborough, was created to accommodate the several hundred injured Haitian earthquake victims who underwent surgery in the nearby Dominican Hospital in Jimani. The displacement camp provides a temporary home for over 1000 injured Haitian survivors and their families, and provides a high level of medical and rehabilitative support.

To read more about the camp, visit our Fond Parisien Disaster Recovery Center page:

http://www.hhi.harvard.edu/programs–and–research/earthquake–in–haiti/188–the–hhi–fond–parisien–rehabilitation–project

The Fond Parisien Disaster Recovery Center is staffed by a dedicated team of Hatiains and international volunteers. Volunteer teams of doctors, nurses, and administrators are a crucial aspect of the Haiti recovery effort.

To find out about volunteer opportunities with HHI at the Fond Parisien Disaster Recovery Center, please visit our Volunteer in Haiti page:

http://www.hhi.harvard.edu/programs–and–research/earthquake–in–haiti/volunteer–in–haiti

Who Should Apply to Volunteer?

HHI is looking for both clinical and non–clinical volunteers to staff the Fond Parisien Disaster Recovery Center. The requirements of volunteers differ according to each individual's credentials and disaster experience. Ideally, volunteers should commit to a minimum of two weeks service.

** In particular, our need for Creole–speaking health professionals is great. If you speak Kreyol, please make sure to indicate that on your volunteer form.

Clinical Volunteers:

Medical Doctor
Nurse & Nurse Practitioner
Physician Assistant
Physical Therapist
Medic
Pharmacist

Non–Clinical Volunteers:

Resident
Medical, Public Health Student
IT Professional
Supply Chain Specialist
Logistic & Operations Professional
Engineers

January 13, 2010
4:10pm – Sherry and Carole just came in from Port Au Prince with two truck loads of people who were trapped under buildings. Yesterday, just one hour before the earthquake shook Haiti, Sherry and Bobby were in one of the buildings that fell to the ground and killed everyone. Right now, the Jesus Healing Center medical staff is working in the clinic 24/7 to help the hurting people of Haiti. We thank Joyce Meyer Ministries – Hand of Hope for fully funding our Jesus Healing Center. Lives are being saved!

We just had another big after shock! Please Jesus let them stop!

Subject: needs for the border
Date: Dec 4, 2010 6:12 AM

dear Stuart

following our last communications on the net ..we have identified some urgent needs for the border area.. specifically where we have concentration of people, like around the market places in Malpasse, Ouanaminthe, Belladere, Tilori, Anse a Pitres,..

together with some instances of the ministry of health, we need to provide urgently to the population in those spots:

– aquatabs,
– chlore,
– buckets to distibute sanitized water in order for the people to wash their hands..
– give access to potable water {to the population in the surrounding areas as well}

best
