Feb 3, 2010
http://www.unicef.org/infobycountry/haiti_52681.html

At a health post in Port–au–Prince's Sylvio Cator Stadium, vaccinators immunize a child, held by his mother, during the first phase of a campaign to protect young children in the Haitian earthquake zone against measles, rubella, diphtheria, tetanus and whooping cough.

PAP – Massive food distributions this morning in the stadium of Sylvio Cator, at the heart of an impoverished neighborhood of Port–au–Prince. Today, over 1,750 families will receive a bag of 25 kilos of rice which should cover the needs of a household for 2 or 3 weeks, depending on the size of the family.

SOURCE: http://www.lifegivingforce.com/2010/10/22/cholera-outbreak-in-haiti/

An outbreak of cholera has exploded in the Artibonite region of Haiti. We have received reports that as of this morning, Friday Oct 22nd, there have been more than 2000 cases of acute watery diarrhea and already 160 deaths and mounting, at the facilities in St. Marc, Petite Riviere d'Artibonite, Mirebalais and Lascahobas; the death-rate of patients since Tuesday night has spiked to around 10 percent. This extremely virulent disease has also spread to the capital Port-au-Prince. In emergency mode, and as officials were just confirming the deadly outbreak, the LifeGivingForce team was on the ground in the seaside town of St Marc, to begin providing families there with desperately needed clean, safe water to stem the tide of the disease.

In its response to the crisis, the co-ordinating body of the WASH cluster in the St Marc area, known as ACTED, requested that LGF assist in immediate efforts to bring clean drinking water to the affected area. This morning we sent our Haiti team to the region, about 45 miles north of the Port-au-Prince capital.

The news we have on the ground is that the St Marc hospital is a horror scene. According to our sources, the inside of the courtyard is lined with patients hooked up to IV drips. Children are screaming and writhing in agony, while others are motionless. The hospital is completely overwhelmed by one of the fastest killers there is: Cholera.

While representatives of all major NGOs attended the urgent WASH cluster meeting at St Marc this morning, approximately 250 local residents gathered outside angrily demanding clean water. The situation there is dire. LGF will set up an LGF mobile response water purification system capable of purifying 10,000 liters per day, providing clean drinking water to thousands of desperate villagers. Our systems rid the water of 99.999% of all known bacteria, viruses and cysts, through best-in-class UF barrier technology.

Matt Walters, Program Director for LGF in Haiti stepped out of the WASH cluster meeting to take a call from the UN MINUSTAH CVR unit in Port au Prince, and received more unsettling news. Cholera has spread to the capital. The UN representative requested that LGF set up a number of our units there as well to try and stem the spread of this deadly disease.

LifeGivingForce is responding quickly to this grave situation. We already have one of our LGF RR 1Ok units providing clean drinking water to 4,000 people per day in the Mirebalais community. We are working on getting as many of our units on the ground in the affected areas as we can in the shortest amount of time to save as many lives as possible.

Please donate and help us get more life saving units on the ground in Haiti!

HAITI PROJECT -
http://www.lifegivingforce.org/projects/h20-haiti

Nine months after its devastating earthquake, Haiti's water infrastructure is still broken. Every municipality on the island remains challenged to provide safe water to its people. Sanitation has improved little, and water-borne disease is rampant. Now with over 2 million people staying in overpopulated and often makeshift temporary settlements, access to safe water or sanitation facilities remains a pressing need. We are still on the ground in Haiti addressing this need. With your help, LGF and its local partners are delivering water purification units directly to where they can make the most difference, and continue to do so for years to come.

Help save a Life by Giving today:
We met Haiti Partners' co-Director John Engle in Port-au-Prince not long after the quake, and learnt about the amazing work that they have been doing in the region for some years now.

Their mission statement is simple- 'Helping Haitians change Haiti', and they have been succeeding through many initiatives, including the support of some seven schools in various locations around the country.

We made the decision to support their efforts by providing a water purification system for one of their schools, the IMN Community School, which was located at the very epicenter of the earthquake.

The direct cost of this project is only $8000, which will provide the entire school with safe water for over a decade. Haiti Partners have raised US $5,000 already, please help us raise the remaining US $3,000.

From RELIEF WEB:

Pakistan: Situation Report, 11 August 2010
Source: Logistics Cluster
Date: 11 Aug 2010
Pakistan – Monsoon Flooding

Highlights

– The Logistics Cluster is in the process of establishing logistics hubs in Peshawar, KPK Province, Multan, Punjab Province and Sukkur Sindh Province. Cluster Officers are being deployed to each of these hubs to augment the response capacity.

– All Logistics Cluster participants will have access to temporary storage facilities; all interested organisations should submit a Temporary Storage Request form that is available on the Logistics Cluster website (http://www.logcluster.org/ops/pak09a/temporary–storage–request).

Situation Update

– Torrential monsoon rains have lashed Pakistan for two weeks, triggering catastrophic flooding that the UN states has affected 14 million people; of which almost 6 million are in need of assistance. Flood waters from the country's North West have now moved south and reached upper parts of the Sindh province, where latest estimates from the Provincial Disaster Management Authority place the number of affected people at 1.3 million, with 700,000 evacuated. In eight affected districts of the Punjab Province, the estimated figure of over 1.6 million people is likely to rise. In Baluchistan and Pakistan administered Kashmir (AJK) number of the affected currently stand at 300,000 and 120,000, respectively. The flood wave is now passing through Guddu and

Sukkur barrages with the potential threat of the Sukkur Barrage overflowing, meaning Sindh will face as much devastation as that seen in KPK and Punjab Provinces.

Logistics Coordination

– KPK Province: The Logistics Cluster is liaising with the Government of Pakistan to coordinate requests from participants for air–lift operations for the distribution of relief supplies. The Cargo Request Form has been updated and is available on the Logistics Cluster website: (http://www.logcluster.org/ops/pak09a/cargo–movement–request).

– The Logistics Cluster has Mobile Storage Units (MSUs) on hand with 25 additional expected by the end of the week, the plan is to erect these in Peshawar. The MSUs will serve as a hub for temporary storage of humanitarian cargo.

– An LRT trained Logistics Cluster Officer will be deployed in Peshawar to augment the logistics and coordination needs for KPK by the end of the week.

– Punjab Province: The Logistics Cluster is establishing a logistics hub in Multan and has identified a Logistics Cluster Officer to be deployed to initiate coordination activities. In addition storage facilities have been identified to augment capacity.

– Sukkur, Sindh Province: The Logistics Cluster is on the ground establishing a logistics hub and has deployed a dedicated Logistics Cluster Officer for this hub.

– An Information Management Officer has been identified and will be based in Islamabad.

– For security reasons, limited maps are being published on the Logistics Cluster website. For information on maps please contact us at Global.LogisticsCluster @WFP.org.

Air Operation

– KPK: Heli–lift operations based in Ghazi continue to deliver humanitarian supplies to Kalam in Upper Swat, having been resumed after several days of suspension due to the poor weather conditions. Two additional heli–lift operations have begun: 1) a Khwazakhela–based operation to support flood affected areas in Swat and 2) an Abbotobad–based operation to support flood affected areas in Kohistan.

Road Conditions

– Gilgit and Hunza remain inaccessible and access to Muzaffarabad is possible by road, but the Neelum and Jhelum valleys are inaccessible from Muzaffarabad. Punjab: Road from Mianwali to Multan has multiple bottlenecks where roads are damaged/ flooded. IOM has suggested taking the following route from Islamabad to Multan: Islamabad–Pindi Bhattian– Chiniot–Jhang–Shorkot–Multan.

Cluster Needs List from One Response dated 8/19/10:

http://www.pakresponse.info/index.php?id=27

Google Group for the Pakistan 2010 Shelter Cluster is at:

http://groups.google.com/group/ShelterPAK2010

FROM THE SITE:

This website is a resource for humanitarian agencies working in the Shelter and Non Food Items (NFIs) sector as part of the Pakistan Flood response.

Please use this site to: contact agencies operating in these sectors; share information about your programmes and highlight priority areas. Minutes of meetings from the Shelter Cluster will be posted here, along with other relevant documents, resources and outputs of the group. We would like to encourage contributions of all partners to ensure a coordinated and transparent approach in the response to the affected population.

New to the Cluster? Please fill in the Agency Profile Form:

https://sites.google.com/site/shelterpak2010/im/profileform
