Save The Children – 4/11 Tornadoes

Donor · Open

Various, AL

Service Temporary

More than 200 deadly tornadoes tore through the Southeast United States. From Tuscaloosa to small towns such as Phil Campbell, families have been devastated by tragedy.

For the thousands of children and families left in the wake of the destruction—homes demolished, schools turned to rubble, entire communities blown away—the recovery is just beginning. Many children arrived at shelters barefoot, having literally run for their lives.

Save the Children is on the ground in Alabama and Mississippi in the hardest hit regions. In the early aftermath of the storm, we've helped more than 4,400 children. Among other things, we are:

* distributing truckloads of shoes, diapers, portable cribs and other child-specific essentials
* establishing Child-Friendly Spaces where kids can just be kids—and begin the recovery process
* providing psychosocial training in anticipation of the impact this disaster will have on children

(5/29/11 LTel: Site states "check for updates" but there does not appear to have been one in a long while so not certain whether they are still actively in this region doing the above)

Services offered: Baby, Baby Furniture, Large (i.e. cribs); Diapers * (ANY/ALL Types/Sizes); Shoes, NEW

VOAD – American Samoa VOAD (VOASD)

Info/Hotline · Open

LTRC, VOAD

Congregational Christian Church of American Samoa (CCCAS) compound at Kanana Fou., Kanana Fou, AS

Phone	684-699-9809
Web	www.asvoad.org
Serves	American Samoa
Eligibility	Impacted by the AS Tsunami
Checks payable to	ASVOAD
Service	Temporary

In collaboration with other community agencies on the ground, ASVOAD volunteers have been engaged in disaster response and relief since the incident occurrence. The soon shift will give concentration to recovery.

For those persons needing assistance, or have any queries with references to the services that have been made available for our community, please CALL our ASVOAD office for more details --- (684) 699-9809.

SOURCE: Samoanews.com

Press Release December 2009
What is ASVOAD and why is it important to know about them?

After a period of inactivity, the local American Samoa Voluntary Organizations Active in Disaster (ASVOAD) reconstituted immediately to foster necessary services to the people affected by the tsunami-earthquake disaster of 29 September. ASVOAD began to bring in new members and opened invitations to faith-based, voluntary, and non-profit organizations to spearhead relief and recovery efforts.

The Congregational Christian Church of American Samoa (CCCAS) has established and donated administrative support for ASVOAD, providing workspace and telephone lines. The CCCAS has made available the grounds, staff, and resources of the Church to accommodate the needs of the ASVOAD. The ASVOAD meetings are generally held at the CCCAS compound which also houses the multi-agency donation warehouse (MADW) and facilitates collection, sorting and distribution of in-kind donations.

Reverend Samuelu T. Tialavea, Jr., General Secretary of the CCCAS currently serves as ASVOAD's Chairman. The remaining executive officers are Vice Chair, Mr. Jim Mahoney, President, Rotary Club of Pago Pago, American Samoa; Secretary, Mrs. Faaalu Faletoese Iuli, Executive Director, American Samoa Coalition Against Domestic and Sexual Violence; and Treasurer, Dr. Falema'o "Phil" Pili, American Samoa Community College's Chief Financial Officer.

Other volunteer staffing supporting the executive board are: National VOAD (NVOAD) Point of Contact, Mrs. Evelyn Sa'o–Stevens from the Pualele Foundation; Public Information Officer, Pastor Vickie Haleck, Founder & Executive Director, Teen Challenge; the Territorial Voluntary Agency Liaison (TVAL) & Donations Coordination Team Chair, Mrs. Easter Asi–Bruce, Program Manager, American Samoa Disaster Relief and Recovery Program; and the FEMA VAL, Mr. Charles Craig.

The unique partnerships of ASVOAD and NVOAD enables the leveraging of resources providing the capability to implement the Long Term Recovery Plan (LTRP). The italicized text in the following paragraphs are snapshots from the recently published LTRP detailing ASVOAD activities that have already been accomplished.

The Mennonite Disaster Service (MDS) and the Christian Reformed World Relief Committee (CRWRC) established a strong working relationship with the CCCAS to begin the groundwork for long–term recovery efforts. The MDS has secured housing quarters at one of the CCCAS housing units.

The Church of Jesus Christ of Latter Day Saints (LDS) responded opening their church halls as shelters. LDS members transported evacuees to nearby shelters, delivered food and water, as well as securing durable medical equipment. The LDS brought in 15 wheelchairs, 20 crutches, and 2 walkers.

FEMA supported ASG by providing a short term housing kit consisting of a two–person tent (Yurt), with a liquid fuel two burner stove, fuel container and fuel lantern and flashlights. 1200 tents were distributed to 657 families. American Red Cross (ARC) also complemented this with a cooler that contained comfort kits, work gloves, hammer and flash lights along with cots. Off–island groups distributed lots of food and supplies.

World Vision, with the Alofa Tunoa Ministries has been in the villages with donations of food, water and personal care packages. The Southern Baptist Convention Disaster Relief provided purified water at the disaster sites to families with 5–gallon water bottles; they bought the islands entire stock.

The ARC, through the national organization, brought 87 volunteers in from their Disaster Services Human Resource (DSHR) system. ARC also had Americorps volunteers' plus 273 local volunteers. ARC distributed tuna, powdered milk, crackers, spam, sugar, flour, potatoes, onions, rice, 446 cases of dry ramen noodles, 8,721 cases of water and 99,490 snacks. Additionally, ARC strategically distributed by implementing the "Hot Shot" approach, 2,205 blue tarps, 548 sleeping mats, 12,500 trash bags, 443 empty 50–quart coolers and 120 pallets of bulk supplies from Hawaii. ARC was able to serve 65, 288 persons through its bulk distribution efforts.

Catholic Charities USA (CCUSA) also brought in volunteers to support the on–island affiliate Catholic Social Services (CSS). CCUSA also gave $10,000 to CSS.

Save the Children (STC) also distributed 270 kits of school supplies in addition to setting up Child Friendly Spaces at several locations including the DRC.

Tzu Chi Foundation (TCF) distributed debit cards to families identified by ASG. TCF provided $89,400 to 481 families. In–kind donations to various local agencies and to ASG, including food and clothes have also been distributed.

Convoy of Hope and Hands On Disaster Relief groups were on the ground assisting in the relief efforts and bridging relations with ASVOAD to help with recovery initiatives.

Feed the Children one 40–foot container and one 20–foot container, containing 672 mid–weight sleeping bags, 504 duffle bags, 2,304 four–person Coleman dome tents w/carry bag and 5,760 flashlights w/o batteries.

Five Community Resource Sites (CRS) were established in the harder hit villages by ASVOAD through coordination by CCUSA and served as points of distribution for in–kind goods to all villages. The CRS were opened for five days when first launched.

To recap, what is ASVOAD? In a nutshell, ASVOAD is comprised of a diverse and talented mix of experienced, humanitarian, compassionate Samoans anxious to help our island heal by helping to rebuild homes and lives. Why is it important to know about them? The composition of their organization, partnership with American Samoa Disaster Relief & Recovery Program and the national resources at their fingertips gives them the most strategic advance in quality expedition of implementing recovery efforts as outlined in the recently published LTRP.

The Long Term Recovery Committee (LTRC) recently formed as well as sub–committees to begin rebuilding homes and lives for our disaster survivors. Look for follow on articles pertaining to the recent creation of the LTRC and sub–committees.

For more information please visit them online: http://www.asvoad.org or contact them at 699–9809.

AS VOAD looking for wheelchairs and crutches

The American Samoa Voluntary Organizations Active in Disaster is appealing to any families with wheelchairs, bedpans and crutches that are not being used, to please donate them for tsunami victims.

Pastor Vickie Haleck, the public relations Officer for VOAD says many individual who were injured in the tsunami are in need of these equipment.

She says the organization has been able to provide for some victims but there's still a waiting list. Today the AS VOAD is receiving 15 wheelchairs and crutches donated from Samoa. Haleck says these were arranged by the Church of Jesus Christ of Latter day Saints.

Pasor Haleck thanked the LDS church and the people of Samoa who donated the equipment even though they were also affected by the tsunami.

She said they have already lined up people to receive the wheelchairs and crutches from Samoa and they still need more. If you're able to help please call VOASD at 699-9809 and 254-0554

EAST AFRICA CRISIS APPEAL

More than 10 million people in Ethiopia, Kenya, Somalia, and the newly-formed Republic of South Sudan have been left in need of food, water and emergency healthcare because of one of the worst droughts in 60 years. Hundreds of thousands of people have fled Somalia due to the drought and conflict, parts of the country are now afflicted by famine.

CRISIS UPDATES: http://dec.org.uk./appeals/east-africa-crisis-appeal

FAMINE IN SOMALIA
DEC member agencies are continuing to scale up their work in south and central Somalia in response to what the UN has now recognised as the first famine in the region since south Sudan in 1998. The people in Bakool and Lower Shabelle are suffering from severe malnutrition with other areas expected to follow in as little as eight weeks as more information becomes available and the situation continues to deteriorate.

Malnutrition rates are above 50 per cent in some of the districts; a level of 15% is considered an emergency, with 30% or more being one of the indicators of famine. Tens of thousands of people have already died for reasons related to malnutrition in the last few months.

Ten of the fourteen UK based aid agencies that form the DEC membership are working in Somalia directly or through partners, including in some cases in the south or centre of the country.

DEC member agencies and their partners operate under strict rules of humanitarian impartiality and independence to ensure continued safe access to as many people in need of help as possible but the situation in Somalia is exceptionally challenging.

Activities of DEC members and their partners in Somalia include:

CARE is providing assistance with food, water, wells and cash to the most vulnerable households in Puntland and Somaliland.

Concern Worldwide is working in south and central Somalia providing food vouchers, water, household items and healthcare for malnourished children and mothers.

British Red Cross' partner in Somali is providing healthcare in Puntland and Somaliland, food for the most vulnerable and wells. It has also distributed seeds and tools in south and central Somalia ahead of hoped for rains.
Merlin is providing emergency healthcare and food in central Somalia, Puntland and Somaliland.

Save the Children is providing supplementary feeding for vulnerable children and cash to vulnerable households in Somaliland and Puntland.

Islamic Relief is providing food, water, sanitation and healthcare in Mogadishu, Somaliland, Puntland and South Central Somalia.

The humanitarian crisis in Somalia has been caused by a combination of factors including severe drought, rising food and fuel prices, chronic poverty and conflict. Unless sufficient levels of aid are raised there is a real risk of the famine spreading to all eight regions of southern Somalia and afflicted nearly 3 million people.

Australia: Safe spaces for children affected by the Queensland floods

Source: Save the Children

Date: 14 Jan 2011

14 January 2011 – As flood waters peak in the Brisbane CBD, Save the Children has established further child–friendly spaces in Brisbane evacuation centres to assist children and families who have been forced to evacuate their homes.

With 75 per cent of Queensland now declared a disaster zone, Save the Children has staff into Rockhampton, Emerald and Brisbane, and is currently assessing the logistics of providing assistance for children and their families in Ipswich.

Save the Children's Emergencies Director in Australia, Mike Penrose, is in Queensland working with local authorities to ensure the needs of children are not overlooked.

"As the flood levels rise, there is a growing need to support children and their families through this time of crisis. Save the Children Australia has deployed qualified staff into the communities most affected, where displacement is anticipated for some time, to support the needs of children by establishing child–friendly spaces in evacuation and recovery centres," says Mr Penrose.

Child–friendly spaces protect children and give them a place to play and recover from the suffering they have endured and witnessed, helping children regain a little normalcy in these highly abnormal times. They also provide much needed respite for parents.

In areas where flood waters are beginning to recede, the hard work begins for many families, as they return to their homes and attempt to re–establish livelihoods.

Save the Children's child–friendly spaces provide supervised care for children of all ages, while their parents are able to begin the all–important task of rebuilding, knowing that their children are safe.

"The enormity of what these families are going through cannot be ignored. Save the Children Australia is drawing on our experience with large scale emergencies, such as the Pakistan floods and Haiti earthquake, to ensure we provide the best possible on the ground support for Queensland children affected by the flooding," says Mr Penrose.

If you would like to support Save the Children's work with the children and families affected by the Queensland floods make a donation at 0800 167 168 or http://www.savethechildren.org.nz

EMERGENCY ALERT
Today, too many children around the work are caught in the middle of crisis, have lost their homes and loved ones or are struggling to survive.

In places like Gaza, Ukraine and here at home in California, we're scaling up our response to meet the incredible need, which includes reaching even more children and families through distributions, cash assistance, health services and safe spaces. But we can't do it alone. Please, will you give today to support our work, every day and in times of crisis?
~~

Children's Emergency Fund
Historic wildfires, including those engulfing Los Angeles County, are putting children at great risk.

With emergency supplies prepositioned, we ensure families have the essential items they need and work with local partners to help kids get back to learning as quickly as possible and protect children's mental and psychosocial well–being.

As severe weather continues to impact children's lives, Save the Children is helping families in the United States prepare for and recover from disasters, including deadly fires. Your donation today can help save lives.

With your support, Save the Children is there before, during and after an emergency. Working together, we help communities become more resilient so that each time a crisis happens, they are stronger, more likely to survive, and recover more quickly. Your support of our Children's Emergency Fund today helps make this possible.

From the NYVOAD Member Directory:

Organizational Structure

Save the Children is an international not–for–profit organization whose mission is to create lasting, positive change in the lives of children in need. We provide a wide range of programs, including:
• Training new mothers with prenatal care
• Supplying life–saving immunizations for young children
• Building schools in developing countries
• Improving literacy and nutrition for children living in rural poverty in the U.S.

Disaster Program

When major disasters strike the U.S., Save the Children responds to the needs of children and families. In each emergency response, Save the Children's Domestic Emergency Unit structures its programs to respond to community needs. However, there are several areas on which we often focus our work:
Creating Child–Friendly Spaces– safe, designated areas where children can play socialize and begin to recover– in shelters and other gathering places, like disaster assistance centers.
Helping children and their caregivers reestablish a sense of safety and normalcy through our menu of disaster recovery and resilience–building programs. These programs also help children and caregivers build the skills to cope with their experiences.
Supporting organizations that children and families depend on, like child care and after–school programs, through small grants for recovery purposes.
Working with families living in temporary housing sites to create protective environments for children and improve access to services.

Service Temporary

Summary

The north coast of Japan was hit by a horrible tsunami after an 8.9 magnitude earthquake that occurred 80 miles offshore. This fund will support organizations providing relief and aid to victims.
What is the issue, problem, or challenge?

Tsunami waves caused major destruction in northern Japan. Trains have been shut down across the country and current estimates are 1000+ people have died. We are working with International Medical Corps, Save the Children, and other organizations on the ground to provide support. Our partners on the ground are working hard to provide immediate relief. We will post more details of the specific use of funds as soon as possible. All donors will get email updates on how their funds have been used.
How will this project solve this problem?

This project will disburse funds to organizations providing relief and emergency services to victims of the earthquake and tsunami. GlobalGiving is working with International Medical Corps, Save the Children, and other organizations on the ground.
Potential Long Term Impact

Major disasters always require a huge amount of international support to provide relief and long term recovery efforts. In the case of Japan, these initial funds will help survivors and victims get necessary services.
Project Message

"This tremor was unlike any I've experienced previously, and I've lived here for eight years. It was a sustained rolling that made it impossible to stand, almost like vertigo."
– Matt Alt, quoted in New York Times, an American writer and translator living in Japan

Community Based Survey: Centre d'hebergement off Beudet 61 suffers water shortages, food shortages, and various public health issues.

Location
North of Carrefour Beudet and Route Lillavois
Date
Mar 31 2010

Incident Report Description
Statistics on the IDP Camp:
Population: 902 Families quantity: 150 Children Quantity: 405 Babies quantity: 26 Pregnant women quantity: 8
Affected Houses: 100 Destroyed Houses: 10

Immediate Needs and Concerns:
1–Water shortage: drinking water is contaminated, causing vaginal infections
2–Infectious disease(sore eyes, vaginal infections, diarrhea, vomit, fever
3–Mental health: people are having difficulty communicating and are otherwise behaving oddly –– "acting a fool" in response to questions.
3–food shortages

Infrastructure:
Their is need for proper piping infrastructure for the population to water their gardens. The water pump needs to be fixed.
They think they should find a way to use solar energy to make the pump work, since fuel is expensive.

Survey administered by Quartier par Quartier.

HAITI HEALTH CLUSTER BULLETIN #14 - PAGE 9 – 1/14/11:

On 4th and 5th of January, JOTC (Joint Operations Task Center Plans Coordination) members visited the Acra IDP Camp. The UNPOL IDP Camp Unit and OCHA participated as well. The camp manager provided a tour throughout the camp to illustrate the impact of the clogged drainage ditches. It was noted that the majority of the garbage is not coming from the camp, but appears to be flowing down from Petionville and Delmas 40B. JOTC is coordinating with OCHA, IOM and Military Engineering to find a solution to this problem. The persistent cleaning of the ditches is not a permanent solution because the garbage will continue to clog the pipes at the entrance of the camp. The flooding from the result of the clogs has increased the risk of the spread of cholera in the camp. The participants also discussed the issue of eviction by the land owner.

HAITI HEALTH CLUSTER BULLETIN #14 - PAGE 4 1/14/11Added n

Save the Children
Two new CTUs were operational this week – one in Delande, Grande Riviere in Leogane with 30 –40 bed capacity. Save the Children started admitting cases since early this week. Another new CTU was set up in Belle Anse, South East Department, with 25–30 bed capacity and started admitting cases last week. Save the Children now supports seven CTUs, which are operational 24/7. Due to increase in number of cases and mortality in South East Department, it will scale–up hygiene promotion and increase the number of Oral Rehydration Posts (ORPs) in South East Department, with focus on Bainet, Belle Anse, Thiotte, Jacmel town, and Grand Gosier communes. The number of new admissions has decreased in Gaston Margron and Delmas this week. Save the Children is supporting cholera response in Dessalines, Maissade, South East Department (Jacmel, Baniet, Belle Anse, Thiotte, Grand Gosier), Leogane, Caffeour, and Delmas.

FROM RELIEF WEB:

Haiti's children at risk
Source: Save the Children
Date: 04 Nov 2010

We're launching a new appeal as Haiti's children face the double threat of an approaching tropical storm and a growing cholera epidemic.

The lives of tens of thousands of children — already at risk from the growing cholera epidemic that hit Haiti last week — are now facing the threat of a major tropical storm heading for the island.

Impending double disaster

Save the Children is launching a (US) $2 million appeal to respond to the impending double disaster — delivering emergency supplies and increasing health and sanitation work with a special focus on hand washing promotion and building diarrhoea treatment centres.

Tropical storm Tomas, which experts think will bring extremely high winds when it reaches Haiti on Friday, could cause horrific devastation in hundreds of temporary camps. Over a million people are already living in camps under flimsy tarpaulin shelters after the earthquake.

The storm has the potential to rip up tents and flood the camps, destroying possessions and leaving families exposed and homeless once again. There will be huge danger from flying debris and peoples' homes could be overwhelmed with sewage and rubbish by the rains. Landslides caused by the flooding could add to the risks.

Save the Children is also warning that the chaos caused by the storm will make conditions in Port–au–Prince even more conducive to the spread of the deadly cholera bacteria, which has already killed over 350 people in the last two weeks.

As well as the unhygienic conditions the storm will cause, families have been advised to move from the camps to find shelter with relations or in safe buildings. This means there will be significant movement of people between areas, increasing the risk that cholera will spread faster and to more locations across the country.

"The humanitarian crisis in Haiti is already one of the worst in the world, and this double disaster could push it to breaking point," said Gary Shaye, Country Director of Save the Children in Haiti. "Once again we have to increase our response — and increase it fast — otherwise children could die."

"There are more than half a million incredibly vulnerable children living in the camps in Haiti. They have already had to deal with the fear of losing their homes and members of their families. Now the most vulnerable children in this country could be facing those fears once again."

Storm could cause cholera to spread faster and wider

"Equally terrifying is the high likelihood that this storm will cause cholera to spread faster and wider. This water–borne bacteria can kill a small child within hours, and if the disease reaches the densely populated city of Port–au–Prince, where most of the displaced families are living, we're looking at a wide–spread disaster that would threaten the lives of even more children in this country."

We are working in the camps in Port–au–Prince and also in two of the areas that could be worst hit by the hurricane – Léogâne, the epicentre of the earthquake and Jacmel on the south coast.

FROM THE SITE 10/28/10:

Save the Children is working urgently to help prevent the spread of deadly and highly–contagious cholera in Haiti. We are teaching families about proper hand washing, boiling water and other ways to protect themselves and their children. We are stockpiling medicines at health centers should the outbreak spread. And we are working with the UN to protect families living in squalid camps after this year's earthquake.

HEALTH CLUSTER DETAILS 3/8/10:

One Month After Major Quake, Save the Children Reports Ongoing Crises for Haitian Children

Save the Children Is Providing Food, Water and Essentials to About 300,000 Children and Families

PORT–AU–PRINCE (Feb. 9, 2010) — One month after Haiti experienced the worst natural disaster in its history, Save the Children has reached nearly 300,000 children and adults in the earthquake impact zone.

Since the early hours after the disaster, the international humanitarian agency has been providing emergency assistance to save lives, alleviate suffering and support the recovery and protection of Haitian children and families. "The majority of Haitian children were vulnerable before this disaster and now, a month after the earthquake, their health, well–being and future are at increased risk. Their families are caught up in a daily struggle to meet basic needs and rebuild their lives," said Lee Nelson, Save the Children's country director in Haiti.

"We are moving quickly to provide immediate aid to thousands of families, including providing food, water, household items, medicines and medical care, while we also implement programs to protect children and get them back to school as soon as possible."

An Estimated 1.5 Million Children Affected by Earthquake

The January 12 earthquake affected 3 million people, more than half of them children. The extensive damage wrought by the 7–magnitude quake forced families into the street and into temporary encampments with little but the clothes on their backs. Today, living among the rubble, they struggle to meet their shelter, health, nutrition and other day–to–day needs as they begin to regain their livelihoods and reconstruct their homes.

"This is a wide–scale disaster that affected all aspects of society, and it will take years to for Haiti's families and cities to recover," said Annie Foster, Save the Children's team leader for the emergency. "Haitians are very resilient, but it is going to take serious and sustained assistance to help them build back and ensure a better future for their children."

Adding urgency to the relief effort, the rainy season is expected to begin in mid–March or early April. Even under normal circumstances, poor drainage and sanitation infrastructure causes problems for the population. This is expected to be significantly exacerbated by displacement and clogging of drainage channels with rubble from the earthquake.

To date, Save the Children's child protection programs have benefitted more than 15,000 children through 18 mobile child–friendly spaces in Port–au–Prince and Jacmel. In conjunction with UNICEF, the International Rescue Committee and the Red Cross, the organization is registering children at hospitals and in camps so as to trace their families and reunite them with loved ones.

Save the Children's 14 mobile health teams have seen 10,630 patients at 45 locations in Port–au–Prince, Leogane and Jacmel. In addition, the organization has distributed food to more than 120,000 people, including 72,000 children. The agency also has provided clean water to more than 59,000 people; latrines for 7,800 people; and essential items such as blankets, hygiene kits, and plastic sheeting to some 48,000 people.

Save the Children, which has worked in Haiti since 1978 and currently has more than 300 staff in the country, plans to reach 800,000 people, including 470,000 children, through its emergency response. At the same time, the agency is continuing to support children through education, nutrition and other programs, where possible.

Eletter 1/15/10:

Save the Children staff –– in rubble–strewn Port–au–Prince Haiti –– are estimating that up to two million children have been directly affected by Tuesday's massive earthquake.

If you've given generously to Save the Children's relief, you have my deepest gratitude. As the extent of the disaster in Haiti unfolds, donations are greatly needed to allow Save the Children to provide urgently needed response. Medical supplies are being delivered to 14 area hospitals and kits of badly needed supplies have arrived in the stricken city and will be quickly distributed. More international Save the Children relief experts are arriving in Port–au–Prince to take part in lifesaving efforts for children.

Hour by hour, our response grows. But untold numbers of children are in grave danger because they have little or no shelter or access to medical care. They also face risks of diseases, being separated from their families and exploited.

It costs us as little as $25 to provide a Hygiene Kit which includes basic items such as rubbing alcohol, soap, toilet tissue, a body towel, sanitary napkins and a toothbrush/toothpaste. For as little $35 we can provide a Shelter Kit that could provide things like a blanket, family mat, mosquito net, a flashlight, Jerry Can, plastic pail and rubber slippers. We are able to set up a Child Friendly Space for as little as $350 to begin to address the unique needs of children during crisis.

These are just examples of how the donations we receive will be spent. We are assessing the situation and will determine where the need is greatest. Know that your money will be used to do the most good for the children and families in Haiti.

It's been less than 72 hours since the catastrophe, and Save the Children is already planning for a five–year, "build back better" commitment hat will keep us by the side of Haitian children and families throughout the very painful months and years that lie ahead.

Eletter 1/14/10:

Our staff in Haiti is working around the clock to mobilize relief. The first kits filled with vital hygiene and household supplies have been assembled in our Dominican Republic office for fast transport to Port–au–Prince today. These are just the very first activities in what Save the Children knows will be a massive relief and recovery effort.

As an ambassador for children in their hour of need, you can help spread the word that time is critical and every gift for Save the Children's relief will be put to work immediately so that girls and boys affected by Haiti's largest disaster in over 200 years can begin to hope.

Major Earthquake Hits Haiti, Save the Children Staff Working On the Ground

WESTPORT, Conn. (Jan. 12, 2010) — Save the Children is verifying the safety of staff just hours after a major 7.0–magnitude earthquake struck Haiti, near the capital city of Port–au–Prince.

Houses are down in the area surrounding the Save the Children office, which was also damaged in the quake, according to Ian Rodgers, the agency's Emergency Response Advisor, who is currently in Port–au–Prince.

An estimated 1.8 million residents were violently shaken by the earthquake and aftershocks affecting the densely populated areas near Port–au–Prince.

Save the Children has worked in Haiti since 1985, primarily in the capital city of Port–au–Prince and the Central Plateau region, providing health, education, protection and food security programs to vulnerable children.

Right now, Save the Children is assessing staff and program safety, which will be complicated by the onset of evening. Employees who were in the office at the time are uninjured, though about half of program staff were elsewhere. The agency plans to deploy emergency teams and begin relief efforts soon.

To provide monetary assistance for Haiti through Save The Children, go to:

https://secure.savethechildren.org/01/childrens_emergency_fund?source=sp_dnbutton_pg

If you have any donation issues contact:

Phone: 1–800–728–3843 or 1–203–221–4030, Monday – Friday, 8 am – 5 pm EST
Email: twebster @savechildren.org

Save the Children has served the needs of some of Haiti's poorest children and families since 1985. Today, through advocacy, by reinforcing government social services and supporting community–based development programs in protection, education, health, food security, livelihoods and humanitarian relief, we are improving the lives of some 425,000 children and adults in urban and rural communities in six provinces and 33 districts. To better serve the great needs of children and best use the vital resources of our donors, Save the Children recently merged programs and activities with other members of the International Save the Children Alliance who also have programs in Haiti.

Challenges for Children

Of all the nations in the Western Hemisphere, none faces greater challenges to improve the lives of its children than Haiti. In addition to its poor development indicators, Haiti is the country most affected by HIV/AIDS outside of sub–Saharan Africa, which aggravates the well–being of children whose health is already compromised by poverty and inadequate access to basic health care.

Protecting Gonaives, Haiti from Future Flooding

Source: CHF International
Date: 01 Nov 2010

When the hurricanes and tropical storms hit Haiti in 2004 and 2008, one of the most affected cities was Gonaives (170 kilometers north of Port–au–Prince). With funding from USAID, CHF International has been implementing projects to help protect the city from future catastrophes. The program focuses on improving drainage and flood control within the city of Gonaives as well as in the surrounding areas. Projects include constructing drains and canals, stone terracing and reforestation to prevent soil erosion, and expanding catchment systems. The program also provides short–term employment for local residents who participate in the construction efforts.

FROM RELIEF WEB:

Innovative CHF Program Recycles Haitian Earthquake Rubble for use in Recovery Effort
Source: CHF International
Date: 28 Oct 2010

October 28, 2010—CHF has launched an innovative new program in Haiti that is turning buildings destroyed by the January 12 earthquake into valuable sand and gravel that is being used in the recovery effort.

CHF's program, called CRUSH (Creating Rubble Recycling Solutions for Haiti), was launched in Petit–Goave on October 18 and is intended to eventually expand to several sections of the earthquake–affected area.

The CRUSH program is currently using 10 portable rock crushers supported by a total of 284 workers to process rubble at 9 sites in Petit–Goave. The portable crushers were built by Red Rhino Crushers in the United Kingdom, representatives of which came to Haiti in mid–October to train CHF local staff in how to use and maintain the machines.

CRUSH is unique in that it is the only large–scale program in Haiti that is actively converting rubble into material that can be used on–site to improve communities affected by the earthquake. Among other uses, CHF has been using sand and gravel to construct cement platforms for its shelter program. Additionally, CHF is accumulating gravel for use in critical road projects identified in concert with the local government, and will soon be delivering gravel to serve as floors of schools still operating out of tents.

The CRUSH program is also unique in that it dramatically reduces the transportation costs and bureaucratic obstacles associated with other rubble removal programs in Haiti. Suitable, approved rubble dump sites in virtually all parts of Haiti are either of insufficient size or are so far away from affected areas that they are cost prohibitive both in terms of time required to access them as well as money required to fuel the trucks. Processing the rubble on–site is much cheaper overall and will allow CHF to operate much more efficiently than other rubble removal programs in Haiti.

In less than two weeks, CHF's crushers have already processed nearly 1,000 cubic meters of rubble to produce an equivalent amount of sand and gravel.

Petit–Goave Mayor Marc Roland Justal was complimentary of CHF's program. "I love the new rubble recycling program that CHF is implementing here," said Justal as he toured one of CHF's recycling sites. The mayor continued, "Instead of just throwing rubble into the ocean or rivers, we can dispose of it on site and for useful purposes." The mayor promised to collaborate with CHF to identify the best possible uses for the processed rubble, in particular key dirt roads that would be reinforced by adding a layer of gravel.

The CRUSH program is paid for by USAID and will continue through February 2011.

FROM RELIEF WEB:

CHF Continues Reforestation and Erosion Control Efforts in the Rural Mountains of Haiti

Source: CHF International

Date: 16 Oct 2010

October 16, 2010—CHF is completing the third week of a three–month soil conservation and reforestation project in Marre Danjour, a rural mountain community high above downtown Petit–Goave.

Only 5 kilometers south of downtown Petit–Goave, the farming community of 5,000 is also the site of a crucial watershed – it hangs directly over the Riviere La Digue, the largest river in the area, and one that constantly threatens the city center during the rainy season. While the riverbed marking the lower boundary of the project site lies 300 meters (1,000 feet) above sea level, the upper reaches of the watershed climb up to more than 1,000 meters (3,300 feet). The area is the origin point of much flooding in the area, so CHF is installing terracing and vegetation that will mitigate against topsoil erosion as well as slow the velocity of water runoff.

CHF's work at Marre Danjour covers 50 hectares of land and will, when complete, account for 10 kilometers of stone terracing. Additionally, CHF will use the terraces to plant 2,000 fruit saplings, 2,000 hardwood saplings, 1,000 bamboo shoots, and 75,000 seedlings of various erosion–mitigating grasses and tubers.

CHF currently employs 132 residents of Marre Danjour to work on the project, each of whom receives at least US$5 per day for their effort. In addition to stabilizing the topsoil and preventing catastrophic downstream flooding, workers will take home a combined US$42,000 in salaries alone, a major stimulus for the economy of this rural community.

Since launching work in Petit–Goave in 2007, CHF has completed soil conservation and reforestation projects that have protected 250 hectares of land, all of it in rural mountains and foothills.

CHF's project at Marre Danjour is paid for by a generous private donation from the Brickman Group, a U.S.–based landscaping specialist. Established in 1939, Brickman is a leader in the commercial landscape industry with over 160 branches serving 29 states in the US. For further information, please visit their web site at www.brickmangroup.com.

CASH FOR WORK PROGRAM
http://www.chfinternational.org/node/34048

CHF–Haiti Blog Update – Feb. 17, 2010: CHF Cash for Work Teams in Petit Goave Receive First Payroll

From the website: January 29, 2010 - CHF International (CHF) began its second phase of cleanup in Haiti yesterday by partnering with Haitian communities to clear essential routes through Port au Prince.

Nine “High Impact Labor Teams”, each consisting of 12 people including a supervisor, fanned out across the municipality of Delmas to clean up key routes through the area. CHF provided teams with hats, gloves, t–shirts, wheelbarrows, boots, pickaxes, shovels, sledgehammers and hacksaws to remove rubble from roads and sites of destroyed buildings. This complements CHF’s ongoing work with CHF–trained Haitian Caterpillar operators who have been clearing large amounts of debris from roads and Ministry buildings since the beginning of this week.

Working with the local mayors, who recruit community members, each team member works from 7:00am–1:30pm daily and is paid 200 Gourdes per day for their work - more than twice the average daily income in Haiti per day and equivalent to $5.00 US dollars. The objective of the work is not only essential clean up, but also to get people back to work in a constructive way, ensure they have income to provide for their family, and begin to revitalize the Haitian economy.

“We are hoping to employ up to 3,500 people within the next few months throughout Port–au–Prince for the clean–up,” says Alberto Wilde, CHF’s Country Director in Haiti. “Cash for work programs will be essential for kick–starting the Haitian economy after the earthquake and for helping families, many of whom have lost everything.”

PROJECT SUPPORTED:

The Project Support Psycho–social will be realized by STADL in partnership with SAVE THE CHILDREN in order to ameliorate the well–being of the children by offering a psycho–social support in a well–known environment called “Friendly Space for Children”.

This program will include newborn to 17 year–old children of our community and the surrounding areas who have been traumatized or have a psychological need after the event of January 12th, 2010. In effect, according to analysis done by the local government and the civil society, which we are a part of, we have come to understand that the impact of the trauma might cause mental retardation for the children mentioned above and the general population as a whole.

Therefore, such a project can play an important role in the Haitian community to identify and address concerns about child protection. This is why we will establish a whole field of activity over a period of sixty (60) days for 4 hours from Monday to Friday with them. For example, we will have activities such as: Creative, imaginative, physical, communicative and manipulative that will allow them to grow, learn, play, become strong and resilient.

In addition, it will also enable many people to find an income generating activity by participating in the project. It is in this context that we manage to write this project for a period of three (3) months, in order for us to contribute and make a difference in the collective construction and psycho–social development of the children and Haitian youth, as a way to address the mental health issues that will be with us for years to come.

Save The Children Japan site: http://www.savechildren.or.jp/

Save the Children opens first child–friendly space in Sendai, Japan

SENDAI, Japan. (March 16, 2011) — Save the Children has opened the first child–friendly space in Sendai, Japan, less than five days after the city was hit by a devastating earthquake and tsunami.

The space opened Wednesday in a primary school currently being used as an evacuation center. Supervised by Save the Children staff, it contains toys and games aimed at 5–12 year olds affected by the disaster.

Child–friendly spaces are protective environments where children can gather to play and talk about their experiences with supervisors and each other, allowing them to establish a routine in a chaotic situation.

Play and routine are recognized as important ways for children to overcome traumatic experiences.

The supervised play areas also give parents time to concentrate on finding food, search for missing relatives and meet other pressing needs in the aftermath of a disaster.

Steve McDonald, Save the Children's team leader in Sendai said: "Children we've met are having nightmares and are terrified of another tsunami. It's essential that we do everything to help them come to terms with what's happened to them, and that's where the child–friendly spaces and other activities come in."

"Parents in Sendai can now leave their children in a safe place as they start putting their lives back together. This will be the first in a network of child friendly spaces across the affected area."

Save the Children is planning on setting up more child–friendly spaces over the coming days to complement the Japanese government–led relief effort helping the affected population.

Up to 100,000 children were displaced by last week's earthquake, which triggered devastating tsunamis and damaged nuclear power facilities on Japan's east coast.

The displaced population are living in some 2,500 evacuation centers set up across northeastern Japan in recent days.

Save the Children's relief operation is being run from Tokyo, with an operational base in Sendai, the closest city to the earthquake's epicenter.

Save the Children Deploys Emergency Response Teams to Tsunami–Affected Areas in Japan

WESTPORT, Conn. (March 13, 2011) –

Save the Children has sent emergency response teams to assess the needs of children and their families in the worst affected tsunami areas between Miyagi Prefecature and Tokyo in Japan.

"We are extremely concerned for children in tsunami–affected areas that are at risk because of a triple whammy of life–threatening incidents including an earthquake, tsunami and now an incident at a nuclear reactor," Stephen McDonald, Save the Children's team leader in Japan said.

The Save the Children teams will be within 80 miles of the nuclear reactor at Fukushima where there has been an explosion. In the area around the reactor, the authorities have set up a 12 mile radius exclusion zone, and have reported that up 170,000 people have been evacuated.

Evacuations centers are being established in the area and along the tsunami–affected coast to accommodate people, and it will be important that children's needs are met while parents register for help and assistance from authorities.

"We're looking to set up child–friendly spaces in the worst affected areas. These spaces provide children with an opportunity to play safely with other children while freeing up their parents to work on the recovery," added McDonald.

Save the Children has been operating in Japan for 25 years.

Donate now to the Japan Earthquake Tsunami Children in Emergency Fund to support Save the Children's relief efforts and responses to children's ongoing and urgent needs.

FROM THE SITE:

Save the Children Mobilizes Response to Massive Japan Earthquake, Tsunamis

How to Help and Donate to Japan Earthquake Tsunami Relief Fund: Save the Children is mounting disaster relief efforts for Japanese survivors. Support us and learn about our response.TOKYO (March 11, 2011) — A massive earthquake has hit Japan triggering a deadly tsunami and raising warnings of more tsunamis across the Pacific basin. Japanese media report that the death toll is rising and hundreds are missing in the aftermath of the disaster. It is the worst earthquake to hit Japan in at least a century and has sparked dozens of fires, including in more than 30 buildings in Tokyo and an oil refinery near the city.

Save the Children's Eiichi Sadamatsu in central Toyko said, "This is a major natural disaster that has caused large scale damage along Japan's east coast. We are extremely concerned for the welfare of children and their families who have been affected by the disaster. We stand ready to meet the needs of children who are always the most vulnerable in a disaster."

In Japan, flooding has caused people to scramble for higher ground on the island archipelago nation as houses and cars have been swept away. Tsunami warnings have been issued across the Pacific, including for Hawaii, California and Canada.

Save the Children is mobilizing its global resources to respond to the needs of children and families affected by the earthquake and its aftermath, and an international emergency team has been dispatched to assist staff in Japan. The humanitarian agency has been in Japan for 25 years, is in many of the other Pacific nations that could soon be hit by tsunamis, and was a major responder to the 2004 Indian Ocean tsunami that killed 225,000 people.

Donors may make charitable contributions to our Japan Children in Emergency Fund during this emerging crisis. Give now.

Save the Children is the leading, independent organization that creates lasting change for children in need in the United States and around the world. Follow us on Twitter and Facebook.

FROM RELIEF WEB:

Save the Children standing by to respond to children's needs in Japan tsunami
Source: Save the Children
Date: 11 Mar 2011

Save the Children is ready to meet the needs of children and their families affected by the tsunami in Japan that hit the nation's east coast at 1500 local time on Friday March 11.

Save the Children's Eiichi Sadamatsu in central Toyko said, "This is a major natural disaster that has caused large scale damage along Japan's east coast. We are extremely concerned for the welfare of children and their families who have been affected by the disaster. We stand ready to meet the needs of children who are always the most vulnerable in a disaster."

For more information, or to arrange interviews with staff in Japan, please contact Andrew Wander in Save the Children's media team on +44 (0)207 324 4959, +44 (0)7827 369757, or out of hours on +44 (0)7831 650 409.

http://edition.cnn.com/2011/WORLD/asiapcf/03/14/iyw.howtohelp.japan/index.html

Save the Children is sending an emergency team to assist its staff in Japan. Donations to the group's Children's Emergency Fund will help preserve the welfare of young ones, who "are always the most vulnerable in a disaster," Eiichi Sadamatsu in central Tokyo said in a statement. Text "JAPAN" to 20222 to donate $10 to Save the Children for Japan relief.

Project Fleur-de-lis (A Program of Mercy Family Center)

Walk-in Resource · Open

Faith-Based, Non-Profit, Community Cooperative
110 Veterans Memorial Blvd., Suite 425, Metairie, LA 70005

Phone (504) 310-6956
Web www.project-fleur-de-lis.org
Eligibility Impacted by Hurricane Katrina
Service Temporary

Project Fleur-de-lis is a cooperative effort among Catholic schools, social services and health care providers to reach out to students, parents, and teachers in Catholic schools. The program helps address emotional and behavioral issues related to Hurricane Katrina. Services include counseling, education, and prevention.

Goals
Project Fleur-de-lis™ core services aim to:
• address symptoms of trauma at the earliest stage before they interfere with a child's educational, social or emotional functioning;
• heal school communities through multidisciplinary programing that utilizes best practice intentions.
• remain integrated in school communities to provide ongoing mental health care.

Services
Project Fleur-de-lis™ provides specialized training and professional support for school-based counselors. To give the highest level of care, counselors use a cutting-edge electronic records system to track students' progress and connect with participating physicians, psychologists and therapists.

Project Fleur-de-lis™ facilitates the following comprehensive services based on need:
For Children:
• School-wide intervention programs
• Classroom-based intervention programs
• In-school counseling
• Assessment, evaluation and referral by professional counselors
• Individual and family counseling

For Parents and Teachers:
• Educational and healing workshops
• Wrap-around services such as food, clothing and financial assistance

Interventions
Project Fleur-de-lis™ employs the following trauma informed interventions within its tiered model of care: Classroom-Camp-Community-Culture Based Intervention (Macy, Macy, Gross & Brighton, 2006) Cognitive Behavioral Intervention for Trauma in Schools (CBITS) (Jaycox, 2003), and Trauma Focused - Cognitive Behavioral Therapy (Cohen, Mannarino & Deblinger, 2006).

Three Tiers of Care
Project Fleur–de–lis™ is designed to help traumatized students via a "Stepped Trauma Pathway" that includes the interventions listed above. Project Fleur–de–lis™ is designed to also identify and address all other psychological or psychoeducational problems that occur in children and adolescents. Studies show that 80 – 90% of those touched will be helped in the first tier of care.

Services offered: Assistance, How to Find, Emergency Food Assistance; Case Management, Hurricane Survivors; Case Management, * (Providers of ANY Type of Case Management); Clothing, All Sizes, New or Gently Used * (ANY/ALL Types) ; Counseling, Childrens Counseling ; Counseling, Crisis Intervention Counseling; Counseling (Free or Sliding Scale) * (ANY/ALL Types of Counseling); Counseling, Spiritual; Financial Assistance, Emergency Financial Assistance; Financial Assistance, ** Financial Assistance (ANY/ALL Types); Services, Family, Children * (ANY/ALL Types of Childrens Services); Services, Family, General Family Assistance

Save the Children is the leading independent organization creating real and lasting change for children in need in the United States and around the world. It is a member of the International Save the Children Alliance, comprising 28 national Save the Children organizations working in more than 110 countries to ensure the well–being of children.

The history of Save the Children is a story of positive change and people — millions of people in thousands of communities around the globe — working together to create opportunities for the world's children to live safe, healthy and fulfilling lives. In January 1932 in a small room in New York City, a group of concerned citizens gathered to respond to the needs of the proud people of Appalachia hard hit by the Great Depression.

The inspiration and vision for Save the Children came in part from the international children's rights movement begun in England in 1919 by Eglantyne Jebb, founder of the British Save the Children Fund. From this early effort in the hills and hollows of Harlan County, Kentucky grew a self–help philosophy and practice still at work today in more than 45 countries — providing communities with a hand up, not a handout.

This approach — working with families to define and solve the problems their children and communities face and utilizing a broad array of strategies to ensure self–sufficiency is the cornerstone of all Save the Children's programs. Through the decades, we have evolved into a leading international relief and development organization. Countless events and achievements have shaped the development of our organization and helped change the lives of the children we serve.

MS

Save The Children – 4/11 Tornadoes

Donor · Open

Various, MS
Service Temporary

More than 200 deadly tornadoes tore through the Southeast United States. From Tuscaloosa to small towns such as Phil Campbell, families have been devastated by tragedy.

For the thousands of children and families left in the wake of the destruction—homes demolished, schools turned to rubble, entire communities blown away—the recovery is just beginning. Many children arrived at shelters barefoot, having literally run for their lives.

Save the Children is on the ground in Alabama and Mississippi in the hardest hit regions. In the early aftermath of the storm, we've helped more than 4,400 children. Among other things, we are:

* distributing truckloads of shoes, diapers, portable cribs and other child–specific essentials
* establishing Child–Friendly Spaces where kids can just be kids—and begin the recovery process
* providing psychosocial training in anticipation of the impact this disaster will have on children

(5/29/11 LTel: Site states "check for updates" but there does not appear to have been one in a long while so not certain whether they are still actively in this region doing the above)

Services offered: Baby, Baby Furniture, Large (i.e. cribs); Diapers * (ANY/ALL Types/Sizes); Shelter, Child Friendly/Safe Spaces / Centers in a Shelter / Camp Setting; Shoes, NEW

2011 Huricane Irene –
http://www.nyvoad.org/disaster_updates

old notes:
From the NYVOAD Member Directory:

Activation of NYSVOAD

NYSVOAD recognizes the independence of each of its member organizations and does not dictate agency response. However, NYSVOAD endeavors to serve as a catalyst of cooperation and communication between each of its members.

In the event of a disaster, any member agency may request initiation of NYSVOAD response coordination. Response coordination may be accomplished through conference calls, local meetings, or electronic communications.

It is important to maintain the regularly scheduled NYSVOAD communications (i.e. monthly conference calls, executive meetings) during the disaster timeframe.
Activation of any one member organization may be done directly by that organization or may be requested through the leadership of the NYSVOAD.

Activation through NYSVOAD will ensure that all member organizations are informed of the situation. Once activated, NYSVOAD will encourage a cooperative and coordinated voluntary response.

Disaster Coordination Plan

The purpose of the NYSVOAD is to bring together organizations active in disaster services to foster more effective preparedness, response and disaster recovery in New York State. Direct service to impacted communities is provided by the member agencies of the NYSVOAD, not by the NYSVOAD itself. NYSVOAD is a coordinating agency whose goal is to enhance planning, training and communications between organizations active in disaster mitigation, response and recovery. With this in mind, NYSVOAD shall support the response to level 3 & 4 disasters, as appropriate, in the following manner:

I. NYSVOAD Officer (or designee) will report to the State Emergency Operations Center and become the liaison for all VOAD members not then represented in the EOC, and will call and facilitate a NYSVOAD meeting or conference call as soon as practical and needed to do so.

II. NYSVOAD EOC Liaison will meet with the State Donation Coordination Manager (or designee), the State Director of Human Services and FEMA VAL (Voluntary Agency Liaison), and will convene meetings or conference calls with VOAD member agencies to identify and assist with immediate needs, and coordinate with member agencies on their planned responses.

III. NYSVOAD Officer (or designee) will provide updated reports of voluntary agency activities to the New York State Office of Emergency Management (State OEM) at regular intervals or when necessitated by changes in service or location, and will provide member agencies with information regarding the state response. The Liaison will also communicate any issues or concerns that member agencies are reporting in the field to the state.

IV. NYSVOAD Executive Committee will facilitate the development of Long Term Recovery Committee(s) as appropriate, in coordination with the State OEM Director of Human Services and the FEMA VAL.

V. At the close of an operation, NYSVOAD Chairperson or Vice–Chair will request a consolidated report from each voluntary organization assisting in disaster response. This report is to include recommendations that will enable NYSVOAD to encourage and implement corrective actions that will enhance future response and recovery operations. Reports will be brought as an agenda item at the next NYSVOAD meeting following the disaster.

NYSVOAD shall support the response to disasters of a level two or less, as appropriate, in the following manner:

I. NYSVOAD Officer (or Designee) will convene a conference call with member agencies and government partners to evaluate the nature and extent of damages. Under special circumstances the VOAD Liaison may be requested to support EOC operations.

II. NYSVOAD Member agencies will support local response agencies as appropriate.

III. NYSVOAD Executive Committee will facilitate the development of Long Term Recovery Committee(s) as appropriate, in coordination with the State OEM Director of Human Services.

IV. At the close of an operation, NYSVOAD Chairperson or Vice–Chair will request a consolidated report from each voluntary organization assisting in disaster response. This report is to include recommendations that will enable NYSVOAD to encourage and implement corrective actions that will enhance future response and recovery operations. Reports will be brought as an agenda item at the next NYSVOAD meeting following the disaster.

NOTE: The primary goal of the NYSVOAD and its member organizations is to work in partnership and support of local VOAD's, disaster response networks, local human services councils and other response organizations, and when required act as a conduit to national resources. It is not the role of the NYSVOAD nor its member organizations to replace local networks or their services.

From RELIEF WEB:

Pakistan: Situation Report, 11 August 2010
Source: Logistics Cluster
Date: 11 Aug 2010
Pakistan – Monsoon Flooding

Highlights

– The Logistics Cluster is in the process of establishing logistics hubs in Peshawar, KPK Province, Multan, Punjab Province and Sukkur Sindh Province. Cluster Officers are being deployed to each of these hubs to augment the response capacity.

– All Logistics Cluster participants will have access to temporary storage facilities; all interested organisations should submit a Temporary Storage Request form that is available on the Logistics Cluster website (http://www.logcluster.org/ops/pak09a/temporary–storage–request).

Situation Update

– Torrential monsoon rains have lashed Pakistan for two weeks, triggering catastrophic flooding that the UN states has affected 14 million people; of which almost 6 million are in need of assistance. Flood waters from the country's North West have now moved south and reached upper parts of the Sindh province, where latest estimates from the Provincial Disaster Management Authority place the number of affected people at 1.3 million, with 700,000 evacuated. In eight affected districts of the Punjab Province, the estimated figure of over 1.6 million people is likely to rise. In Baluchistan and Pakistan administered Kashmir (AJK) number of the affected currently stand at 300,000 and 120,000, respectively. The flood wave is now passing through Guddu and Sukkur barrages with the potential threat of the Sukkur Barrage overflowing, meaning Sindh will face as much devastation as that seen in KPK and Punjab Provinces.

Logistics Coordination

– KPK Province: The Logistics Cluster is liaising with the Government of Pakistan to coordinate requests from participants for air–lift operations for the distribution of relief supplies. The Cargo Request Form has been updated and is available on the Logistics Cluster website: (http://www.logcluster.org/ops/pak09a/cargo–movement–request).

– The Logistics Cluster has Mobile Storage Units (MSUs) on hand with 25 additional expected by the end of the week, the plan is to erect these in Peshawar. The MSUs will serve as a hub for temporary storage of humanitarian cargo.

– An LRT trained Logistics Cluster Officer will be deployed in Peshawar to augment the logistics and coordination needs for KPK by the end of the week.

– Punjab Province: The Logistics Cluster is establishing a logistics hub in Multan and has identified a Logistics Cluster Officer to be deployed to initiate coordination activities. In addition storage facilities have been identified to augment capacity.

– Sukkur, Sindh Province: The Logistics Cluster is on the ground establishing a logistics hub and has deployed a dedicated Logistics Cluster Officer for this hub.

– An Information Management Officer has been identified and will be based in Islamabad.

– For security reasons, limited maps are being published on the Logistics Cluster website. For information on maps please contact us at Global.LogisticsCluster @WFP.org.

Air Operation

– KPK: Heli–lift operations based in Ghazi continue to deliver humanitarian supplies to Kalam in Upper Swat, having been resumed after several days of suspension due to the poor weather conditions. Two additional heli–lift operations have begun: 1) a Khwazakhela–based operation to support flood affected areas in Swat and 2) an Abbotobad–based operation to support flood affected areas in Kohistan.

Road Conditions

– Gilgit and Hunza remain inaccessible and access to Muzaffarabad is possible by road, but the Neelum and Jhelum valleys are inaccessible from Muzaffarabad. Punjab: Road from Mianwali to Multan has multiple bottlenecks where roads are damaged/flooded. IOM has suggested taking the following route from Islamabad to Multan: Islamabad–Pindi Bhattian– Chiniot–Jhang–Shorkot–Multan.

2010 Pakistan Humanitarian Response Plan:

http://oneresponse.info/Countries/Pakistan/publicdocuments/PHRP_PAKISTAN_2010.pdf

The Cluster approach was a key recommendation of the July 2005 Humanitarian Response Review (HRR). The clusters create a single framework for coordination in bringing together a variety of different actors, including international governmental organizations, national and international non-governmental organizations, government and the military, for regular coordination meetings. It was implemented during the response to the South Asia Earthquake in Pakistan for the first time. The UNDAC team, together with the Humanitarian Coordinator and the UN Country Team established a set of ten Clusters, covering the main relief work, in Islamabad. Clusters of particular relevance to the environmental experts included health, water/sanitation, and early recovery and reconstruction. Subsequently, field cluster sites were established in each of the main UN field presences, i.e.

Muzaffarabad, Bagh, Batagram and Mansehra, and were called Humanitarian Hubs. In response to that humanitarian emergency, the use of the following coordination structure was agreed upon national authorities and the humanitarian country team:

Clusters and Cluster Leads

* Agriculture (FAO)
* Camp Management (UNHCR)
* Community Restoration (UNDP)
* Education (UNICEF / Save the Children)
* Shelter and NFI (UNHCR)
* Food (WFP)
* Health (WHO)

ACTIVITIES:

HEALTH:

Medical camp. OPD, skin disease, cholera, gastro. Medicine.

Vulnerability being a reality of peoples' lives influenced Sungi's rights based development approach to include disaster management as one of the main elements and cross cutting theme. Sungi responded to a number of disasters including "South Asian Earthquake 2005" & "IDPs Crisis 2008–09", contributed significantly and added the learning in its institutional capacity of humanitarian response through its organized and trained community organizations.

In view of the disaster prone nature of Sungi's working areas and experience gained in this regard. Sungi is committed to provide humanitarian assistance to vulnerable sections of society and develop capacities of the marginalized women, men and children to mitigate and respond to disasters. Developing resilient communities is the main objective of Sungi's disaster management programme. Cascading effects of the natural and man–made disasters would be minimized by preparing communities to respond to emergencies as first responders and provide timely relief as disasters strike.

Disaster Management Programme has three thematic areas: Preparedness & Mitigation; Emergency Response; and Advocacy.

Sungi developed disaster management committees and emergency response teams in the most vulnerable areas, based on the vulnerability mapping. This is one of the tested sustainable models of community based disaster management.

Sungi is a member of HAP (Humanitarian Accountability Partnership) International. Sungi follows humanitarian standards in emergency response in addition to this Sungi is stepping forward for HAP certification by ensuring accountability principles in its work.

Sungi Development Foundation is currently working in different areas of Pakistan its offices are:

Pre–earthquake work recommended by ReliefWeb. In our experience, groups that are listed on ReliefWeb to this extent are worth supporting. Note the link below for Yemen puts MedGlobal in good company of other groups we've vetted. See the list below of

the different groups that MegGlobal is aligned with. However, we are a volunteer staff and we can you guarantee anything. Since we aren't perfect, we always recommend that people do their own research.

Communications Carolyn Shell, American Red Cross
Education & Training Linda Walker, Adventist Community Services
Sandra Ray, United Way of Greater Houston

The Texas Gulf Coast Regional (TGCR) VOAD is a consortium of recognized voluntary organizations active in disaster relief. Its mission is to foster more effective service to people affected by disasters. VOADs support and facilitate the delivery of disaster services by their members. They do not themselves deliver response and recovery services. Member organizations support the efforts of federal, state, and local agencies and governments.

TGCR VOAD bases its mission on these four values:

Cooperation. By this we mean that we need each other, that no member organization has all the answers for the challenges we face. We treat members as partners.

Communication. Here we mean the regular sharing of information about our member organizations—their capacities, accomplishments, and commitments. We try to maintain good channels for sharing

information, listen carefully to each other, and deal openly with concerns.

Coordination. We commit ourselves to work together and not competitively toward our goal of effective service to disaster victims. We seek to match services to need. Through planning and preparation, we equip our organizations to behave in a coordinated fashion in time of disaster.

Collaboration. We dedicate ourselves to work together to achieve specific goals and to undertake specific projects at disaster sites. We form partnerships during the disaster response.

Organizations wishing to coordinate their efforts with TGCR VOAD members are encouraged to register on the web site and add their organization to the list of VOAD members.

The Disasters Emergency Committee (DEC) Member Agencies
The Disasters Emergency Committee (DEC) is made up of 13 member agencies who provide humanitarian aid in times of disaster.

The 13 member agencies are:

* ActionAid
* Age UK
* British Red Cross
* CAFOD
* Care International UK
* Christian Aid
* Concern Worldwide
* Islamic Relief
* Merlin
* Oxfam
* Save the Children
* Tearfund
* World Vision

The agencies are the leading UK registered humanitarian charities that fulfil certain criteria. DEC agencies have the profile to ensure successful national appeals and expertise in the delivery and provision of aid.
Campaigns: ActionAid; American Red Cross; CARE–International; Christian Aid; Concern Worldwide; Islamic Relief; Merlin (Medical Emergency Relief International); OXFAM; Save The Children; World Vision
