Service Temporary

7/17/11– Post on HEAS
Rasin Foundation is looking for additional physicians, physician assistants or nurse practitioner to join our medical mission from July 22 to August 12, 2011 in Petite–Riviere in Leogane. We will be seeing about 300 patients per week delivering outpatient medical care, treatments and medication free of charge. We are also in need on blood pressure, acid reflux and iron tablets. Please let us know if you have surplus that you can share.

Please contact us off this google group at info @ rasinfoundation

Leogane is coastal town located 29 km west of Port–Au–Prince, the Haitian capital. It had an estimated population of 150,000–180,000 people. It is divided into 13 communal sections of which Petite–Riviere is the second section with a population of 17,000. Eighty percent of the population lives below poverty level. Sugar cane, banana, mangoes are the major cultivated crops. However, most of the farming is for family subsistence. Leogane lacks all the basic services that the population requires. Leogane was at the epicenter of the catastrophic earthquake of January 12, 2010 and is 90% destroyed. An estimated 30,000 people have died. Opening the small health center in Petite–Riviere was deemed to be a " miracle" by the villagers. They now have access to basic health care by a dedicated group of health care providers and have access to medications to treat their illnesses without worrying about their ability to pay.

Medical Clinic
Cheridan

Web www.rasinfoundation.org
Service Temporary

Rasin Foundation runs a small medical clinic in rural Petite–Riviere, Leogane since February 2010. Our specific locality is called Cheridan. Our clinic nurse reported a cholera suspect case on monday whom she referred to MSF in Chatuley (Leogane). Since then we have been made aware of 12 reported cases of cholera in the locality of Kay Monsil, Cheridan, and Kafou ve. We are doing community education and have purchased sugar, salt, ziplock bags and mixed our own oral rehydration mix to give to patients to keep home just in case.

We would like to do more outreach in the community and would like to know where we can get supplies such as:

Soap
Water Purifier
Bleach
Water Purification Tablets

Patients are asking for water purification tabs but we don't have any. We have enough of antibiotics but don't have IV fluids and syringes etc..

Please contact:

John Pele Walter (Clinic Coordinator)
Midlene Boudeau (Clinic Nurse)

Update on Cholera in Sud–Est
Friday, April 29, 2011 1:09 PM
From: "Linda.Weber @ hearttoheart.org"
To: haiti–epidemic–advisory–system @ googlegroups.com
Cc: "James Wilson" <jim.wilson @ praecipiointernational.org>

An update regarding Haiti Sud–Est: Heart to Heart supports a clinic in Bleck and has been holding clinics at Cascade Pichon since October 2010. Monday we received a cry for help because over Easter weekend cholera hit Mare Jofre, Ti Boulay, Platon Figue and Domas areas located in and around Thiotte. The plea reported 22 deaths with 31 sick. Today Heart to Heart drove in what cholera product and water purification product we had remaining. We have cholera product in the douane since April 1. Should come out any day now...and we are implementing a 3–month response plan into the area.

2/9/11
Cholera and Medical Questionnaire
Please try to answer all questions

Name of Facility: Heart to Heart Clinic at Fondwa (we provided the 40ft Clinic in a Can created for H2h by Hospitals of Hope)
Any supporting orgs.(for example: MSPP, MSF, etc.) Father Joseph and the Sisters of Charity who have an orphanage, a school of 700 plus students
Type Facility (Type if applies (CTC, CTU, CTP post): Primary Care facility (do cholera screening on any patient that presents with diarrhea. This means we treat them with ORS and cholera meds, MSPP cholera education and water treatment product.

Village: Fondwa
Commune: Leogane
Department: Ouest

GPS Coord? N18 23.355' W072 34.693'
If not easily accessible by road, is their a helicopter landing zone nearby (Coord. If available):

Days per week facility is open? 7 days a week. Heart to Heart does their Friday Clinics
Medical Staffing (How many Doctors, Nurses, Non Medical Staff on hand)?: Heart to Heart Fridays: 2 docs, 2 nurses plus 4 support staff

Does facility have any supply needs that you are having trouble meeting? no
Can you pick up supplies? Yes Where?: at Promess and at our warehouse, donations from other NGO's and from our weekly volunteers

Services facility normally provides if not strictly cholera related facility: Heart to Heart does Primary Care Clinics. (Since late October we have run cholera screening next to, but not inside, our various clinic locations. At Fondwa we did not begin Cholera Screening until January. Cholera didn't move into Fondwa until then.

Date began treating Cholera patients?: At Fondwa in January 2011
Total number of patients since that date: 8 suspected during January
Total number of fatalities since that date: In Fondwa, per Sister Carmela lost two (2) people who were unable to come to clinic and she could not reach in time.
Number of Cholera patients in the last week?: zero
Number of fatalities in the last week? zero
Last week, has number of Cholera patients stabilized, increased, decreased or is fluctuating?: stabilized. No suspected Cholera during February
Bed Capacity for Cholera patients?: none

Is the surrounding community receiving education on Cholera prevention? Choler education is done at clinic every day
How far are Cholera patients having to travel to receive treatment at your facility?: It is very mountainous so have no real idea

What is the water source for this facility?: well
Is your water purified? water purification solution has been being provided via clinic
If so, through a holding tank or through buckets?

Primary Needs: clorox and more buckets
Additional Comments about your situation: Sister Carmela is relieved there has not been one suspected cholera patient presenting thus far during February. Nor has she been called concerning it as she was during January.

1/24/11 Email from Jenny from Hands On
Thank you for your message Laura. We have had a few medically trained volunteers go to assist at the Ayuda clinic, but have never had a part in it's operations. As far as I know, it is now being run by doctors and nurses from Israaid, but I do not have any contact info for them. Good luck in your search for information.

MSF Activities in Haiti as of May 2010
May 19, 2010

Outside Port–au–Prince:

Léogâne: MSF has been working since the earthquake in this 120–bed hospital on the site of Chatuley Hospital. The hospital is providing emergency services including: maternity, obstetrics and gynaecology, general surgery and general medicine. Physiotherapy and mental health are also integrated. MSF has started to build a container hospital, with a capacity of 100 beds, as well as 60 additional beds in outside structures. The new hospital is expected to be ready between mid–July and mid–August and will be providing the same services as those mentioned above, plus radiology and laboratory facilities.

Earthquake Response

Having Haitian and American staff on the ground allowed the CNP to quickly respond to the devastation caused by the earthquake. Within days emergency medical personnel and supplies were landing in Leogane. Our Emergency Response Team is working in Leogane full–time, coordinating medical teams, providing clean water, food and other resources, and operating a field hospital with several other organizations. A big focus for us has been rapidly scaling up our existing Nutrition and Safe Water Programs to meet the increased needs of the communities in Leogane.

Ashley Aakesson, CNP Executive Director, has been working with World Wide Villages to set up and manage a supply chain for Leogane including coordinating 2–4 charter flights a day ensuring the delivery of medical teams, medical supplies, safewater supplies and food. Albert Point Du Jour, CNP Deputy Program manager, has been working on logistics at Hopital Ste. Croix, the Nursing School and the Filariasis House.

Cathy Dorvil, former CNP Executive Director, and Nathan Michaels, CNP volunteer, worked for two weeks immediately after the quake setting up a safe water system for distribution to the displacement camps, distribution food in Leogane and assisting medical personnel. Cathy Dorvil reported that between January 19 – January 26, 950 patients were treated at the emergency clinic. Conditions treated have ranged widely including wounds, fractures, pneumonia, a variety of infections, malnutrition and pregnancy. Services provided include medications, wound care, amputations, tendon repair, and treatment of fractures, among others.

Kara Telesmanick, the CNP Program Manager whose home was destroyed in the quake, is back in Leogane and helping to plan the long term response to the quake and recovery.

TWITTER UPDATE FROM ALL HANDS VOLUNTEERS – TOMAS:

Tomorrow we continue residential mudding, will also help Hopital St. Croix w/ mud/cleanup – it's completely shut down, no services

UPDATE FROM MEDICINES SANS FRONTIERES SITE 3/26/10:

Leogane, Dufort and region: OPD is operational in the city of Leogane on the site of Hopital Sainte Croix. At the Dufort fixed clinic site, approximately 250 consultations are carried out each day, with referrals to Leogane when required. In addition, MSF teams are operating mobile clinic activities in 20 locations, between Gressier and Petit Goave. In total, 2,130 consultations were carried out last week.

FROM THE HANDS ON DISASTER RESPONSE SITE – UPDATE 3/16/10

Hopital St. Croix Field Hospital
Next door to our base is a field hospital which will transition into the permanent medical facility for Leogane, the Hopital St. Croix. Teams of Haitian and international doctors are working together to provide a full range of clinical and hospital services at no charge to the community. HODR is supporting the hospital with both infrastructure build–out and operations/administration.

We started with a fencing project around the perimeter of the hospital; now we've expanded and are framing and building triage and clinic buildings. On the admin/operations front, we have a crew organizing the extensive supply/pharmacy inventory at the hospital and developing an inventory system that can be transferred to the local staff. Volunteers are also slotting in as "runners," helping the doctors to move patients, run tests, take vitals, get supplies, and whatever else is needed to keep the hospital moving.

2/18/11 http://haiti.nd.edu/program–history/hopital–sainte–croix/
On September 22, 2010, Hopital Sainte Croix officially reopened for patients for the first time since it was destroyed in the January earthquake. Bishop Jean Zache Duracin came to Leogane and presided over a worship and celebration service and blessed the hospital. It is operating in the one story medicine wing of the old hospital. There are about 30 beds and two small operating rooms. On the evening of the 23rd, there were two patients, a pediatric patient and one adult. Rejoice with us! There are doctors and nurses around the clock, sheets on the beds, and functioning bathrooms! Down the hall, in the old operating room/central supply area, the Children Nutrition Program is providing in–patient and out–patient renourishment programs. In the old day clinic area, the out patient clinic is seeing over 150 patients every day. The lab and the xray departments are busy. The place finally looks and works like a hospital again.

SOURCE: http://www.emmf.com/hscroix.htm

Hopital Sainte Croix of Leogane, Haiti , a 120 bed general hospital, is the base of operations for the regional health care program serving the Commune of Leogane in the Department de l'Quest, Republique d'Haiti. The hospital is owned by the Episcopal Church of Haiti (EEH, Eglise Episcopale d'Haiti.), and is operated in partnership with the Presbyterian Church (USA).

http://www.torontosun.com/news/haiti/2010/01/22/12576411.html

This article states:

The population in Leogane and the surrounding region prior to the Jan. 12 quake was about 200,000. However, relief organizations and the United Nations have estimated the death toll just in this area could be between 20,000 and 30,000. Food and supplies have taken longer to reach Leogane because the main roads were wiped out, a factor Maj. Brizay added may delay their move into the city.

"They don't have anything standing," he explained. "Even if they have the doctors or nurses the hospitals are flattened."
