12/16/10 Phone call from Haiti – Pastor Francky Jeune:

CTU – Needs to be moved – They have a location secured but need the supplies – This clinic is in the middle of the village and the community outcry to move it is a big motivation to get Cholera exposure out of the central location of the village – 10 beds is not enough – The new location will have a 20+ bed capacity

Cholera Activity: 3 fatalities 12/15/10 / 3 fatalities 12/16/10 – Patient surge increasing daily // Catchment is 90,000 // Patients in the mountains are carried by stretcher 1–3 hours and are either DOA or too far gone to help by the time they reach the clinic.

Supply situation: Running out completely. MSPP has not given any support and not checking in on their needs // MSF in Jeremie has helped with very small amounts of supplies but can do no more as their own resources are stretched. There is no other organization assisting or present in this remote region.

1000 – Ringers Lactate – 1000
500 – Intracath Pour Les Moins De 5 Ans
Intracath for children under 5 years old
500 – Intracath Pour Les Plus De 5 Ans Intracath for Adults and children over 5 yrs old

Checks payable to St. Francis of Assisi Parish
Service Temporary

2/18/11: MSPP runs a CTU in a separate tent behind the clinic averaging 3–5 pts were reported during the present mission trip. It is run totally separate from the clinic.

This mission serves five weeks per year at the dispensary in Leon. The first week in October, and the first two weeks in February and June every year. Focus of mission is primary care. We see about 850 patients per week, have 6–7 physicians, have a laboratory and ultrasound. We have no surgical capability. We have no "specialty" capability. We are staff with Emergency and Family Physicians.

When the mission is not there, the Dispensaire is run by one nurse.

Water source is a deep moutain spring that has been piped in.
Only personal drinking water is purified through bucket system.

Gets supplies through PROMESS in Jeremie.

Services offered: Medical, Services, Laboratory / Lab Services; Medical, Services, Primary Care; Medical, Services, Ultrasonography; Medical, Services, Visiting Specialty Teams, Lab Services (clinical tests); Medical, Services, Visiting Specialty Teams, Primary Health
Campaigns: 2010 /2011 Haiti Cholera Epidemic; 2010 Haiti Earthquake; Catholic Church; MSPP (Haiti – Department of Public Health & Population
