In an effort to reduce the effects of the outbreak in hard-hit Artibonite Department located north of the Haitian capital, ADRA and the Seventh-day Adventist Church in Haiti are sending 10 Trekker mobile water purification units to help ease the demand for clean water in the area. Each mobile unit, which is powered by a motorcycle, can purify 63 gallons of water per hour.

Plans are also underway to distribute 30,000 water purification tablets and information flyers in four targeted zones in Artibonite, including the communities of St. Marc, Grande Saline, Marchand, and Verette.

Haiti: ADRA Intensifies Cholera Prevention Efforts Following Outbreak
Friday, October 29, 2010

SILVER SPRING, Md. – In the wake of a cholera outbreak in Haiti that has killed more than 300 people and sickened thousands, the Adventist Development and Relief Agency (ADRA) is ramping up efforts to prevent the spread of the disease to vulnerable populations in Port-au-Prince.

"The cholera outbreak in Haiti is the worst case scenario," said Fritz Bissereth, country director for ADRA Haiti. "We could not be unconcerned about these particularly difficult moments in the life of the country."

As a result, ADRA is focusing cholera awareness efforts in various camps in Carrefour, a neighborhood of Port-au-Prince where thousands of displaced persons have been living in makeshift shelters since the deadly January 12 earthquake. Using live drama presentations, pamphlets and posters in the local Creole language, ADRA staff and volunteers have instructed residents on the dangers of cholera and prevention practices. In addition, hand sanitizers and a total of 2,880 water purification tabs have been distributed to camp residents. Each tab can disinfect 2.6 gallons (10 liters) of water.

In recent days, ADRA also solicited the support of Haiti's National Direction for Potable Water and Sanitation (DINEPA) to test the water being provided to displaced persons. Testing confirmed the good quality of the water and its distribution remains unaffected.

In the displaced persons camp located on the campus of the Haiti Adventist University, ADRA has conducted cholera training for the camp management team and continues the distribution of Oral Rehydration Salts (ORS) in the camp's three remaining inhabited zones where some 500 families live.

In an effort to reduce the effects of the outbreak in hard-hit Artibonite Department located north of the Haitian capital, ADRA and the Seventh-day Adventist Church in Haiti are sending 10 Trekker mobile water purification units to help ease the demand for clean water in the area. Each mobile unit, which is powered by a motorcycle, can purify 63 gallons (240 liters) of water per hour. Plans are underway to distribute 30,000 water purification tablets and information flyers in four targeted zones in Artibonite, including the communities of St. Marc, Grande Saline, Marchand, and Verette.

Key to ADRA's cholera prevention message is the focus on basic sanitation, including boiling water, using soap, consistent hand washing before meals and following toilet use, keeping foods clean, and avoiding the consumption of fish. ADRA is implementing these preventive actions using guidelines set by the United Nations Children's Fund (UNICEF) and the International Organization for Migration (IOM).

The Ministry of Health in Haiti reported 4,722 cholera cases, including 303 deaths. Haitian officials say that the majority of cases have appeared in the departments of Artibonite, Central, Nord-East, and Nord. There is concern that the disease could also spread to the densely populated Port-au-Prince area where thousands of people are living in squalid camps with little access to clean water and food.

Cholera is an acute diarrheal infection caused by ingestion of food or water contaminated with the bacterium Vibrio cholera. According to the World Health Organization (WHO), cholera can kill within hours if left untreated. Up to 80 percent of cases can be successfully treated, however, with oral rehydration salts, WHO reports.

ADRA Feeds Thousands in Haiti
Source: Adventist Development and Relief Agency International (ADRA)

Date: 21 Jan 2010

Wahroonga, New South Wales — The Adventist Development and Relief Agency (ADRA) distributed nearly 13,000 rations of high–energy nutritional biscuits donated by the United Nations World Food Programme (WFP) in several sites in Port–au–Prince, Haiti, on January 18. Each ration can feed a person for five days.

"Thousands of people remain in makeshift camps where the food and sanitation situation is precarious," said Richard Jaqua, a staff member who is helping to coordinate the logistics for ADRA's emergency response. He reported that the distribution of food is crucial as supplies in the capital's stores and marketplaces have become limited and extremely expensive.

ADRA also continues to provide urgent water supplies and medical care to approximately 25,000 internally displaced people who have sought refuge at the grounds of the Haiti Adventist University and the Adventist Hospital of Haiti.

ADRA, in partnership with Global Medic, has already established several clean water access points at the site, with plans to install 20 more. ADRA also expects to distribute more water supplies provided by the United States Agency for International Development (USAID), with thousands already receiving water purification tablets. To improve sanitation at the site, ADRA is constructing 60 latrines.

In addition, ADRA will distribute a shipment of 450kgs of medical supplies received from International Aid and medical supplies worth $15,000 donated by Heart to Heart International. ADRA has already distributed approximately 30 boxes of medical supplies at the hospital and continues to provide medical assistance to the injured.

To implement these initial response activities, ADRA is also partnering with Food for the Poor, which is assisting in the distribution of medical and food supplies; Johanniter International, a non–profit association that is providing medical supplies for hospital staff; GARSA, a Colombian rescue and relief group in partnership with ADRA Colombia; International Relief and Development (IRD); and donors in Puerto Rico.

The worldwide ADRA network urgently needs US$1 million to help communities rebuild in the long–term. ADRA Australia has opened a Haiti Earthquake Appeal and is calling for support for the response efforts in the region. Donations can be made to ADRA Australia by calling 1800 242 372 or visiting www.adra.org.au. Donations to ADRA Australia's Haiti Earthquake Appeal will be used to support the disaster, recovery and reconstruction efforts in the area. If the appeal raises more funds than are needed, donations will be allocated to ADRA Australia's ongoing emergency management activities.

International ADRA network partners currently supporting the response efforts include ADRA International, ADRA Australia, ADRA New Zealand, ADRA Czech Republic, ADRA United Kingdom, ADRA China, ADRA Denmark, ADRA Switzerland, ADRA Norway, ADRA Canada, ADRA Ireland, ADRA Portugal, ADRA Sweden, ADRA Netherlands, ADRA Austria, and ADRA Japan.

ADRA Australia is a non–government organisation (NGO) engaging in sustainable development projects and emergency management activities for people in need in Australia, the Pacific, Asia and Africa. It is a member of the Australian Council of Social Services (ACOSS) and has full accreditation with the Australian Agency for International Development (AusAID). It is a member of the Australian Council for International Development (ACFID) and is a signatory to ACFID's Code of Conduct. ADRA Australia is part of the international ADRA network, which has a presence in 125 countries. ADRA is the worldwide humanitarian arm of the Seventh–day Adventist Church. For more information about ADRA Australia, or to sign up for email updates, visit www.adra.org.au.

from their website:

SILVER SPRING, Md. —As the humanitarian crisis continues to grow in quake–hit Haiti, the Adventist Development and Relief Agency (ADRA) has expanded its relief efforts by committing $1 million worth of emergency aid to assist survivors in the hardest hit areas.

”As an organization, we recognize the urgency that this disaster demands, and press forward to meet the most immediate needs of survivors,” said Charles Sandefur, president of ADRA International. “We will continue to do everything possible to alleviate the suffering of those affected in this incredible tragedy.”

As part of ADRA’s immediate response, an emergency assessment team also traveled to Port–au–Prince to begin coordinating the distribution of aid in the region. The group is expected to arrive in Haiti on Friday, January 15, to support the operations on the ground.

"On our way to Haiti, the expressions of solidarity from everyone we've met have been inspiring. People are encouraging and genuinely emotional regarding the events surrounding the earthquake,” said John Torres, a member of the ADRA International team headed to Haiti.

ADRA is partnering with Toronto–based Global Medic to provide medical aid for survivors through four mobile medical clinics, each of which can assist up to 1,000 patients a day. Survivors will receive other emergency items, such as water purification tablets, water treatment packets, and oral rehydration salt units. Water purification units and a portable water tester will also be available. These water treatment methods will provide clean drinking water for an estimated 90,000 people a day.

A donation of medical supplies from Heart to Heart International will help ADRA provide assistance to as many as 800 people. Supplies include antibiotics, vitamins, vinyl gloves, and over–the–counter pain relief medication.

ADRA network offices have already committed an estimated $98,000 toward the Haiti response. Funders include ADRA United Kingdom, ADRA Switzerland, ADRA Norway, ADRA Canada, and ADRA Portugal.

The quake, which struck at 16:53 local time (21:53 GMT) and approximately 10 miles (15 km) southwest of the capital Port–au–Prince, is the strongest to hit Haiti in more than 200 years. It was followed by two powerful aftershocks registering at a magnitude of 5.9 and 5.5, respectively. As a result, the damage to infrastructure, including bridges, buildings, phone and power lines, has been severe.

Updates will be released as ADRA’s response efforts expand.

To send your contribution to ADRA’s Haiti Earthquake Response Fund, please contact ADRA at 1.800.424.ADRA (2372) or give online at www.adra.org.

Follow ADRA on Twitter and Facebook to get the latest information as it happens.

ADRA is a non–governmental organization present in 125 countries providing sustainable community development and disaster relief without regard to political or religious association, age, gender, race or ethnicity.

For more information about ADRA, visit www.adra.org.

Spoke at length with Chrispin Gabriel in Lexington, KY. He grew up in this orphanage and was there for a week 2 weeks ago. He is a graduating Structural Engineer student and personally conducted the structure assessment. All but 2 buildings are salvageable (if they get funds for repairs). No buildings on site are habitable. To look at these buildings they do not appear to be damaged. His assessment of the structure and foundation is that they are not safe at all to enter.

He was also there 3 weeks post quake and the food he and his friends purchased was the only aid at that time they had received.

Chrispin ran a water test and the well water is not safe to drink They need water filtration urgently.

The orphanage is in a very poor community with lots of trash and debris and shanty type shack shelters. He feels that the building will withstand hurricane strength winds, but the debris factor will be the big danger posed to the children in a storm as well as to the surrounding community.

They have no alternative evacuation plan in place. They are not supported by any specific missionary group from another country and are not well or regularly funded in any way.

This is called an 'orphanage' but no children in Chrispin's memory were ever adopted out. He was very well taken care of in this environment.

Here is a current assessment of the living conditions:

–60 children
–Ages 3–20
–Pastor Cassy has run the orphanage for 50 years (not physically well at this time)
–Overall medical health appears good, with exception to some children having a bad skin rash near their ears
–Site is a compound, including School/Orphan Dorms/Chapel/Bakery
–There are at least 2 teachers on site & the children are currently getting lessons & learn English also
–There are approx. 7–8 Caregivers (but they are having a hard time paying them)
–They have received minimal aid here and there by NGO's and told "this will not be a regular thing". For example they bring anywhere from 2–10 lbs. of rice at a time (for 60 children)
–They are all sleeping in tents in the compound

SUPPLY NEEDS:

Rice
Beans

Cooking Oil
Pasta (Spaghetti)
Snacks
Juice
Powdered Milk
Cornmeal
Flour/Sugar (they have a bakery on site)
Bags (to hold the bread they make)
Water Filtration System (well water is undrinkable per testing)

Web UPDATES: http://www.gsohaiti.org/updates.php

We are in the process of assembling a team to travel to the orphanage mid–March to begin the process of rebuilding. We need a structural engineer to assess the condition of the structures damaged in the earthquake. If you are interested please contact us at donations @gsohaiti.org

FROM THE HOMEPAGE OF THE SITE:

Dear Friend of GSO,

It is with a sad heart that I send this letter. First, to inform you of the massive damage done to the buildings in Port–Au–Prince and throughout Haiti. Anyone with a radio, television or internet connection has been made painfully aware of the massive damage and the enormous loss of precious life. I would like to say that Good Shepherd Orphanage and School was the exception to this catastrophic event, but I am reminded of a scripture that says "It rains on the just and the unjust alike". Such is the case in Haiti.

Even though all of our structures are still standing, they are heavily damaged and will need to be stabilized first with major repairs immediately following. This will take an enormous amount of time and financial aid to accomplish the many tasks that lay ahead.

Tragically, two of the young men who grew up in the orphanage are missing. Having graduated from the GSO school, they were attending college downtown and are still unaccounted for and presumed lost in that devastation. This is a tragic loss for Papa Cassy and all their brothers and sisters at GSO, and I'm sure each of you.

On a more positive side, two of our board members, David Zimmer and Mike Martin along with Chrispin Gabriel, flew to the Dominican Republic last week and purchased two truckloads of food, water and fuel. They traveled through the night and arrived 12 hours later at GSO, just as their supply of food and water was about to expire. This was, and still is, the only help that has come to that area. I have added a picture of a little boy at the orphanage, eating the food that they brought.

Many of you have been wanting to help in many different ways, and we deeply appreciate that. However, the thing we need most of all is financial aid. Please visit our support page for details on how to contribute.

God bless each of you as we stand in the gap together.

Earl Holt
President,
Good Shepherd Orphanage and School

Per Lori Boyko, Virtual Volunteer in Connecticut, they are moving to their new site that was being built pre–quake in Croix De Bouquet. They are expanding to a capacity of 300 for orphans and are planning a feeding program that will serve 1000 people. They have the ability to make hot meals. Lori has assisted them in partnering up with supporting partnerships/orgs to maintain this feeding program. Move date not available yet. Initial population of orphans not known yet.

NO DATE PROVIDED/SOURCE: http://haitiearthquakesurvivors.blogspot.com/

Foyer de Sion – ALL of the Foyer kids are now at the LDS church in PetionVille. Junior Mardy reports that they have enough food for about 2 more days but have no clean water. Mandi (an adoptive mother and RN who was in Haiti on a medical mission when the earthquake occurred) is trying to get a water purifier to them tomorrow. update: Water, food and medical care has reached the children of Foyer de Sion in Petionville.

By Brooke Adams

Another 10 children from a Haitian orphanage are on their way to the U.S. with the help of a Utah adoption agency.

The children left the earthquake–ravaged country on a military jet about 5 p.m. Saturday, according to Chareyl Moyes, Haitian program director with Wasatch International Adoptions, based in Ogden. Moyes helped coordinate the children's flight.

Two Utah families are adopting children in the group, she said. That leaves just four children with completed adoption cases waiting approval from the Haitian prime minister, she said.

The adoption agency, with the help of the Utah Hospital Task Force, flew 50 Haitian orphans to Miami last week, where they were united with their new families. Another 16 children were unable to board the plane because of incomplete paperwork.

One child, an 8–year–old boy being adopted by an Eagle Mountain couple, arrived in the U.S. on Tuesday.

The Haitian and U.S. governments have cooperated in arranging humanitarian paroles for children whose adoptions were nearly finished before the earthquake destroyed much of the island country.

The children are from the Foyer de Sion orphanage.

HAITI HEALTH CLUSTER BULLETIN #14 - PAGE 9 – 1/14/11:

On 4th and 5th of January, JOTC (Joint Operations Task Center Plans Coordination) members visited the Acra IDP Camp. The UNPOL IDP Camp Unit and OCHA participated as well. The camp manager provided a tour throughout the camp to illustrate the impact of the clogged drainage ditches. It was noted that the majority of the garbage is not coming from the camp, but appears to be flowing down from Petionville and Delmas 40B. JOTC is coordinating with OCHA, IOM and Military Engineering to find a solution to this problem. The persistent cleaning of the ditches is not a permanent solution because the garbage will continue to clog the pipes at the entrance of the camp. The flooding from the result of the clogs has increased the risk of the spread of cholera in the camp. The participants also discussed the issue of eviction by the land owner.

THE UTC is able to make oral rehydration and intravenous use. Capacity 2–20 beds. Opening: at least during 12 hours. Staff : doctor, nurses, agent sanitation, health worker.

MANAGING ORGANIZATION:
ALIMA

The representative of the organization:
Amel Chillas; Guillaume Le Duc, responsible for programs

CONTACT:
alima.portauprince @ gmail.com, 3486 8446; Guillaume Le Duc 3785 4383

Main Contact of the place of intervention (Name, telephone, e–mail):
Dr. Marie Claude Francois, 3449 1530, marieclaudieclaudy@yahoo.fr / Jean Adrien, 37602901

Current Capacity beds of the place of intervention:
30 – Extendable to 40

What are your main domains of activity?:
Health promotion and awareness, social mobilisation, ORD corners x22

What do you need to support your work in Haiti?:
Supply of rehydration intrans, SRO & Ringer

FROM THE ALIMA SITE 10/25/10:

Haiti: Alima is mobilizing to respond to the epidemic of cholera

A cholera epidemic is causing dozens of deaths in Haiti in recent days. Victims suffer from diarrhea and dehydration very fast, symptoms of cholera. The deaths of patients can respond very quickly, just hours after the onset of symptoms. Yet, clinically, the disease is easy to treat, simply rehydrate the patient for two to three days.

For Haiti, it is the most serious health alert since the earthquake of January 12. The disease has already killed 253 on 3000 cases were identified by the Haitian authorities. The epidemic broke out in central Haiti, in the Artibonite and Central Plateau, where many refugees are survivors of the earthquake of January 12.

This epidemic may spread significantly to the rest of the country, especially in large overcrowded camps in the capital, where the earthquake nine months ago has made 1.5 million homeless, in addition to more than 250,000 dead. The situation of people in Port–au–Prince remains precarious, particularly in terms of habitat quality and hygienic conditions.

An emergency medical response to cope with the spread

The analysis of living conditions in these camps (quantity and quality of available water, sanitation systems and waste treatment, housing density) suggests that if the epidemic could spread it 's expect a peak of the epidemic particularly intense and fast.

ALIMA – present in Haiti since the earthquake of January 12, 2010 – is preparing a medical response to cope with the possible spread of the epidemic in Port au Prince. At this stage Alima studying the various possibilities for intervention under the coordination of the Haitian Government, which oversees the medical response to this epidemic.

This assessment work is undertaken locally by the President of Alima, Thierry Allafort Duverger and program manager, William Duke. This first team will be strengthened by the middle of this week with the arrival of a coordinator and several additional nurses and logisticians.

Email: rh@alima–ngo.org If you want to join the team

Organization Details :

Rebuilding a Future of Hope Among the destroyed buildings in Haiti were schools the children depended on for their education. Now, those children have nowhere to go to broaden their knowledge while also being faced with hunger and fear. Our nonprofit organization is working hard to not only rebuild the schools, but also offer nutritious meals for those who no longer have parents to care for them. Each school costs around $25,000–$30,000, and your sponsorship goes towards this goal. Supplying School Necessities When you sponsor a child through Haitian Students Parents Solidarity Association, you are providing him or her with the tools necessary for a fantastic education. We are looking for people that can donate school supplies such as chairs, blackboards, writing utensils, and everything else needed for learning.

Food Distribution
Submitted by HSPSA on Apr 11, 2010.

Tomorrow we'll continue feeding over 500 children in Clarcine 12, Tabarre.

HSPSA has a new program call “Good Times Operation”, it’s a place for children to come, we served them three meals a day, we create a playground where the children can play, and listening to music, read, sing etc.Our goal is to continue this program for a long time. We already served over 500 children a day. We can’t do this alone without your support, please go to our website@ http://lnk.ms/5VtGD to donate. Every little bit count, nothing is too little.

WISHLIST FROM THE SITE:

We Accept:

• Folded Beds
• Tents
• Folded Chairs

• Blankets
• Baby Items and Food
• Water
• Summer Clothes for Men and Women
• School Supplies (Notebooks, Pens, Pencils, Chalkboards, etc..)

Donations can be delivered to the address below, or call us at (888) 759–3085 to arrange a meeting for pick–up:

Haitian Students Parents Solidarity Association
226 York Street
West Haven, CT 06516–3551

Services offered: Camping Supplies, Tents; Clothing, Summer, New or Gently Used/CLEAN * (ANY/ALL Types); Demographic Served: Children; Food, Baby Food * (ANY/ALL Types); Food Distribution, Emergency/Disaster Food Distribution; Furniture, Chairs, Folding Chairs; Linens, Bedding, Blankets * (ANY/ALL Types); Meals * (ANY/ALL Types) ; Meals, Congregate Feeding, Meals; School, Supplies * (ANY/ALL Types); Water, * Bottles (ANY/ALL Types of Bottled Water)

Kay St. Germaine – NPSF (School & Physical Therapy Programs)

School · Open

lot adjacent to the St. Damien Pediatric Center, Tabarre

Web www.nphhaiti.org
Service Temporary

Posted on:
http://www.nphhaiti.org/

February 2, 2010
Today is the first day that the school and physical therapy programs were open at Kay St. Germaine. There were 18 students and 10 patients for therapy. Previous to the earthquake the school had 70 students and 20 therapy patients daily. The staff is still unsure regarding the whereabouts and status of previous students.

The 30 children from the general hospital are still living at Kay St. Germaine, but Partners In Health are providing staff and some supplies for their care, while they are searching for a permanent rental facility. About 10 of these children are integrated into the

classrooms, which started today. All 30 children have been receiving physical therapy. There is no exact date as of yet to when these children will be moved to a PIH location. Nine special needs abandoned children, originally from the hospital, moved from their damaged rental house to Kay St. Germaine as well. It is a very full house!

The new goal for Kay St. Germaine is to offer physical therapy for amputees. In fact, today the first child amputee referral from St. Damien hospital arrived for therapy. Patients who are discharged from St. Damien who need PT are then referred to Kay St. Germaine.

Gena has met with other NGO's to discuss the future prosthetic needs for children and adults. Currently, the idea is to link with prosthetic organizations already here in the country, and once patients receive their prosthetic, they can then receive physical therapy at Kay St. Germaine. There are two American organizations that stated within a week they can make prosthetics.

Gena is searching for a rental property in Petionville to continue the Kay Elaine programs that were located in the former Fr. Wasson Center. The embroidery card program is continuing at Kay St. Germaine. Prior to earthquake there were 100 children enrolled in the Kay Elaine school and therapy.

HAITI Special Needs Program Update
Update – Friday
January 23, 2010 – Haiti

Kay Christine is the special needs home in Kenscoff at the NPFS St. Helen Orphanage.

Kay Elaine was the special needs rehabilitation and educational programs in Petionville at the Father Wasson Center (building that collapsed).

Kay St. Germaine is the special needs rehabilitation and educational programs in Tabarre, lot adjacent to the St. Damien Pediatric Center.

Posted Jan. 23, 10
Our program in Petionville (Kay Elaine) at the Father Wasson Center no longer exists since the building collapsed. We lost our wonderful volunteer Molly Hightower during this collapse. That collapse also killed Ryan, a young man that was here visiting his sister Erin, a volunteer. Molly had been with us since June and she was the one that got the kids using the swimming pool and she also helped with the riding program and many other activities in our three places. Molly was a bright smile that brightened every day and we miss her a lot.

NPFS has three distinct facilities:
* St. Hélène, a permanent home for orphaned and abandoned children
(UPDATE ABOVE)
* Kay Père Wasson or The Father Wasson Center, our former pediatric hospital now used for administration, rehabilitation and educational purposes;
* and a pediatric hospital called St. Damien Chateaublond.

St. Hélène is located 5,000 feet above sea level where the trees flourish and the air is cool. Approximately 450 children reside in this refuge, healthy and well fed. Another 175 youths are enrolled in an external program in which they live with family but receive academic scholarships.

The entire facility is located on 15 hillside acres. There are 19 residential cottages: one is for babies and toddlers; another is for children with special needs; and the remaining are for various age groups.

Just outside of the capital in Pétionville (a suburb), is Kay Père Wasson or the Father Wasson Center. This five-story building, formerly known as Hospital Saint Damien, is currently being used for various programs and administration purposes.

Kay Père Wasson houses the accounting offices, a physiotherapy/rehabilitation program for children with developmental disabilities, a job training and development program for ex-pequeños teaching them management skills and it is also used to accommodate visitors.

In December 2006, a state-of-the-art pediatric hospital in Tabarre, named St. Damien Chateaublond, was inaugurated. The hospital's main focus is on HIV/AIDS, tuberculosis, malnutrition and cancer. This facility provides in-patient care with 120 beds and out-patient care for up to 100 children daily. There is also a dental clinic, laboratory, and public health clinic on premises.

Adjacent to the hospital is Kay St. Germaine, a 2,300 sq. ft., rehabilitation and physiotherapy center aimed to open in the summer of 2008. These programs reach over 30,000 people annually.

Cholera in Haiti
http://weill.cornell.edu/globalhealth/online–global–health–journal/global_health_news/cholera_in_haiti/

From Dr. Jean William Pape, Director of GHESKIO

As of October 27, 2010 there have been 4,000 cases of cholera in Haiti and over 300 deaths. The epidemic started in the Center Department in the city of Mirebalais, and has spread to the Artibonite valley on both sides of the river, with most cases diagnosed and treated in the St Marc area. Two days ago, cases were reported in Arcahaie, and Cabaret indicating that the epidemic is moving towards the Port–au–Prince area. There are 6–8 cases diagnosed in Carrefour, a heavily populated area close to the downtown GHESKIO site. All the cases diagnosed in Port au Prince come from the Center Department and Artibonite area.

There has been no known transmission to date in Port au Prince inhabitants. The greatest fear is that the epidemic will hit the 1.3 million homeless people living in tent cities. At GHESKIO we are more concerned about the people living in slums around Port au Prince. While 90% of tent city populations have access to potable water and latrines, this is not the situation for habitants of slums. Cholera transmission is particularly likely in areas where fecal–oral contamination through non potable water can occur. Thus the slums are a prime concern for new cholera outbreaks, which in turn could spread to tent cities because of the close proximity and exchanges between both populations.

In anticipation of these outbreaks, GHESKIO has developed the following interventions:

1. Cholera Treatment: We have set–up three treatment sites: one at the downtown GHESKIO clinic on Blvd Harry Truman, one at the GHESKIO tent city across the street, and one at the GHESKIO–IMIS site in the north of the city near the airport.

a. Why set–up these treatment sites at these locations?

i. The GHESKIO–downtown site is a logical site because it cares for about 1200 hundred patients with HIV, TB, and other STIs daily and is located right across from two major slums with about 200,000 inhabitants (City of God and City of Eternity). This site is very close to Carrefour and Martissant, two heavily populated areas with very little medical infrastructure.

ii. The GHESKIO tent city has almost 7,000 people, and we are providing the primary care for this population.

iii. The GHESKIO–IMIS site is located north of Port au Prince and is closest to the northern areas affected by cholera. Except for a pediatric hospital, Petit Freres et Soeurs, there are no other clinical care facilities in this area.

b. Three tents have been set up– one at each of the locations indicated above and the personnel has been identified and are being trained in cholera case management.

2. Training: Set up two training sites respectively at GHESKIO–INLR and at GHESKIO–IMIS. These sites can train health care personnel from other health care facilities in Port au Prince.

3. Provisions: Offer potable water to the slums near GHESKIO on a constant basis.

4. Prevention: Create a 12 member community health team to educate in tent cities and surrounding neighborhoods to:

a. Inform about protective measures : potable water, wash hands

b. Inform people living in the slums about the availability of potable water at GHESKIO

c. Inform about treatment centers at GHESKIO

d. Distribute soaps and chlorox solutions

Per MSPP/PAHO/Health Cluster list dated 11/13/10 this hospital is a 'UTC':

UTC DEFINTION: Unit for the/Cholera (UTC): a health center, mobile clinic or hospital alone which has built a space to be able treat patients cholera, or in a tent or ente or in a house of the structure. THE UTC is able to make oral rehydration and intravenous use. Capacity 2–20 beds. Opening: at least during 12 hours. Staff : doctor, nurses, agent sanitation, health worker.

LTel: 11/19/10

UPDATE 11/17/10 from FR RICK FRECHETTE/St. Damien:

–locations/GPS coords of CTCs & other cholera tx centers
WE ARE AT TABARRE 500 METERS FROM USA EMBASSY

–who is currently organizing?
PRIVATE CATHOLIC HOSPITAL

–how many deaths in recent days?
WE HAVE HAD ABOUT 200 PATIENTS SO FAR WITH 10 DEATHS
MOST OF THESE ON ARRIVAL

–do you have body bags & disposal cleaning supplies?
WE ALWAYS NEED BODY BAGS
WE HAVE A CREMATORIUM
COULD USE HELP WITH PROPANE

–how is the water supply?
WE ARE FINE WITH WATER

–is staff exhausted? are there night–shifts & day–shifts?
YES 24 HOUR SERVICE PEOPLE ARE TIRED BUT OK

–who has been your medical equip supplier?
PURCHASE IN HAITI AND DONATIONS ABROAD OF SUPPLIES MOSTLY THE FORMER

–are any medical shipments being held in Customs?
NO

–what are main safety concerns?
ADEQUATE SHOWER SYSTEM FOR THE PATIENTS
VOLUMES OF CHLOROX THAT WE NEED CANNOT BE MET

**How are you confirming cholera? Do you have quick–tests? Do you have access to a lab?
TESTS SENT TO NATIONAL LAB
WISH WE DID HAVE QUICK TESTS

WE CN GROW TO 400 BEDS ON OUR PRESENT SITE AND 600 BEDS ON AN ADJACENT SITE IF WE HAD A ,OT OF HELP TO DO THIS
TOTAL 1000 BEDS IS ACHIEVABLE

THANKS
FR RICK FRECHETTE

November 16, 2010
Haiti: A letter from Saint Damien Hospital

Via NPH Saint Damien Hospital Haiti, Fr. Rick Frechette writes: Cholera in PaP. Excerpt:

I worked all night at our cholera treatment area, and during the night I saw a comparison I never would have imagined. Stepping out of the tents for fresh air from time to time, I saw the pearly white crescent moon overhead, beautiful and calming.

Inside the tents, also set against a deep darkness, the eyes of the most severe of the sick people have the same form. Eyes sunk deeply to that the whites of the eye stay below the upper eyelid, with the eye rolled upward toward the forehead. Two crescent moons.

It is a scary sight to see the depth of the apathy and surrender, not an ounce of fight left. It is sadder still to see it in children.

The last time I wrote there were about 4,300 reported cases of cholera in Haiti. That number is climbing to 20,000 with 1000 deaths. I read reports that about 200,000 cases are anticipated before there is a decline.

We are setting up two more tents of 16 cots each, which will put our small base at 100 beds. You can believe me that even 100 people represent enormous human suffering, as well as enormous devotion (and work!).

The public morgue will not accept bodies, for fear of cholera. You cannot even bring the garbage to the normal dump without getting stoned by the neighbours for fear of cholera.

We are cremating our own dead. It is sobering to be the one to push the furnace button, after placing the child inside.

All night I see how closely the parents cling to their children, accepting to sleep in the most difficult positions as they find the best way to hold their child. I watch them and admire them, but the in the case of the children I am sure will die, it seems so unfair that the children are slipping away from such tender arms.

The last arms to hold them are mine, as I place them in the crematorium. The grief of the mothers is as difficult for us to take as the illness.

EXCERPT FROM:

October 31, 2010
Between a Rock and a Hard Place
Father Rick Frechette, Director of Nuestros Pequeños Hermanos/Nos Petits Freres et Soeurs (NPH/NPFS, Spanish and French for “Our Little Brothers and Sisters”) Haiti

SOURCE: http://www.friendsoftheorphans.org/s/769/inner.aspx?sid=769&gid=1&pgid=252&cid=2449&ecid=2449&crid=0&calpgid=61&calcid=719

We have an organized plan to help in case of a huge outbreak of Cholera in Port–au–Prince, in a way that will not disturb the function of, or contaminate, either our children’s hospital (St. Damien) or our family hospital (St. Luke).

We have covered about two acres of land next to the St. Luke hospital with gravel, and we set up so far 4 of a total of 15 large tents, where we will receive cholera patients. We have set up a diarrhea clinic there, where our staff will evaluate anyone with diarrhea, without them needing to go into either the St. Damien or St. Luke compounds. After screening, if it is likely cholera, we

will bring them nearby to Doctors without Borders Cholera site. When they have reached their capacity of 250 beds, we will begin receiving the patients in our tents. We have a capacity for about 300 people.
