Gallatin Mayor Jo Ann Graves urged citizens to fill out a form on the city's website with basic contact information to help report damages.

The form, which can be found by clicking on the "FEMA" logo at gallatinonthemove.com, only asks for basic contact information so that the city can email or mail the official damage report forms when they are received.

The damage detail form will come from the Sumner County Emergency Management Agency.

"It is very important we are able to provide FEMA with as much information on damages as we can. We certainly want Gallatin and Sumner County to be eligible for relief," Graves said.

The contact form can be found by clicking on the "FEMA" logo at the city's website www.gallatinonthemove.com. Residents without email or Internet can call the mayor's office at 451–5961 and ask for Pat Byars.

Special Projects Director Rosemary Bates said the city would "be happy to assist any and all" Sumner County residents.

Once the county receives a disaster designation from FEMA, individuals, families and businesses affected by flood damage can begin applying for federal assistance in the form of grants for temporary housing and home repairs, low–cost loans to cover uninsured property losses, and other programs.

Information about how to apply for FEMA help can be found online at fema.gov/assistance.

How you can help: www.gallatinonthemove.com

The United Way of Sumner County is providing information on drop–off centers for donations of fans, cleaning products, work gloves, towels, shop vacs and other items necessary for cleaning and debris removal. They ask that you do not bring clothing at this time. For drop–off locations and other information http://www.unitedwaysumner.org/FLOOD_RELIEF_INFO.php

Information on the U.S. Army Corps of Engineers water releases from local dams is available at the Nashville District website at: http://www.orn.usace.army.mil/

The State Health Department has provided information for those affected by flood damage. To access the Health Department's information go to:

Wolf Creek Dam

See maps of what areas of Gallatin would be affected if the Wolf Creek Dam in Kentucky were ever to break. These maps are available online from the United States Corps of Engineers and can be viewed if you have a high–speed Internet connection. If you have a low–speed connection, you might want to see paper copies of the maps at the Edward Ward Carmack Library in Gallatin.
